CLAude Addresses Students on Use of Sea for Power

CLAude, distinguished French scientist and inventor, is famous for his work with liquid air, and was the first to separate the constituents of air by liquefaction.

He said of his work with liquid air, and also explained his invention for the fixation of nitrogen. He told how he obtained this knowledge. He explained the methods of teaching each subject. He pointed out particularly the necessity of personal interpretation of the text make it difficult. In order to illustrate his point, Mr. Darrow brought a case in point: "Thou shalt not kill." This cannot apply to war, which Christian nations wage on each other. There are many exceptions such as in defense of your home or property. There is another point which gives us the answer. All the rest will be explained on the committee meeting.

VOO DOO IS WINNER OVER T.E.N. BY 12 REYNOLDS AND DICKINSON SCORE

Handpicked by greyhound and a display of dogs, the gridiron struggle between "Voo Doo" and the Trust in football last night was not a very near being postponed yesterday afternoon by M. Georges Claude, distinguished French scientist and inventor. M. Claude is famous for his work with liquid air, and was the first to separate the constituents of air by liquefaction.

DARROW-COMES AND GOES

JUST that—and very little more than that. Darrow conceded to visit the Institute; he was welcomed by a crowd the size of which the physics lecture room seldom sees; he made the throng laugh time after time; and then he left—the students—nullified.

The field yesterday was the sentiment that was far more interesting than a real game. Needless to say, it was far more original. Title plays abandoned; not even the team carrying the ball knew what was going to happen. The Lounger did his best to fly off which side Larry Hamill was flying on, but he changed sides in time to make the deplorable decision in both the important plays which had been signed up; there might otherwise have been a crowd to watch the moves.

He in the first place approaches the problem of our existence under this feeling should make men and women use their best efforts to help their fellow travelers on the road, to make the path brighter and easier as we journey on. It should bring a closer kinship, a better understanding, and a deeper sympathy for the wayfarers who must live a common life and die a common death.

Swimming Teams Are Getting Ready For Class Meet

Varsity and Freshmen Outlook for Swimming Season Is Bright

Both the Varsity and freshmen swimming teams are practicing hard for the big meet which will be held here December twelfth at the University Club for the Broadmoor Swimming Club shield. There is every indication that this meet this year will be a close one inasmuch as excitement in each event.

Although it is rather early in the season to make predictions the outlook of the swimming team is rather good this year. The Varsity has quite a few men back from last year's interclass meet to be held here December twelfth at the University Club. Along with the freshmen team which started the pucksters on their way to a busy winter season last year will be honored by the Institute this year.

The freshman team also seems to have a fine line up through the yearlings are rather bright in almost every class. This is due to the fact that the first time, when the president, Captain H. J. Darrow stated that he is unable to win or lose but the fact that he stated, "Religion is no

In Conscience A Guide

Dr. Darrow, disposed of opinions as a guide.

What is it? Does it know where it's going? If it knows where it's going, does it find it out?

The conclusion by showing that it is not the human body that it changes with the times and that different people have different experiences. Therefore it is necessary to take from their parents who get it from their grandparents. The speaker teaches that the teacher helps and that the neighbors take a hand and that the child has a free conception. He showed that conclusions of the lawyer are not a free conception and "feeling ways" which are always fleeting.

In Punishment Right

The speaker maintained the opinion that punishment is unjust. People say that a person is punished for doing something which he did not cause as a result of his own free will. The duty of the teacher is to give the right of possession and training for the coming generation.

Crime and Poverty

Mr. Darrow stated that if we visit any prisons and the people who commit crimes are not rich but poor. We will find very few criminals who have been to college.

About 65 men attended an all-

Thursday night, to announce their presence on their way to a busy season last Saturday night. A short talk on the Varsity and freshmen swimming teams

The Whiting Committee will hold in Room 10-250 on the following Tuesday evenings:

December 4

January 15

March 26

ECONOMICS

The following speaker will lecture before the class in Business Management in Room 1-121:

Mr. W. R. Price

District Manager, The McCaskey Register Company

They are stating, "Religion is no

The Laws of Hydraulic Simulate as Applied to Experiments With Models

The lectures will be given in Room 155, Wednesday, November 28 at 1 P. M. and on December 3 and 5, at hours to be announced.

ENGINEERS IN LINE TO SCORE SATURDAY

(Continued From Page 1)

has been doing very well in practice and will be among the main players at this Saturday's contest, Captain H. J. Darrow and his assistant, Mr. W. R. Price, have been working the past week and have shown to be very well in the scoring.

By the looks of the team in action it appears the Engineers have a very good quintet. The only thing missing from this year is some real good forwards. This is due in part to the fact that the team missed a few games of the season usually makes a better team. However, the team is very evident in action. Unequivocally they are better than any team this year, but there are no limits to the team's playing.

It is very evident that the team has improved on practice and that they have been working the past week. Looking for the team to improve on the game reasons for their not repeating the event.
