

Lounger Unravels Weighty Affairs of Institute Committee Meeting Carnival Carries

Listen, my children, and the Lounger will tell you all the inside dope on this bunch of Activity Men otherwise called the Institute Committee, the Representative and Governing Body of the Mass. Inst. of Technology. For the sake of those who have never had the spare time to devote to such a study, the Lounger herewith offers a completely uncensored accumulation of the business of this august body.

First of all, the assembly convened in North Hall, because something more important seemed to be going on in the Faculty Dining Room. Carlton B. Allen '29, known as Chairman, lounges in without one finger nail, at five o'clock. Rich deposits derby carefully and sympathizes with Carlton; two others join them, and the rest come over to the stenog's table. A minute after scheduled time enough are there so Allen blows whistle and everybody sits down—Bremner Geisman, Baumrucker and two others on the side lines. Allen whispers to Boyer, and on request Boyer reads roll, with the incidental snickers peculiar to said secretary. Couldn't locate Freeman, Atkinson, Wiley, Rogers, Hamilton, McCaskey, Paul, Sears, and Dxxx (stenog was watching Boyer trying out his Gregg.) The absentees musta thot the meeting was over in Ham's apartment.

Joke by Boyer

Allen fingers his Bible, and suggests that Boyer read minutes of last smoker; record of five MSP's accepted without protest. Boyer then relates very brief but helpful discussion of the Executive Committee; claimed they brought up Carnival suggestions and then adjourned. They might as well have adjourned first. Bianchi gives no news from Walker Committee, other than that of social correspondence with prep schools telling what 150 of their progeny are doing in the good ol' stute. Rich: no report from the Point Systems Com. Atkinson is still out, so Allen's prompter reads long report of Carnival vote carried 473-179; if the figures are wrong, it was because Boyer's face was horizontal.

Bennett Sits Down

Bennett gets set on one foot with hand where Napoleon's was and says he's hired a hall for his Prom, and pretty soon will start trying to sell tickets. Sits down gracefully. Logan takes dead pipe out of his mouth and says even less than Rich for Budget Committee.

Carlton calls for old business. There seems to be no old business. The Lounger presumes there wasn't enough two weeks ago to carry over. Carlton hopefully calls for new business. What—no new business? Brig chews lip. Ah yes, Boyer remembers Atkinson's (still out) motion
(Continued on Page 2)

Awards Contract For Senior Ring

Committee Announces That Class Emblem May be Ordered on February 12 and 13

John B. Osborn, '29, Chairman of the Senior Ring Committee announces that the contract for the Class Ring has been awarded and that it will be selected soon. Salesmen will be on hand in the Main Lobby on February 12 and 13 at which time the members of the class will look over the assortment of rings.

In order to place an order for a ring a deposit of \$5 is required. The total cost will be \$10 or \$11 according to the style of the ring that is chosen. The design, as announced by the Committee is that it is a 10 Karat, 10 Pennyweight ring containing a stone of the students choice. In addition any color gold with any corresponding finish may be chosen upon request.

One side of the ring contains a design of a Beaver in the woods chewing on a tree. The other side is covered with a front view of the Institute and the Class numerals. Around the stone the words Massachusetts Institute of Technology are embossed. Orders for the ring will be taken on the above date and all seniors are asked to look over the selection of rings that are submitted by the salesmen.

Large Crowd is Expected to be at Junior Prom

Annual Affair Will be Held in Ballroom of Hotel Statler on February 21

Attendance at the Annual Junior Prom, which will be held in the Main Ballroom of the Hotel Statler on February 21, is expected to be larger than ever before. For this reason the Committee is making arrangements to take care of the increased expected crowd.

In previous years, when the Prom was held during the spring recess of Junior Week, a comparatively small percentage of the student body attended the affair. This was due to the fact that it was vacation time and accordingly most of the students went home. There seemed to be very little student interest in staying for the Prom and, for that reason, it became more and more difficult for the Committees to run the dances successfully.

By holding the Prom on February 21, a date which is open to most any student to attend, it is expected that more interest will be taken in the affair and that the attendance will be successively larger. The total number of tickets to be sold is expected to be 350 and if necessary the number will be limited.

In the last issue of THE TECH, the total cost of the Prom was erroneously stated. The dance, with the Tech Show, will cost \$15, which also includes the cost of the midnight dinner.

Airships Will Inaugurate New Phase of Commercial Flying Says Hunsaker

First Instructor of Aeronautical Engineering Speaks About Rigid Airships

"The next phase of aeronautical engineering is due to blossom in the near future, for the airship has not as yet had full commercial exploitation, although it is a century and a half old," said Jerome C. Hunsaker '12, vice-president of the Goodyear-Zeppelin Corporation, in an address to a group of faculty and students in Room 3-270 yesterday afternoon at one o'clock. President Samuel W. Stratton introduced Mr. Hunsaker as the first instructor in aeronautical engineering at the Institute.

In tracing the development of the airship, Mr. Hunsaker stated that the first balloonist discovered the principle when his wife's silk petticoat, which was draped over a chair before a fire place, was driven to the ceiling by a gust of smoke. He constructed a series of paper balloons and filled them with smoke. Not realizing that hot air, not smoke, was the cause of the phenomenon, he burned wet straw to obtain dense fumes.

The next step was the addition of a power plant and the balloon became a non-rigid airship. Since speed was desired, more powerful engines were built which necessitated larger ships. This involved structural difficulties and led to the semi-rigid ship, built by Italian engineers which was the

old type but, however, with a rigid keel.

The first rigid ship built was the Zeppelin developed in Germany in 1900. This consists of a long basket-work body, inside of which is a series of smaller balloons, and outside of all is the fabric cover. The basket-like shell is built of longitudinal girders held together by transverse members and braced by diagonal wires. At the take off the individual bags are flabby, as the ship rises the outside pressure lessens and the bag expands. To prevent the ship from blowing up, there is a safety valve to release the gas at 5000 feet.

RECITAL GIVEN BY NOTED MUSIC CRITIC

Mr. Arthur Whiting, nationally known music critic, presented the second recital of the year at Technology last Tuesday night. About two hundred people, consisting for the most part of professors and their wives, attended the concert. Mr. Whiting first gave a history of the pianoforte and explained the way in which different composers played. Selections from Bach, Ravel, Schubert, Brahms, and Chopin were played by Mr. Whiting beside a piece of his own composition: Five Damper-pedal studies.

ANNUAL ELECTIONS BANQUET HELD AT HOTEL BELLEVUE

John Bakeless, Editor of "The Living Age" Speaks on World Affairs

ANNOUNCE JUNIOR BOARD

During the annual elections banquet of the combined boards and staff of THE TECH, held at Hotel Bellevue Wednesday evening, Lawrence C. Hamlin '29, General Manager of the closing volume, announced the selection of the following Managing Board of Volume XLIX: General Manager, D. Tullis Houston '30; Editor Wilfred F. Howard '30; Managing Editor, Carl Connable '30; Business Manager, Gregory Smith '30.

At the conclusion of the dinner, attended by 70 members and guests of Volume XLVIII, entertainment was furnished by Bourdini, escape artist, and Hum and Strum, well-known for their radio broadcasting. There followed a short talk by Mr. Arthur W. Walker '82, who directed the opening volume of THE TECH, in which he told of the first efforts of the paper to direct international affairs.

Lobdell Introduces Speaker

Assistant Dean Harold E. Lobdell '17, asked by Mr. Hamlin to introduce the principal speaker, then proceeded in three parts, and after describing their mutual efforts overseas to make the world safe for Democracy, presented Mr. John Bakeless, editor of "The Living Age."

Mentioning briefly his subject, "The Scientific Approach to World Affairs," Mr. Bakeless told of the difficulties of securing cooperation from the printer, and then discussed at length the necessity of scientific thought in emotional crises.

Houston, General-Manager-elect, of Maplewood, New Jersey, prepared at South Orange High School, participating in football, newspaper work, dramatics, and student government. In his freshman year at M. I. T. he was Treasurer of his Class, a member of the Freshman Dance Committee and of the Field Day football team. He was elected Sophomore President, chairman of the Sophomore Dance Committee, and in the same year was appointed to serve on the Freshman Rules Committee and Field Day Committee. He is now Vice President of the Junior Class, a member of the Junior Prom Committee, of the Quadrangle Club, Tau Beta Pi, Stylus, and the Sigma Nu Fraternity, and was recently elected to Theta Tau. Houston has been successively Night Editor, News Editor, and Managing Editor of THE TECH.

Howard Transferred From Chicago

Editor-elect Howard comes from Waupun, Wisconsin, transferring to Technology in his Sophomore year from the University of Chicago. In high school Howard was president and valedictorian of the class of '24, taking part in football, debating, and
(Continued on Page 4)

Fire! Dorm Hosemen Help in Saving Soap

Engineers became fire fighters at the blaze at Lever Brothers factory three blocks from the Institute on Wednesday evening. The flames in the sky attracted many of the dormitory men and they dashed to the point of excitement in every kind of covering from pajamas to tuxedos. The renowned Cambridge Fire Department, which so bravely fought the dorm fire in Nichols sometime ago needed assistance to drag some of the long hoses to strategic and useful positions. The Tech men joined in to pull with other volunteers and those who were on the Tug of War teams used their brutal strength wisely. Later in the evening the participants spent much time thawing their feet and melting the ice from their frozen hair.

No Issue Monday

Due to final examinations there will be no issue of THE TECH during the next week. The first issue of Volume XLIX will be published on Wednesday, February 6.

FROSH SEXTET TRIMS ANDOVER

Thirty Technology Men Enter Knights of Columbus Meet in Boston Garden

Yearlings Show Up Well In First Game of Season Defeating Andover 3-0

In their first game of the season the relatively inexperienced frosh sextet sent the Andover Hockey team down to a 3-0 defeat Wednesday night at Andover. The game was fast, the Technology team being constantly on the offensive, but team work was lacking, and the yearlings were unable to score in the first period. Technology scored goals in the second and third periods of the game. Regan, Peterson, and Yeager making the points for the Engineers.

Getting off to a fast start, the Cardinal and Gray team took the offensive, and carried the puck far into Andover territory, but were unable to score. Andover then got the puck, and the game saw-sawed until the last few minutes, when the frosh again broke away, and took several fast shots at the goal, all of which were stopped by Neil, the Andover goalie.

Technology Scores

In the second period, the Cardinal and Gray again got the jump, and scored two goals. The first was made by Regan, who receiving a pass from Moran, pulled the Andover goalie out of position, and sent the puck flying into the net for the first score of the game. After going to center ice, the yearlings again took the offensive, and Peterson on an assist from Fahey, made a 35-foot shot for another Cardinal and Gray goal. The period ended with the teams scrimmaging in Andover territory, the Technology frosh still outclassing their opponents by a wide margin.

Andover attempted a rally in the third period, and made several attempts at the Technology goal which were stopped by Hansen. In a scrimmage that followed, the frosh took the puck far into Andover territory, and with a fast shot Yeager scored again for M. I. T. as the period ended.

In their first game the yearlings easily outclassed their opponents, and

did fair to go through the rest of the season undefeated. Hansen acting captain at goal played an excellent game, and made the goal impregnable to Andover attack. Peterson and Moran also played well at center and right defense respectively, leading the offensive which sent the Blue team to defeat. Captain White of the Varsity has been coaching the freshman squad in the absence of Coach Stewart, and has done much in bringing the freshman team into their present shape.

Tie is Result in Freshman Inter- Company Matches

E and D Companies Win First Place—French Turns in Highest Score

Companies "D" and "E" are tied for first place at the end of the third Inter-Company rifle match of the freshman R. O. T. C. At the first of these matches, held earlier in the term, all the members of each company fired; and from the results of this match the ten highest men in each company were chosen to represent their company in the following two matches. In these competitions one prone score was fired by each man, the five highest scores in each company being recorded.

Scores of the companies were: Company "D" 2254, Company "E" 2254, Company "C" 2236, Company "A" 2182, and Company "B" 2162. The following were the high scores in the last two matches:

Name	Company	Score
J. C. French	E	192
W. E. Nichols	D	191
J. F. Longley	A	191
E. A. Eddy	D	190
H. A. Traver	B	190
N. J. Paulson	C	190
W. C. Swanson	E	189
R. F. Cicchetti	E	189
G. E. Colby	E	189
G. F. Barnett	D	189
R. H. Clary	D	188

The above-named men will be entered by the Military Science Department in the Gallery Qualification Competition of the National Rifle Association.

Men wishing to try-out for the freshman rifle team will report at the Range at 1 o'clock on February 4, and will fire every Monday and Wednesday afternoon between 1 and 4 o'clock. Seven matches have already been scheduled, the first to be fired during the week ending March 9. Full particulars regarding the matches may be obtained at Room 3-305.

Star of Basketball Team Injures Hand

Brig Allen, president of the Senior class, and star of the undefeated Basketball Team is suffering from a severely injured finger sustained when the door of an automobile was accidentally slammed on it Wednesday. An x-ray yesterday confirmed the belief that no bones were broken, but the nerve has been injured which has resulted in the loss of the nail. This injury is a blow to the basketball team as it is believed that he will be out of the game for a month.

Sports Desk

Tommy Rawson, son of Coach Rawson of the Technology boxing team, who defeated all contenders in the 135-pound class of the recent Inter-city bouts, and held in the Boston Garden is a strong favorite to win a National Amateur Championship this year. Coach Rawson is taking him to the Navy meet where he will take part in an exhibition bout.

A light-heavyweight boxer has blossomed forth for the Navy meet in the person of John Scheuren, now manager of the team. He has been practicing with the freshmen, and hopes to get into shape before February 2, when the Varsity goes to Annapolis. Scheuren has been training with the team for several years but has never entered competition for a position, and it is hoped that the fighting manager will duplicate the great record made by O'Malley, former Intercollegiate Heavy-Weight Champion.

Victorious over the Andover Hockey Team, the Cardinal and Gray yearlings will have a rest before their second game in which they will face Arlington High at Arlington on February 22. At the next practice session the frosh team will probably elect a captain to lead them the rest of the season. Hansen, goalie, was acting captain in the last game.

Training for their coming meet with the Navy, the Varsity boxers, now practicing every day, are rapidly coming into shape. Captain Bolanos, who placed in the Intercollegiate last year, seems to be in better shape than ever and is expected to score a victory over his Navy opponent.

Brown and Bowdoin Relay Teams Will Meet Varsity In Annual K. of C. Games

As an opener of the winter season in competitive track events, the Technology speed merchants will take an intensive part in the annual Knights of Columbus games which will be held in the Boston Garden on January 26. Due to the large number of men available this year, the entry list has been enlarged in order to give everyone a chance of winning laurels for himself and for M. I. T. About thirty men have been entered, which is a considerably larger number than last year.

The relay team will consist of four men, to be chosen from a list of nine who have been registered. At the head of the list are Jack Hallahan and Freddy Ladd who were on last season's victorious team, consisting of Ladd, Hallahan, Fay, and Meagher. In that race, which was held at about the same date last year, the Technology team met Brown, following the custom of several previous years. Each man ran 300 yards, and Meagher, who ran as anchor man, finished nearly a half-lap ahead of the Brown runner.

Two Positions Unfilled

This year the race will include Bowdoin as a third team in the contest. Little is known about the strength of either of these teams this year, but the men on the Institute squad are confident of ability to defeat them. Brown has been an easy victim for the past few years and Bowdoin should not prove any more difficult to defeat.

With Ladd and Captain Hallahan as a nucleus for the Institute team there remain two positions left open by the departure of Fay and ex-Captain Meagher from Technology athletic circles. The coach is not worried because of lack of capable material to fill these berths, but rather because of the abundance of material that makes the task of selecting the two men a difficult one.

The most likely candidates for the team at the present time, those who have been entered with the K. of C. officials, are Berry, Reynolds, Lappin, Goodhand, Wood, Gonzalez, and Barrington. These men have all established good records for themselves here at the Institute, and any two of them would make the relay team complete.

Many In Other Events

In addition to the relay, M. I. T. will be well represented in the other events of the evening, some of which are handicap affairs and others New

England championship contests. The 50-yard dash will be of special interest, since four of the Cardinal and Gray's best sprinters are to take part in it. It is a handicap race, and will be open to all competitors, whether they are collegemen or not. The combination of Broder, Wayne, Lappin, and Jandris could not be improved upon, and this race should bring points to M. I. T. Wayne, in particular, has run away with all the intramural competition, and his performance will be watched with much interest and speculation.

Championship Race In 300

The 300-yard run will be a N. E. A. U. event for collegiate competition only. Broder, Wayne, and Barrington will endeavor to bring a New England championship to M. I. T., and they have a good chance for success.

In the open 600 the entrants are Goodhand, Gonzalez, Berry, Jewett, Kelley, Mulliken, and Rogers. The last four are freshmen who have a fine chance of making a good start in Institute sports. Goodhand and Berry were winners in the last handicap meet. Berry took third place in the 600 last year in the K. of C. meet.

Another handicap open is the 1000, in which the Engineers entrants are Baltzer, Mitchell, Vennard, Worthen, Gilman, Littlefield, Thorsen, Conant, Herbert, Camerlingo, and Austin. The Varsity men on this list have shown a great improvement over last year. Baltzer and Vennard in particular have shown the results of faithful daily work, and these two men, with Thorsen, Worthen, and Gilman, have the best chances of winning, although handicaps may make a big difference in the results. Worthen won third place in this race last year.

Benjamin In High Jump

Phil Benjamin, who took second place in the handicap high jump last year and tied for first in the N. E. A. U. jump which is a scratch event, has entered these two events this year and expects to win a few points. If his work of last year is any indication, he has a good chance of winning the New England championship in the high jump.

The following week, on February 2, the B. A. A. M. meet will be held. As usual M. I. T. will have at least one relay team in this meet. Last year the Varsity team met Harvard and lost by inches.

**Sailor Gets
This Tobacco
in Far Port**
Buenos Aires, Argentine,
Jan. 4, 1928

Larus & Bro. Co.,
Richmond, Va., U. S. A.
Gentlemen:
I'm a seafarer, and as such of course travel quite a lot. Right now I am in the Argentine, and am glad to say that I can here purchase your beloved Edgeworth Tobacco, of which I'm so very fond.

It is indeed a pity that one can't find this good smoke in every place of the seven seas. While recently in Germany, my home-country, I tried in vain to come upon one of these little blue tins. I'm not saying too much in mentioning that I would outwalk that famous mile, hunting up dear Edgeworth. I dare say there is no other tobacco like it, and am convinced that Edgeworth cannot be improved.

Let me know when you contemplate ceasing to make Edgeworth so that I may lay in a goodly store to last till I'm seventy.

May Edgeworth never change!
I'll always remain
Sincerely yours,
Willie Schmekies

Announcement of Managing and Associate Boards Made For Volume XLIX

(Continued from Page 1)

dramatics, editing the school paper. Entering Chicago University the following fall on a scholarship for grades received in high school, he served on the staff of the University daily, took part in dramatics, swam with the varsity tank team, receiving honorable mention at the end of two years for high standing. After working a year for the Northwestern Bell Telephone Company and the Illinois Central Railroad Company, he entered the Institute in the fall of 1927. Howard has served as Features Editor of Volume XLVIII, is a member of the American Society of Civil Engineers, Stylus, and the Phi Kappa Sigma Fraternity.

The new Managing Editor, Connable, prepared at the University of Toronto Schools, Canada, while there being a member of the rifle team and the dramatic staff. He transferred to M. I. T. after a year of undergraduate study at the University of Toronto, and has since been associated with THE TECH as reporter, news writer, night editor, and Assistant to the Managing Editor. Connable is a member of Stylus and the Sigma Chi Fraternity.

Smith, newly elected Business Manager, received his secondary schooling at Marblehead and Boston English High Schools, having been business manager of the school paper and a member of the hockey team. During a year at Bowdoin College he served on the "Bearskin" staff, transferring to Technology as a freshman. He was a freshman section leader, served as a freshman on the Freshman Rules Committee, and has been Treasurer and Advertising Manager of THE TECH. Smith is a member of Stylus and the Delta Upsilon Fraternity.

Announcements of the Associate Board of Volume XLIX were as follows: News Editor, Ralph Davis '31; Sports Editor, Wendell N. Currier '31; Advertising Manager, Gilbert M. Roddy '31; Circulation Manager, John K. Minami '31; Treasurer, Harmon J. Truax '31. Edwin S. Worden '31 was elected Assistant to the Managing Editor.

JUDGES ANNOUNCE WINNING POSTER FOR "A TECH RIOT"

Design by Pickell Chosen From Among Seventy Entries In Contest

HAVE FUTURISTIC TREND

Tech Show Pictures Will Be Taken On Registration Day Of New Term

Picked from a group of approximately seventy posters, the design submitted by James M. Pickell '30 for "A Tech Riot" Tech Show 1929, was finally judged to be the best and will be the one used on the program cover, stickers, and posters this year. The judges had considerable difficulty in arriving at a decision as the number of good entries was surprisingly large. The general trend of the majority of the designs submitted seemed to be to the modernistic and futuristic.

Pickell's winning design shows a considerably dilapidated but smiling face with "A Tech Riot" appearing in large letters underneath and Tech Show 1929 at the top. Black, white, and red will be the predominant colors used in executing the posters.

Included in the blanket tickets for the Junior Prom, which will be on sale February 4, will be admission to Tech Show on the night of the Prom at the Hotel Statler, February 21. There will be no separate tickets sold for the Show that night.

On registration day for the second term the final pictures of the cast and chorus of "A Tech Riot" will be taken in Room 2-070 at 3 o'clock. It is necessary that the entire cast be present at this time as pictures will be required for Technique and the program not later than February 9. There will be rehearsals of both the cast and chorus on the evening of February 4 at 7 o'clock. Cast rehearsals will be held in the East Lounges of Walker and the chorus rehearsals will be in North Hall.

FRATERNITIES HOLD DANCE AT SOMERSET

"Tunesters" Will Furnish Music at Social Function

Due to the fact that many fraternities are holding initiations on February 7, the Interfraternity Dance scheduled for that date has been transferred to February 8. The Louis XIV Ballroom of the Hotel Somerset has been engaged for this affair.

Last year's attendance of this function was lowered due to the fact that some examinations were scheduled for the next day. For this reason, the committee in charge this year planned the dance for a later date so that a much larger attendance is expected. The "Tunesters" who have played at numerous Technology social functions this year will furnish the music for the ball.

Tickets have already been sent around to the houses comprising the interfraternity conference, and will be on sale to their members for the usual two dollars. This time there have been some considerable changes made in the tickets, however, in that they are printed on a gray stock with a horizontal red stripe running through the middle.

JITNEY PLAYERS

Sheridan's "A Trip to Scarborough" will be presented by the Jitney Players in the ballroom of the Hotel Statler tonight at 8:15 o'clock. The regular price of tickets is \$2.50 and \$1.50 but reduced rates are offered to students. The play is being given under the auspices of the Nursery Training School of Boston.

RIFLE MATCH WITH B. U.

Boston University will meet the Varsity Rifle Team in the Mechanic's Building at 7:30 o'clock on January 18, during the National Sportsmen's Show.

Appalachian Mountain Club President Will Attend Annual Mid-Year Outing

Twelve Persons Have Signed Up to Date—Trip Limited to 25 Men

Dean Peabody, Jr., '10, Associate Professor of Applied Mechanics at the Institute, and president of the Appalachian Mountain Club, will attend the Mid-Year Outing that will be held at Jaffrey, New Hampshire, from January 26 to January 30.

Professor Peabody was president of the Appalachian Mountain Club last year, and was recently reelected to that position for the coming year. The club is an organization that builds cabins, has trails and compiles information about hiking and mountain climbing. Before being elected as president, he was chairman of the Excursion Committee. The club has an excursion to some distant point every year, and Professor Peabody led two of these excursions. In 1923, he

SERIES OF LECTURES ON ART TO CONTINUE

Continuing his series of lectures on the "History of Prints and Drawings as Illustrated in American Collections," Professor Paul J. Sachs of Fine Arts in Harvard University will present a lecture on the "16th Century in Germany" at Huntington Hall tonight. This is the fifth lecture in the series of eight that are being given by Professor Sachs under the auspices of Lowell Institute. The lectures are open to the public and tickets may be secured from the Curator of Lowell Institute.

FACULTY CLUB HEARS DR. ALICE HAMILTON

Member of League of Nations Health Section Speaks

"The Health Work of the League of Nations," an address by Professor Alice Hamilton, M. D., of the Department of Industrial Medicine at Harvard Medical School, was given before the luncheon meeting of the Faculty Club held yesterday noon in the North Hall of Walker.

Professor Hamilton is a member of the Health Section of the League of Nations, which position she has held since 1924, and she has had an unlimited opportunity to observe the work of the League in this field. The speaker talked of the activity of the organization in collecting information about epidemics in all parts of the world, and transmitting this information to places where it is most needed. Special mention was made of the excellent service rendered by Dr. Selskar M. Gunn '04, Vice-President of the Rockefeller Foundation, and in charge of the Rockefeller Health Work in Europe. The work of Prof. Charles A. Winslow '98, was also praised.

Miami Students Fake Influenza

University Clinic is Stampeded by Freshmen Hoping to Get Vacation

The flu epidemic which has been closing up colleges and universities throughout the middle-west, has reached the campus of Miami University, and brought with it a wave of freshman tomfoolery. Learning that the University hospital was overcrowded and that several colleges in the mid-west had closed, Miami students went on a spree of pretended illness. A few have already been sent home because of overcrowding at the hospital, and many others, envious of those who were sent home to enjoy an extra week of Christmas vacation, mobbed the university clinic, hoping that something would be found wrong with them.

Persistent rumors circulated the campus that classes would be dismissed early if the situation failed to improve. Emphatic denials, however, were given out by President A. H. Upham, who averred that nothing but an earthquake could shake him from his determination to keep classes going.

An entire freshman dormitory paraded to the hospital for an examination, after having employed every conceivable method of assuming symptoms of influenza. Freshmen at Fisher hall were reported to be practicing violent coughing. Others were wearing blotters in their shoes, and rubbing moist tobacco in their arm pits preparatory to going for an examination at the hospital. Someone told them they could in that way raise their temperature to a fever point. One freshman shook his head violently to acquire a headache. Then hurried over to the clinic for an examination, but received headache pills, not a vacation. (I. P.)

WITH THE AMERICAN COLLEGE EDITORS

(Continued from Page 2)

of the ruthless destruction of forests. The second invention, unless by chance it helps to scare us into peace, is of no such admirable sort. We refer, of course, to the announcement of Dr. H. I. Jones that a new poison gas named cacedyl isocyanide already known to the chief governments of the world "is a deadly poison which would destroy armies as a man might snuff out a candle." In the event of any large scale war, of course the governments will use this gas, in spite of paper agreements to the contrary. Our hope lies in building peace, in killing the tiger of war, not in trying to file down his teeth.

—Norman Thomas, In "League for Industrial Democracy."
