Gymnasts Evenly Matched at Navy Meet Saturday

Score Should Be Close in Every Event of Most Important Meet of Season

TEAM LEFT YESTERDAY

Navy Has World Champion Rope Climber on Record

Last Saturday

Tomorrow afternoon the Gymnastics Team will open its program for the present season in the gymnasium.

Some two matches will be the stiffest meet of the season. The men will be competing for the championship of the Intercollegiate Gymnastics League and it cannot be said with assurance just how the teams will get along in the meet. It will be interesting to see how the gymnasts will react to the first competition of the season and should he able to begin the new program for the meet.

In the individual events the engagement for the first event to be painted is the high bar. In this event Dave Wells stands a good chance of setting a new record. Within the last few weeks he has won first place in the high bar in every meet that he has been taking part in and is in the best physical condition he has ever been in. He has been practicing his series during the next two weeks and today Dave Wells is expected to set another mark.

Battle on Stele Horse

On the only horse to be found at the Gymnasium, Navy should have a fine battle for first place. Both wells are equal in the ability and strength of the two top men and either of them could win the high bar competition.

Quantum Theory Talks Commence

Prof. Heinzen, Noted German Physicist, Gives Nine Lectures

Professor Werner Heinzen, one of the greatest physicists in the world today, will commence a series of lectures at the Institute on "Recent Developments in Quantum Mechanics," the first lecture to be given in Room 403 at 4 o'clock this afternoon.

Professor Heinzen, now 58 years old, is widely known for his physical work and research. His work is particularly common in the field of the invention of the principle of indeterminacy, which he developed in his first lecture. Since that time he has done much work in the extension of the principle of indeterminacy.

As a matter of fact, all of the investigating work in the field has been maintained in the Main Laboratory and anyone who has not yet received his ticket may do so by purchasing them at that place today. Tickets will be sold there from 9 until 11 o'clock.

This is not the only hour when the ticket for the lectures will be sold. This afternoon after a meeting of all the members of the committee and others connected with the ticket sales will be held in the Faculty Room of William Memorial. The tickets have been sold fairly, and it is expected that the sales will be a success.

"TECH IN TURKEY" TO START ANOTHER YEAR

Adrian T. Skene, assistant professor of engineering at the University of Michigan, returned home from an interesting Technology Triathlon at Rochester College and the University of Michigan, announcing that he would accept the invitation of the Committee of the University of Michigan, to act as the "Tech in Turkey." His salary for the coming year is to be no more than $1,000. He has been in constant demand in the department of chemistry and is said to be one of the most versatile and hard-working students in the department.

The first lecture of the new series will be delivered at 4 o'clock on Tuesday, October 14, when the students will be given an account of the history and development of the University of Michigan, its departments, and its personnel.

Students Hold Nocturnal Vigil While Making Boiler Tests at Power Plant

Ober Seniors Make Debate as Stokers, Water-Weights and Bellringer

Boilers are removed from the power plant for inspection purposes, and the Ober seniors completed the annual test. Under the direction of Professor E. C. W. C. it was completed within the safety regulations and orders of the American Institute of Electrical Engineers. The tests were completed within the safety regulations and orders of the American Institute of Electrical Engineers.

The chief purpose of this annual "Vestibule of the "Infinite Wisdom" is to test the workmanship of the boiler operators in the boiler plant. It is not only a test of the boiler operators but also of the efficiency of the entire plant. The tests are usually comprised of a series of tests designed to determine the performance of the plant under actual conditions. The highest grade of workmanship is expected of the boiler operators and the tests are designed to determine the efficiency of the plant under actual conditions.

To those who enjoyed Ed Wyman in "The Perfect Fool," it is enough to say that he is again in Boston; the playing in which he is playing is of higher order. This time, however, it is not hard to sympathize with the whole mourned. Mental comedy seems to be the order of the day.

The current one is "The Office," playing at the Shubert Theatre, starred by George White, and comes here from a long run at Chicago's White's Apollo Theatre in Chicago. The plot is of the usual mixture of comedy and pathos. It incorporates many new ideas that had variety as well as humor. The cast is well acted throughout. The "New York" is a real Ireland in which the audience passes into fits of hysteria. He is a fine actor, and his charm brings him to an elite position; he is well worth seeing again.

"The Dark-down" characters made the audience laugh. A girl from Greenwich Village, because her mother is in jail, goes to the police, when her boyfriend comes to get her. She is left, heartbroken, a stranger in a strange land. As the service continues in a family, the mother, who has the opportunity to show that she is again in Boston; the play in the "Folies Bergere" in Paris. But Ed Wyman will be called "glorified," and also a deserved of all criticism which it received.

SWimmers ENTER NEW ENGLAND

Every Record Should Be Broken in New England Swimming Meet Tomorrow

ENGINEERS STAND SECOND TO BROWN ALONE IN LEAGUE

Trials Heats Will Be Held This Evening at University Club Pool

FINALS ARE TOMORROW

Tonight for the first time the New England Intercollegiate Swimming Championship will be held in Boston at the University Club pool under the auspices of M.E.T. Nine teams will be represented, and the powerful Technology team is expected to finish first.

The heats for the different events will be held this evening, as several events must be run off tomorrow afternoon at two.

The event in which the Technology team is most powerful and well-balanced is the distance events, in which they have repeatedly broken New England records. Captain Larry Long of this team has the New England record in the 400-yard back stroke, while his mate Ed Reade led Harvard to the title last year.

New England Intercollegiate Swimming Meet Dated April 6 to May 11, during which time matches with Buena Vista with 21 students and 1,500 teachers. The smallest is South Florida with 20,000 students and 50 teachers. The University of Texas has at last filled its quota of 2,000 students, while the fourth largest in the series is the University of Pennsylvania.

NOTICES AND ANNOUNCEMENTS

Of General Interest

Aldred Lecture
Dr. E. Degolyer
Friday, March 15, 3 P.M., Room 1240
Dr. E. Degolyer, former president of the American Institute of Mining and Metallurgical Engineers, will be the speaker for the fourth lecture in the Aldred Series. The subject of the lecture will be "Our Mineral Virtues."

The lecture is open to seniors, graduates and members of the instructing staff.

Quantum Mechanics
Prof. W. Heisenberg
Friday, March 15, 4 P.M., Room 4-231
Professor W. Heisenberg, Director of the Institute of Theoretical Physics of the University of Leipzig, will deliver the lectures on "Relativistic Development of Quantum Mechanics." The first lecture will be on the subject "The Principle of Indetermination."
The lecture is open to students and members of instructing staff.

New Board Chosen For Comic Monthly

Institute Organizations Vote In Favor Of Continuance Of Comic Monthly

(Continued from Page 1)

Directed to guttering and the continuance of the comic monthly were unanimously adopted.

At the Institute Committees meeting last week, the comic monthly Committee of the Institute Committee on Publications was instructed to continue the comic monthly as a matter of record. The decision was made on the recommendation that it is of record that the bulletin of the comic monthly for the spring term will be the last issue of the comic monthly. The comic monthly for the spring term will be the last issue of the comic monthly.

By a vote of 205 in favor of continuing the comic monthly, 25 in favor of abolishing the comic monthly and 47 in favor of abolishing the comic monthly, the comic monthly for the spring season will be discontinued.

As a result of this recommendation, the comic monthly Committee voted to accept the recommendations of Lawrence C. Hamlin '29, chairman.
