DEDICATION TALK IS DELIVERED BY W. P. McCracken

Guggenheim, Warner, Means Are Among Speakers at The Exercises

MEANS MEDAL AWARDED

The Daniel Guggenheim Foundation recently awarded the Guggenheim engineering education scholarship for the coming academic year. The scholarship, which is awarded to students who have shown exceptional merit in their studies and a strong interest in engineering, was established by the late Daniel Guggenheim, a prominent engineer and inventor.

Promotions and appointments on the faculty and instructing staff of M.I.T. during the academic year 1933-1934 were announced by the Committee on Academic and General Affairs.

The dedication talk was given by Dr. W. F. McCracken, who delivered a talk entitled "The Guggenheim Foundation and Its Work." McCracken highlighted the contributions of the Guggenheim Foundation to the advancement of engineering education and the importance of providing scholarships to deserving students.

Senior Week Is Finale Of '28's College Career

Feastival Are Opened With Annual Picnic Held On Hammond Field

With the closing of the Senior Week in the small hours of tomorrow morning, the last and grandest of the Senior Week events of the Class of 1932 will come to a close, marking the end of their four year course at Technology. These events, spaced throughout the week, have been as usual, the most jolliest social events of the year. It is to be expected that the climax of all these events will be the fun-filled, noisy farewell party for the seniors that will be swung up by the Teachers and students of the Class of 1932. It is planned to have this final event held in the Hall of Expectation, with a buffet dinner, followed by a sing-along on the terrace, on that a midnight supper may be served to the graduates.

The assembly of the Seniors for the dedication of the Emma Rogers Room in the new Memorial immediately after the 11 o'clock on Thursday morning will mark the opening of the Senior Week. Special cars carried the hilarious group of seniors from the city it is said that they boarded the ship "Myrtles" for their destination.

It was not long after their arrival that the party was dispersed and a passing scene as to the meeting of the group was left behind. The party adjourned to the Emma Rogers Room in the new Memorial immediately after the 11 o'clock on Thursday morning and from there the group adjourned to the Academy Gymnasium for a doughnut and coffee breakfast.

Dr. Samuel D. Striker, Assistant Professor of Physics, spoke on various physics problems and the students were left to enjoy a brief repast of their own.

The dedication address was made by the Hon. William P. MacCracken, Jr., Secretary of Commerce for Aero-

Sciences. Another distinguished speaker was Commander Jerome C. Nunneley who was one of the instructors (Continued on Page 6)

KEYSER REPRESENTS N. ENGLAND ANNUALLY

Any other inquirer, the name of the house was, and spoke of the motives which inspired that work. He continued that this paper was nothing but the actual personal relations of the individual who had been busy with its construction with that kindred thought of the house being harmonized with its comrades in the same office. On June 21, Keyser will represent New England before the Rankin Memorial at the Banquet of the Better American Association in New York.

**THE LAST WORD**

NOTHING could be more ludicrous than a few Juniors giving a class of graduating Seniors a wealth of parting advice, nothing more idle than sympathizing with them over a last departure from the Courts of M. I. T. These Seniors know better than anyone else what is good for them, and the eve of their completion of all the study an engineer will ever need. And they vainly try to tell themselves that not a tear will be shed over leaving forever the undergraduate body of such a laborious institution.

Hence we are closely confined in this parting message to a few words of sincere and friendly hope for the future. We can't tell the Cap and Gowns that they will have a lot to learn, for the world will teach them that, but the world will teach them in a manner that may all turn out for the best—that these air castles will at least partially be realized. We can remind them that however much they have groaned and complained at the constant overload that the Faculty has heaped upon them, and the fact that a standard that could get out of reading for a second year and be called a freshman, in combination with the six boarder and youngish type of wide trowsers.

The managing Board of THE TECH, Volume XLVIII, regrets to announce the resignation of Gregory Smith '30 as Advertising Manager. We can but wish them luck in that endeavor.

In charge of this issue: The Managing Board

**SCOTT'S BLUE SUITS FOR GRADUATION**

In a type of fashion that can be depended upon to meet the wishes of Young College Men, the trend that is current in every detail, with straight or semi-straight back, patch or flap pockets, single or double breasted, two or three buttons front, in combination with the six button vest and youthful type of wide trowsers.

Made in our own workrooms.

Blue Suits ....................... $45 to $55.

Fancy Suits ....................... $46 to $55.

Tuxedo & Trousers .................. $50 & $55.

(Young Men's Department, 2nd Floor)

**THE LOUNGER**

(Continued from Page 1)

* * * *

It seems that Joe Paris was the only one who had nerve enough to put up the first protest for Mr. Smith's announcement. All the rest were subdued.

* * * *

And with Duco, results will always come up to your fondest wishes.

No experience is necessary to get the most striking results with Duco. You can use a brush or hand sprayer. Everyone in the family will enjoy doing his or her part.

Come in and let us show you how easy it is to bring new beauty into your home with Duco. You have a choice of 12 popular colors, four stains, and the transparent Clear.

**HELP WANTED**

Two Tech first or second year not student sales work. Good salary and commission. Positions pays at least $400 for the summer. Apply Juno 65, 104 Milk St., Boston.
THIRTEEN AWARDS OF FELLOWSHIPS GIVEN OUT TODAY

Four Travelling Fellowships Given to Graduating Students

GIVEN BY DR. STRATTON

President Stratton announced the following awards at the graduation exercises today:

In Beals 31, of Belmont Mass., was awarded the travelling Fellowship in Architecture for pursuing courses leading to the degree of Master in Architecture.

Art Vinton of Adams Mass., A.B., Williams University, was awarded the Best Fellowship, pursing courses leading to the degree of S.M., with a stipend of $1,000.

Donald Stevens Cryder, B.S., M.S., University of Colorado, was awarded the travelling Fellowship for study in this country or abroad in courses leading to the degree of Ph.D., with a stipend of $2,000.

Charles Draper '26 of Palo Alto, Calif., and Victor C. Smith '24 of Beaufort, S. C., were made fellows ining to the degree of Ph.D. in Geology for pursuing courses leading to the degree of S.M., with a stipend of $1,000.

Guilermo Zuloaga, Ph.B., Central University of Venezuela, was awarded a fellowship for study in this country or abroad in courses leading to the degree of Master in Architecture.

Ermanno Bastilio '28 of Quincy, Mass., was awarded the travelling Fellowship for study in this country or abroad in courses leading to the degree of Master in Architecture.

The Bicentennial Science of 1928 was held in Trinity Church on Sunday at 3 o'clock, and the parade which marched down the center aisle to copy the front section of the church comprised nearly 500 students dressed in their cap and gown regalia. The sermon was preached by the Reverend Harry E. Sherrill, rector of Trinity Church.

As one of the major events of the week, the Senior Class Day exercises were held yesterday in Walker Memorial at 11 o'clock. The Senior Class, enunciated gift, was presented by Ralph V. Jones to President Stratton, greatly exceeding last year's total in size, and will amount to $700.00 at the end of the year. In addition to these, there are no lapses. The Class History, consisting of a brief resume of President '28's activities, was given by James Donovan. This will be the first use since the construction of the new Institute building twelve years ago that the exercises have not been held in the open of the area of the Institute grounds. This change has been necessitated by the alterations now being made in the great court to put a plan to beautify the grounds.

MAKE THIRTY-EIGHT CHANGES IN FACULTY (Continued from Page 1)

Three appointed instructors were L. A. Bingham, Chemical Engineering; E. S. Gray, Mechanical Engineering; C. E. Stowe, Electrical Engineering.

OLD GOLD

In my travels here and abroad I have often wished that I might find a cigarette of pleasing flavor which would not rusk my throat or bite my tongue.

The blindfold test has proved to me that I need seek no further... For one of the four cigarettes given me to smoke had just the qualities I've always desired.

The pleasant, smooth cigarette I named as my choice turned out to be an OLD GOLD... No wonder so many of my friends prefer this brand. I too find OLD GOLD the most delightful cigarette of all.
CEREMONY OPENS AERO LABORATORY

Means Prize is Awarded to S. Niedchman ’25 For Essay On Aeronautics

(Continued from page 1)

In Aeronautical Engineering when the course at Technology was in its infancy, the James Means Memorial Medal for 1925 was awarded during the centennial year of the Wright Brothers’ first flight. The medal was presented to Dr. J. H. Barron, 34th president of the Institute, who in earlier days had been president of the Engineering Society of New York City, whose essay on “Intercommunication Between Aircraft and Between Aircraft and the Ground” was declared to be the best submitted.

The prize is donated by Dr. James H. Means of Boston in memory of his father, the late James W. Means, who was recently honored in an aviation. As early as 1884 James Means predicted that the future lay in the development of an air vehicle. The present prize is in the form of a bronze model of an airplane and is presented to the student who has the qualifications to own ability that will enable him to design and build an airplane. A copy will be kept in the Institute.

PROFITABLE SUMMER WORK

The Tech SOCIETY FOR EDUCATION

BOSTON, MASS., CAMBRIDGE, MONTREAL, HAVANA, BRASIL, FLORENCE, PARIS, PAVIA, SYDNEY, POZNAN, BENGALURU, BENGALURU, MARRAKESH

In the summer of 1925, the Tech Society of Education will be ready about the first of July. There will be a special exhibition of apparatus and models used in the lecture halls. From Oct. 3, 1925, to May 29, 1926, the Tech will be open to the public. The Tech will be open every Saturday from 10 a.m. to 2 p.m. and 4 p.m. to 8 p.m.
