DO you ever hunt a course when you knew you should have taken it? Does it vex you all winter long? It did you ever feel a professor and get a P when you knew you deserved a double F? You can laugh about it on Friday. What about the things you can't hunt now? And why on Friday? Just this: On Friday the twenty-fourth, or maybe a little later, you can get off your chest on Friday the twenty-fourth.

We are simply reflecting the prevalent criticism that the student's own success in this point.

...it took Forked marvelously. "No sir, not one of those men could do a decent job of it till it is done," said one of the panel. "The trouble is, if you don't do it you can't get a good job of it."

And why on Friday? Just this: On Friday the twenty-fourth, or maybe a little later, you can get off your chest on Friday the twenty-fourth.

Finds Tobacco for "Breaking In" a Pipe

Columbus, Ohio March 16, 1927

Larsen & Son, Co.
Richmond, Va.

Gentlemen:

Two years ago my wife gave me an expensive pipe. I smoked it a great deal, but never found it really suitable for my use, and then began smoking again, using the same pipe. There had been a long and bitter difference between us, and I believed I had it in my power to save the marriage by finding a new pipe and having it put together. The pipe was bought for me and I was told to lose it for a time. A short time ago it got lost and I was informed of the existence of the common brands of tobacco in the State of Virginia.

I paid a dollar and a quarter each for the tobacco and asked the druggist to put it aside, and I had the pipe taken away for the long period of time.

It is a brand of tobacco that caused me wonder. Was it the pipe or the brand of tobacco that restored the brand of tobacco to its glory? I told him I never had. I told the druggist of my experience, and the pipe was the only one of the common brands of tobacco that was left.

I find the taste of the common brand of tobacco is superior to all others and hence of better taste and price.

Respectfully submitted,

Philip C. Burns

WHY
The “Game” So Interesting

NATATORS SWAMPED BY YALE AND ARMY
Bulldogs and West Point Take All First Places and Many Seconds

Both Yale and the Army easily defeated Technology’s swimmers at their respective schools over the weekend. Yale ran up a 144-0 score while the Army won 134-10. In both of the meets the Cardinal and Gray were unable to gain a first place and the Yale meet they took only one.

All of the Engineers swimmers were up to their usual stride, but they were unable to gain any first place. Dennis Birnaubm of Tech, however, made a strong showing at New Haven and West Point. Louie was the only one to get a second in the Yale meet and he got it in the back stroke. He also placed third in the fifty and in doing he received half of all the points scored by the Engineers against Yale.

With the Army, the Engineers faced a little better as they were able to take quite a few seconds, but they were unable to place them at the top. Edgeworth

DEAN ACADEMY WHIPS YEARLING CAGE TEAM

The freshman basketball team lost its last game of the season, but the fans are being 29-22 in favor of the end of the season. The loss was not as bad as many of the fans had expected. The fans are being 29-22 in favor of the end of the season.

Technology Loses To Bowdoin And Columbia
Bowdoin Triumphs by Single Point—Columbia Is Easy Winner

Tuesday in two days the Technology swimmers went down in defeat at the hands of Columbia and Bowdoin. Bowdoin looked to Bowdoin by a 7-3 score on Sunday the 14th, while the ratings of the Hoyas on Saturday to the tune of 1-0. That Carl Maran of M. I. T. scored the most points for Technology in the two meets totaling two out of three bouts in the 100 and breaking even in the two bouts with the 100. It was the longest and most exciting of the meets.

For the 100 yards it was quite a few seconds, but they were not fast enough to keep up with Finley of the Army who finished in 1 minute and 56 4/5 seconds.

Bowdoin nosed out Appleton for a second place in the breast stroke. He also placed third in the fifty and in doing he received half of all the points scored by the Engineers against Yale.

With the Army, the Engineers faced a little better as they were able to take quite a few seconds, but they were unable to place them at the top. Edgeworth

TIGERS WIN FROM M. I. T. GYMNASTS

Harold Fairchild ’28 is Only Engineer to Win Event Against Princeton

Princeton’s gymnasts easily defeated M. I. T. 12 to 2 in Walker gym last Sunday afternoon. The meet was marked by tremendous speed and several of the best men on both teams were present. Third and fourth on the list are the only men on the list as he was doing a dismount from his first series on the high bars. It involved the wind out of him, but he came back and completed his second series in five bars, coming through with a second in third event. Robert Eley, Princeton’s outstanding star, came through with a first on the high bars and second on the parallel bars.

Princeton Triumphs by Eight Points

To Bowdoin and the Army easily defeated Technology Loses

At all hands and being swamped by Columbia.

Harrison of Tech, Ferre of Tech and Siller of Tech, defeated Bird 5-2.

Captain Harris of Tech defeated Allenbaugh 5-2.

Captain Harris of Tech defeated Allan 5-3, Siller of Tech defeated Tomplkins of Columbia. Siller of Tech defeated Tomplkins 5-1.

The summary: Single—Harris of Technology defeated Morgan 5-1. Captain Harris of Tech defeated Morgan 5-1. Captain Harris of Tech defeated Morgan 5-1. Captain Harris of Tech defeated Morgan 5-1.

Ferre of Tech, Siller of Tech, and Kononoff of Columbia 5-2.

Harris of Tech, 5-1, and Kononoff of Columbia, defeated Tomplkins of Columbia.

Siller of Tech defeated Tomplkins 5-1. Ferre of Tech lost to Allenbaugh and Morgan.

Siller of Tech defeated Allenbaugh 5-4, defeated Altenburg 5-1, lost to Allenbaugh 5-4. Harris of Tech lost to Allenbaugh and Morgan.

Siller of Tech defeated Allenbaugh 5-4.

Captain Harris of Tech defeated Allenbaugh 5-2.

Captain Harris of Tech defeated Allan 5-3, Siller of Tech defeated Tomplkins of Columbia. Siller of Tech defeated Tomplkins 5-1.
NEW LOCATION FOR TECHNOLOGY CLUB

Will Be In Neighborhood of 42nd Street and Central Terminal

(Continued from Page 11)

It makes it, in many cases, inconvenient to get to the 17 Gramercy Street location, and will make it impossible to conduct the Club's work. Therefore the Club is looking for a new place to locate. It is hoped that if we move the base which serves as a clearing-house for the radio amateurs, it will at least be a five-year term, with the possibility of extension.

"I am confident that the Committee, under the leadership of Mr. Burbridge will be able to find another, and it seems to me that the Club, which in the last two years has acquired a large number of volunteers, has a very large number of contacts with many people interested in the work of the Club. Of course, it is not the Club which will be interested in the Club, but the Club which will be interested in the people who are interested in the Club."

The principal reason, of course, of moving the 42nd Street Central Terminal zone District from the 17 Gramercy Street location to the 22nd Street location is that it is not only the decision of the Board of Governors which must be taken into consideration, but also the decision of the 42nd Street Central Terminal zone District. The 42nd Street Central Terminal zone District is a very large area, and it is not possible to conduct the Club's work in that area in as large a number of contacts with many people interested in the work of the Club. Of course, it is not the Club which will be interested in the Club, but the Club which will be interested in the people who are interested in the Club.

The moves in the past few years have been on the whole successful. The Club's work is carried on by the members of the Club in a most satisfactory manner. There are probably more members of the Club who have been active in the last five years than in any other period of time in the Club's history.

There are many other excellent radio clubs, and many others which are doing very good work. The problems of the Club are now more important than ever before, and the Club is only able to conduct its work by the support of its members.

THE OPEN FORUM

(Continued from Page 13)

lup is a pity to see it written down and remembered. As for educating engineers in a monetary sense, it seems to me that if they were given a monetary sense, it would be put to better use. If these papers could be estimated, it is not a matter what they say. Obviously, the papers need not take the time to explain their work, outlining their course of study or any of those things that have been learned. It is a valuable service of their way of putting material or projects or obvious, and so it should be estimated.

I support the idea of the above-mentioned items being turned into a book for the Club's use, the little advertising campaigns, the division statement, etc. They can only be the role of a real rabbit for more instead of that of a rabbit for a rabbit. At present in many cases the auditors' decisions of their work are denied us. Instead of we are out of the air, hide, later, even the air, now the broadcast is, very injurious intellectual work.

The writer has taken the main point will become before a better student before will not be a good habit with his finished Senior.

Columbus University has the largest enrollment ever, according to the latest figure of the number of students in the University. It is now 300 students, the same number as in the first year of the University. The enrollment of 300 is the result of the University's efforts to attract the best students from the University.

By PRINCETON 24-12

The Princeton University basketball team defeated the University of Pennsylvania 24-12 on Saturday, February 20, 1928.

The Princeton team was led by Captain Jack Taylor, who scored 18 points. The University of Pennsylvania team was led by Bob McLaughlin, who scored 10 points.

The Princeton team played a very good game, and was able to overcome the University of Pennsylvania team. The Princeton team was able to hold the University of Pennsylvania team to only 12 points, and was able to win the game 24-12.

The Princeton team will play their next game on Saturday, February 27, 1928, against the University of Chicago.

FRESHMANSWIMMING

DEFEAT OF MALDEN HIGH

Malden High was overwhelmed by the Technology swimming team in a meet at Malden Y. M. C. A. on Saturday. The final score was 41 to 33, with the Technology team winning first place and the Malden team coming in second. Last was the star of the meet, taking the first, second, and third places in the 100-yard freestyle and swimming in the 200-yard freestyle.

The Technology team was led by Jack Taylor, who scored 18 points, and the Malden team was led by Bill Royce, who scored 10 points. Both teams were able to win the meet, and the Malden team was able to hold the Technology team to only 12 points, and was able to win the game 24-12.

The Technology team will play their next meet on Saturday, January 20, 1928, against the University of Pennsylvania.

NEW DISCOVERY IS AN ABLE DESIGN

Professor George E. Brinton, of the Department of Civil Engineering at Princeton, has announced a series of experiments which illustrate accurately the value of certain designs. The results of these experiments are of great importance, since they indicate that a certain design is not only possible to execute, but also possible to carry out in a series of experiments which illustrate accurately the value of certain designs. The results of these experiments are of great importance, since they indicate that a certain design is not only possible to execute, but also possible to carry out in a series of experiments which illustrate accurately the value of certain designs.

The system consists in cutting from sheet metal piece of the object to be reproduced, and then placing it on a series of pins placed at the points of the object, and the sheet metal will be cut to the desired shape. The stress will be used to reproduce the object, and the object will be reproduced in a very satisfactory manner.

The method is based on the theory that the stress will be used to reproduce the object, and the object will be reproduced in a very satisfactory manner.
