

HOLD ALL-TECH SMOKER TONIGHT

SOPHOMORE CLASS MEETS TO DISCUSS FIELD DAY PLANS

Team Coaches Need More Men To Assure Victory for Sophomores

H. S. FORD, Jr. PRESIDES

Chances for a triumph over the freshmen in the events of Field Day furnished the chief points of discussion at the Sophomore Mass Meeting last Wednesday afternoon. The attendance at the meeting was considered very good, and plenty of noise was to be heard in the neighborhood of Building 10.

Horace S. Ford, Jr., '31, was in charge of the meeting. It was opened with several lusty cheers for Technology, for the Class of '31, and even one for the Class of '32. These were led by Albert L. Eigenbrot, '29, who did his best to get the maximum of noise out of the assembly, by disparaging criticisms and the like. He gave to the Sophomores an ill-received warning of the possibility of a freshman victory.

Speaks On Freshman Rules

Enforcement of the Freshman Rules was the next subject presented. Ralph B. Atkinson, '29, Chairman of the Rules Committee, spoke upon the serious necessity of every Sophomore co-operating with the Rules Committee, in seeing to it that all the freshmen obey these rules. The wearing of the ties seems to be very well accepted, but the "hello" rule and the one concerning use of the lobby benches are being quite generally violated. Unless the interest of the second year men can be enlisted in real enforcement of these rules, they will only become jokes and will have to be dropped, it was said. The rules should be a greater success this year than last, for there is now a class which has been subject to them to back them up, yet the Rules Committee find this not the case.

Winslow Fitch spoke upon the necessity of more men turning out for the football team. So far there are only about fourteen men out, while there should be at least twenty-five. Fitch, a transfer from the University of California, has been coaching the team regularly.

Hedlund Needs More Runners

Oscar Hedlund, coach of the relay team, said that men were very urgently needed, for the matter of beating the freshmen this year is not to be a foregone conclusion but a real business proposition.

Bill Haines, crew coach, had very much the same story to tell. He

(Continued on Page four)

Freshmen Are Still Looking for Answers

Gullibility is supposed to be one of the things that every freshman is subjected to and the class of '32 is no exception. The well known trait of the green freshman to believe anything he hears comes to light again with the anonymous announcement made by THE TECH on October 1 that the Coop was putting out an answer book to Drisko's "Mechanics and Light." The freshmen swallowed hook, line and sinker to such an extent that the manager of the Coop is seriously considering having a phonograph record made to the effect that, "No, we haven't any answer book for Drisko's 'Mechanics and Light' and never expect to have." Perhaps the apparent innocence of the freshmen was partly due to their zeal to solve the answer to the now famous problem of the weight on a cord three feet long that was to be moved five feet horizontally. For further information apply to Professor Drisko, Room 4-244.

Program of Events Scheduled for Smoker in Walker Memorial Tonight

- 6:15 Dinner for freshmen and Transfers.
- 7:00 Speakers on Activities
C. Brigham Allen, '29—Student Government
Dr. John A. Rockwell, '96—Athletics
Professor Winward Prescott—Publications
Mr. Alexander Macomber, '07—Tech Show and Musical Clubs.
- 7:30 Recess to Activity Office.
- 7:30 Exhibitions of Sports in Gym.
- 8:00 Program in Main Hall for Entire Student Body.
- 8:30 Presentation of the Key to Walker Memorial by Mr. Alexander Macomber, '07 and acceptance of the Key by C. Brigham Allen, '29 for the Undergraduates.
- 8:40 Presentation of the Schwartz Medal by Dr. John A. Rockwell, '96.
- 8:45 Presentation of the Technique Cup by William B. Thomas, '29.
- 9:00 Moving Pictures of Institute life and freshman camp.
- 9:40 Songs led by Stephen W. Townsend and Percy W. Carr, '16.
- 10:00 Cabaret Acts.
- 10:50 Raffle.

FRESHMAN VOO DOO COMES OUT MONDAY

New Issue Promises to be Free From Conventional Forms

Carrying many new departures the Commencement number of the Voo Doo makes its advent on Monday. This number is novel in many respects because it is doing its level best to break away from the hackneyed slapstick of the conventional freshman number. Phosphorus is to depart from the role of the self appointed advisor of the freshmen and give our new comers some sparkling humor of a somewhat more sublime variety.

Some of the features the new number boasts are full page drawings by Chick Kane and Elmer; a long and very appropriate poem after the style of Dan Magrue; and a new artist Shelly who is doing some of the pictorial work in this issue.

Phosphorus also announces that he is soon to change his style and add some new departments to allow the pitiless light of publicity to play upon more of our nearest and dearest friends so that we may know them more as they are. Among the innovations will be different managements of the issue such as new styles in the heads and covers. The whole tendency of the changes will be towards making a great Voo Doo publication of definite identity and to lift it above the style of the ordinary college comic.

FIRST T. E. N. TO APPEAR OCTOBER 10

The Tech Engineering News will make its first appearance this year on October 15th. The issue will contain only generalized articles of a nature to appeal to any student interested in engineering. An article on Transatlantic Telephony by Doctor J. O. Perrine of the American Telephone and Telegraph Co. will be in the magazine. Howard T. Barnes, a professor at McGill University, has written an article about an unusual subject—the freeing of harbors from ice. Professor Barnes spoke at the Institute last year. The Industrial Application of Electric Furnaces has been written up by Mr. H. H. Watson. Mr. David Woodbury of General describes the strange phenomena of the Neo Electric Stroboscope. A graduate of Technology, F. Alexander Magoun, '18 gives advice to Freshman in an article entitled Education and Choice of Profession. A description of the Engineering Foundation by the director of it, with the usual editorial pages will complete the issue.

Band Will Lead Grand March to Field Day Battle

Students Who Play Instruments Still May Report for Band Practice

Technology's "Hellcats" as the R. O. T. C. Band is called make their first public appearance Field Day when they lead the grand march of both classes on the field at 2 o'clock, according to Arnold S. Ackiss, '30, leader of the band, they are to play on the field and during the football game and between halves of the game will entertain the crowd with popular numbers. Field Day will be concluded by all students standing and singing the "Stein Song."

Already 39 freshmen and 10 upper-classmen have reported for band practice, but there is still a demand for players. Tryouts for membership in the band will be held in the Hangar Gym next Monday at 4 o'clock. Men who can play any musical instruments are asked to report at this time. There is an especial need for trombones and bass horns. The Institute will supply musical instruments if necessary.

Distinguishing features of the uniforms this year will be an over-cape of cardinal and grey and a cardinal and grey cord on the sleeve. The band will appear at all formal military functions during the year such as parades and reviews. Practice is held on Mondays, Wednesdays, and Fridays from 4 to 5 o'clock in 3-270.

GLEE CLUB WILL BE IN NEW "MOVIE TONE"

The Fox News Co. after having heard the Technology Glee Club decided that it would be worth while to bring it before the eyes and ears of the world. Accordingly a "Movie-tone" of the organization is to be made within the next few weeks. The fact that such a large company believes the Club to be of the caliber that is wanted for the best movie theatres speaks well for the members and leader of the group. The Glee Club has been working hard and it is no little wonder that their efforts have resulted in what will be national recognition. Congratulations and best wishes for further successes!

Entertainment of Sports and Vaudeville Acts Will Honor New Men at Annual Event

Registrar Shows an Increase of 146 Men for New Year

Course VI Has Greatest Number of Students and Shows Largest Decrease

A survey of the number of men in all of the courses given at the Institute has been released by the registration office. This list is complete up to the third day of registration, and is practically complete as most of the prospective have registered at this time. Saliest features of the list show an increase in enrollment of 82 men in the freshman class, 41 men in the Sophomore Class, 10 men in the Senior Class, and 26 graduate students. The only class having a decreased enrollment is the Junior Class in which there is a drop of 29 men. Altogether the total enrollment for the term shows an increase of 146 men over last year.

Registration Figures for Various Courses

The following registration figures up to and including the third day of the term, this year and last, were issued by the Registrar's office.

Course	Enrollment 1927	Enrollment 1928
I	232	236
I-A	—	16
II	287	274
Torpedo Design	2	2
Army Ordnance	13	9
III	51	48
IV	179	208
IV-A	89	88
V	108	116
VI	321	227
VI-C	20	20
VI-A	206	214
VII	51	65
VIII	48	43
IX-A	8	9
IX-B	29	29
IX-C	18	19
X	261	265
X-A	30	39
X-B	5	9
XI	17	26
XII	12	23
XIII	39	55
XIII-A	15	12
XIV	51	50
XV	306	301
XVI	163	221
XVII	64	92
Fuel & Gass Eng'g.	15	12
UNC	26	42
Total	2672	2818

From the Registrar's figures we find that the greatest enrollment is in Course VI, including the options. For the other extreme, the course in Torpedo design has the least number of students, two, to be exact. That Lindberg is an inspiration is shown by the fact that Course XVI shows the greatest increase in enrollment, gaining 61 students over last year's mark.

CUBAN TOURISTS SEE INSTITUTE BUILDINGS

Several Cuban tourists, arriving in a large touring car, bearing Cuba plates were escorted through the various buildings of Technology. It is believed that this is the first time that tourists from that country and having a car with Cuban licence plates have visited the Institute. Mr. William Jackson, of the Information Office acted as their guide.

SMOKER STARTS AT 6.15 WITH BANQUET FOR NEW STUDENTS

Technique Cup and Schwartz Medal Will be Presented After Sports Program

RAFFLE TO BE HELD LAST

Walker Memorial will be the scene of an evening full of entertainment and enjoyment for the undergraduates when the Annual All-Technology Smoker takes place to-night. Over 600 freshmen and transfers will be the guests of the evening when they will be given a free dinner at 6:15 o'clock and entertainment with a complete program of sports, speeches, movies, vaudeville acts and other special numbers.

As the first of the after dinner speeches, C. Brigham Allen, '29, Chairman of the Institute Committee and President of the Senior Class, will explain the system of Student Government to the newcomers as it is carried out at Technology. Dr. John A. Rockwell '96 Chairman of the Advisory Council on Athletics of the Institute, will speak on athletics, while Professor Winward Prescott of the English Department will address the students on the various publications of the school. The final after-dinner speaker of the evening will be Alexander Macomber '07 who will describe the activities of Tech Show and the Musical Clubs.

All Undergraduates To Assemble At 7:30 o'clock all of the undergraduates of the Institute will be permitted to enter Walker Memorial for the evening program of entertainment. (Continued on Page four)

ELECTRICAL SOCIETY PLANS ON BUSY YEAR

First Supper-Meeting Will be on Friday, Oct. 19

Opening its winter program with a meeting on Friday, Oct. 19, the Technology Electrical Engineering Society plans a varied and extensive program for the coming year. A continuation of their bi-weekly supper is planned, at which anyone of an engineering bent of mind can have an interesting and instructive time. At these suppers the society plans to continue its custom of having well-known engineers of various large electrical concerns speak to the students and explain to them the requirements expected from them in future life.

This year the society will attach great importance to papers written by students. Several prizes will be given for the best papers of the year. These papers are symbolic of the work expected of the electrical engineer in industrial positions and give an excellent training for future work.

Membership in the student society usually leads to membership in the American Institute of Electrical Engineers. At present most of the new members of this Institute are recruited from the many student societies. As soon as a member of this society graduates he at once becomes an associate member of the A.I.E.E.

CALENDAR

- Friday, October 5
6:15—All-Technology Smoker, Dinner, 7:30—11:00, Walker Memorial.
- 7:30—All-Technology Smoker, Main Hall, Walker Memorial.
- Monday, October 8
7:30—Schwartz Memorial Society Meeting, Emma Rogers Room.

"WHERE THERE'S SMOKE—"

"THERE'S fire," as the old saying goes. And believe it or not, there'll be plenty of smoke at the All-Technology get-together tonight. Whether you prefer to be blindfolded, or like them toasted, you'll be satisfied. Or bring the pipe—or don't smoke at all.

Which all goes to prove that there should be a lot of fire there, and the committee's promises seem to indicate that the pep and fun will make the evening a merry one. Good food, snappy talks, songs, movies, and some mysteries which sound awfully interesting—what more do you want for an evening?

This is the first, and one of the few yearly affairs, where the whole student body has the opportunity to mingle together. Of course, there are banquets, dances, smokers, and parties throughout the year, but they are generally for a particular group. This is an occasion when everybody is there—all the classes, and graduates and faculty join on this night to have a large time. You newcomers may take the word of those of us who have seen these affairs before—you're missing a lot if you don't come.

You freshmen are particularly urged to be present. You, most of all, need to realize what the real Technology spirit is. Outstanding undergraduates and Faculty members will show you what that side of the Institute life is which you don't see over in the classroom. These will not be dry speeches, but informal talks, interesting, something you'll be glad you heard. You've probably been crabbing all fall about how much things cost—here is the chance to enjoy yourself to the utmost, and all for nothing. Dinner for first year men is at 6:15, and even that won't set you back a sou.

This year we come to a school which has enlarged its buildings, beautified its grounds, added new courses to its fine curriculum; a larger freshmen class than ever was admitted; the activities and sports show promise of a very successful year. The All-Technology Smoker committee has made plans to keep up with this improved tone at the Institute. All they need is student support, and all it costs you is a little time. Let's give it to them!

INTERESTS AND GULLIBILITY

INTERESTS of a technical nature naturally prevail over all others in Technology students. And these interests are pursued here so relentlessly in countless cases, and to such a degree, that in many individuals they become obsessions. The cultural interests, to speak of one phase of extra-technical interest, which should exist equally with the technical pursuits, are submerged to a plane far below their true value. The result, as we have long since found, is a well-trained engineer, but a very inarticulate social being.

This situation, which has the earmarks of a provincial reactionary atmosphere at Technology, is not a sudden outgrowth but one to which many have acquiesced with a mere shrug of the shoulders. But now we propose to shed light on these cobwebs and explode their feigned innocence by throwing a few bombshells into their midst. What we need is some fresh air, a new enlightened atmosphere—something refreshing, exhilarating.

This year we are witnessing one of the most interesting political campaigns since the famous Bryan oratorical contest of 1896. The Democrats have put forward in Smith one of their most dynamic personalities. The conservative Republicans have nominated for the Presidency, Hoover, a man whose administrative and executive abilities are lauded to the skies by his associates. These two men have been placed before the electorate as candidates for the highest office in the land. Their records deserve the closest analysis, and their abilities a most careful study. As an excellent cultural interest, we recommend this political campaign as one that should receive an enthusiastic reception in the minds of all students. We would not like to see college men prove themselves gullible fools in so important a matter, particularly when they have every opportunity to inform themselves intelligently.

In past years the Lounger has heard students judge the success of the entertainment at the All-Tech Smoker by the laughter of Obie Denison and the tint of the cheeks on the trespassing coeds and faculty dames. But alas such will no longer be the case. For Obie will be miles away, the coeds and faculty dames will be forcibly ejected should they manage to dodge past the doormen, and the entertainment will be notorious for its genuine, scrupulous sanitarianess.

The Lounger wonders just how far in the feminine element will get before the bouncers begin. Tech circuses have long been the means of rating the ingenuity of the more inquiring coeds, but now that they are passe what is there left for a coeducational spree but being able to blush on the balcony during a men's smoker?

Big Boy Karas, it is said, has given an unmentionable sum for the privilege of introducing the professional talent tonight. Why they should pick a kid used to working only around the boat house where men are men to lead the sole representatives of femininity to the stage sure beats the Lounger. Does anyone know if Os has found the asbestos mittens he has been looking for the past week and a half?

Speaking of cigarettes, past committees have never found a method of keeping the front row guests from walking off with all the cartons they

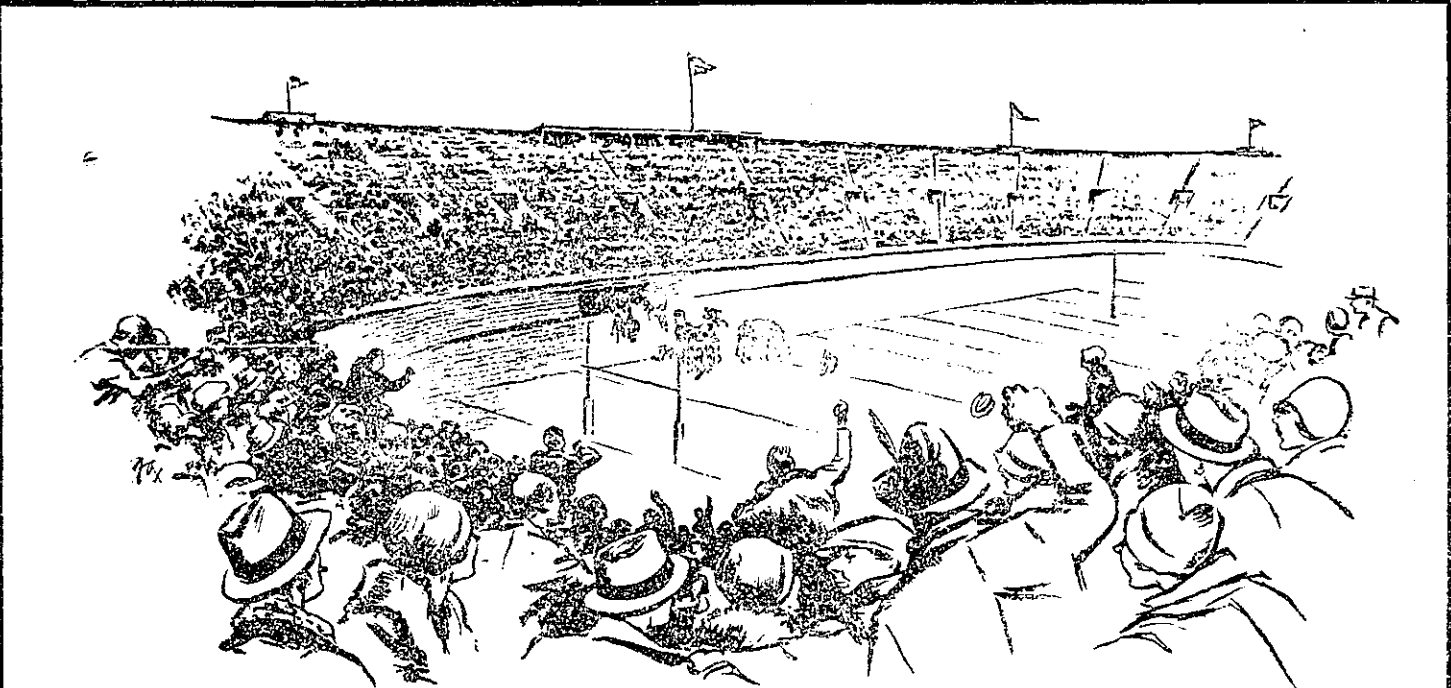

pass out. The Lounger suggests that they could very capably combat this if they would use the same non-coughless Rolled Cold brand that some company gave away last term.

Among hints to the ladies, here is a little news gem the Lounger got from Gilbert Seldes in "The Stammering Century": "Amelia Bloomer, pioneer in reforming women's fashions, did not make the first pair of bloomers. They were made by a neighbor, a Mrs. Miller, and ought to be called millers. But Mrs. Bloomer was a notable woman leader and her name stuck to the garment which was supposed to herald new freedom for women. Oddy enough

the Bloomer costume was derived from that of the least advanced women in the world, the slaves in the harem." Which reminds the Lounger: who was the handsome engineer plying the needle up in the Voo Doo office a day or so ago? Damn clever, these cats.

After the cheering

THE great stadium seems a living thing, swaying, swinging, moving with each play on the field. When the last fan has gone and there remains only crumpled programs and bits of torn tickets, the stadium takes on another aspect—cold, strong, gigantic, its empty seats rising row upon row.

Have you ever stopped to consider what it means to build a stadium? More than concrete, more than steel and cement go into it. Knowledge of climatic conditions, drainage conditions, subsoil. Knowledge of engineering and construction. For the stadium must be as permanent as a power plant or dam.

Stone & Webster's engineers design and build stadiums, power plants, factories. Twenty millions of people are now supplied with light and power furnished by stations built by Stone & Webster. The story doesn't end with construction. Stone & Webster finances utility and industrial concerns, and operates gas, electric and transportation companies in many parts of the world. You'll find the Stone & Webster organization is worth knowing and worth doing business with.

STONE & WEBSTER INCORPORATED

Twenty-five thousand Stone & Webster men know that the growth of a public utility company depends on its success in serving the public.

SOCCKER TEAM OPENS SEASON TOMORROW

Time Trials for Harriers Will Be Held Next Week

Cross-country is beginning to take the center of the stage among the fall sports with a large number of men trying for both the Varsity and freshman teams. The Varsity has twenty-four men working hard every day. Out of this group Coach Hedlund should have no trouble in selecting a team of ten good men at the time on October 13, the first to be held on the new course at Winchester. The men are at present very well matched and the competition for places among the first ten will be close.

Captain Worthen has been leading the squad every day at practice. Dick Baltzer, captain of last year's freshman team, with his running mates, McNiff, Albright, McBrayne, and McSheehy, are certainly showing something for the other men to work for. These men are sure to be very much in the running at the time trials.

26 Frosh Out For Relay
Twenty-six freshman candidates have reported to the coach, and most

of them are men who have had experience in high or prep schools. Conant, Gilman, Jewett, Littlefield, Rogers, and Leichenstein have all had some experience in track, and they are beginning to show, after a week's workout, that there are fine possibilities for a good freshman cross-country team. They will also have their trials at Winchester a week from Saturday, working on a 2 1/4-mile course. Coach Hedlund will pick the ten best from this group.

The Soph-Freshman relay this year should be one of the best in the history of the Field Day games. Some of the new freshmen, particularly Lynch, Wayne, Regan, and Beck, have shown some good form in practice. They have had considerable experience and with the intensive training to the second of November they should push the Sophomores to a new record in this event.

Soph Team Strong
The Sophomores have an excellent team, which shows a marked improvement over last year. With a wealth of material which has been developed since last November Coach Hedlund will have difficulty in selecting the twelve best men. Already Orleman, Broeder, Ayers, Wood, Ford, and Lappin have shown good work. The first time trials will be held shortly and at that time Coach Hedlund will pick twenty-eight men to pass the baton in daily practice, in order to avoid any possibility of failure to do this with perfection.

It is not too late for other men to come out for either team, and everyone who can run is urged to report to Coach Hedlund as soon as possible.

Local Smoker Learns Bitter Lesson Abroad

New York,
March 13, 1928
Larus & Bro. Co.,
Richmond, Va.
Gentlemen:

I have used Edgeworth Smoking Tobacco for the past twenty-five years. Two years ago I took my trusty briar along on a trip abroad, intending to purchase the delights of the famous London. I confess that I was very sorry along with me any of the products of Edgeworth. But the moment I went back to Edgeworth's time I had to pay 40c for a pack of Edgeworth's. On a trip through England and later through Ireland, I found it to be the only tobacco with distribution in both. A frequent and familiar name in Dublin, Cork and other parts of Ireland was a white steamer bringing a new shipment of Edgeworth's. To make such a conquest in the home of smoking tobacco must be very gratifying to your house.

Sincerely,
J. B. Kelly

OPPOSE BRADFORD DURFEE ON COOP FIELD IN OPENER

Tentative Lineup Announced by Coach Welch—Backs Plentiful
GAME STARTS AT THREE

Technology's Soccer team will open the season against Bradford Durfee Saturday afternoon at three o'clock on Coop field. In a scrimmage Thursday afternoon the team seemed to be in good condition and the fact that they are playing on their own field will be a big aid in the Engineers starting the season off with a victory.

Aided by several men from Boston University, a lively scrimmage was held Thursday afternoon. The regulars battled the subs and the B. U. men. Coach Welch gained considerable information as a result of this battle and has arranged a tentative lineup for Saturday's game.

Wyman will be found at his old position as goal guard. Hawkins, McDowell, and Riehl are the candidates for the full back positions and it is likely that all three of them will do some playing in Saturday's game.

Cooper, Kabit, Kim, and Fahey will alternate as half backs, the two who show up best Saturday will probably be chosen for the team. As these men are all good players it is probable that they will alternate throughout the season.

There are quite a number of men out for the forward positions, with the exception of outside left as none of the forwards seem to be able to play this position well. Coach Welch does not know whom he will run in this position and it is likely that a number of men will see action in this position.

Among the men who are likely to be in the forward line are Baroudi, Kashemsanta, Saunders, Vibul, Krellano, Youngson and Gutierrez. Of these Baroudi and Youngson played on last year's team. With the large number of men out this year the team should not have any trouble in winning a large percentage of their games.

Football Teams Looking Towards Field Day Game

Both Teams Have New Coaches. Frosh Squad Losing in Numbers

Field Day football is getting under way in earnest at last and if the size of the squads that are working out on Tech Field each night is any indication there is going to be a hard fought game on the second of November. With experienced men getting into the coaching of both teams and the first games only about ten days off the squads are getting a taste of real training.

Wednesday's mass meeting for the Sophomores seems to have put some real spirit into the class at least as far as football goes for Wednesday saw the biggest group of Sophs at practice that has been seen so far this fall. Fully eight of the twenty-five men out that afternoon are members of last year's outfit. Some of the veterans present were Boynton, Kamy, Morse, Grondal, Wilson, Lammoreff, McMinn, and Coffey.

At present the coaching of the second-year men is in the hands of Mr. Fitch. Fitch is a member of the Sophomore class and has had a lot of football experience as a member of the University of Southern California team. He has plenty of assistance from Kontoff a former star Boston University player.

Last year's huddle system that was so effective against the class of '30, has been abandoned in favor of a new set of signals that have been devised and which include some of the best plays of last year. Wednesday saw the men in light scrimmage and as soon as some suits can be obtained real hard work will be on the daily program.

From the wonderful showings the frosh made at the first of the practice sessions there has been a very gradual drop in attendance that doesn't look very encouraging, but taking into consideration the fact that the Sophs are just getting under way the yearlings still have the jump.

Probably the falling attendance was due to the fact that there was no regular coach to direct the workouts and the men were forced to plug along by themselves breaking up into groups and being able to get in only a small amount of ground-work.

SEVENTY FROSH WORKING OUT DAILY AT BOATHOUSE

Morning practice started on Wednesday last, for all the crews. This is the regular program at the boathouse each fall as it becomes dark too soon after five in the afternoon for practice after classes. The attendance at the boathouse has been well over the average for past years, over one hundred men reporting regularly each day. This number includes forty five upperclassmen and over seventy freshmen.

With three Varsity crews reporting daily Bill Haines has many experienced oarsmen at his disposal from which to pick his varsity crew for next year. Last year's freshman crew is rowing practically intact this fall as one of the Varsity boats. The other two Varsity boats are made up of Varsity, Jayvee, and ineligible from last year. With such a group of material Bill Haines is looking forward to a banner season next spring.

An ineligible crew will be formed next week for all those who are interested in rowing but ineligible for Varsity competition. The prospects for such a crew are exceptionally good this year as Kelsey and Erickson, two Varsity men of last year, are taking graduate work at the Institute, and will undoubtedly row with the ineligible this fall. Doherty who rowed with the ineligible for the past two years is back at the boathouse again this fall. The crew will be coxed by a former Yale coxswain who

GYMNASTS PERFORM AT SMOKER TONIGHT

Several members of the Institute gym team will give an exhibition for those who attend the annual All Technology Smoker tonight. All of the regulars are expected to put on a series of one kind or another. As it is quite early in the season none of the men have developed the series that they expect to use in the meets but they have a number of stunts that will thrill the spectators. Norman Dolloff is expected to work on the mat doing his back flips and somnies. At the mass meeting on Monday he went through a series in good style and he will probably repeat this again tonight.

transferred this fall. The first regular workout for the ineligible is scheduled for next Monday at 7 A.M. All men who are interested in such a crew should report at that time.

Annual Smoker to Be held in Walker Memorial Tonight

Sports and Cabaret Acts Feature on Entertainment Program for Evening

(Continued from Page One)

ment. After the dinner speeches, the students will visit the activity offices of the building which will all be ready for inspection by the visitors. At that time student leaders of the various activities will be present to explain the functions, and duties of the undertakings and efforts will be made to interest the newcomers in coming out for the competitions now going on.

Those interested in sports will go upstairs to the gymnasium where there will be exhibition bouts put on by the Varsity Boxing and Wrestling teams. The Varsity Gym Team is scheduled to put on a series of gymnastics which will be the feature performance of the sports program. Some of the point winners on the varsity who scored last year in the Intercollegiate will be there to give a special demonstration which will be their first appearance of the year.

Awards Will Be Presented
A general assembly of all the students will be held in the Dining Hall immediately at the conclusion of the sports program. The annual presentation of the key to Walker Memorial to the student body by Mr. Alexander Macomber, '07, President of the Technology Alumni Association will take place at that time and it will be accepted by Brig Allen. This event is a traditional feature of the Smoker and gives the men an insight into Technology history which is naturally included in part of the speeches.

Presentation of the Technique Cup to the track man still at the Institute who scored the most number of points in the track meet last year, will be followed by the awarding of the Schwartz medal. This prize is given each year to the man who has been adjudged the best athletic manager for the past year. The secret of who is to receive these awards is never known until the night of the Smoker.

Cabaret Acts On Program
What is considered by many students the high light of the entertainment program will be the cabaret acts by professional dancers and singers. Last year they proved to be very popular with all those present and the committee promises that this evening's performance will be much more snappier than last years. The exact order in which the various vaudeville acts will come off is not known but it includes singing, dancing, and acting. The feature number of the evening which will probably make the biggest hit will be the dancing by Gretchen Grant and Ruth Prineau. They will be accompanied by Ben Macomber on the piano. An impersonating act will be given by Hazel Childs in addition to several specialty numbers that will be given by the performers.

During the evening there will also be a great deal of singing and cheering by the students. Stephen W. Townsend and Percy W. Carr, '16 will lead in the songs and in addition they will entertain at various parts of the program with special numbers of their own.

FRESHMEN CREW MANAGEMENT

All Freshmen who are interested in the crew management competition should report this afternoon at 5 P. M. to the manager at the Boathouse.

Institute Professor Gives Object Lesson

After spending several minutes lecturing to his class upon the financial losses that would be incurred if a Sophomore should injure any of the expensive meters, Professor Newell C. Page, of the Physics Department, accidentally gave a practical demonstration of how to act under such circumstances. He was demonstrating the uses of the galvanometer, explaining what precautions to take, when he shorted the large wall galvanometer on a "B" Battery. Without appearing the least bit disturbed over the damage, the professor, changed to another instrument and proceeded with the lecture. Moral: don't damage any expensive electrical apparatus unless you are a member of the Institute.

Arrangements Are Being Completed For T. C. A. Drive

Will Announce Budget for This Year in Latter Issue of THE TECH

Arrangements are being completed for the annual T. C. A. Drive. The drive which will commence Monday, November 5, and continue until Friday, November 9, will be open to anyone wishing to assist the Association in carrying out its work.

This year's drive will have for its quota a budget that is lower than last year's. It is through the money received in this way that the T. C. A. is able to issue the Handbook, to maintain the Room Registry, The Undergraduate Employment Agency, The Industrial Service, The Book Exchange, The Information Service, Church Relations, and the Foreign Students Service. Advisors are also

appointed to assist the incoming Freshmen in becoming familiar with the Institute.

Budget Not Decided Upon

Figures concerning this year's quota will be announced in a later issue of THE TECH. Last year the amount was \$3100, of which \$2300 was received, therefore causing the budgets of some of the departments to be reduced. Consequently the scope of some of the activities had to be considerably limited.

Students are always welcome at the office in the basement of the Walker Memorial. Information may be had for the asking upon nearly any subject concerning the Institute.

There are several openings for students who are interested in any of the T. C. A. departments, such as the Handbook Department, and other branches. Information concerning the above subjects may be had by applying at the office.

Freshman Camp Is Success

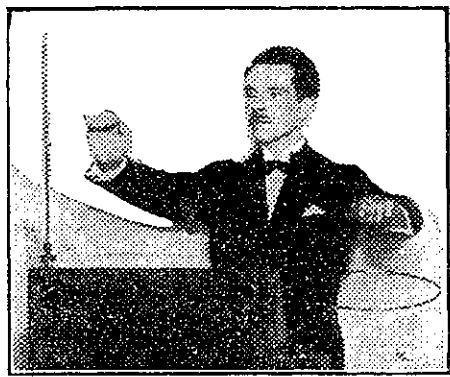

There were about 30 more freshmen attending the Freshman Camp this year over last year which shows that the idea is becoming more popular every year. However, the T. C. A. lost approximately \$2 on every man at the camp.

SOPHOMORES PREPARE FOR FIELD DAY FRAY

(Continued from Page One)

stated that the freshmen were turning in large numbers, while Sophomores had just the bare number necessary for their team. He said that of course he realized there is a sad lack of time, but he urged that men try to come down to the crew house mornings before school.

Cheers for these various activities were given by the assembly between the speeches. These cheers included of course the old Technology standards, as well as a new cheer which was tried out, consisting of three M.I.T.'s and then nine "rah's" in rapid succession. It was hinted that some fellows might practice counting to nine.

PROFESSOR THEREMIN GUEST OF PRESIDENT

Professor Theremin of the Leningrad Polytechnic Institute who is giving a recital at Symphony Hall Sunday afternoon will be a guest of President Stratton at the Institute today. In the last issue of THE TECH it was stated that Professor Theremin would give a demonstration and explanation of his Ether-Wave Music Instrument at the Institute but this has been changed.

"The habit of criticism grows upon us because criticism is the easiest thing in the world. It does not take a thimbleful of brains to find fault, and the biggest numskull in the world can find fault with the greatest men in the world. We flatter ourselves that criticism is a sign of superior intelligence. It is not. It is usually a sign of bad manners, of lack self-restraint, and an entire ignorance of psychology.

Dr. Frank Crane

Old Gold hits a homer for Babe Ruth in Blindfold cigarette test

"Yes, I am well over 21... so I could see no reason why I shouldn't make the blindfold test. As I tried the four leading cigarettes I kept this 'box score' on the results:

- No. 1 out at first
- No. 2 . . . this one 'fanned'
- No. 3 . . . out on a pop fly
- No. 4 (OLD GOLD) a home run hit!

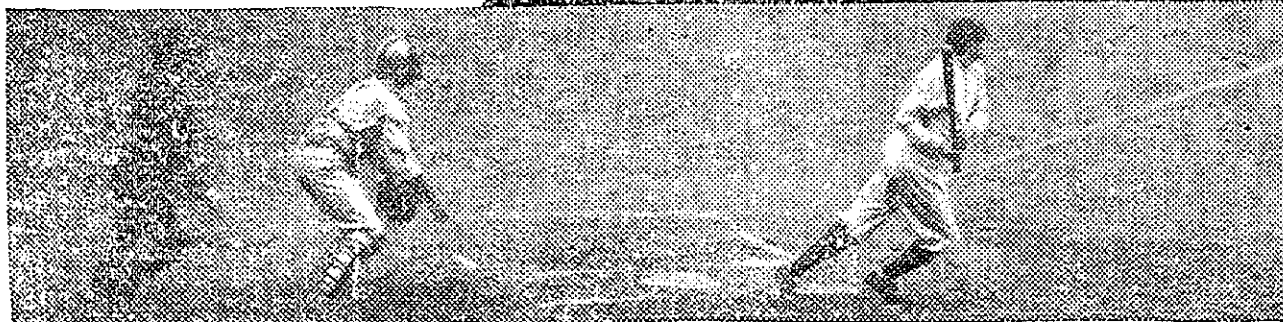

"OLD GOLD'S mildness and smoothness marked it 'right off the bat' as the best."

Babe Ruth

The idol of the baseball world... "The King of Swat"

BABE RUTH... making the test in the dressing room at the Yankee Stadium. He was asked to smoke each of the four leading brands, clearing his taste with black coffee between smokes. Only one question was asked: "Which one do you like best?"

On a non-stop flight to the bleachers! . . .

Made from the heart-leaves of the tobacco plant

Why do they choose OLD GOLD... even in the dark?

What is this superiority that wins so many famous people? It's simply honey-like smoothness... the new and delightful quality that OLD GOLD has added to cigarettes. And it comes from the heart-leaves of the tobacco plant... the finest tobacco that grows. That's why you can pick OLD GOLDS with your eyes closed.
