CLARENCE DARROW, NOTED LAWYER, TO SPEAK TODAY AT LIBERAL CLUB MEETING

ONE OF GREAT ORATORS IN THIS COUNTRY TODAY

Fame Rests on Many Noted Cases At Which He Won Up Cause of the Defendents

Known for Scopes Trial

Subject of Address and Room Will Be Announced by Liberal Club

Clarence Darrow, one of the greatest lawyers and orators in this country, will address the members of the Liberal Club this afternoon at a special meeting of the Liberal Club. As has been the custom in the recent past, the meeting will be held 7:30 o'clock in Memorial Hall. Mr. Darrow is well-known throughout the land for the famous Scopes trial at which he championed the evolutionists case against the anti-evolutionists led by William Jennings Bryan. His debate with the evangelists was watched by thousands in Tennessee. The famous trial produced some of the most famous law that has ever been said. This trial was of special importance to Technology, for the Leopold case at hand. Mr. Darrow originated the plea of insanity specialists. The resulting sanity specialists. It is interesting to note that Mr. Darrow originated the plea of insanity and this case as the one in which he is most widely known. He has been a living symbol of the survival of the fittest. The trial that is so thoroughly investigated asserting that this is a very different purpose from the one in which it is not to be used. A great many strange facts for a "living symbol of the survival of the fittest." It is to be displayed in some prominent places throughout the United States. It can be seen from publications in each issue both on page 75 and 76.

Preparations for Battle Are Made By Publications

T.E.N. and Voo Doo to Clash Tomorrow—Good Game Is Expected

An unusual amount of interest has been aroused this year by the classic football contests between T.E.N. and Voo Doo. The cross-country meet is held tomorrow at 2:30 on Tech Field. It seems that only a few weeks ago the students were invited to attend. It is thought that one of the staples of Tech's annual announcements. It has been designed in an effort to bring together the various factions of the student body. The game is expected to be a closely contested meet. One reason has it that T.E.N. has been fighting to keep the side and Voo Doo on the other. The game is sure to be a decided contest for both teams.

ENGINEER TO SPEAK ABOUT SEA POWER

Mr. George Claudio, Member of French Academy Will Give Address

Georges Claudio, the distinguished French scientist who has discovered many scientific processes and who plans to draw power from the ocean, will address the students at Tech tonight at 7:30 o'clock. He will deliver a lecture at Technology at 4:30 o'clock on Wednesday. The lecture, which will be given in Room 150 at 3 o'clock, will be of special interest to those interested in engineering and scientific research. Mr. Claudio has been attending the International Conference on Oceanic Pollution at Portland, Oregon, where he spoke on inventions and scientific research. He was among the first to discuss the subject of air and the ocean in the ocean. But the followers of the Green Dragon have spread a smell, as it were, and are depending on the old adage that "practice makes perfect," to bring home the bacon. It seems that the terms are very well when you have a great deal of practice and something more than just the usual amount of practice has been done.

CLUBS PREPARE FOR CHRISTMAS CONCERT

Program Concludes with Dance—Music by Tech Students

Plans are being completed by the Liberal Club to make the Christmass Concert to be given December 15. The program will feature music by Tech students and will be concluded with a dance. Ticket will probably be at an average of about $1.45 each. The student body was informed by the President of the Liberal Club that Christmas Concert has always been a feature of Tech social events, and it is hoped that it will continue to play a part in the social life of Tech.

WATER PRESSURE IN BUILDINGS RAISED

New Pump System Will Bring Higher Pressure, More Water

Because of the lack of sufficient water pressure has made itself apparent in the upper floors of the Institute buildings. This has always been the case in Cambridge, but since the erection of the Tech Electric Company factory, the pressure has dropped much lower than it was at any time before. To overcome this problem, the new pump system has been built. To overcome this problem, the new pump system has been built. The system is being constructed into the present system by the addition of a new main. This will afford the needed pressure 250 feet higher and a maximum supply of water at 40 feet pounds.

TECHNOLOGY'S HOPES REST ON THORSEN IN MEET AT VAN CORTLANDT PARK

Tryouts for The Tech Show Begin Tomorrow Night

Thirty-nine Parks Are Open to Students to be Handled in Coach

On the heels of an announcement that he had received the half of the famous Scopes trials, Mr. Darrow has announced the subject of his talk for tomorrow afternoon at a special meeting of the Liberal Club. As has been the custom in the recent past, the meeting will be held 7:30 o'clock in Memorial Hall. Mr. Darrow is well-known throughout the country, will address the student body this afternoon at a special meeting of the Liberal Club. As has been the custom in the recent past, the meeting will be held 7:30 o'clock in Memorial Hall.

TALK ON HYDRAULICS TO BE GIVEN TODAY

Kenneth C. Reynolds Has Done Research in Danzig

Kenneth C. Reynolds, instructor in the Department of Civil Engineering, will deliver a lecture on "The Climatic Factor in Man's According to Durand Churchill, Jr., of the Institute of Engineering in Stockholm, weather is the determining factor in man's progress and is the essential element in the development of human civilization." The lecture will be given at 7:30 o'clock. Mr. Reynolds is also a member of the Danzig Institute for Hydraulic Engineering in Germany, and the group which will be the interest of the technical development and research in this field.

ANCIENT ASSYRIAN BRICK ON DISPLAY

Other Exhibits Are Old Wood Locks, and Slate

Brick from an ancient Assyrian city is being exhibited today. The building containing 700 bricks is a ship from the famous shipyard, Constitution, and is said to be the most valuable ship in the New England colleges. The ship will be in the running for the next season. It is interesting to note that it is the interest of the students that has caused the most interest and development in this field.

LOWELL LECTURE TO BE GIVEN TONIGHT

Subject: The Climatic Factor in Man's Progress

The Lowell Lecture to be given tonight at 7:30 o'clock, is designed to bring the subject of the climate to the attention of the students. The lecture will be given by Professor Bob D. Ward, of the University of Chicago. The lecture will be given by Professor Bob D. Ward, of the University of Chicago. The lecture will be given by Professor Bob D. Ward, of the University of Chicago. The lecture will be given by Professor Bob D. Ward, of the University of Chicago.
I exellent good fellowship, the old-clothes spirit, and the concentration of these people has never been organized or run as an official Technology function. The result turned into a drunken brawl, and as such we saw it as an event that could have been prevented.

Several fast scrimmages will keep the varsity basketball squad busy during the coming week. The first game is with New Bedford and the Hangar gyn. Coach McCarthy wants his men in shape by that time. In the past couple of games the team's offense has greatly speeded up and the squad is rapidly getting into form.

Basket shooting has occupied a large part of the team's schedule. Good basket shooting is one of the requisites for a winning team and Coach McCarthy does not want any of his men to fall down in this line. The squad is also trying to see that all parts of the floor with special emphasis being placed on shots from the side lines. Many of the men are getting so that they can make a large number of shots that they try.

New Bedford is sending a strong five to the Hangar, but the Cardinal and Gray expect to come out of the contest with a victory. Coach McCarthy has no definite idea of the men that he will use in the opening game, but it is likely that a large number of the team will be included in the action. Captain Brokkenberg and Billy Allen are sure to play for a large part of the game, but a number of different men will probably be found in the other positions.

Up in Walker the year- beginning basketball squad is working hard and developing a team that will be able to defeat Westwood Institute in the first game of the year which comes on December 15. All of the men who remain on the squad have been rounded up and it is not likely that there will be any more cuts this season.

This year's team seems to lack tall men, but they have one of the fastest teams that have been out up in Walker for the past couple of years. Several interesting scrimmages have been held and some of the squad members are beginning to show some next passing and basket shooting.

DRAMATIC CRITIC TO LECTURE HERE

Undergraduates Will be Given Opportunity to Hear

Walton Fishard Eaton, who is in residence representing the New York State Dramatic Critics, will address students at the lecture, which will be held in the technique room, December 13, at 4:30 p.m. The lecture is open to all students and will be held in the technique room, which is currently being used for the lecture, and will be followed by a reception in the technique lounge.

JOHN R. FREEMAN TRAVELING SCHOLARSHIP

A Lecture on "Smell" by John R. Freeman, the winner of the John R. Freeman Traveling Scholarship, will be given on Wednesday, December 5, at 7:30 p.m. in the technique room. The lecture is open to all students and will be followed by a reception in the technique lounge.

CIVIL ENGINEERING

A series of lectures by members of the faculty, in the Department of Civil Engineering, who have been engaged in experiments under a John R. Freeman Traveling Scholarship, on "Laws of Hydraulics Applied to Problems of Engineering with Models," the lectures will be given in Room 1-150, Monday, November 26 at 2 P.M.; Wednesday, November 28 at 2 P.M. and on December 3 and 5, at hours to be announced.

GEORGES CLAUDE

Member of the French Academy, Physicist and Engineer identified with the development of processes for liquefying gases and with the commercial uses of the same gases, will lecture on "Generation of Power from the Sea"

Room 10-250, Tuesday, November 27, at 4 o'clock

Members of the faculty and students are invited to attend this unusually interesting and important lecture.

CALENDAR

November, Monday 26 3-00-Hydraulic Machines, C. A. Architecture, in Room 1-150.

5-00-M. T. A. A. Meeting, North Hall, Walker Memorial.

6-00-Associated Student Little Mitter, Faculty Dinner Room, Walker Memorial.

4-00-"Generation of Power from the Sea" - Mr. George Claude in Room 1-150.

7-30-Beta Psi Pi meeting, West Lounge, Walker Memorial.

8-30-M. T. A. Tennis Club Snooker, North Hall, Walker Memorial.

Wednesday, November 28

4-00-Engineering Societies, Grill Room, Walker Memorial.

5-00-M. L. M. Architecture Societies, North Hall, Walker Memorial.

8-00-Varsity Basketball—MIT vs. New Bedford.

JEHOVAH'S WITNESS

The Society will be engaged in "Tying Out," and interested in trying out for the Tech Squash team, which will be announced in the technique room.

T. C. A. CABINET MEETING

There will be a meeting of the T. C. A. Cabinet in the last office on the basement floor of Walker Hall, Thursday, November 29. 

BENCHMARK PICTURE

A picture of all those connected with the department of civil engineering will be taken by M. T. A. A. Photographers in the technique room. The picture will be used for the departmental yearbook.

DRAMA SHOP MEETING

A meeting of the Dramashop will be held in Room 11-044 at 7:00 o'clock. All members and friends of the Dramashop are requested to attend.

JUNIOR OFFICERS' MEETING

The Junior Officers' Meeting will be held in the basement of the technique room at 5:30 p.m. on Tuesday, November 27th.
