

SPECIAL FEATURES ARE PLANNED FOR OPEN HOUSE NIGHT

Expect to Include Sports, Music
And Radio Exhibitions in
List of Attractions

B. S. KELSEY IS CHAIRMAN

Arrangements Will Be Made
By Nine Sub-Committees
This Year

According to a recent announcement, Open House Night will be under the control of nine different sub-committees working under the direction of the Executive and Finance Committee. It is believed that a better program can be arranged by having a committee to take care of the different phases of Open House Night.

There will be several special features this year. The Musical Clubs will entertain the outside students of the high schools with some selections, as will the R. O. T. C. band, and the Chemical Warfare unit will put on an exhibit.

It is being planned to have some special features in the Walker Gym, such as wrestling, boxing and fencing, as well as talks by the different coaches of the student activities. Professor Bowles will co-operate to provide a radio or similar entertainment. The main idea of these special features is to give those attending an idea of the outside activities here at Technology. It is expected in this way to show that Technology is not entirely a grind but as many varied extra-curricular activities.

Sub-Committees Are in Charge

These sub-committees will take complete charge of all duties coming within the scope of their responsibility as outlined by the Executive Committee. The latter consists of four student members and three staff members. The student members are: Benjamin Kelsey '28, chairman, William M. all '28, vice-chairman, William H. Woods '28, secretary, and Ralph T. Pe '28, president of the Institute committee. These members will co-operate with the following members of the staff: Colonel F. L. Locke '86, chairman, Professor R. H. Smith, vice-chairman, and Bursar H. S. Ford.

Following is a list of the committees: Co-operating Committee, President's Reception Committee, which is to be a feature this year, Outside Arrangements Committee, Interior Arrangements Committee, Publicity Committee, Invitations, Program, and Entering Committee, Walker Memorial Student Activities Committee, Special Features Committee, and Women's Committee.

The Co-operating Committee will establish contact with the heads of the different departments and will make arrangements to have the best possible exhibits.

Any suggestions concerning Open House from the heads of the departments, staffs, alumni and student body are invited and encouraged.

DUFFIELD TO SPEAK ABOUT VENTILATION

Delta Omega Sponsors Talk
By Commission Secretary

Ventilation and its effect on the health of school children will be the subject of a lecture by Thomas J. Duffield '14, Executive Secretary of the New York Commission on Ventilation, at the Institute at 4 o'clock on Friday afternoon.

The lecture is the first given under the auspices of Delta Omega, the honorary society of the public health profession, and is sponsored by the biology chapter of the society in the Department of Biology and Public Health.

Duffield will speak on "The Present Status of Ventilation," a subject which he has carried on long research for the New York Commission on Ventilation. Besides his work for the Commission, he has also served as health consultant to the League of Nations.

As a result of his studies in schools, Duffield has found a very close relation between proper ventilation, the health of the child. School principals, physicians and hospital officials have been invited to the lecture, which is open to the public.

84 PROM SIGNUPS SOLD IN TWO DAYS

According to the reports turned in last night by the members of the Junior Prom Committee, 84 signups have been sold for the Junior Prom so far. The sale will continue until Friday night, after which signups will not be obtainable except by stags.

Thursday and Friday afternoons the committee will have a representative at the Rogers building to sign up the men there. The signups cost \$4 and are to be redeemed for \$8 the first week in April.

New Haven R. R. President Will Address Civils

Major C. E. Smith Is Designer
Of St. Louis' \$40,000,000
Transit Plan

Major Charles E. Smith '00, vice-president of the New York, New Haven, and Hartford Railroad will address the Civil Engineering Society in the East Lounge at 7:00 o'clock this evening, upon "Developments of Railroad Engineering."

Major Smith is the head of the firm of C. E. Smith & Company, in St. Louis. During the past 12 years, he has served continuously as the consulting engineer for the city of St. Louis, handling its relations with the telephone, gas, electric, steam railroad, and street railway companies.

He has built bridges over virtually all of the rivers of the Southwest, principally the Arkansas, Kansas and the Red Rivers, and he was a member of the board of engineers who built the Memphis span across the Mississippi.

Designed Rapid Transit Plan

Major Smith has designed a comprehensive rapid transit plan which would provide St. Louis with adequate subways and rapid transit lines. This plan, which will cause an expenditure of \$40,000,000 during the first five years, has been approved and has been the first step taken by that city to solve the transit problem.

He has also served as an arbiter in many controversies, often in the face of severe criticism from those who disagreed with him, and has been acknowledged by those as being fair in his judgment.

Dinner will be served for the members of the Civil Engineering Society in the North Hall, Walker, at 6:00 o'clock, and Major Smith will talk immediately after it.

MENORAH HAS DANCE IN WALKER TOMORROW

An informal dance will be given tomorrow night by the Institute Menorah Society in North Hall, Walker, the first of the season given by the Society.

Dancing will start at 8 o'clock and last until 12 o'clock. It could not be learned last night what orchestra would furnish the music.

Professor Presents Unusual View on Much-Dreaded Course in "Triple E"

"Strange as it seems to most students," said Professor Ralph G. Hudson '07, in his morning tirade in "Triple E," it is the desire of the teachers in this course that the men pass. One term we got the failures down to eight per cent, 32 per cent of the class passed. I hate that word 'teacher,'" he continued. "It sounds so high and mighty—it should be, rather, 'adviser.' That expresses so much better what we attempt to be."

Students, he admitted, seem to think that EEE is the bane of their existence. The men feel that problem sections are to be dreaded during the week, will be horrible while they are going on, and that the week-end is happier because they are over. "But we have to have them," says this professor, "that we may send to the dean's office a '35-1' for the man, or an '80-C.' We would like it a great deal better if there weren't any. But if we had no concrete evidence of a man's ability, we would surely slip in our judgment of it, and what a calamity that would be! So we give you a problem and allow you to bring all your texts to the section—all you need to do is know how to use the books."

FRESHMAN CLASS DISCARDING TIES BY WHOLESALE

SCHOOL TOURNEY STARTS TOMORROW

Arlington and New Bedford
High Furnish Competition
In Opener

Arlington High will open the third annual Technology basketball tournament for schoolboys by playing the New Bedford Vocational School quintet in the Hangar Gymnasium at 4 o'clock tomorrow. At 5 o'clock Lynn Classical High will oppose Brockton High and in the evening two more games are scheduled to take place, Gloucester High vs. Framingham at 7:30 and Medford High vs. Chelsea High at 8:30.

This schedule justifies pre-tournament forecasts in that the strong Arlington High and Medford High teams have been seeded. These teams are expected to defeat all opponents and clash in the finals on Saturday night.

Everett High, whose officials turned down the Technology tournament in favor of that of Glen Falls, was defeated last Friday by Cambridge High and Latin School, St. John's Prep, whose team Everett High was to play in order to qualify for the Glen Falls games, has now refused to play Everett on the grounds that the latter team has suffered a defeat whereas their own record still stands unblemished. This means that Everett High will not be represented in either tournament.

NEED MEN IN STAGE END OF DRAMASHOP

Men interested in stage work, who are capable with a hammer and saw will be welcomed in Room 2-178 tomorrow night at 5 o'clock, when the stage department of the Dramashop holds a meeting. Charles O. Terwilliger '30, stage manager, is in charge of scenery construction, lighting effects, and all other matters pertaining to the stage side of the show.

There is a great deal of elaborate scenery to be constructed, all within a month's time, and the Institute has loaned a room in the basement of Building 2 for that purpose. Construction work will start the beginning of next week, most of the scenery having been designed already.

M.I.T.A.A. Makes Nominations For Its 1928 Officials

William B. Thomas '29 and
Arthur B. Marlowe '29
For President

William B. Thomas '29 and Arthur B. Marlowe '29 were put up as the nominees for the presidency of the M. I. T. A. A. for the fiscal year starting this April by the Executive Committee of the Athletic Association at its meeting on Monday afternoon. The election of these men will take place at the next regular meeting of the whole Association, which comes the last Tuesday of the month.

Thomas at present holds the position of Crew Manager in addition to membership in various honorary societies including Beaver, and Theta Tau. Marlowe is now the Manager of Track, and is acting as the representative of the M. I. T. A. A. to the N. E. I. C. A. A. and I. C. A. A.

As nominees for vice-president, the names of Paul F. Donahue '29, present Manager of Hockey, and M. Edgar Powley '29 were proposed. In addition, the losing candidate for the position of president will also be a competitor for this office. Following out this policy, those men who lose the election for this office will again be candidates for secretary. The treasurer of the A. A. is an entirely competitive position, each treasurer appointing his successor.

At this meeting, recommendations were made to the Advisory Council on Athletics that Norman C. Estes '28, C. Brigham Allen '29, Bernard B. Brockelman '29 and John F. Reynolds '28 be presented with the award of the straight "T" for exceptional performance as members of the Varsity basketball team. In addition, these men together with Henry N. Bates '30, S. George Lawson '30, Robert M. Nelson '30, William H. Spahr '30 and Ernest S. Johnson '29 were recommended for the award of the "BTB".

Upon the recommendation of this year's Manager of Basketball, M. Edgar Powley '29, Robert K. Phelan '30 was named as Manager of Varsity Basketball for next year. As Sophomore assistants he will have Richard H. Yates '31 and Robert S. Backus '31.

FORCE FEEDING AIDS EQUAL DISTRIBUTION

"High Speed Fuel Injection Engines" is the subject of an address to be given at Technology Friday afternoon by Mr. William F. Joachim of the Advisory Committee on Aeronautics at Langley Field. Mr. Joachim is coming under the invitation of President Samuel W. Stratton to speak to members of the M. I. T. Student Branch of the Society of Automotive Engineers, aeronautical engineering students, members of the instructing staff and other students and their friends.

The idea of fuel injection is to obtain uniform fuel distribution under pressure to each cylinder. A fuel injector will thus take the place of a carburetor, which is notorious in its usual form for unequal distribution of fuel. Extended research and study is being carried on in this line.

PHOS' CIRCUS NUMBER PRESENTS SHOW LIFE

As his latest offering, Phosphorous plans to present his Circus Number of Voodoo to the undergraduates today. This number has as its main theme a campaign for another Tech Circus, and in that it adheres more closely to one idea than any of the previous numbers, it is the most distinctly specialized of any of Phos' recent brain children.

The cover, by Seron, depicts a clown standing in front of a circus tent juggling balloons.

FRATERNITIES ARE LOATH TO SUPPORT TIE WEARING RULE

Have Brought No Violators
Before Rules Committee
This Term

FEW TIES AT ROGERS

Less than twenty-five percent of the freshmen are wearing their Cardinal and Gray ties, according to an approximate count taken in the first-year classes during the past two days. It was also ascertained that the largest number of these violators of the rules are members of fraternities who are supposedly backing the rules and who have upperclassmen on the Freshman Rules Committee and Institute Committee.

It is alleged that some fraternities at one time went so far as to forbid their men to wear the ties, but upon intervention of members who are supporting the rules these prohibitions were vetoed. At Rogers Building the number of freshmen wearing the cardinal and gray cravats is almost nil. Upon inquiring of one of the Rogers' 1931 men why he didn't wear his tie he retorted, "What's the use? No one else does."

No freshmen have been brought before the Freshman Rules Committee this term and no written reprimands have been sent to these men.

Freshmen in the dormitories are wearing the ties to a man, possibly because they are leery of physical punishment which the Dormitory Committee metes out to convicted violators. The local resident element of the Class of 1931 are violating the rules, but to a lesser extent than the fraternity men.

SONG BOOKS WILL BE OUT IN FALL

Selections to be Chosen From
Tech Show Songs and
Alma Maters

According to a recent announcement, the Institute song book will be ready for distribution sometime during the fall term. The committee has had several meetings at which they have reviewed the Tech Show music as far back as 1900 and picked out several numbers that were appropriate for such a publication.

As soon as all the necessary material has been gathered by the committee such as prize songs that have been won by members of the Institute, and other college songs, including the alma mater anthems, the different publishers will be notified. From the quotations of prices and the grade of work submitted by these publishers, the one offering the lowest price for the highest grade of work will be selected to publish the song book.

There will be between 25 and 40 songs contained in the book, including both the words and the music. Nothing definite has been arranged as yet concerning the price.

The committee in charge of procuring material and publishing the song book are as follows: John Russell '28, Leonard C. Poskin '29, Donald Funk '29, who was appointed to succeed Robert C. Parler '29 upon the resignation of the latter.

CALENDAR

Wednesday, March 14
6:00 P. M. Faculty Club, Faculty Dining Room
7:30 P. M. Student Branch of the Society of Automotive Engineers, Room 2-330
Friday, March 15
10:00 P. M. Fuel Injection Talk by Mr. Joachim, Room 2-270.

MUST WE BE COLLEGIATE?

"The student body immediately arose in opposition to this action, which they felt was an encroachment of the right of the undergraduates to choose their own Alma Mater song and presented a petition, signed by hundreds of students, less than twenty-four hours after action had been taken by the committee."

SEVEN years ago this Spring certain of the undergraduate body, with the moral backing of the Alumni Council, brought into being the Prize Song Contest, in an effort to find a substitute for the Stein Song as the Alma Mater Song of Technology. To date four of the five contemplated annual contests have been held, none of which has yet produced a song that the students are willing to adopt in place of the Stein Song.

When the outcome of the third contest of the series was announced the Institute Committee resolved to adopt for a period of one year "The Courts of M. I. T.," as the Alma Mater song in order to give this third winning song a fair trial. In the above quotation from THE TECH of that year is presented emphatically the opinion of the student body regarding the substitution for even so short a time.

Technology has often been criticized as a school without tradition, a school that cannot sing, and so on. Possibly this latter suggestion couches the real reason that thus far each contest has failed to bring results, for not once have the undergraduates shown any desire or inclination as a group to toss aside the Stein Song for want of something better. Yet the Stein Song is famous the world over as a masterpiece for male choruses, and Technology has clung to it with far more love and pride than a mere popular tune could draw from any group of students.

Much of the minority reaction against our present Alma Mater song has emphasized the lack of any direct connection whatever of the words with Technology, in apparently futile endeavor toward its alienation in student minds. It is common knowledge that similar songs of other schools rhyme such hallowed words as "reverence," "fidelity," "courage," and the like with the names of their colleges and traditions, and so conform to the accepted standard of Alma Mater songs. And because we are different, and have a fast and firm tradition in the Stein Song, an attempt is made to set up something new to us which follows more conscientiously the accepted collegiate custom.

We beg to disagree. We have no desire to sacrifice the Stein Song, and we are firmly convinced that few students or Alumni have any such intentions.

BACHELOR OF LOITERING

A COLLEGE executive in a rather sarcastic mood once proposed a college without laboratories, libraries, classrooms, or teachers for those who want to loiter and learn from their social activities. But things such as prohibition, often proposed in jest, become the great reforms of the next generation. Let us, therefore, study how much good this institution will do for the country.

Usually the student, especially in a scientific school, spends his time learning how to use the working day from nine to five—after he is out of college. Yet this will probably be less than half his waking hours. Why should he spend all his period of training for what will eventually take only a fraction of his time? Why shouldn't he learn how to use the rest of the hours to best advantage!

It is probably true that a great many men do not know how to enjoy themselves when they are not working. Imagine what a boon it would have been to such men to have been able to take a graduate course in a college where they could learn how to loiter pleasantly in their spare hours. Many a marriage that now is wrecked might be saved if both parties could amuse themselves without ending up in a battle.

There is a great need for some such institution giving instruction in graceful loitering. At present the student has to study the subject for himself but it could be accomplished much better by a school taught by experts in the line. Think of the demand there would be for "bachelors of loitering" for every party, for amusement is contagious.

THE OPEN FORUM

To the Editor of THE TECH:

In reference to "Prep Night" recently held at the Institute at which nearly two hundred prospective students were entertained, I would state that such an event must necessarily increase the young men's interest in Technology. They can carry back to their fellows a mental picture of the Institute which shows that our students do play as well as work, and that Technology has as wide a variety of extra-curricular pursuits as is offered by many of the liberal colleges.

The successful undertaking of "Prep Night" was made possible only by the whole-hearted co-operation of the many sports, activities and fraternities which participated in the program, and they are to be congratulated upon the excellent result of their work.

Yours sincerely, (Signed) S. W. STRATTON, President.

As We Like It

REPERTORY

James Barrie's masterpiece, "What Every Woman Knows," at the Repertory, is as humorous and stimulating today as when it was first produced in 1908. Couple with the beautiful lines of the comedy, the charming personality of Katherine Warren as Maggie, and the realistic presentation of Dennis Cleugh as John Shand, and you have an evening's entertainment of the first order.

Perhaps we were amused by the naivete of John Shand, "the man without a sense of humor," or perhaps we were enraptured by Maggie as the helpful wife who knows "what every woman knows", but no one, we think, could resist these two characters so typical of Barrie's genius. We particularly like that little speech Maggie makes at the end of the play when her husband, John Shand, realizes how much he owes her for the high position he holds. "It's nothing unusual I've done, John," she explains. "Every man who is high up loves to think that he has done it all himself; and the wife smiles, and lets it go at that. It's our only joke. Every woman knows that." There you have it in a nutshell—the plot skillfully, artistically embroidered into a master's comedy.

Play Directory

- STAGE: COLONIAL: "Sir Harry Lauder." COPLEY: "The Wrecker." "Twin of the Ghost Train." HOLLIS: American Opera Company. Grand opera in English. MAJESTIC: "Straight Through the Door." TREMONT: "Hit the Deck." A nautical musical comedy. SCREEN: METROPOLITAN: "Red Hair" with "Lana Bow." FENWAY: "Gentleman Prefer Blondes." LOEW'S STATE: "The Latest From Paris" with Norma Shearer.

Waxes Poetic Over Favorite Tobacco

"A Prescription"

Have you ever noticed right after a meal How tired and lazy you always feel? I'm telling you folks it isn't a joke, It will freshen you up if you try a good smoke. But whatever you do these lines you must heed, There's a certain tobacco of course, that you need. It's packed in a tin, the tin's colored blue. Not only the smoking but the chewing kind too. Of course if you never are bothered this way, Just keep the prescription for some other day. Ask for tobacco, the best that's on earth: To shorten the story, just call it "Edgeworth." Chas. J. Butler Owensboro, Kv.

Edgeworth Extra High Grade Smoking Tobacco

After seeing "What Every Woman Knows" on the stage for the first time, we do not hesitate to voice our praise alongside that of William Lyon Phelps (we apologize for this presumption), who expresses the opinion of the greatest dramatic critics, that "this is one of the great plays of the modern stage." M. B.

The students of the Louisiana State University have declared the honor system a failure by a vote of

482 to 36. They seem to believe that the failure of the system is due largely to suspicion on the part of the faculty.

As a result of a check-up by Dr. S. W. Reaves, dean of the college of arts and sciences of the University of Oklahoma it is now believed that outside work is a severe handicap to students at least at that institution. The dean has found that a large number of the freshman failures were due to work outside the college.

"Nunc est bibendum, nunc pede libero Pulsanda tellus."—HORACE

GENTLEMEN: This is Latin. Latin is an Ancient Language. It is no longer studied in colleges. You are not expected to know what this quotation means.

Literal Translation—Strike up the band! Now is the time to drink. Now is the time to shake a mean pair of dogs.

Free Translation—When, in the course of human events, it becomes necessary for two or more undergraduates to gather together in friendly communion, there is only one drink, Gentlemen, for the occasion—"Canada Dry," The Champagne of Ginger Ales.

Reasons—"Canada Dry" has a delightful flavor because it is made from pure Jamaica ginger. "Canada Dry" has no false bite, no unpleasant after-taste and is really good for you because it contains no capsicum (red pepper). And, Gentlemen, it mixes well with other beverages. Class dismissed!

CANADA DRY "The Champagne of Ginger Ales"

Extract imported from Canada and bottled in the U. S. A. by Canada Dry Ginger Ale, Incorporated, 25 W. 43rd Street, New York, N. Y. In Canada, J. J. McLaughlin Limited. Established 1890.

Don't let 'em fool you, fellas! Look for the name "Canada Dry" on the bottle cap. Then you'll be sure!

FIVE TEAMS COMPETE IN WRESTLING TOURNEY THIS WEEK

Harvard Is Favorite To Win New Englands; M.I.T. Strong In Lightweights

For the windup of their season the Beaver varsity wrestlers are entering the New England wrestling Intercollegiates being held this Friday and Saturday at Tufts. Beside the Technology outfit, teams from Tufts, Brown, Harvard, and Williams are entered so with these teams, all good, competing, and most of last year's champions back defending their positions, some clever work should be shown before next year's champs can be named.

In dual meets Harvard has beaten or could probably beat any of the other teams entered but she couldn't hope to compete against a team composed of the best men from each of the other teams and that is practically what it amounts to in this case. Harvard has a well balanced team while Tufts is good at the middle weights and quite strong in the heavyweight end. Brown is at its greatest strength from 155 up while the Technology team is good at the lighter classes.

Cornsweet Brothers Favorites
Winning the final in a class counts the highest in a team score toward winning but points are also given for second places and any falls scored during the meet. These points may influence the final score to a large extent. From past performances it would seem that the most likely results would see the Beavers placing in the 115 class, Harvard or Tufts in the 125, 135, and 145 classes, with the odds on Harvard for their team has two defending champions at 135, and 145 pounds.

Brown appeared to rate well up with a safe bet for the 155-pound class and the two Cornsweet brothers in the two heavy classes. Brown ought to take the 175 event, while the other heavyweight event, the unlimited, seems a flip-up between the other Cornsweet brother and Captain Howe of Harvard.

From the scores turned in by the Williams outfit they might well defeat the Beavers in a dual meet but the Engineers have the edge on them in this meet because of the possibilities they have of coming through with a couple of winners in the lower classes. If the points were only awarded on winners of firsts the final lineup would probably see Harvard leading, with Brown or Tufts in second and third, Technology fourth and Williams trailing; and the final scores with all points will probably run in this same order.

The students of Radcliffe College seem to have a leaning toward the so-called cultural subjects. Most of the students are taking courses in English, literature, history, and fine arts and at the same time ignoring the courses in physics, chemistry, and astronomy. These facts have been revealed as a result of a survey by the team.

The library of Princeton University has been presented with the note book of an unknown student in which he describes the lectures of Joseph Henry, the famous physicist and former Princeton professor. The lectures were delivered in 1848 and the notes are almost unbelievably neat and legible. Joseph Henry is known the world over for his experiments in electro-magnetism.

START FRATERNITY BASKETBALL AGAIN

Fraternity basketball is again under way. Last year's winner was Delta Kappa Epsilon, and the runner up was Sigma Nu. The first round has already been played, and the second round has been started. Only seven more games are to be played before the final round which will be held at the Hangar Gym, April 3rd.

Results:

First Round		Winner	Loser
Phi Kappa Sigma	Sigma Alpha Epsilon	Phi Kappa Sigma	Sigma Alpha Epsilon
Alpha Tau Omega	Delta Tau Delta	Alpha Tau Omega	Delta Tau Delta
Sigma Chi	Kappa Sigma	Sigma Chi	Kappa Sigma
Phi Sigma Kappa	Theta Delta Chi	Phi Sigma Kappa	Theta Delta Chi
Sigma Nu	Beta Theta Pi	Sigma Nu	Beta Theta Pi
Delta Upsilon	Psi Delta	Delta Upsilon	Psi Delta
Delta Kappa Epsilon	Theta Xi	Delta Kappa Epsilon	Theta Xi
Chi Phi	Phi Mu Delta	Chi Phi	Phi Mu Delta
Phi Beta Epsilon	Phi Gamma Delta	Phi Beta Epsilon	Phi Gamma Delta
Phi Kappa	Theta Chi	Phi Kappa	Theta Chi
Lambda Chi Alpha	drawn bye	Lambda Chi Alpha	drawn bye

Second Round (Unfinished)

Phi Beta Epsilon	Delta Upsilon
Delta Kappa Epsilon	Chi Phi
Phi Sigma Kappa	Sigma Chi

Varsity Crews Keep Charles River Flowing To Sea—Here's How!

Versatility is the keynote of Coach Haines' varsity oarsmen, judging from the recent exhibitions of all-round skill which they have exhibited. All kinds of strange means of locomotion have been employed by the boys in getting to and from the boat-house, but once seated in the training barge, they can ride either the waves or the ice, depending on the whim of the coxswain. This was demonstrated last Wednesday afternoon, when sixteen of the mighty sloshed through and over the new ice in an effort to get out to the open water in the middle of the Charles. The attempt was successful, and there is some talk at present of sending a bill to the Metropolitan District Commission for services rendered in clearing the channel of ice.

Sports Desk

Premature old age is prophesied for Coach Haines' crew men if conditions are not remedied at the boat-house before very long. It seems that the new storage tank for hot water is not yet in commission, and in the meantime, crew men are on meager rations of hot aqua. After the boys have finished perspiring they are led meekly to the showers. On the signal from Rigger Pat Manning, accomplished by rapping three times on the pipe with a sledge-hammer, each man springs into his position under a shower, and turns on the faucet. A brief interlude of perfect bliss then follows, but all too soon come the three fateful raps, and all make a hasty exit before the icy stream overtakes them. There is grave danger of someone being trampled to death, but it is considered good training, and teaches the men to fight as a unit, especially when all lift their voices in unison in the familiar chorus: "HOTTT WATAHHH."

GREEKS IN FINALS OF BOWLING TOURNEY

Last night in Walker Basement the semi-finals of the interfraternity bowling league were played off. Phi Mu Delta opposing Phi Kappa and Delta Kappa Epsilon opposing Kappa Sigma. The winners will bowl Tuesday, March 20, to determine the championship. Last year Phi Mu Delta house were winner and Delta Kappa Epsilon runners up.

Boston University plans to establish a branch in London during the coming summer. The university already has branches in Porto Rico and Havana.

JACKSONVILLE

START SALE OF DUCATS TO BASEBALL DANCE

A benefit dance will be held in the Main Hall, Walker, on Saturday, April 27, for the aid of the Beaver baseball team, since the management has arranged an extensive schedule which will incur quite an expense. The proposed dance seems to be the only available means present to meet the deficit. The committee in charge has engaged the Collegian Ramblers, who have played for many of the Dorm dances, to furnish the music. It has been decided to run the dance inform-

ally. The price of admission will be \$1.50 per couple. Tickets, which go on sale Wednesday, can be obtained from members of the team.

M. E. SOCIETY

Cold swaging will be demonstrated and discussed by Mr. Schneider of the Torrington Company in Room 5-330 at 7:30 o'clock this evening at a meeting of the Technology Mechanical Engineering Society. All are invited.

The Princeton University library has been presented with a Bible printed in 1480. The Bible is in four volumes and is hand illuminated.

48 MEN THROW BULL ABOUT BIRTH CONTROL

Room 10-250 was again the scene of a bull-session when the second meeting was held yesterday afternoon at 4 o'clock. Professor R. G. Tyler was again in charge of the affair and a lively discussion was held on the subject "Companionate Marriage." It was agreed by both sides that birth control was one of the big problems which must be considered in dealing with the subject. Forty-eight were present.

INSTRUMENTAL CLUB

All those desiring the position of pianist or violinist in the Instrumental

Club see Arthur Campopiano, the leader, or come to rehearsal today or Friday at 5 o'clock in East Lounge, Walker.

not a cough in a campus-ful!
(and of course, "not a cough in a carload")

One of the leading tobacconists in Cambridge, Mass., says:

"The rapid growth in the popularity of OLD GOLD Cigarettes among the students is remarkable. Never in my experience have I seen a new cigarette catch on so quickly with the boys on the campus."

Edward B. Noyes

Technology Branch, Harvard Co-operative Society, 76 Massachusetts Ave.

AT LEADING COLLEGES... This is an Old Gold year

For a most refreshing change:

"Follow your friends and switch to this smoother and better cigarette"
