LITTLE COLLEGE THEATRES

QUICK to take advantage of such new trends in the modern universities are those showmen in whose ventures into the Little Theatre Movement. The School of Speech at Northwestern University has just completed its third annual Little Theatre Production, "The Sign of the Greedy Pig," with such distinctly gratifying results that the contest will now be continued indefinitely.

The affair is not at all sectional is well shown by the fact that colleges from such widely separated states as Arkansas, Missouri, Louisiana, Kentucky, Iowa, Texas, and Colorado, the first two tournaments were won by the University of West Virginia. The whole program was taken by Butler University. The sole restrictions are that the plays be written and performed by college students carrying full college work, and that the play not take more than four hours in rehearsal.

In their first effort as a college dramatic organization, the Technology Branch proved conclusively that it was capable of holding its place among the best college activities. It is illogical to presume that with such a start the organization will not be able to represent that Technology may be represented in the future at the Northwestern Tournament. O'Neill at the first gulp is a feature which would make many a trooper faint. Yet the Institute cast made of it a really excel- lent stage production, in spite of the handicap of working under such poor conditions. That they are capable of doing equally as well a play as from the type of "The Hairy Ape," which will be shown at the first of two performances Friday night.

This play of Charles Brooks' is purely a comedy of exaggeration that through its place at several of the more modern insti- tutions. It will test the ability of the players to shift from the impressionistic sort of thing that O'Neill's forte is the spring-like humor that takes place in the vicinity of the Greedy Pig—the more so since such comedy is often the most difficult to stage. We shall be greatly interested in attending this second effort of Dean Fuller's proteges.

FROTH MEET TUFTS ON TRACK TODAY

Cardinal and Gray Favorled in Meet With Jumbos on Tech Field

Track House opinion seems to point to the Tufts freshman team to be the most in the meet they meet the Technology varsity team on Tech Field at 4 o'clock. Some considerable improvement has been made in the track team since it appeared last week. This is especially noticeable in the field events. Bill Hardy has the discus hand and now and应当 reach close to 129 feet this afternoon. Bill Miller has been a fine man, to give the pole vault strength, in the Duncan field and he should with practice be reaching good heights before the season is over. Bert Gonswald after his 42 foot 3 inch put against Andover should have little difficulty with the Tufts pole vault. (Donn) will also be entered from the field.

Benjamin's Jumping Will Be Feature

Bill Benjamin, freshman high jump record holder, will raise his present standing of 59.5. Cohen and Nordin will back up their team man in the high jump, as the record will be considered the best in both events. Jimmie Woodcock is making good distances in the broad jump and if his inflated back doesn't bother him, chances are he will break even the high jump record of the school. The mile will be fortified with the addition of Dick Baker who has been artillery from the half. Glenn Goodwin will be the fully in the 220 yard dash along with (Hal). The long jump is scheduled for today.

Anchors Away!

The varsity track team will take their annual trip to Harvard yard. There will be all Harvard track teams there and the varsity meet will constitute one of the most exciting of the season. The Harvard team is stronger than Tech's and the varsity meet will test the quality of the Tech team.

UMBRY OUT SATURDAY'S RACE

Byrne Shifted to Varsity Boat. To Fill Vacancy Caused By Sickness

Starting the week before the Harvard race without the services of Bill Erickson at No. 4, the Varsity crew rowed to the arsenal last Monday with Johnah McQuade at the bow and Charlie Forbes at the throat for Erickson. The latter is in bed with the grippe, and his chance of being able to row tomorrow looks slim. It is uncertain whether the crew of time remaining before Saturday will be too short for Byrne to get used to the nvail in the varsity shell, after rowing all spring in the junior lineman.

The jayvees were shaken up in the heats at a bit, but the permanent changes probably will find Al Laiman in Abbott's seat at No. 2 and Abbott at No. 4. These two men have been fighting it out for the regular position at No. 2 all spring, with first one and then the other having first call. If Erickson is in shape for the tugge- lars more, a week from Saturday, there will be some interesting changes made to make room for him in one of the seats.

The fifth and first freshman boat with the two heavy boys every night and now seem to be improving a good deal. The Primrose meet was a little tough a debut for the boys liking them. They'll learn to work the boat as they go. In their workouts these evenings, it is thought that the boys are giving the old B. M. a good pop into the frosh boat, and that the first year men are showing good advancement.

Engineer Track Team to Oppose Cornell Saturday

Maine Beating Pots Fight Into Hearts of Cardinal and Gray Men

But beating sometimes have a good pull to them. Maine does not last Saturday has certainly attracted the attention of Tech. The meet with Cornell on Tech Field at 2 o'clock this afternoon will find a fascinating bunch of Cardinal and Gray members running on their early season set back.

Cornell will be at an absolute advantage this year, having won the inter-collegiate meet at New York this winter. However most of the strength is in the field events and the hurdlers. The Engineer's main power is in the track and the last mile. In the former Tech had its famous John R. M. Johnson and Jack Halverson. Marsh Allgood of Tech should do well in the 100 yard dash but the 220 yards is his specialty. Tinsley who will enter the mark. Pete Riley has been doing good work and he will find a fighting bunch of Cardinal and Gray men.

Mass Meetting Friday at 11:15

Jim McCarney, имеет record showing back to 1915, will be one of the best in the meet at last year and should do as well if not better on home field this year. Technology has a capable man in the distance events in Miles Gray. His trip made several 220 yard successes last year. Gray and Gray is the scoring man in the event after the 220 if it is. will be held from in the pole vault.

Coach Follard wants to test all Mediums in his meet at last year and should do as well if not better on home field this year. Technology has a capable man in the distance events in Miles Gray. His trip made several 220 yard successes last year. Gray and Gray is the scoring man in the event after the 220 if it is. will be held from in the pole vault.

Lured by Aroma of Neighbor's Tobacco

Boston, Mass., April 20, 1927

This morning I had an amazing advertise meat

Next to me in the smoking car a gentleman was cutting his pipe contently. I was not smiling at the moment, and the aroma of the tobacco was quite strong. For ten years I had smoked Edgeworth without being particularly interested in that brand. The fragrance escaping from the pipe of the gentleman next to me was so agreeable that I could not resist the temptation to ask him what it was.

"That is wonderful fragrant tobacco, how did you have them," I remarked.

"Would you mind telling me the name of it?" I inquired.

"It's Edgeworth," he answered.

We congratulated each other on our good fortune, and I decided that I would continue to use his brand and never go back to it. I've been very pleased ever since.

New Aeronautical Laboratory

TO Be Completed Soon

Formal Dedication of Building

Will be Made During June

Completion of the Daniel Guggenheim Laboratory is expected to be completed in the middle of June. It is nearing completion at the present time. Airmen who have been actively engaged in the design and construction of this laboratory for the past three years have been working on the project. The laboratory is expected to be ready for use by the end of June. The laboratory will be equipped with the latest in aeronautical equipment and will be used for training purposes.
