Propriety Not Sobriety

After a year with no All-Technology gel-together, tonight saw the gala occasion of the annual Carnival. All last year the Ill fame of the Carnival has hung over us like a pall. We have never friendly squabbling any ideas for a recurrence.

And now the Carnival.

Everyone has worked hard for it. The committee has spent days in laborious effort to make it a success the students, and all other student groups are cooperating to the utmost.

And the Carnival is a success—the bad points of those events too far outbalanced the good they did.

"Voo Doo" will not throw pies; there will be no riotous parade; the system will still be running. And yet there will be no decrease in the fun and freedom of the occasion. Beginning tomorrow when the student body appears in old clothes, the spirit of the day is informality.

We at the Institute get far too little of that sort of thing. We go through life with a mask of dried-out dryness. We don’t know each other, nor do we make much effort towards mutual acquaintance.

If this Carnival does no other thing than promote a better feeling between the students, it will amply repay the effort. And remember only one thing in your enjoyment. On the success of today’s venture depends the continuance of this most valuable tradition, if you will, of separating the boys from the men.

Everything is set for the biggest event in Technology’s history. The performance, the cooperation of the student body, the plans cannot go wrong. Let’s go!

You Can’t Win

The discouraged student after a particularly trying exam, wails, "You can't win." Some days it seems "you can’t make a living." You can’t have a nickel. "Whiskey Jim" Foresees Carnival
