PROM COMMITTEE HOLDS REDEMPTION DRIVE THIS WEEK

Setting Arrangement of Prom Dinner May Be Made at This Time

TRIOUARDS WILL PLAY

Style of Pass-out Checks to Be Withheld to foil Gate eners

Redemption of sign-ups for the Junior Prom may be made any time this week at the booth in the Main Building, and the tickets may be sold for the Prom dinner. There is no reason to believe that a sign-up is not to be held, but the committee is trying to call the attention of those who have not signed up to this fact. The sign-up will be held from 7:30 to 9:30 on Thursday evening at the Main Building.

OFFER FELLOWSHIPS TO M.I.T. GRADUATES

State College of Washington Will Make 25 Awards

According to a recent announcement, the State College of Washington is offering 25 fellowships to students who have completed the junior year in the college with a grade-point average of 3.0 or above and who have been admitted to the graduate school. The fellowships are open to students of any race, color, or religion and are awarded on the basis of academic achievement.

PUBLIC UTILITIES TOPIC OF LECTURE

Mr. L. N. Nash, of Stoes and Webb, will be present to the President's Club at 7:30 p.m. Thursday evening at the Main Building to deliver a lecture on "Public Utilities." The talk will be given by the president of the company of the same name and will be devoted to a discussion of public utilities in general. The lecture will be open to all members of the club and to the public.

THE TECH

THE TECH EDITIONAL SPECLUM

AS WE SEE THE MOVIES

METROPOLITAN

A fighting, loving first mate, just two years short of being the skipper, is a character that won't soon fade from the memory of a student. She loves, leaves, and brands them, but he, obviously, isn't thinking of anything but the next girl. It is seen today fall mainly into three classes-an interesting, worthwhile, and bad. We believe that the change will prove a welcome one to the students, and the beautiful make in the grace type that would allow the faculty ample time in relief we have from the grind of elec-

THE TECH BOOK LIST

A PRESIDENT IS BORN, by Pamela Keough, New York, Harper. $2.50.

A few months before the early life of a country youth destined to be a future ruler of the United States starts. This book, by the author Picture House has taken upon herself to show, with its usual vividness, the fact that her story is now among the few best sellers of the day; and that by the time she is grown up there will be thousands of people that will have read the story for himself. Developed under primitive conditions that are said to have made thousands of our past presidents what they are, she is the only boy to go up with the last day of the student is placed under a very severe strain. We feel sure that even the short period of two days and the extra days thus provided will allow the students to make up records and attend to the various other duties connected with the closing of the school year; they will as well furnish the student with sufficient time and effort to make a careful review of the term's work before plunging into the depths of the dreaded finals.

 Behold the Bull

Lest our scattered best, "The Filter Paper," be taken in too literal a sense, we desire to explain that the average right is not a corrective measure. It is interesting to know how per- rectly, and since efforts to reform were ever given standing and professor to respond to the criticisms of this pink edition.

THE COLLEGIATE EMPIST POST

REFORMS are introduced from the most unexpected sources. Who would think that Hollywood would be the place where American universities can right track? Many is the time we have seen genius elsewhere, but hardly, the need, uses her sex appeal to attract football stars to a school on the brink of ruin because it is consistently losing its games. As far as we are concerned, the beautiful snake in the grass type has an excellent story, and is distinctively different from the college girls that fall in her path, but her practicality does not interfere with her sympathy and understanding.

BEAVERS HAVE OUTDOOR PRACTICE
OLYMPIC GYM TRYOUTS TO BE HELD IN WALKER

Baseball Candidates
Hammer Out Long Hits; Drill Under Coach Silva

Thirty-nine aspiring candidates for the Beaver baseball team braved the high winds and intense cold of Saturday, in expectation of the first call for official practice. The assignment was by no means discouraging to the few spectators, who watched the team's performance until forced to retire by the severe cold weather.

It was evident that in at least one individual a feast was to be had, and that is at the bat. During the course of the practice, an out-fielder, who is one of the boys from back of the Coop, put on one of the finest individual performances of the day. This boy, a son of a prominent member of the club, was most spectacular in this demonstration. It was evident that in at least one member of the team braved the high winds and intense cold of Saturday, in recognition of the possibility of a few spectators, who watched the team's performance until forced to retire by the severe cold weather.

There was no lack of enthusiasm in the ranks of the Beaver candidates for the first practice, as it was evident that the squad was strengthened by the absence of several who were absent from the regular practice schedule. It was also evident that the members of the team were willing to place their talent at the service of the team, and that they were ready to give their best in any situation.

The assignment was by no means discouraging to the few spectators, who watched the team's performance until forced to retire by the severe cold weather.
