INTRODUCING A DORMITORY DISCUSSION

AT THE present time the Corporation of the Institute and a special sub-committee of the Institute Committee are investigating the desirability of requiring all freshmen to live in the dormitories under the control of parents or relatives.

The question has been discussed formally by the Institute Committee, the Inter-fraternity Conference and in each of the separate fraternity houses. The meeting has brought up the breakfast, lunch, and dinner table and it is a topic that has inspired many a "hall session." A consideration of the question aside from the physical consideration of the problem itself is enough to convince one that the question of determining who lives in the dormitories and who lives in the undergraduate houses is one of the paramount ones which exist today.

Whether you are in favor of grouping of the first year men or not is a question for individual opinion, but no matter which side you are on, any action taken will entirely change the conditions and present educational standards.

At the present time we do not feel qualified to take a stand for or against it because there are arguments of weight to be said by each side and we found in a recent discussion that opinion of the editorial board was clearly split on the matter.

We have decided therefore that we would present points in favor of each side in an effort to stimulate undergraduate thought and to provide a forum for discussion of importance which we have overlooked, and that we hope that our presentation will lead to the development of a freshman body which we can publish in our Open Forum column. Today we present the first part of the argument as used against the proposed plan of requiring freshmen to live in the dormitories. The other side of the question, the contrary set of opinions which favors the adoption of a freshman dormitory resident rule.

REASONS WHY IT WOULD BE UNWISE TO REQUIRE FRESHMEN TO LIVE IN DORMORIES

ONE OF the strong points against the proposed plan is the actual example of the use of such a rule at Harvard. For the past few years that institution has had a compulsory freshman dormitory rule and it was expected that such a rule would result in the sad condition of the Crimsons undergraduate spirit. No such result, as we well know, has been forthcoming and as a matter of fact we are informed that the abolishment of the rule has been completely abandoned.

It has been stated that such a rule would develop a pre-school atmosphere in the freshman class and would seriously handicap the development of the individual student as a Hollywood "college" spirit has also been mentioned. We want to improve undergraduate activity, but do not want it to be pre-school. Such a rule would prevent the relatively small number of interested domitories to live either at home, in the dormitories or in fraternity houses.

Serious objection has been raised to the plan on the grounds that it will harm undergraduate activities because the freshmen will assume the "brown-bag" atmosphere which is at tribute to the dormitories and because they will have no one interested in meeting them individually and get them interested in the undergraduate activities.

Technology Polo Team Develops Into Horse-Mounted, Mallet Swingers

Club Members Organize Teams And Hold Practices At Riding School

After an early season, an evolution which was to be one of the most interesting this year has been that the polo club has become a horse-mounted mallet swing team. As a matter of fact, the members of the polo club are now going out to the Brookline Country Club and around Boston. It is expected that by the beginning of next term will have several hundred dollars worth of mallets, balls, and helmets at their disposal. At present the sport has been popular and the members are said to be practicing the game. Club are now going out to the Brookline Country Club and around Boston.
