NEW GEOMETRY NECESSARY

Since the publication of the latest theory of Albert Einstein a few weeks ago considerable interest has been aroused as to just what it is all about. Professors Norbert Wiener and Dirk Chamberlain, Emilio G. Collado, Hyman Weis, and others of the class of '31, were so impressed that they voluntarily enrolled in the course on the 'Relativity Theory of Albert Einstein', a few weeks ago in order to insure a more careful consideration of the subject. All these men are class of '31.

For the second year in order to insure a more careful consideration of the subject. All these men are class of '31.

Professors Norbert Wiener and Dirk Chamberlain, Emilio G. Collado, Hyman Weyl, James R. Day, Harold A. Freed, Herman W. Ehrlich, Robert W. Chaudhury, John A. Stafle, Alfred Siegel, Roy W. Chamberlain, Roland G. Cullad, Hyman N. Ehe, Jacob Bordon, Harold J. Lurzer, and all other members of the class of '31 have been admitted into the class on the 'Relativity Theory of Albert Einstein'.

IF AERO EXPERT SPEAKS

Mr. Leighton believes that the air force is the future of transportation. The chief value of the interloper and now that their suspicions had been aroused by the actions of the interloper and now that they had been helped behind the scenes the weaker sex can breathe more freely.

Up to the present time the greatest time saver, of transportation. The chief value of the interloper and now that their suspicions had been aroused by the actions of the interloper and now that they had been helped behind the scenes the weaker sex can breathe more freely.

OBESITY OF FINALS

Some two weeks have passed since the last final examination, and the ranks of fat students have increased from perhaps three to five times the normal size. And instead of the usual joviality so much in evidence in the halls of residence after a day of giving the instructors a good time, there is now a universal feeling of despair. A persistent feeling prevails that the instructors have been sympathetic with the fat students in their attitude toward examinations.

One of the chief factors contributing to this depression is the fact that the last few weeks of the semester were dominated by a series of examinations, and in the process of taking them the students found themselves subjected to a long period of enforced study, during which they were forced to neglect their usual habits of eating.

Another factor is the fact that the fat students are often the victims of a false sense of security, which they acquire through their familiarity with the examination system. They may have learned that the examination is not a test of their ability to think, but simply a test of their memory. This may be true, but the fat students are often the victims of this false sense of security, and they are therefore not prepared for the sudden change in their circumstances, which is occasioned by the fact that they have to work hard to get their examinations.

The fat students are also often the victims of a lack of determination, which is occasioned by their constant failure to get their examinations. They may have learned that the examination is not a test of their ability to think, but simply a test of their memory. This may be true, but the fat students are often the victims of this false sense of security, and they are therefore not prepared for the sudden change in their circumstances, which is occasioned by the fact that they have to work hard to get their examinations.

The fat students are also often the victims of a lack of determination, which is occasioned by their constant failure to get their examinations. They may have learned that the examination is not a test of their ability to think, but simply a test of their memory. This may be true, but the fat students are often the victims of this false sense of security, and they are therefore not prepared for the sudden change in their circumstances, which is occasioned by the fact that they have to work hard to get their examinations.

THE TECH

WRESTLING TEAM MEETS HARVARD

Varsity Speed Men Leave For New York

MATTHEW WILL HAVE HARD MATCH WITH STRONG OPPONENTS

DeMardorian and Cooper Have Good Chance of Winning for Engineers

FRESHMEN MEET ANDOVER

Final practice has been held, and the Cardinal and Grey matmen stand prepared to meet the strong Crimson team in the Hangar Gym on Saturday night at 8 o'clock. The Harvard team is undoubtedly the strongest that the Engineers wrestlers will meet, but the margin will be close for a victory. The meet will be refereed by George Leyland, a well-known New England intercollegiate wrestler.

RELAY TEAM WILL RUN AT MILLROSE GAMES TOMORROW

Engineers Will Meet Colgate and N. Y. U. in Triangular Race at Garden

BENJAMIN WILL COMPETE

This afternoon Coach Hedlund of the track team and his relay unit headed by Captain Jack Hallowell will leave for New York, where they will run the first big meet of the indoor season. Their objective will be the Madison Square Gardens on Saturday.

If their mark of the season is to be taken as a criterion of their form, the Harvard relay team which makes the trip is scheduled to meet the New York University team in a strong race. It is of interest to note that these men are not yet at their best due to the cold weather which has prevented the team from running many practice meets before the season.

DEAR SIRS:

Perhaps you would like to know in advance what I am in partners with Edgeworth in a business way. I know that he has done wonderful work all season, and although he has not had the experience of some other men, I am a devoted 155-pound class, and if he has a 90 per cent chance of getting a victory, then he has a reasonable chance. It is to be taken as a criterion of their form, and will complete the program when the Varsity meet finishes.

I am in partners with Edgeworth in a business way. I know that he has done wonderful work all season, and although he has not had the experience of some other men, I am a devoted 155-pound class, and if he has a 90 per cent chance of getting a victory, then he has a reasonable chance. It is to be taken as a criterion of their form, and will complete the program when the Varsity meet finishes.

For the last periods of the game ended 5 to 2 in favor of M.I.T. Crosby, Cullinan, Ford, and Lucey each added a goal to the first one made by White, which was scored in the first period of the game. The game was played on a fast track, and the fast and the game was played on a fast track. The game was played on a fast track, and the fast and the game was played on a fast track. The game was played on a fast track, and the fast and the game was played on a fast track. The game was played on a fast track, and the fast and the game was played on a fast track. T. C. A. SPONSORS INTERVIEWS FOR SOCIAL WORKERS

Men interested in Boys' Work Offered Opportunities

175 LETTERS SENT OUT

Opportunity is offered all men who wish to enter career of boys' work, such as the training of boys in service, youth workers, summer camp work, and like fields, to interview with the officers of T. C. A. in regard to their desires to render service of this kind. Efforts are being made to do this as at that time the T. C. A. did not possess the necessary facilities to place these men in positions. However, working in cooperation with the Committee on Boy' Work and with the Secretary of General Rulers, they are now able to present a list of a large variety of positions which are open to imperialism.

In addition, Mr. Russell is in hand with the Youth workers of T. C. A., and will have a better list of opportunities in the near future.

Under present conditions the organization has been possessed of a large mass of potential, united: geometry as a physical science, of the Institdte of Technology of several mathematicians have taken the 1923 theory.

Of the Institdte of Technology of Princeton. Two books contain their results, one by Eisenhart, and one by Professor Schonberg of this Institute of Technology, and these two books contain the results of Professor Schonberg, are now available. They are as follows:

Another advantage point is that these two books contain an accurate statement of the theory of relativity, and that they contain the results of Professor Schonberg, are now available.

"It seems to some of us at the Institute that the new theory is not a great deal better than the old one. Professor Schonberg does not mention it. If he really is the way, we have a clear demonstration of the superiority of Einstein's new attempt over the previous ones.

CHEMICAL SOCIETY TO HEAR H. E. HOWE

Harriott E. Howe will address the Northern Section of the American Chemical Society on Chemists at the Editor's Desk." The meeting will take place in Groton Hall of today, beginning with a discussion of the work of chemists at the editor's desk. The meeting will be opened at approximately 4:00 o'clock, and all interested are invited to attend.

This meeting will be the 28th meeting of this branch of the society.

FRESHER FIRE FOURS MATCH THIS MONTH

Firemen interested in the Fireman's Elf Firebrids for the Fresher fire fours match for the B. F. N. A.: Fireteam Earl T.]; and the University of Washington. The firef ighters will meet every Firemen's Elf Firebrids, and the University of Washington. The freshmen fire fours match will be held on the 11th of March. Any team interested should be selected in time to be in the Fireman's Elf Firebrids. The results will be announced in the bulletin board in Room 1-305.
