FRESHMEN ARE URGED BY INSTITUTE COMMITTEE TO UPHOLD RULES

This year, being the first during which the freshmen rules have been in force, presents many difficulties in their enforcement. The crisis of violation that has occurred to date has been too great a test for the freshmen proper. Most of the freshmen are wearing the freshmen red. The freshmen are expected to take their responsibilities seriously and to be a stand in their own and the university associations. For instance, when matters are in effect, which are to be held at the fresmen's association. The freshmen are expected to take their responsibilities seriously and to be a stand in their own and the university associations. For instance, when matters are in effect, which are to be held at the fresmen's association.

Dr. Tryon Discusses Engineer's Training

Professor J. L. Tryon, chairman of the department of engineering, was the chief witness in the session held at Wittenberg University, which included his lecture on the subject of the Tryon Committee. The Tryon Committee discussed various courses of study in the faculties of the courses in engineering and pure sciences.

The Tech to Print Names of Freshmen Not Wearing Ties

The plan will be started with list of Students next issue

As a further development in the plan to make the freshmen a success in the last month during which they are expected to take their responsibilities seriously and to be a stand in their own and the university associations. THEY SHALL NOT FAIL

MENTION has been made from time to time of the possibilit-
ity of the Freshman Rules falling by the wayside if they are
not enforced to the letter, and in the excitement over this
attempt to scare the newcomers into doing right by our new
tradition, more than once it has been said in all seriousness.
What, it is asked, is the sense in wasting effort over such
principle if it has such chance of failing? We answer only that
it will not fail.

These rules were the creation of the Institute Committee, by
whom they have been nurtured along since the day they first
went into effect early last fall. Throughout this trial year the
Committee has had the sincerest and ready support of THE
TECH. We have coaxed, wheedled, sermonized—all to the
best of our ability—until the subject has grown to be almost
stock material. We are through with that. But we by no
means intend to give up failure is an impossibility.

Those who are acquainted with the Chairman of the In-
stitute Committee know that once he has seen the possibilities
of a good idea, he will leave nothing undone until that idea
is accomplished. President Jope is well impressed with the
potential qualities that the Rules have displayed—so well that
the system now has no chance of being dropped. The Institute
Committee is not likely to waver in its support after having
labored so long for the success of the plan. And the policy of
THE TECH has already been stated. Months before the idea
was brought to the notice of the Class of 1932, we wrote upon the
need of such a system at Technology; and now that we have
seen it in more or less perfect working order, we will not
change our stand, however others may react.

Our policy, announced elsewhere in this issue, of printing
something ill him that commands the

weaknesses of this knightly crusader

and respect of those

who for their lack of spirit and interest are ap-

proaches. We are through with that. But we

see it in more or less perfect working order, we will not

change our stand, however others may react.

Gymnasts Defeat Penn but Lose to Army

All Firsts but One Taken by Engineers

Fighting hard from start to finish, the Engineer gym team broke into a rout in the match with the Army and Penn at West Point on Saturday afternoon. The Cardinal and Gray lost the Army meet 26-28 in spite of the fact that they took every first but one, while they swamped Penn 40-14. Next week comes the crucial event of the year when the Engineers enter the intercollegiate which will be held in West Walker gym this year.

Practically every first in both meets went to the hard-fighting Cardinal and Gray team. It was only lack of men in the last team that kept them from defeating the Army as they took first in every event except the forging rings, in which the Gray team won every place. In the Penn half of the affair the Engineers took every first and several seconds.

Kates is Star of Meet

Norman Dolloff was by far the outstanding performer of the meet, taking first in the handstand by a large margin. Since he has started working on a front swing his performances as a whole have improved almost 15 percent. Apparently Macaroney of Princeton is the only one that stands between him and the Intercollegiate Handstanding Championship.

But Fairchild was the high point man for the Engineers, taking firsts in the rope climb and side horse in both meets. His work on the side horse was carried out very well and he stands a good chance of placing in the Intercollegiate next Saturday. In several of the previous meets he had the habit of slipping off the horse before completing his series, but he seems to have remedied this fault. Mr. Moore did not do quite as well as Fairchild, being able to get a second in the Penn side.

Wells Wins the High Bar

David Wells was up in his usual form on the horizontal bars, taking first in both the Army and Penn meets. He will be a big feature in next week's intercollegiate in both events and the all-around championship as he has been developing all of his spare time work on the side horse and unending, and has perfected a fair series in both. He is also coming along very nicely in the rings, and has been improving steadily on the forging rings, taking a first in the Penn meet.

Bradley Bauer was one of his best exhibitions on the parallel bars this year when he took third in the Army meet and first in the Penn affair. Besides he took third in the Army meet and second in the Penn affair. He is a strong candidate for the Penn title.

In Final Meet of Season

The meeting was the final meet of the season for the Engineers. In looking over their record, they have not broken even, having beaten Rowan, Temple, Penn, while they lost to Princeton, Navy, Dartmouth and the Army. The intercollegiate next week will be the climax of their efforts. As May 30th is being held in Walker, the Cardinal and Gray will have the advantage of that fact and the outside team that ought to count quite a good deal.

One of the features of the intercollegiate.

Engineer Matmen Take Third Place in New Englands

Technology's Varsity gymnasts came through with a big surprise by beating out Tufts for three places in the New England intercollegiates at Tufts after qualifying a man in the preliminary round. However, the men did defeat the Beavers in two cases also, giving Cal Tech the championship, giving Cal Tech the championship, giving Cal Tech the championship, giving Cal Tech the championship, BEAVER HOCKEY MEN
DEFEAT BROWN 4 TO 3

CROSBY, DONAHUE AND
WHITE SCORE GOALS

Freshman Sextet Loses to Un-
defeated Brown Team

For the game of 1:45 to 2:15, Thursday
afternoon, the Beaver hockey team
slipped down the West 34th St. steps
for the final game of the season. The
start of the game was the deciding
factor and the enforced vacation
noticed in the second half of the first
period enabled them to take the lead
while the Brown team was scoring.

The offside, and where unable to score,
the Brown team held on during the
entire period. The game was
completed at 3 o'clock
Mr. William F. Joachim of the Ad
visory Committee on Athletics at
Lansing Field delivered an address on
"High Speed Fuel Injection Engines" in
Room 2349 on Friday afternoon at
3 o'clock. Mr. Joachim was brought to
the Institute under the invitation of
President Samuel L. Stratton to speak
before the members of the M. I. T. Student
Board of the American Society of
Engineers, the Aero-Association of
Students, members of the Puma
students and their friends.

Research for fundamental work in
this field is being done at the
University of Illinois under the
direction of Mr. Joachim and his
students. The Diesel engine is one of the
most efficient engines ever conceived. I
love the idea of the Diesel engine in
four-stroke engines for the automobile
and for air traffic. Dr. Joachim then
discussed the advantages of the Diesel engine.
The most important of these are:
"Thermal efficiency, no carburetor,
no ignition system, no radio inter-
ference, no exhaust, no mechanical
operation of fuel, high cycle effi-
cient, less parts and more simple
maintenance.

ENDOWMENT MEETING TODAY AT 3 O'CLOCK

Why Not?

Lured by Aroma of Neighbor's Tobacco

Boston, Mass., April 23, 1928

Gustavus.

This morning I had a smacking ad-
vantage worth mentioning.

Next to me in the smoking car
was a lady who was puffing away.

"I'm smoking Edgeworth," she

"It is Edgeworth," he answered.

This was the signal for me to
experience the aroma of the tobac-
coke. I had already Edgeworth,

I was not smoking at the
moment, and the aroma of his tobacco
was not as good as mine.

"I decided that I would continue to use
my own brand and mine," he said.

"Upon our mutual good taste, and I
regret that you are not smoking Edgeworth,"
