

HEDLUND REVIVES HARE-AND-HOUND INTERCLASS RACE

Competitors Will Run Through
Cow Pastures, Streams
and Bogs

MANY ENTRIES EXPECTED

Gold, Silver and Bronze Medals
Are Awards for Winners
Of Events

After several years among the list of forgotten traditions of the Institute inter-class cross country has been revived by Coach Oscar Hedlund. For a long period of years in the past, Hare-and-Hound races were held every year on the old Brookline course. These races, as the term implies, were run in the open country, over cow pastures, streams, fences, and bogs, and were "cross country" in every sense of the word. The interest of the students in this form of sport was very great, as was shown by the large numbers that participated.

With the march of progress available ground for Hare-and-Hound racing became scarce, and the Institute was forced to discontinue the sport. With it disappeared the only form of inter-class cross country competition.

Free-for-all Race October 27

In order to renew the former interest in class competition of this kind, Coach Hedlund has arranged for a free-for-all handicap meet, to be held on October 27. It will be run on some good course, and will be about three miles in length. The coach wishes everyone who is interested in such an event to report as soon as possible, as it is not too late to get into condition.

The race is open to every student of the Institute who wishes to compete. As an added inducement three medals are to be awarded as prizes to the winners. The medal for first place is gold, while the other two are silver and bronze for second and third places respectively.

Long List of Entries Expected

With the Varsity men in good condition at that time and the freshmen keeping up their good record, the race should be close throughout. If the old Technology spirit has not been dampened there will be a long list of starters.

The men who have already been out for the team have been practicing daily and are rapidly getting into mid-season form. Today a group of Varsity and freshman hill-and-dalers will work out on the old course at Franklin Park, and a great deal is expected of them.

SAFETY COUNCIL TO MEET IN NORTH HALL

Newly Formed Women's Division
Makes Good Start

Opening their winter program of dinner meetings the Massachusetts Safety Council will have their first meeting in North Hall, Walker Memorial, Thursday evening. This body of men is appointed by the Governor of the Commonwealth to investigate and prosecute measures promoting the Public Safety.

Starting their season a little in advance of the men the newly formed women's division of the Council had their first meeting last week. The Safety Council has been making Walker its meeting place for the past two seasons and the size and enthusiasm of the gatherings has been steadily increasing. Their discussions are characterized by the prominent speakers who bring up the latest steps being adopted through public and private agencies for the promotion of greater safety.

Their work is certainly of very great importance at the present time with the steadily increasing rate of deaths through automobile accidents. At the National Convention of Safety Committees in Washington a short time ago was stated that for the month of July of this year the auto fatalities amounted to the unprecedented figure of seventeen per day.

14 Kinds of Paddles Build Big Blisters

Fourteen samples of wooden paddles which will be made to order for students' use are on display in the woodworking shop in building 30.

The sizes vary from short, squat, ping-pong paddles to long curving baseball bats. Holes punched to order in the paddle blades guarantee to raise blisters to fit the size of the victim. The paddles are made of straight grained wood to prevent splitting when subjected to sudden strain. Some are made with long handles to allow two hands to be used to increase the leverage. Many fraternities burn their initials into the paddle blades in order to leave the desired impression.

R. O. T. C. CADET OFFICERS NAMED

Enrollment in Advanced Courses
Shows Large Increase
in Air Service

Announcement of the following appointments and promotions of cadet officers in the Reserve Officers Training Course is made by the Department of Military Science:

To the rank of Major and Battalion Commander Raymond P. Delano, Jr., '29.

To the rank of Captain and Battalion Executive George T. Brady, '30.

To the rank of Captain and Company Commander.

"A" Company, Arthur B. Marsh, '29.

"B" Company, Milton Male, '29.

"C" Company, Donald S. Fraser, '29.

"D" Company, Joseph Harrington, Jr., '30.

"E" Company, Amasa G. Smith, '29.

Figures from the department of Military Science on the enrollment in the different corps on the advanced Reserve Officers Training Course show no increase in total enrollment in the first year over the second. There are, however, several shiftings in the different corps, the air service making the greatest increase and the Chemical Warfare making the greatest decrease. The figures are as follows:

	ADVANCED COURSES	
	First Year	Second Year
Coast Artillery Corps	25	38
Air Service	13	33
Corps of Engineers	32	24
Signal Corps	10	9
Ordnance Department	30	27
Chemical Warfare	30	9
Total	140	140

PRESIDENT STRATTON IS KEPT VERY BUSY

President Samuel W. Stratton seems to be a busy man as is evidenced by the fact that along with his regular work at the Institute he is chairman of a government committee and a Safety Council not to speak of numerous other activities. Furthermore he often gives talks before various bodies.

Just before he sailed for Europe in July President Stratton received from Secretary W. C. Wilbur an appointment as Chairman of the Submarine Board of the Navy Department for investigation of methods of salvaging submarines. Working with President Stratton are Mr. M. R. Witney, Mr. T. A. Scott, and Admiral Joseph Taylor. In connection with this committee the President of the Institute has to make trips to Washington almost weekly.

During the meeting of the American Society for Mechanical Engineers held at the Hotel Statler from October 1 to 3 President Stratton gave an address on Wood Engineering. October 4 found him presiding at a meeting of the Council on Safety on Aviation in New York.

BRIDGES AND PUNG GIVE ANNUAL DORM PARTY IN WALKER

Prizes Will be Given to Winners
of Pool and Bowling
Tournaments

BUFFET SUPPER AT 9:30

Mr. Albert W. Bridges and Mr. Edgar Pung, following the policy inaugurated last year, will give their annual party to the dormitory men, in Walker Memorial, this evening, at 7 o'clock. The first party was given last February, when 175 dormitory men were entertained and a buffet supper was served.

This year, a much larger crowd is anticipated since there will be no conflicting social event. Chef Harry Casalon, who has been at Walker for ten years, will prepare a buffet supper consisting of several salads, meat courses, French pasties, cakes, doughnuts, chocolate, and coffee. These will be served in the main hall from 9:30 to 11 o'clock.

In the basement of the building, bowling and billiards will be open and free to all men. An elimination tournament in both bowling and pool will be started at 7 o'clock, the winners to receive various prizes. Cigarettes, cigars, corn-cob pipes, and tobacco will be distributed free of charge.

There will be music, singing, and dancing in the main hall, while the buffet supper is being served. The policy of annually entertaining the dormitory men was adopted for the purpose of promoting the good will of these men toward Walker, and in some measure to show appreciation for their continued patronage. In view of the increased number of men residing in the dormitories, the managers expect to entertain nearly twice the number that attended the party last February.

ROGER W. BABSON '98 WILL GIVE ADDRESS

Roger W. Babson, '98, head of the Babson Institute will speak to the student body at four o'clock on the afternoon of October 17 on the subject, "Forty-nine ways to make a Million." This should prove quite interesting to the embryo struggling young engineers and should prove a worth while address. Mr. Babson will address the Faculty Club on the same subject at their annual dinner that night.

Freshman "Hello" Rule May Change to "O Hell"

Startling results were found, when with characteristic optimism, an investigator from THE TECH was detailed to gather statistics on the "Hello" rule.

It appears in the first place that, although there are some 2800 students at the Institute, a freshman in his wanderings comes within speaking distance of but few upperclassmen.

During a full day, from 9 until 5, only 126 came within call of his clarion clamor. Of the 126, 26 gave a prompt and courteous "Hello" in response; 14 managed to squeak a tardy answer from the depths of the corridor beyond. Thirty-four upperclassmen were so preoccupied in snatching a few moments of study between classes, lost in ecstatic dreams of reverie-land or garbed in a protecting supercilious, see-through-you-worm, air, that the bashful investigator dared not challenge them. Then, as a final climactic statement, let us record the fact that 52 upperclassmen met face to face and spoken to, gave not the slightest recognition of the speaker's existence.

In contrast to this freshmen responded 100% to all "Hellos" addressed to them. In view of these statistics perhaps the lowly frosh will be tempted to say rather than "Hello", "O Hell" and call it a day.

Volunteers Needed to Coach Freshman Team

Are you a football coach? If so, the freshman football team would like to occupy a part of your time until Field Day. It is not fair to allow the Sophomores to have such an advantage over the yearlings eleven. There is much good material among the twenty-eight men who are on the squad, and all they need is order to give their opponents a good fight is some coaching. Several interesting games are scheduled for the season, including matches with Tufts Freshmen, Boston University yearlings and St. Anselm's preparatory school. Anyone desiring to assist these men is requested to see Samuel Woodruff at the track house any afternoon at 5 o'clock.

REPUBLICAN CLUB AT THE INSTITUTE

Club Organized for Revival of
Political Enthusiasm
in Students

In view of the coming presidential election many Tech students should be interested in the Republican Club which is now being organized. Any person desiring to become a member or to find out more about this club can do so at a desk in the main lobby where members are being enrolled. Cards of invitation were sent to prominent men and fifty replies have been received already.

The club has been formed for the purpose of presenting political speakers of ability to the student body of the Institute. It will attempt to awaken the dormant interest with which most students look upon political affairs, with the ultimate hope that they may continue to follow politics with a keen and absorbing desire for better government.

Mr. Otto C. Kohler, temporary chairman, states that the first meeting will be some time next week. The merits of the club were brought to the attention of the faculty and no objections were raised by that body. As the Constitution has already been presented to the Institute Committee for recognition it seems as though the club will soon be under way. Mr. Kohler further states that as there are to be no dues there is no reason for anyone not joining who is interested in the work of the club.

PHOTOS TO BE TAKEN INDOORS THIS YEAR

Technique has completed its plans for the taking of photographs for this year's issue. The White Studios of New York will have a photographer ready to take pictures at any time from October 29 until December 8. All appointments for fraternity, committee, club activity, fall and winter sports, and society photographs must be made before October 15 or the photographer cannot guarantee that the appointments will be kept.

Senior and other individual picture appointments should be made immediately, as all these pictures must be taken between October 29 and December 8.

This year, all the pictures are to be taken in Room 11-004 of the Homberg Memorial. This is planned to prevent the delay and inconvenience usually arising from adverse weather conditions when the pictures are taken outside.

ANNOUNCE NUPTIALS OF M.I.T. GRADUATE

An announcement of interest to many has been recently made concerning the engagement of Dr. William P. Allis, '23, to Miss Margaret James of Belmont. The date of the wedding has not yet been decided, but it will be held some time in the near future.

After his graduation from Tech of Nancy, France. At present he is nology Dr. Allis received his Doctor of Science degree at the University of a research associate in the Physics Department of the Institute.

FRESHMEN LEADERS MEET AGAIN TODAY TO PLAN FIELD DAY

Freshmen Are Urged to Come
Out for Football and
Tug-of-War

MEET EVERY WEDNESDAY

Jenkins, Weller, and Hall Elected
To Membership On the
Rules Committee

Freshmen section leaders are called to the second meeting of the year this afternoon in Room 10-275 at 5 o'clock. The chief business of this meeting will be a discussion of the reports of the committee-men in charge of Field Day affairs were elected at the last meeting a week ago, and the results of their activities will be heard today. The crew and relay teams are fairly well provided for, but it is urged that more men are needed out for football and tug-of-war. The freshmen are looking forward to victory over the sophomores in some of the events at least.

The three men who were elected to the Freshman Rules Committee at the last meeting are announced as Thomas H. Jenkins, Charles L. Weller and William A. Hall.

These meetings of the freshman representatives are to be held regularly every week on Wednesdays in Room 10-275 at 5 o'clock. Three leaders from each section have been elected and one representative at least from each section is expected at every meeting.

CIVIL ENGINEERING SOCIETY MAKES TRIP

Students Examine Suspension
Bridge at Bristol

Taking its first trip of the new year the Civil Engineering Society of the Institute, traveled to Bristol on Monday afternoon. While there the students examined the new suspension bridge which is now in the process of construction at that place. Several of the engineers in charge of the works acted as guides by explaining the different operations of the work which is to be completed by next June.

During the school year the Society is planning to make several such trips as last Monday's. The schedule of trips has not been definitely arranged, but it will soon be completed. Between 65 and 70 students went on the trip which was made in a large sight-seeing bus and private automobiles.

Other future functions include talks by the leading engineers of the country, smokers, and supper. Membership is open to all classes, and those who wish to sign up, may do so any afternoon between three and five in Room 3-212.

CALENDAR

Wednesday, Oct. 10

- 5:00—Meeting of Freshmen Leaders, Room 10-275.
- 5:00—Meeting of Camera Club, Room 3-270.
- 5:00—Debating Society Meeting, Room 2-178.
- 6:30—Faculty Club Dinner, Twentieth Century Club.

Friday, Oct. 12

Columbus Day—Holiday.

Monday, Oct. 15

- 5:00—Meeting of Radio Club, Room 10-200.

POLITICS GALORE

ALTHOUGH we emphatically disagree with some of the ideas and principles underlying the political movements of the present presidential campaign, we heartily approve of the fundamental ideas back of these activities. Encouraging signs of such activity have been seen around the Institute in the past few days, and others should appear before long. It is not very surprising that the Republicans of the student body were able to get the jump on the Democratic and Socialist members in organizing a fighting unit for their candidate. But we should be innocent babes if we didn't expect these latter factions to begin similar activity in the near future. We want disagreement, not harmony.

Every man whether he be eligible to vote or not and who has a flexible mind that can hold more than one idea at a time, and is capable of doing a little thinking for himself, should, if not actively, participate in these movements. Sign up with one of the political clubs, and attend the meetings and rallies of all. With an open mind to receive and cogitate the thoughts presented at these affairs, an intelligent decision based on an intelligent survey can be reached.

Although the Liberal Club, which began its career yesterday at a meeting, has not announced at this writing whether it will discuss the presidential personalities, its discussions on the issues that are vitally important today should prove highly enlightening to those who are in a dilemma on the whole problem of party principles. In conjunction with the study of these questions at the Liberal Club meetings, the addresses at the political rallies and the spirited talks will assume a new significance—one of understanding. Then the advocacy of one party ticket over another will mean more than mere fanatical adulation or narrow-mindedness. It will mean an intelligent partisanship.

COLLEGE "HUMOR"

EIGHT college comics on the West Coast have refused to allow "College Humor" to reprint their jokes. Led by the "Stanford Chaparral" and the "California Pelican", these magazines declared that they had seen enough "humor" representing colleges as places of petting and hip-flasks. They regard "College Humor" as having broken faith with them, and they hope to see the speedy end of all such pervariation and false judgment.

The idea is a good one. Too much do people think of all college students as they see them represented in the humorous magazines of the day. They cherish the notion that all college men wear coon coats, smoke pipes, think every date is a "flop" unless necking is involved, get drunk at every party, drive around in either old wrecks or high-powered roadsters, and generally throw away their fathers' hard earned money. It is that impression they get from the papers. "The man on the street" is ever ready to get the most sensational news he can; always alert to see the worst side of any question; never willing to give the matter thought and see the other view-point to a question. If he did, he would realize that, while there has to be some recreation at college, the student is there essentially because he has the desire to acquire knowledge.

People do not appreciate this serious side of things at college, and papers do their best to foster this misconception. Their influence is utterly unwholesome in this respect. While such conditions as are pictured may perhaps exist, it certainly does no good to wink at each other and let the matter slide.

To take a purely non-partisan view on the subject, the Western comics might well realize that more than likely they are doing just what they criticize in "College Humor". Judging from what we see in Eastern magazines, the character of the humor is not exactly high. Maybe a low-minded public demands that sort of thing. At any rate, we feel that to get to the bottom of the matter, there should be a general change in attitude in all college humorous magazines. The action of the California schools is commendable, but we hope that it will go further.

As We Like It
THE SILENT HOUSE
One might think that after a run on Broadway of nine months the mystery melodrama now playing at the Majestic would have most of its rough edges smoothed away and be as near the perfect thriller as could be expected. Yet "The Silent House" is even more replete with these rough edges, impossibilities, and carelessly planned situations than with the hair-raising episodes that every self-respecting mystery play must have. There is the usual plot involving an ancient home, over a million in missing bonds, an English comedian or so, and the essential Chinese element for the dirty work. As the first curtain rises, no end of surprising luminous figures appear here and there, but sad to say they make the audience laugh instead of shudder. From then on, time after time does the suspense prematurely break or fail to exist entirely at the proper moment, though we must admit that countless times does the audience lose control and scream in perfect chorus. For sheer thrill, perhaps, "The Silent House" is as good as any, but from the standpoint of logical situations and convincing acting it is far below the ideal. Allen Atwell as Ho-Fang was the only one the first night to receive a burst of spontaneous applause, which his portrayal (Continued on Page four)

... with their feet on the ground

MEN of vision, yes. But don't overlook the fact that those old Roman road builders and empire builders kept their feet firmly fixed on the ground. They faced the facts squarely. They were demons for detail. They were the world's first great organizers. Pioneering in the telephone industry is like that. It is a work of vision and of leadership into new fields. But back of it all must be the ability to organize men, money, material and machines. The telephone executive must coordinate his machine before he can run it. He must understand the possibilities in his organization before he can lead it. That done, his opportunity is empire-wide, vision-broad and ambition-deep.

"OUR PIONEERING WORK HAS JUST BEGUN"

SOCCER TEAM PLAYS HUSKIES TODAY

NORTHEASTERN HAS BEATEN FITCHBURG AND HANOVER TEAMS

Northeastern's huskies meet the Engineer soccer team today at four o'clock on the coop field. A stiff battle is in prospect as Northeastern is undefeated while the Cardinal and Gray are out to avenge the 5-1 drubbing that the Huskies handed them last year.

Fitchburg Normal was the first team to fall before Northeastern's strong offense losing a one sided game 7-1. Dartmouth, always considered strong, also lost to the Huskies, by a four to nothing score. The Huskies have been beaten once in the last eleven games that they have played. So it is very unlikely that the Engineers will win today's game although they are going to put up the best fight they are capable of.

Howard is Northeastern Star
Captain Rusty Howard, a center forward, is the Huskies leading threat. He has scored quite a number of goals this season, and is one of the best shots in the East. Burton, an outside right, is a strong man and is an accurate passer.

As a result of Saturday's game with Bradford Durfee Textile School several defects have been exposed and the Engineers have been doing their best during the last few days trying to iron these out. The team has a tendency to bunch up. This was particularly noticeable when the Cardinal and Gray neared the Bradford goal.

Engineers Work On Passing
Accurate passing has been the most important thing that the Engineers have been working on during the past few days. The defense appears pretty well organized and it is likely that Hawkins and Riehl will be at full back with Wyman as usual at goal. The other positions will probably be shifted around some. Outside right was the weakest position in Saturday's game and Coach Welch has been doing his best to develop a man who can play this position. The team expects to give the Huskies a good battle and the game will be fast judging by the calibre of the Northeastern team.

TENNIS TOURNAMENT PROGRESSING SLOWLY

Technology's Tennis Tournament has not gotten quite the flying start that was expected. In fact, if those men who are entered do not hurry up and play their matches, many will find themselves out in the cold. First round matches must be played by Thursday, October 11. With two days left to complete them, only two matches have been played. Considering the fact that there are more men entered this year than ever before, this is indeed a poor showing.

Entrants are again advised by Manager Wight that they may play their matches on the concrete courts free of charge. It is up to the man in the lower bracket to look up his opponent, and failure to do so means a default. After the match is completed, the score should be written on a slip of paper and deposited in an envelope on the bulletin board opposite the Cashier's Office.

In the two matches that have been played so far, Abbot beat Kingsley 6-3, 8-6, while Dame had an easy time conquering Wilson 6-0, 6-0.

SOPH FOOTBALL TEAM SHOWING REAL CLASS

Handicapped by Insufficient Amount of Equipment

With their first game only five days away the Sophomore football team is rapidly rounding into form. Under the able coaching of Ken Fitch the team has perfected a few new plays which, with those of last year, will give them enough of a variety to puzzle their opponents. The signal system which Fitch has substituted for the huddle seems to be working out very well. It gives the men a chance to get set before the ball is passed and thus a faster start.

Having as a nucleus eight men of last year's team seems to help in keeping the team organized and thus to be working as a unit in all of the plays. On the average there have been eighteen to twenty men out at every practice. This gives the men a chance to get some competition and thus improve their style of play. As a rule there has been a light scrimmage every afternoon which gives Fitch a chance to size the men up. The dummy has been put up and the men are making good use of it practicing both tackling and blocking.

Three Games Scheduled

There are thus far three games on the Sophomore schedule. This Saturday will see the opening game with the Tuft's seconds at Tufts. Besides this the team will meet the Harvard

Juniors the following week and then the Newport Training School at Newport, Rhode Island.

More men are asked to come out and support their class team. The team is in need of about ten more men to make a regular squad and increase its chances for success in competition against other teams. All men who can't come out but have any sort of football gear of any size can help the team along considerably by loaning the same to the team.

INTERCLASS RELAY TRIALS NEXT WEEK

Time trials for the freshman and Sophomore candidates will be held all of next week. It will be a series of trials giving each man a fair chance to make the team. The distance will be 220 yards and twelve men will be selected for each team.

In the Sophomore list of candidates this year are many men who could not make the team last year, but such an improvement has been noted that they will be strong contenders for the Sophomore team and should be up in the running for places this year. Olerman, Wadsworth, and Genrich are among those who did not participate last year, but are expected to be stars before Field Day is over.

The freshmen have begun to show some real speed, and if the men show as much improvement in the next two weeks the record for the relay will be in serious danger of being broken. The yearlings have been working out for two weeks, and have been holding sprint races every afternoon at the track, with practice in starts and running form.

Adolphe Menjou picks OLD GOLD

as camera records the Blindfold test

The test was conducted by responsible witnesses who asked Mr. Menjou to smoke each of the four leading brands, clearing his taste with coffee between smokes. While the camera recorded the test, only one question was asked: "Which one do you like best?"

ADOLPHE MENJOU... debonair, sophisticated Paramount star... one of the greatest living actors... appeared recently in "His Tiger Lady", "Night of Mystery" and "Serenade".

"I've discovered a new way of mixing business and pleasure. The parts I play call for the constant smoking of a cigarette... I probably average one cigarette to every hundred feet of film. In the blindfold test I discovered one so smooth, so considerate of my tongue and throat that even the business of wholesale smoking while we're shooting scenes will be a pleasure. The cigarette I voted for proved to be OLD GOLD."

Adolphe Menjou

Why you can pick them

Three types of leaves grow on the tobacco plant... coarse top-leaves, irritating to the throat... withered ground-leaves, without taste or aroma... and the heart-leaves, rich in cool and fragrant smoking qualities. Only the heart-leaves are used in OLD GOLDS.

SMOOTHER AND BETTER

"NOT A COUGH IN A CARLOAD"

T.E.N. MAKES FIRST APPEARANCE OCT. 17

Tech Engineering News, the engineering magazine of the undergraduates at the Institute, will make its first appearance of the year on Wednesday, October 17. The magazine will contain a greater number of articles dealing with the humanistic side of an engineers' life than heretofore, and will also contain several articles dealing with various engineering projects now under way.

All men who are interested in T. E. N. are urged to come down to its offices in the basement of Walker. Positions on both the literary and business departments of the magazine are open.

POLO CLUB MAKES PLANS FOR ACTIVE SEASON IN LEAGUE

Much Valuable Instruction for All Who Wish to Become Members

With fifteen old members present, including four veterans of last year's Varsity team, the Polo Club held its first meeting of the year yesterday. Besides the old members present, ten new polo enthusiasts listened to Livingston Longfellow newly elected president, outline the activities planned for the coming season.

These include two riding classes, one for advanced riders, and one for elementary men. All new riders and members must start in the elementary class until promoted by the instructor. Both classes are to be under the tutelage of Captain Brown, a well-known horseman.

Although polo is the club's main activity, membership is by no means restricted to polo players. Anyone interested in riding is encouraged to join and receive the benefit of the excellent instruction to be given to members. The club welcomes any riders to its ranks, and requests that they come to the next meeting on Tuesday, November 6 at five o'clock in Room 2-190. However, any rider wishing to join the class, which will be organized next week, may see W. B. Wilder, who is manager of riding for the club. All polo players interested in coming out for the team are urged to see F. W. Trumbull, manager of polo. Either manager may be seen by inquiring at the M. I. T. A. A. in Walker Memorial.

INSTITUTE MEN WILL ATTEND DEPUTATION

Technology will send four men to the Intercollegiate Deputation which will be held in New London. A large banquet will be held Friday evening, and the deputation will close with a mass meeting Sunday.

Among the various colleges which will be represented at the meeting will be Yale, Wesleyan, Brown, Boston University, and Technology. All expenses for the trip will be paid by the New London Committee.

Leonard Stievater, '29, will be in charge of the representation from Technology. Any men interested should get in touch with Fred Dickerman, '30 at the T. C. A. office.

This is the first Intercollegiate Deputation that the Institute has been represented at during the past two years.

Fourmen will be sent to a meeting which will be held at Ayer, Massachusetts on November 11.

STUDENT DIRECTORY TO APPEAR SHORTLY

Proofs of the 1928-29 Student Directory will be posted today in the Main Lobby, Building 10 and in Walker Memorial. Everyone is asked to examine this list and report any corrections upon the cards provided. All corrections must be in by October 17.

Dorm Men Submit to Loss of Moustaches

Ye residents of the dormitories who enjoy the luxury of an hirsute development on the upper lip, beware! Last Tuesday evening a delegation of students, mindful of the unwritten law that no dormitory man should wear a moustache, paid a visit to such culprits as were suspected of harboring the aforesaid adornment upon their person. Three defendants were found, tried and condemned on the spot. The official executioner advanced and proffered the lathered brush to each prisoner allowing him to soap the offending appendage and remove it. One man, loath to part with his prized possession, chose to have the operation performed by the executioner rather than perform the operation himself. The sentence having been duly carried out each offender was reinstated in the merry fellowship of dorm men.

THE SILENT HOUSE

(Continued from page 2)

of a misunderstood Chinese servant surely merited. The rest of the cast follows much after the pattern of the usual thriller, from the heroic, blundering heir to the somber villain, Dr. Chang-Fu. "The Silent House" will amuse you, and lift you from your seat more than once, but don't expect too much.—H. R.

BEAUX STRATEGEM

The Boston Repertory Theatre opened its season Monday night with Farquhar's comedy "Beaux Strategem" which, although an ancient stimulant, has lost none of its savory aroma from lying and ageing in the cellars of dramatic art until such time as some skillful tapsters might wish to draw it forth to sparkle again. Its success on and since April 1707 is due not so much to its strength (of plot) as to the tangy flavor of its lines, the latter requiring deft and clear interpretation without which some of its delicacy might vanish into thin air without one's being aware of the loss.

The story spins about two jolly English gentlemen who have little more than their good natures, constitutions, and hopes for wealthy marriages. In order to simulate the wealthy gentility more effectively, one of them travels as the other's servant. Both being clever and imaginative young gentlemen, nature contrives well by these recipients of her gifts and causes them to fall in love with equally clever but exceedingly wealthy ladies.

Commendation for the success and contagious spirit in this play are rightly due Katherine Warren as one young lady, Olga Birkbeck as the other who is married, Milton Owen and Arthur Sircorn as the clever young gentlemen; and to Scrub, servant to the intoxicated Squire Sullen, played by Cameron Matthews, whose laugh is infectious because of its distinct uniqueness and to which we have built up no resistive immunity of repetitions. The pleasant aroma of the play still lingers in our nostrils.

ELECTION OF LIBERAL CLUB OFFICERS HELD

Brimberg Chosen as President for Coming Year

Technology's Liberal Club started its annual program yesterday afternoon when the first meeting was held in the Emma Rogers Room, at 4 o'clock. The election of officers resulted in Murry Brimberg, '29, being elected President, William E. Higbee, '29, vice-president, and John A. Johnson, '30, as secretary-treasurer.

As an outgrowth of the bull-sessions held last year under the auspices of the T. C. A. and led by Professor Richard H. Tyler, '10 of the Civil Engineering Department, the Liberal Club will attempt to bring to the attention of the undergraduates some of the important questions of today. Professor Tyler, in the first address of the meeting spoke on the subject of "Liberalism" and explained what it stood for and its relation to the student.

Edmund Berkeley, President of the Liberal Club of Harvard, and guest at the meeting, extended greetings to Technology's Liberal Club and told of the Club over which he presides. Meetings of the organization will be held every Thursday in the Emma Rogers Room of Building 10 at 4 o'clock and it is open to all undergraduates and Faculty members of the Institute.

LATEST MOVIE MACHINE IN BIG LECTURE ROOM

A De Lux Motiograph which is the most well developed of modern motion picture projectors arrived yesterday and will be installed by the end of the week in Room 10-250. Mechanics have already started to set up this projector and as soon as films are shown everyone will notice the clearness and exact perspective produced by the new features on it. The new apparatus which is of special note is an internal shutter and a motor driven arc. The films are kept 60% cooler by the former appliance and the electric carbon arc is kept unusually constant by the latter. From all parts of the room the pictures will be seen easily and proportionately.

WALKER COMMITTEE

The Walker Memorial Committee announces that there is still time to enter the competition for the four Sophomores positions. Candidates should report any afternoon between 3 and 5. There will be a meeting of the Committee Monday, October 15, at 5: p. m.

Girl's Hot Tip Steers Student to Favorite Pipe Tobacco

San Francisco, Cal.
Larus & Bro. Co.
Richmond, Va.
Gentlemen:

Since I first started to smoke, I have always smoked cigarettes.

One day SHE said to me "Ed, dear, why don't you smoke a pipe. I think those long straight-stemmed pipes are so manly-looking."

So, naturally, I had to buy a long-stemmed pipe and a can of well, we'll call it "Blubs Mixture tobacco." Immediately with a certain feeling of pride in my new pipe, I "lighted up" and proceeded to have my tongue bitten. I tried almost every brand I had ever heard of, but none satisfied me. Sadly, I had to confess to HER that as a pipe smoker I was a good dietitian.

"Did you try Edgeworth?" she asked. "That is what dad smokes, and he's always smoked a pipe."

So I was forced to try Edgeworth, and all that I can say is that if every fellow that has tried to accustom himself to a pipe, started with Edgeworth, there would be very few that would go back to cigarettes.

Yours sincerely,
Ed Maher
