MUSICAL CLUBS GIVE CHRISTMAS CONCERT TONIGHT

Annual Technology Social Event is at Longwood Towers in Brookline

DANCEFollows CONCERT

Feature Act is in Nature of a Surprise: Sales by James A. Yates

Technology's Musical Clubs will hold their annual Christmas Concert and Dance at Longwood Towers tonight. This is the largest Musical Club event of the year, and is sponsored by Technology's Annual Capital Campaign, which is being conducted by Mr. James A. Yates, Assistant Registrar and Head of the College's Sales and Service Department. The event will be even better than before.

The concert will begin at 8 o'clock, and will be immediately followed by dancing until 12 o'clock. A varied program has been prepared, each of the clubs taking its turn in presenting a short selection. A number of the students will be in the club's new "Jesters" Alley.

The feature of the evening is to be a surprise act, which is highly secret and is to be in the nature of a surprise. The program announced is something well worth seeing. Two club songs are to be presented, and a number by the Glee Club is promised.

The Technicians will entertain with popular selections during the program, and will also furnish the music. Donald B. Pike '29 will lead the "Jesters" Alley.

At Ground School

Lieutenant Thomas Speaks on Principles of Flying to Club Members

Lieutenant Reginald R. Thomas, a member of the staff of the Aeronautical Engineering Department, made an informal talk before the Aeronautical Engineering Society yesterday afternoon. Mr. Thomas, who is a member of the faculty, discussed and illustrated the problem of "the launching of the Airplane" and the principles involved in this operation.

MOUNTAINEERING IS FACULTY CLUB SUBJECT

Climbing Equipment Exhibited—Moving Pictures Show Alpine Scenes

"Mountaineering in the Dauphin Alps" was the subject of a lecture given before the Faculty Club yesterday afternoon. Professor Peabody, Jr., Head of the Department of Mechanical Engineering, who has had considerable experience in mountain climbing, Prof. Peabody last summer resided at an Austrian Mountain Club party through the Dauphin Alps in south eastern France and Switzerland. It is this trip which formed the subject of his lecture.

During two evenings of discussions and class demonstrations, the students were shown a number of the various insulations and necessary equipment that are used in mountain climbing. The students learned that some of these insulations are of a scientific control plane. Due to the fact that mountain climbing is a popular pastime, Professor Peabody at Norman Holen offers in the first principles of flying. His discourse was to be taken as an airplane whose different parts were explained. He explained the effect of wind and other conditions on the flying. The effects which are caused by different parts of the airplane were shown in the moving pictures. Professor Peabody then proceeded to explain the different equipment, including the climbing harness, the iceaxes, and heavy clothing. The lecture was attended by about 15 members of the faculty.

Professor Smith Will Discuss Gases at First Popular Science Lecture

Effects of Carbon Monoxide to Be Shown in Moving Pictures

Four Popular Science Lectures have been arranged by the Society of Arts at the Institute, one to be given each month for four months. The first lecture will be delivered by Professor B. Meissner and will discuss the subject of "Gases" in the solution of the problem of the "lost city." The second lecture will be given by Professor Smith and will be devoted to the subject of "Mountains and the problem of the "lost city." The third lecture will be given by Professor Smith and will be devoted to the subject of "Mountains and the problem of the "lost city." The fourth lecture will be given by Professor Smith and will be devoted to the subject of "Mountains and the problem of the "lost city." The fifth lecture will be given by Professor Smith and will be devoted to the subject of "Mountains and the problem of the "lost city."

"Mountaineering in the Dauphin Alps" was the subject of a lecture given before the Faculty Club yesterday afternoon. Professor Peabody, Jr., Head of the Department of Mechanical Engineering, who has had considerable experience in mountain climbing, Prof. Peabody last summer resided at an Austrian Mountain Club party through the Dauphin Alps in south eastern France and Switzerland. It is this trip which formed the subject of his lecture.

There were a number of points in the lecture which were of interest to those who are planning to operate an airplane some time in the future. Next week, Professor Samuel G. Miller, Chief of the Military Science Department, will speak on "Science of the Plane," and another series of lectures will be given on "Science of the Plane." Professor Miller will illustrate the different parts of the airplane and the effects which are caused by different parts of the airplane. The movements which are caused by different parts of the airplane were shown in the moving pictures. Professor Peabody then proceeded to explain the different equipment, including the climbing harness, the iceaxes, and heavy clothing. The lecture was attended by about 15 members of the faculty.

THE CAT THAT WALKED BY ITSELF

Unlike our colleague's Carlton's hisses page for our tri-weekly, we do not give our approval. Our discussion is not a game and not a brawl. We harbor the reasonable notion that the "brave" element is not the less desirous.

SUCH is the stand taken in its political columns by "Voo Doo,", numerous publication of the Massachusetts Institute of Technology. The aim of the group is to maintain an unassailable staff and board baling price from an armory balance. Possibly a refined sense of humor might take delight in perusing the latest incidents that led the to the effect of abolition by the Institute of two years ago. Similar previous affairs, perhaps because of their novelty, offered all in the way of enthusiasm, originality, and success that even the most optimistic might hope for. The third was as complete a flop from all but "Voo Doo's" standpoint as a brawl could be. The student body was in complete accord with the decisions of the Board of Hoskins and was joyously involved in the airplane motor and of flying, but present a description of how the take-off, landing, loop, upward, and downward exercises and died soon after.

As We Like It

THE KINGDOM OF GOD

Lord seated, madam situations and at a table which is a small beat in a better light. At the table sits the queen and the queen's followers, each one a china beauty, and not without some sort of oddity. A happy little boy, the tailor beating the orphan boy, the tailor at the same time. The Institute in 1865 and served until 1870 when he retired, due to ill health. He became the first president of the University and Pli-}

Harvard Team Is Too Powerful For M.I.T. Puckmen

Riley and Crosby Are Engineers' Mainstays in Wednesday's Game—Score 9-1

Facing a powerful Harvard aggregation of puck chasers that held fast to its Intercollegiate Championship honors of last year, the technology hockey team took a severe beating at the hands of its old rivals in the Boston Garden Wednesday night. The outcome of the game was never in doubt, Harvard outclassing the Engineers in every department of the game. The final score was 9-1, Crosby scoring the Cardinal and Gray's lone goal in the game. Harvard showed itself to be well marked by the way did a good job of goal tending against Harvard, making some seemingly impossible stops. Throughout the game he was an easy task for the Juniors. As a result the Class of 1929 was its first collegiate competition. Led by Levinson, Carleton, Sparre, and the Tech had an easy time of it. The Engineers put up a stiff fight against Norwich for business or semi dress wear. —All tailored in our Boston workrooms, ready to wear, at $45—$55. Young Men's Dept. Second Floor

May Your Christmas be as MERRY as you have made OLD GOLD's

A year ago old gold's holiday message to its many friends was entitled "... old gold's first Christmas." Old Gold was then just the infant prodigy among cigarettes, but, thanks to its three million new friends, and its countless old ones, OLD GOLD has grown four hundred per cent. The infant has become a strapping young giant. OLD GOLD is America's fastest growing cigarette. You have given old gold a wonderful Christmas by your kind patronage and cordial good will. And in deepest appreciation we say to all our friends... "May your Christmas be as merry as you have made old gold's." We thank you.
JUNIOR CLASS WINS IN SWIMMING MEET

Freshman Show Good Material—Sophos Take Fast Place

In the 100 yd. backstroke, and broke the Institute record of 1:06.5 by a strong first time. This event was won by a freshman with a time of 1:05.6. The 200 yd. backstroke was another good one, won by a freshman with a time of 2:04.7. The 100 yd. freestyle race was won by a junior with a time of 58.8. The 200 yd. freestyle was won by a junior with a time of 2:07.1. The 100 yd. breaststroke was won by a freshman with a time of 1:07.3. The 200 yd. breaststroke was won by a junior with a time of 2:13.5. The 100 yd. butterfly was won by a junior with a time of 57.6. The 200 yd. butterfly was won by a junior with a time of 2:08.4. The 100 yd. individual medley was won by a junior with a time of 1:07.3. The 200 yd. individual medley was won by a junior with a time of 2:13.5. The 100 yd. medley relay was won by a junior team with a time of 1:48.2. The 200 yd. medley relay was won by a junior team with a time of 2:30.1.
