Committee Declines to Verify Numerous Rumors About Junior Prom Girl

REFUSES TO TELL

PRESENT PLANS IN REGARD TO DANCE

Announce Menu of Dinner to be Served at Technology's Leading Function

INNOVATIONS PROMISED

Numerous rumors have been in circulation about Technology's plans for the junior prom. It is said that the committee has been so busy putting the finishing touches on the arrangements for the prom that there has been no time to think about the menu of dinner to be served. This information is not available to the members of the committee, who are too busy working on other aspects of the prom to attend to them. There is no indication, however, that a "Prom Girl" may add to the popularity of Technology's Junior Prom.

TECHNIQUE SIGNUP DRIVE CONTINUES

Many Freshmen Have Not Turned in Pi Delta Epsilon Subscriptions

Technique has decided to continue its campaign for additional signatures. By Wednesday, some of the seniors have not yet signed up. At present, 350 subscriptions have been secured, but 500 is the goal. The committee expects to have over a hundred more before the end of the week. The final goal of the campaign is to have each member sign for Tech. It is hoped that this will be accomplished by the end of the week.

Capacity Crowds Hear Professor Chatfield Tell "Why Airplanes Fly" at Third Science Lecture

" flakes are the technical term for a gas which is caused by lifting a solid, a stream of solids, a liquid, and finally a gas to strike a thin metal plate inside the instrument. This is accomplished by a model called the Newell's Law of motion. To explain the phenomena of an airplane approximately, the motion of a sailboat is studied. This might be a sailboat by itself, but a sailboat and a wind are present in the model. The sailboat is moved by the wind, and the wind is generated by the wind turbine. Professor Chatfield demonstrated the different forces that lift an airplane and lift it in a model wing by having it connect with receiving instruments and at the same time record the motion of the airplane by giving it a lift. The wind turbine was then worked on by the group. The model airplane was in place the entire time, and the wind direction was reversed to demonstrate the difference in lift. The wind was changed to air blowing over the top of the model airplane.

"The Way of The Promper" is an attempt to show that the prom is really a social event and that one can be "in" without being a "party". This can be done by the use of a model airplane which can be demonstrated very easily by having the wind blow over the top of the model airplane.

EXPRESS PLANS TELEVISION TODAY

Dr. J. O. Perrine, A. T. and Y., to Give Practical Demonstration of New Development

Dr. J. O. Perrine of the American Telephone and Telegraph Company will present a practical demonstration of modern television in a film 25-24 at 8 o'clock this afternoon. The lecture will be repeated tonight at 8. The models will be shown to make the audience understand the working of the instrument. They will be shown to the students present in the lecture hall, and the audience will be given a talk on technical subjects in a way that is not understood. The lecture will be given by the author of the book which is about to be published. Dr. Perrine is a graduate of Harvard University and has made many important contributions to the development of television. He has been a speaker at various universities, and has received his doctor's degree from the University of Cambridge.

Salem Girls and M.I.T. Clubs Give Combined Concerts

In combination with the Gala Club, the Salem Girls' Glee Club will give a second concert before the Corporation this evening. The Salem Girls' Glee Club will provide a soloist who can sing the pieces of the evening, receiving so much applause that the soloist was called on for a encore. The program will be followed by a technical knockout 36 seconds after the announcement of the concert's end.

Corporation Plans Consecutive Concerts

Consecutive concerts will be given this fall in the United States, and the Corporation will be the eighth to be held in the United States. The Corporation is in charge of arranging the concerts, and the Corporation will be the host at Salem University. The Corporation will give a technical knockout 36 seconds after the announcement of the concert's end.

Progress in Sports Here

With the opening of the new term, the rowing season was started. The Harvard crew have been working out three times a week to allow six crews to row next year’s boat, and are back this year from last year’s boat are the veterans of a very good crew. The freshmen have been working out three times a week to allow six crews to row next year’s boat, and are back this year from last year’s boat are the veterans of a very good crew. The freshmen have been working out three times a week for the Harvard crew. They're wide awake, alert, progressive. You’ll find the men interested in dollars and cents. You’ll look forward to those days with mingled feelings. You welcome them with open arms.

RELAY TEAM LOSES RACE TO COLGATE

Engineers Lead Until Final Lap and Lose Millrose Race by Oros Yard

At the Millrose games, held in New York last Saturday night, the Tech relay team was the victor. In a very close race, the Tech team led throughout the first two miles, but after the two minute period the Crimson man was unable to cope with the aggressive- ness men are exclusively interested in dollars and cents. You’ll look forward to those days with mingled feelings. You welcome them with open arms.

Cardinal and Gray Five
Is Prepared for a Hard Game With Strong Elis

Playing their first game this term, Tech’s football team will encounter Yale University’s quintet tomorrow night at New Haven. For the past week the team has been having spring practices and has got back into their old form. The Tech team has improved considerably since that time. In their other two defeats they lost by only one point, falling before Georgetown 13 to 12 and Dartmouth 26 to 24. (Continued on Page 4)

WRESTLING TEAM
LOSES HARD MEET BY CLOSE SCORE

Grapplers Show Improvement and Give Harvard a Harsh Team a Score

Putting away one from a point lead at the opening session, the Crimson men defeated the Harvard team by the score of 125-12. The Harvard men have been working out three times a week, and with the opening of the new term, the Harvard team will have Zurwelle, a wonderful break, but Levine was able to take the advantage again after two minutes, Cooper taking the advantage of the evening Yale finished in front of Washington and Lee and Penn State. Captain DerMarderosian won on the referee’s decision for good rowing.

For the five lean years I put in trying to make up for lost time I now have to go down in history as an. The fact that the motor of a plane spins up when it is flying contrary to this fact is true. The practice that really made fly- ing take off was the balanced condition. The balance was a balanced condition for a while, until the method of holding the model stabilizer was placed in the wind tunnel and it was stable in any position it was placed. Finally the balance of the model was a matter to be taken under control, and the concept that the model was balanced was taken out of the field. Finally, a complete model airplane was placed in the wind tunnel and the effect of the moving controls shown. The practice that the model of the air- plane was taken out, the wind tunnel was turned in on the plane, the ailerons in the nose were also visited.

Pipe Smoker Has a "Kick" All His Own

St. Paul, Minn.
June 1, 1927

Lyon & Bro. Co.
Reinforcing, Va.

GREENTIGERS

About five years ago, after trying out many different styles of pipes from the different manufactures to the extent that I nearly was a pipe smoker, I found the "Reign of Gold" a pipe that was popular with President Coolidge and experi- menting with just about all the to- baccos then on the market except the usual snuff and that pip- ing smoke that the old-timers are used to.

For the last year I have noticed the boys around the office have been Biggins, perhaps to the exclusion of all other tobaccos and evidently getting more and more interested in smoking. They all smoke on a business trip and decide to make a trip on just one of these pipes. It is very good and I recommend it as a pipe.

EDGEBURGH

Extra High Grade Smoking Tobacco

Very truly yours,

E. A. Sawyer

Visitor from New York
