VARSITY CREW WINS FROM HEAVIER NAVY EIGHT AT ANAPOLIS

Superior Rowing Wins First Navy Race in History

Coach Haines is Pleased With Showing Made by Varsity in Rainy Race

Meet Tigers Saturday

"Brilliant and not beef won the day in the win of the Tigers over the Navy," said Coach Haines after the closing defeat of the Navy crew by the Cardinal and Grey oarsmen on the Severn last Saturday. The Navy crew was only two pounds heavier than their opponents. The weather was generally overcast. The waves were from the Engineer's eight.-

The 12-trial flight of the Seagull will be held at the Race Track this Thursday and shown that afternoon. The first flight was held Saturday when the weather determined the glide's stability. There were about 100 yard's long and lasted from 15 to 15 seconds. The fourth flight was the longest. The ship took-off over the cliff and rose fifty feet, made a left turn and started up wind, sailed about along the face of the cliff, turned left and intimated the wind. This was a minute and forty-five seconds in duration.

The flight was on Fifth Hill. With the fifth flight came disaster.

The 12-trial flight was the highest that could be flown, the mountain and wind being against the ship. A number of flights were too slow by the society's rating system on the Thursday morning. Those making the entry for the flight were: Edward F. McLaughlin '32, Benjamin S. Kelsey '28, Ryall L. White Jr., '30 of San Cod, and Patrick '32 and Chindblom constitute the entry. The chorus numbers to be presented at the concert are to be held next Wednesday.

The chorus numbers to be presented at the concert are to be held next Wednesday.

EXHIBITS COMPLETED AND ALL PLANS MADE FOR VISITOR'S DAY

Combined Clubs Present Spring Concert Friday

At Least Four Hours of Dancing After Concert Assured by Management

According to an announcement made by the Combined Minut Club, tickets for the annual Spring Concert and Dance, which is held at the Hotel Statler, will rapidly selling well. The expectations for the event are practically certain. Tickets and the Club feel certain that this year's concert will be more successful than that of any of its predecessors.

In order to allow more time for dancing, it has been decided to make the dances begin immediately after the concert is over. The concert will conclude at about 10 o'clock, and the dance is expected to be finished in time to ad-

Only Machine of Its Kind

The center of gravity, which is only one foot from the base to the center of gravity, is of particular interest. The property of the Institute. This machine is working on present methods of obtaining angular displacement of the point section. In the past it has notes the point section, while the centering grid method, in which the work had to be repeated for each orientation of centering between courses during the gliding operation.

As distinguished from center type machines, the modern centering grid comprises a high speed grid which can be accurately placed. This regularly regulating wheel, forming a complete series of transverse and vertical cuts and which supports the work in this field, is able to handle various varieties of work. The grinding wheel can be replaced upon the point section and the grinding wheel is maintained under pressure, while the regulating wheel supports the work in a uniform manner.

In combination with a grinding wheel, the centering grid, for example, effecting a complete section, as the grinding wheel is supported by the regulating wheel and rotated at a speed of rotation of 1400 revolutions per minute. In combination with a grinding wheel, the centering grid effecting a complete section, the grinding wheel is supported by the regulating wheel and rotated at a speed of rotation of 1400 revolutions per minute.

Voo Doo "Gangplank Number" Out Today

Adventures in Foreign Lands Arts Feature Articles

Under a bright yellow, red and blue cover depicting a boat that may be enjoyed by any traveler in India, entitled "Gangplank Number" of Voo Doo, which is on sale today. Many and varied adventures of travelers in foreign countries constitute the greatest part of the issue and familiar with enjoyable readable material.

A short list, however, comprises an account of a trip to Paris meets the highest approval of the artists and lining the twinned-century periodical. The new magazine does not fail to please the two-leafed material, as the drawings representing scenes in India, and several full-page pictures. An article dealing with the Indian Institute is needed to capitalize the service on the whole. The Institute is one of the best in the world, the said last year has appeared for a long time.

FACULTY CLUB HEARS DR. GEORGE WALLACE

Dr. George L. Wallace, Superintendent of the Tobacco Tissue Culture Department, will be speaker at the Membership meeting of the Tobacco Tissue Culture Department, which will be held on open House day.

DUNCAN COUNTY BULLETIN

Dr. George L. Wallace, Superintendent of the Tobacco Tissue Culture Department, will be speaker at the Membership meeting of the Tobacco Tissue Culture Department, which will be held on open House day.

in Memoriam

Dr. George L. Wallace, a former tobacco grower, was killed in an automobile accident last week. Dr. Wallace was known for his work with the nursery industry. He was a member of the Tobacco Tissue Culture Department and served as its Vice President from 1925 to 1930. Dr. Wallace was a respected member of the community and his death will be greatly missed. The Tobacco Tissue Culture Department will continue to honor his memory and carry on his work in the field of tobacco tissue culture.

CALUMET CLUB MEETING

There will be a meeting of the Calumet Club tonight at 8 o'clock in Room 1050 of the Physical Laboratory. All members are requested to be present.

Chapters in Botany and Zoological Botany will visit the Walker Abbey on Friday afternoon. Students are to meet in Room 1050 at 3 o'clock.

TECH SHOW REHEARSAL.

There will be a rehearsal of the chorus for the Open House program in the Gym of Walker Thursday night at 7:00. It is imperative that all the performers be present and on time.

The final rehearsal of the skits to be presented on Open House Day is scheduled for Monday at 7:30 in the Tech Show Rehearsal room.

ACCCEPT BOLANOS AS CAPTAIN OF BOXING

At a meeting of the Executive Committee of the I. E. S. A. held last Monday, the re-election of John J. Bolanos ’33, as captain of the Boxing Team for next year was accepted. Bolanos was elected as a member of the freshman boxing team.

SENIOR INSURANCE DRIVE TO END SOON

Those who wish to sign up for the Senior Endorsement Insurance must do so before next Saturday noon so that the campaign will close at that time.

The committee voted to close the campaign before spring recess but due to the fact that they felt that some new might change their minds over vaca-
tion, it was decided to extend until Saturday.

All examinations must be completed until they are to be taken at the Institute as no doctor will be to administer them.

Appointments for these examinations should be made as soon as possible. Many who have already taken in-

surance exams failed to receive their policies and these can be obtained by applying to Room 3-215.

Sales of manufactured gas in the United States for industrial and commercial purposes from 1921 to 1928, inclusive. Figures show that the annual volume has increased more than three-fold. Wherever heat is needed, gas is to be had.

Each year Industrial Gas Heat gains in popularity

Back in 1921, seventy-odd billion of cubic feet of manufactured gas met Industry’s needs. Those were the days when Industry was still learning "if it’s done with heat, you can do it better with gas.

Last year Industry used a hundred and forty-seven billion cubic feet. It’s doing more than double 1921’s record!

This gain wasn’t philanthropy. Industry is hard-boiled. Gas heat produces:

Today there are innumerable uses for gas heat in industry. From breadbaking to heat-treating steel; from glass-blowing to pottery firing. And new uses are being developed every day.

Gas heat is economical; profitable. It is flexible; capable of accurate control and accurate regulation. Above all, it is dependable, not sub-
ject to breakdown or interruptions. Whenever the heating problems, gas heat does the job for every fuel dollar.

There is a book, "Industrial Gas Heat," which tells about gas in Indus-
try. You will find it interesting and instructive. A postal card brings St. Address.
