

## WILLIAM B. THOMAS '29 IS SELECTED TO HEAD M. I. T. A. A.

**P. F. Donahue '29 Elected Vice  
President and A. B. Marlow  
Made Secretary**

### ELECTIONS YESTERDAY

**Successful Candidates Will Not  
Take Office Till End of  
April**

William B. Thomas '29 will be president of the M. I. T. A. A. for the next fiscal year, it was decided by the elections of the association late yesterday afternoon. Paul F. Donahue '29 was selected as vice-president and Arthur B. Marlow '29 as secretary of the association at the same time.

Thomas, whose home is Johannesburg, South Africa, is the present manager of crew, with which position he was rewarded after two years of assistant managership. He is enrolled in Course XV-2, and is a member of Beaver, Theta Tau, the Tech Boat Club, the Calumet Club, and Walker Club.

Donahue, who prepared for the Institute at Boston Latin High School, is a native of Boston. He was manager of the hockey team the past season, and he also played a defense position on the team at the same time. In his freshman year he played on his class football team, and an injury sustained during practice was the only thing that prevented him from playing class football last year. He also played last year on the newly-reorganized Beaver baseball team.

Marlow, who is a resident of Helena, Montana, prepared at Exeter. He is this season's track manager, after being successfully freshman and sophomore assistant of track. He was also manager of the part-field day, and he is a member of Beaver and the Calumet Club.

These three men will take office the last Tuesday in April, but are supposed to attend all Executive Committee meetings until then. At these meetings they may take part in the discussion, but will have no vote.

## 750 'SNIQUE SIGNUPS NOT YET REDEEMED

**Demand for "Name in Gold"  
Has Increased Noticeably**

It is announced that about 250 redemptions have been sold for this year's Technique during Monday and Tuesday. This is about one quarter of the number who purchased signups during the signup campaign about a month ago. It will be necessary for those who have not yet paid in full for their Technique to do so, before the end of this week, in order to procure the year book at the special price of \$4. A stand is being maintained in the Main Lobby from 9 until 5 o'clock every day where the signups may be redeemed for \$3. After this week the price of the sales will be raised to \$4.

A much larger number of students have ordered their names printed upon the front cover of their year book than was expected. The students name in gold will be printed on the cover for the slight extra charge of \$.50. Orders should be placed as soon as possible.

## Razz Sheet To Print Institute Dirt Monday

According to the signs posted on the various Institute bulletin boards the Filter Paper, Technology's annual razz sheet, is to appear Monday. "Them we don't razz ain't worth it" is the Filter Paper's motto. It is claimed that they have a direct wire connection with the New York relay point of the Association for the Purification of the Press.

Last year their main flyer stated that "Activity Heads Don't Give a Damn" while the year before it was to the effect of an injunction served against the tutoring trust. What it will be Monday is not known but it is rumored that this sheet is about to reveal the most startling scandal of its existence.

## Technology Wins New England Rifle Title

Technology won the championship of the New England intercollegiate rifle league according to the final standing just released by the National Rifle Association at Washington, D. C. The M. I. T. men defeated all of their opponents and finished with a record of seven straight victories. In the final match of the week the Cardinal and Gray shooters made certain of the title by overwhelming Amherst by the score of 1355 to 1177.

The standing:

	Won	Lost
M. I. T.	7	0
Norwich	6	1
Vermont	5	2
Dartmouth	4	3
Boston University	3	4
Worcester Tech	2	5
Amherst	1	6
Williams	0	7

## Cornelius Lely Speaks on Dikes And Zuider Zee

**Former Dutch Minister of Public  
Works Tells of Holland's  
Fight With Sea**

Dr. Cornelius Lely, construction engineer, and former Minister of Public Works of Holland, gave an address in Room 5-330 on Monday afternoon at which he described the work which was done in reclaiming the Zuider Zee. This project, one of the largest construction jobs that the world has known, was planned and carried out under the direction of Dr. Lely. He was commissioned by the Dutch government in 1886 to draw up plans for the reclamation of the area, and in 1918 work on the project was started.

This work, the reclamation of an immense tract of land which was under the sea, was accomplished by the construction of a dike, 18 miles long, across the entire entrance of the Zuider Zee, after which the land would be reclaimed by draining. This dike has recently been completed, and Dr. Lely augmented his address with moving pictures showing the various phases of the construction of the dikes.

These lectures, which are given under the auspices of the Department of Civil and Sanitary Engineering of the Institute, but due to the fact that Dr. Lely has come to this country with the express purpose of giving the lectures, they will be open to the public as well as the student body and members of the faculty. The second and last lecture will be given this afternoon at 4 o'clock in Room 5-330.

## PROFESSOR DAVIDSON TO SPEAK AT LOWELL

Professor Archibald T. Davison of Harvard University will give the second of his series of four lectures on "Folk Songs" before Lowell Institute Thursday, March 29. The course takes up in sequence the various characteristics of these songs as found in Russia, France, Italy and Germany. At this next meeting Professor Davison will confine himself to the elaboration of the songs of France. These are held on Mondays and Thursdays at 8 o'clock in the evening in Huntington Hall at 491 Boylston street.

The first talk of the group on Russian songs was well received and augurs well for the remainder of the course. Each of the lectures is illustrated by selections by a special chorus which form a happy setting for each of Prof. Davison's separate subjects.

## 1893 DORMITORY TO UNDERGO RENOVATION

As soon as the present exodus from the Class of 1893 Hall is complete, the process of renovating this dormitory will begin. The Dormitory Committee proposes to have the cracks in the walls plastered, the woodwork and furniture refinished, the holes in the floor, caused by students leaning back on the rear legs of their chairs, filled, and other minor necessary repairs made. In all probability some of the old dormitories will undergo similar repairs during the summer session.

## Hugh Hamilton '29 Is Chosen as New T. C. A. President

**M. Richard Boyer Elected As  
Vice-President—Riehl  
Is Treasurer**

Hugh G. Hamilton, Jr., '29 was elected president of the Technology Christian Association for the year beginning April 15 at the elections held in Walker last evening. At the same time, M. Richard Boyer '29 was elected vice-president and Theodore A. Riehl '30 treasurer for the same term.

Hamilton graduated from Schenectady High School in 1923 and while there he was chief engineer and treasurer of the Radio Club, a member of the track team, and also of the school debating team. He prepared for M. I. T. at Union College in Schenectady, which institution he attended for one year. He entered the Institute in 1925 and is now enrolled in Course IX-B. During his freshman and sophomore years he played on the football team and managed the freshman basketball team in his second year. Last year Hamilton was general manager of the freshman handbook and manager of the Beaver baseball team. He is now a member of the Beaver Club and the Calumet Club.

**Boyer is Vice-President**

M. Richard Boyer prepared for college at Exeter Academy, which he attended for two years. While there he was a member of the Varsity crew and was awarded a letter in that sport. At the Institute he is enrolled as a Course VIII student. During his freshman year Boyer played on the football team and was awarded his class numerals. He is a member of the Beaver Club.

Theodore A. Riehl attended Horace Mann Preparatory School in New York, where he played on both the soccer and basketball teams. He was awarded letters in soccer during both years on the team. He is enrolled as a Course X student at the Institute. Last year he was awarded the A-TA letter in soccer and is a regular member of the team. He is vice-president of the Quadrangle Club and a member of the freshman Rules Committee and also the Points System Committee.

## Dr. Stratton Calls Freshman Meeting

**Yearlings Will Hear Talks By  
Professors on Choice  
Of Courses**

President Stratton has called a mass meeting of the members of the freshman class in Room 10-250 tomorrow afternoon at 3 o'clock. The purpose of the meeting will be to make a study of the various courses at the Institute. At that time Dr. Stratton will seek to impress the freshmen with the importance of studying the various courses so that they will finally choose the one for which they are most fitted.

At the same time Professors Edward F. Miller '36, Samuel C. Prescott '94 and Davis R. Dewey will address the students. Professor Miller, head of the Mechanical Engineering Department, will describe all of the Engineering courses; Professor Prescott, head of the Biology Department, will speak on the Science courses, and Professor Dewey, head of the Economics Department, will discuss the Engineering Administration.

## Seniors Begin Active Campaign This Week for Endowment Insurance Funds

**Drive Continues Through Next  
Week; Response Better  
Than Last Year**

With a start which the committee feels points towards success in the project, the campaign for pledges for the Senior Endowment Insurance Fund continues active during the next two weeks. Already letters explaining the plan and including pledge cards have been sent to all members of the class.

Special emphasis this week will be put on soliciting from the various courses. A list of the standing of each course as regards the response of its

## FACULTY EXTENDS SENIOR MAKE UPS OVER FOUR WEEKS

### Prom Redemption Sale Due to Start Monday

Redemptions for signups to Junior Prom will be put on sale in the Main Lobby all next week, and at the same time those who have not already purchased their tickets may do so for the original price of \$12. The cost of the redemptions will be \$8, the balance having already been paid at the time of signing up.

## M. I. T. A. A. MAKES RECOMMENDATIONS

**Asks Award For Track Meet  
And Freshman Swimming;  
Names New Managers**

Many recommendations for awards and appointments were made at the last meeting of the Executive Committee of the M. I. T. A. A. on Monday afternoon.

A motion was passed that the following men, each of whom took at least one first place in the Interclass track meet on March 3, be awarded their class numerals: A. N. Laurence '29, R. Y. Barbour '28, F. A. Ladd, Jr., '30, M. H. Fay '29, P. H. Kirwin '28, C. E. Worthen, Jr., '29, L. S. Thorsen '30, C. D. Sullivan '31, and B. Grondal '31.

A motion was also passed that Thomas McLauren '30, be appointed manager of the gym team for the next season, and that Clarence Feld be made his sophomore assistant. The motion was also passed that T. B. Spruill '30 be appointed swimming manager for the coming season, and A. G. Dean '31 and S. E. Northrop '31 his sophomore assistants.

The following members of the freshman swimming team, each of whom took part in at least two-thirds of the meets and scored at least five points, were recommended for the award of their class numerals: M. Allen, C. Baker, H. Holst, F. Lutz, E. McKay, R. McMinn and J. Noyes. H. Lykes was also recommended for his numerals for his work on this team, since he was in five of the nine meets and scored 23 points.

## PRESIDENT INVITES AIRCRAFT ENGINEER

Mr. George J. Mead '16, chief engineer of the Pratt & Whitney Aircraft Co., is coming to the Institute upon the invitation of President Samuel W. Stratton to speak before the M. I. T. Student Branch of the Society of Automotive Engineers, Aeronautical Engineering students, members of the faculty and others interested. The meeting is in Room 3-270 on Friday at 4 o'clock.

He will talk on his "Impressions of Commercial Aeronautics," gathered from his recent trip to the West Coast over the government air mail routes. Mr. Mead is the designer of the well-known Wasp engine that weighs but 1.7 pounds per horsepower developed.

## CLASSES WILL BE SUSPENDED AFTER 5 O'CLOCK MAY 24

**Previous Congestion is Cause  
Of Students' Suffering  
Faculty's Belief**

### CHANGE MAY BE LASTING

At a Faculty meeting which was held last Wednesday, it was voted that the students who are now listed as '28 will take their condition examinations upon four consecutive Saturdays from 2 until 5 o'clock. The examinations will begin on April 28th and will continue for four weeks. The committee was of the opinion that the students had suffered during the previous examinations due to the congestion over such a short period of time. It is believed that this idea will increase the marks and enable the students to do much better work than if the examinations were crowded into one week. As this regulation is more or less of an experiment, it is therefore only temporary. The committee has not made it permanent, as such a solution might incur a change of the calendar during future years. If the trial is successful, it is entirely probable that a similar type of examination will be arranged for the following years.

**Classes Suspended Sooner**  
Undergraduate exercises will be suspended after May 24 at 5 o'clock instead of on Saturday afternoon, May 26, as was previously announced. This fact should be well received by the students as well as by the faculty.

Condition examinations for undergraduates will be held on Friday and Saturday, May 25 and 26. These days should be sufficient to take care of the greater part of the re-examinations without causing conflicts. However, it is entirely possible that these exams will also be given upon one or two other days if a need is felt for same.

May 28th has been set as the date for the beginning of the student examinations. The Seniors will commence their troubles upon a somewhat earlier date, namely on the 25th of May.

These dates have been altered in order to provide the Faculty with more time to compile their report of the graduating students and post graduates for the Corporation.

All Seniors and graduate students who are required to take the makeups will be notified by mail in regard to the time and place of such examinations.

## FACULTY CLUB HEARS PROFESSOR BORODIN

Professor N. Borodin of New York City was the principal speaker at the Faculty Club meeting held at the Faculty Dining Room of Walker Memorial yesterday noon. His subject was "Russian Scientists in and Out of Russia, Today." Professor Borodin was formerly associated with the Petrograd Agricultural College as Dean of the Department of Fish Culture and Fisheries, and is now connected with the American Museum of Natural History.

Ever since the Russian Revolution of 1917 it has been very difficult to secure any reliable information concerning that country. Reports in American scientific journals have indicated that the present plight of Russian scientists is pitiful. Professor Borodin, who is familiar with the pre-war and post-war scientific effort on Russia, was able to give some authentic information on the subject.

## CALENDAR

Wednesday, March 28  
1:00—Address by Dr. Cornelius Lely in Room 5-330.  
5:00—Meeting of the Radio Society in Building 35.  
Thursday, March 29  
3:00—Freshman Course Lecture, Room 10-250.  
6:00—Swimming Teams Banquet at the University Club.  
8:00—Folk Song Lecture, Prof. Davison, at Rogers.  
Friday, March 30  
4:00—In Room 3-270 Mr. G. J. Mead speaks on "Impressions of Commercial Aeronautics."

FACULTY ADVICE

FEW men who enter the Institute each year are any more decided upon their future careers than are the majority of high and preparatory school students. They may have made up their minds in a vague sort of way to enter the engineering field, but time and time again have their minds changed before the second year has passed, usually with a sad loss of time in making up the extra work required.

It is admittedly next to impossible for one to choose his life profession with simply the perfunctory smattering of knowledge of the courses that is shared by the average outsider. Not until one has studied in his chosen field for several years is he at all certain of his ability or future happiness should he continue along that line. However, contact with men who are prominent in their profession has often given students that insight into the different fields which will enable them to make their decision with a very fair degree of intelligence and accuracy. It is with this end in view that much of the Institute's efforts toward the orientation of its undergraduates has been made.

Aided by a vast fund of experience with both the collegiate and the professional world, President Stratton and the members of the Faculty have sought constantly for better methods of acquainting new students with the scope of the various courses given at Technology, as well as with the fundamental demands these courses make of the students in the way of personality and mental adaptability. In the past the heads of the departments have outlined for the assembled freshman class the work in their own departments, but this year a far more general plan will be followed.

Following a few days after the talks by the President and Professors Miller, Prescott and Dewey tomorrow in room 10-250, all the department heads will be in their offices at hours to be specified within the week, where they may be consulted by members of the first year class concerning their choice of course. By this method freshmen will be able to confer with men who are thoroughly familiar with their fields, thus coming into active contact with those best able to give needed information and advice.

The Combined Boards of THE TECH, Volume XLVIII, take pleasure in announcing the election of Murry Brimberg '29, to the Editorial Board.

DYSPEPTIC SCHOOLBOYS

"WERE you on a large bender last night? Have you an exam tomorrow which requires more time than your schedule allows? Is there a movie you want to see, or is your girl in town just for today? Then don't bother to go to school. Get one of the brothers to tell the Medical Department you have sinusitis, or an ingrowing toe-nail, or dyspepsia. Gullible souls, they believe you, and your problem is solved."

Such seems to be the thought process indulged in by many students. Particularly is it the case in fraternities, where it is often a freshman duty to carry over the daily sick list. Of course, it is a remarkably convenient system, but certainly not a commendable practice.

The Medical Department owes its existence to a desire on the part of the powers that be to keep the student body in good health. In such a capacity, it does a great deal. However, as Dr. Croke, assistant medical director points out, the situation is too serious for his staff to treat lightly the requests for excuses on account of sickness. The time and labor involved prevent the department's investigation of each case—they rely on the veracity of the student. They trust us—a gentleman could do no more than warrant that trust.

The sportsmanlike treatment we get should appeal to us to such an extent that we should reciprocate. But perhaps prep school tactics need be resorted. Might not the old army game of prescribing the notorious "C and C" pills be a good idea for cutting down on the pseudo-invalids? Or the authorities might adopt Mussolini's famously effective plan of giving large doses of castor oil to the fractious students. If honesty will not work, we should expect to be treated as youngsters unworthy of trust, and some measures for curbing the schoolboy practices would not seem out of order.

With The American  
College Editors

"LECTURES FOR LECTURERS"

"Crime er- is caused uh- by environment and not uh- by uh' etc, indefinitely. Ballyhoo 13 is a lecture course. It must be presented with some skill to be assimilated by even the most eager student. Its value depends almost entirely on the strength of the lectures. Their success in gaining and maintaining the students' attention is a fair criterion of the extent to which the course accomplishes its purpose. Folly it is for an instructor with little speaking experience to attempt a task for which special training is necessary. Lecturing is an art, consummated only with long practice. It does not grow on one overnight. One must be instructed in it to understand its principles.

"A public speaking course as a prerequisite for college instructors would ameliorate the faults of poor lecturing. One has only to sit in a class where the lecturer, recently graduated from some university, helplessly fumbles for words, to realize the necessity of such a plan. It is bad enough to hear a stuttering succession of "ers" and "uhs" without seeing the Key twirled unceasingly by nervous fingers. It seems a very admission of impotency for the lecturer to whirl that symbol of high scholarship in front of our eyes. The ability to speak coherently and with some skill is important for everyone, but especially so for an instructor, whose task is to impress upon his students the content of the lecture. If he is unable to do this, he might as well resign his position. Brilliance is unnecessary, but knowledge of the fundamentals of public speaking is essential. And so, that many lectures may not be so absolutely worthless, perhaps it would be possible for instructors to become proficient as speakers. It does not seem to be asking too much."—The Dartmouth.

book is her version of the famous diary. Miss Brunner shows Elisabeth Pepys to be a woman of resource and fascination who knew more of her husband's affairs than he really suspected. She loved her husband, but his well known eccentricities and his susceptibility to feminine charms made him somewhat

difficult to live smoothly with. Her husband, a delightful rascal, becomes all the more interesting as seen through feminine eyes. Out of the things not mentioned in the diary a most interesting story has been woven, which, if not quite the truth, is at least possible and fits in well with (Continued on page 4)

Richmond, Va.  
Gentlemen:

I sure get some riled when I see where some fellow is crowing over the fact that being older, and having run into Edgeworth sooner than his less fortunate compatriots, he challenges the world as the champion long-time member of the Edgeworth Club.

He doesn't deserve any medals. He got his reward in the enjoyment of his smoking for the added number of years. He was just lucky in starting sooner, that's all.

However, if you care to delve into ancient history, look up when they first started to pull down the old Grand Central Station in New York,\* then add at least six months to that, and you will arrive at the approximate time when I first joined the club.

I have smoked at least one pipeful of every other tobacco I have seen advertised, sometimes through necessity, but most of the time to prove to myself that I have been right in sticking to the old blue tin.

Yours truly,  
H. M. Wittridge

a fac' no on you.

# BASEBALL CANDIDATES ARE OUT THIS WEEK

## FRANK SILVA WILL BE COACH OF TEAM

### Large Number Expected to Be Out For First Practice On Thursday

Beaver baseball team will hold its first outdoor practice on Thursday of this week. It is expected that the grounds will be in shape for practice on that date. From the large turnout of candidates for the battery positions, an unusually large squad is looked forward for on the opening practice.

Frank Silva, who so successfully coached the Beavers a year ago, will be on hand to direct the operations of this season's team. With the material anticipated and the ability of the coach, as was manifested by last year's showing, this season's outfit should create quite an upset in collegiate baseball.

All candidates, whether for infield, outfield or battery positions, will report at the gym floor in the Hangar on Thursday, when Coach Silva will explain his plan of action for the coming year.

Strenuous practice will start immediately and daily workouts will be held on Tech field. Frank Silva will have scarcely three weeks' time to round out his first-string combination before the opening game. For this reason the management will expect exceptional support and co-operation from the candidates.

## TRACK RALLY DRAWS LARGE ATTENDANCE

Nearly a hundred and fifty fellows turned out Monday afternoon to the track rally held in Room 5-226. O. B. Dennison '11 led the crowd in several cheers. Track Manager A. B. Marlow '29 introduced, in order, Head Coach Oscar Hedlund, Dr. J. A. Rockwell '96 and Field Coach Bill Meanix, who each said a few words about the meaning of track at the Institute. This is the largest crowd that has ever turned out to a meeting of this kind and everyone seemed enthusiastic about the coming season.

Members of the track squad can be seen running along Charles River Drive most any afternoon, getting their wind and strengthening their legs for the spring campaign. Norman L. McClintock '29, captain of next year's harriers, reported yesterday for the first time since the cross-country season finished last fall. An injured ankle held him back in the two-mile even last year but this year he is back in shape and it will be a different story.

## SIGMA NU DEFEATS LAMBDA CHI ALPHA

Sigma Nu continued its winning streak by defeating Lambda Chi Alpha 44-11 last evening at the Hangar Gym. Weddle and Arnie Wood were the stars for the victors. Sigma Nu will play Delta Kappa Epsilon for the Interfraternity championship next Tuesday night.

## Crews Showing Big Improvement Over Last Week

### Pat Manning Agrees to Coach Third Varsity Crew This Spring

Still endeavoring to hit upon the best possible combinations which can be made of his Varsity and Junior Varsity material, Coach Haines has been mixing the first two crews the early part of the week, and taking them upriver as far as Watertown. In the meantime, the hundred-and-fifties and first freshmen have been working hard, and are beginning to show up in something like the form they will attain by the first race.

The third Varsity is still more or less of a haphazard organization, due to the fact that the members of the crew have not been practicing regularly. This lack of interest has been overcome by the announcement that Pat Manning will coach the scrubs from one of the launches. Lack of coaching has handicapped this crew so far, and from now on there should be very rapid improvement.

Practices last longer every evening, some of them terminating as late as 6:45. The lengthening days are a big help, because they allow the crews to

go farther upstream every day. It is now a common occurrence for the Varsity crews to stage a tremendous sprint past the Watertown Arsenal, for fear that the sunset gun will catch them at too close range. Many crews finish under the light of the moon and carry the shells in under the combined illumination of the moon and the auxiliary searchlight mounted on the boat-house.

Improvement in both form and condition has been very noticeable within the last two weeks. The men finish in a fresher condition than they did a short time ago, and the closing sprint from the railroad bridge to the float is a sight to dismay any lurking enemy scouts. All crews are rowing a fast stroke, and time trials will undoubtedly be held sometime this week.

**'28 CLASS INSURANCE DRIVE ON THIS WEEK**

(Continued from page 1)  
part of this difference, and besides has the advantage of a safe insurance policy.

The sub-committee in charge of the drive is as follows: William J. Kirk, George P. Palo, Thomas S. Wood, Jr., Elliot B. Grover, Everett V. Lewis, Paul A. Johnson, John C. Melcher, David Y. Bradshaw, Edwin F. Cellette and Elisha Gray, all of the class of '28.

**SWIMMING BANQUET**

The annual banquet of the Varsity and freshman swimming teams will

be held at 6 o'clock, March 29. The banquet will be over at 8 o'clock in order that other plans for the evening may not be interfered with.

**RADIO SOCIETY**

There will be a meeting of the Radio Society in the radio station room in Building 35 at 5 o'clock this afternoon. All persons interested in radio are invited to attend the meeting.

**TECH SHOW ORCHESTRA**

All Tech Show orchestra men must be present for a broadcast rehearsal in East Lounge of Walker at 5 o'clock today.

**THE TECH BOOK LIST**

(Continued from page 2)

what is known of the characters. The climax to the story, in which the famous Nell Gwynn is involved, is exceptionally cleverly worked out. The use to which Elisabeth Pepys puts the information that she gleans from deciphering her husband's diary is indeed unusual. The whole story is exceedingly clever and enjoyable, whether one knows much of Pepys or not. It

bears resemblance in ways to the recent "private lives," and it is worthy of a place with them. It has taken a group of well-known characters of history, and by a combination of fact and fancy has given them a much wider appeal than they previously possessed. H. T. G.

**NEW DRESS CLOTHES FOR HIRE**

Tuxedos  
Full Dress  
Cutaways

**READ & WHITE**

not a bark in a bowl-ful!

(and of course, "not a cough in a carload")

Still another leading tobacconist in Boston, Mass., says:

*"The growth of OLD GOLD Cigarettes' popularity here has been amazing to me, but what interests me most is the way students stick to the brand after they start smoking it. OLD GOLD smokers don't switch."*

L. J. Peretti Co.,  
993 Boylston St.

AT LEADING COLLEGES. *This is an Old Gold year*

*For a most refreshing change:*

*"Follow your friends and smoke this smoother and better cigarette"*
