THE TECH

Bureau of Standards Produce the Three Flattest Surfaces in World

Quartz Discs Polished Flat to Ten Millionths of an Inch Accuracy

Some time ago the Bureau of Standards in Washington completed a polishing of three quartz flat discs. These discs are now being used for various scientific measurements and will be used entirely as master data for the establishment of tolerances of flatness that are used in the work of various organizations. Measurements on the surfaces of these three discs which are from 25 to 11 inches thick, fail to show any place where they have more than ten millionths of an inch of variation. It seems that if the discs were magnified to the extent of Washington to Chicago, a distance of 307 miles, no amount along the margin would be out of flatness by more than one inch.

These master optical flats, made from clear quartz, are far superior to the optical flats. It is much harder to produce flat surfaces of expensive materials, such as glass. The glass previously used for optical flats is so sensitive to heat that its surface would change condition if it were placed on a very hot stove, or even an ordinary room stove.

Talk about all the necessary sportsmanship—sparks fly for the Boston papermen; the letter of board for their ability to write about the Cleveland Institute of Applied Science and its place might just as well be a system of bargaining between the Dormitories and Fraternities.

Many of the students complain that they do not know who the officers are, especially in the two lower classes.

This is incomparable, since the opportunity is given for anyone to run for any office. The complainants might be scored on.

Our educational bargain

Many men and women who have been successful as educators have been known to question the value of a college education. Dr. Clark of Columbia stated recently that after studying the matter he reached the conclusion that a college education actually diminishes earning power. Such a statement is as always liable to instill fear in the undergraduate; a fear that he is spending the best years in college to no purpose. It is true that many who attend college fail to receive the remunerative benefit of the years spent in pursuit of higher education, but that is not the fault of the individual, but is due to an extraneous characteristic of the student.

The "worsening of money" however, while important, is not always the entire object in attending college. Higher education is regarded the individual and society alike, to our mind, the purpose of developing men who can think. If, however, it is assumed that financial return rather than a thorough knowledge which will result in making a career is what is sought, there are statistics that lend encouragement to those who think along these lines.

"Who's Who in America" in its recent publication shows that 77 percent of these listed have had college training. The "Who's Who" in America, we are told, is an organization which selects notables, but is statistical and it is a significant fact that 77 percent of these listed have had college training. The "Who's Who" in America, it is further stated, is an organization which selects notables, but is statistical and it is a significant fact that 77 percent of the list have had college training.

GOLF PLAYERS TIE
WITH W. P. I. 3 TO 3

Yesterday afternoon at the Oakley Country Club the W. P. I. golf team won against Pennsylvania Polytechnic and played them to a tie across a 6-hole. The representatives of the Institute in the match were Edward A. Yancey '29, Richard H. Yancey '32, High Walker '30, and Kito A. Blanchard '29. On the Harrisburg Ed Yancey won 2 and 1, and Dick Yancey won 2 and 1. High Walker beat his 3 and 2 and Kito Blanchard did not put up any second forecourt. Walker living 4 and 1 and Blanchard 2 and 1. Technology also lost best four and A for the match. This afternoon at three o'clock the team is scheduled to meet Rensselaer and Allegheny. The team will be composed of Ed and Dick Yancey and two others who have not yet been chosen definitely. At the end of next week the team will journey southward to meet Yale on Friday and Army on Saturday.

The weather permits. The Davyl all-round men who placed first will in all probability make the city. On the all-representative of what the team is capable of doing.

TRACK TEAM WILL MEET CORNELL AT ITHACA SATURDAY

Sundin and Bridge show-up best in tryouts held over last week-end.

TEAM LEAVES THURSDAY

Last Saturday afternoon the members of the track team, which were not competing at Philadelphia, emerged in a most promising form. It is a most promising form engagement with Cornell University on Saturday afternoon. Although the meet will have no direct bearing upon the make-up of the team, those who placed first will in all probability make the city. On the all-representative of what the team is capable of doing.

Broder took first in the 100 yard dash in the time of 10.3 seconds, while Jandris placed second. In the half mile run, Ed LaBesse took the victory in 2 minutes, 11 seconds. Balius came through to win again in the mile run in the rather slow time of 4 minutes, 40.5-seconds. The two mile run was a little slower and was won by Thorsen in 8 minutes, 25-seconds. The field events were run of a little more even and better distances were made. Ground was broken with a team of 4 and 3, while Wells with a team of 4 and 2, and with a throw of 14.44, another one came through in the discus throw with a distance of 11'-6". In the pole vault Dascher seems to be the likely man for the meet, as he was from Idaho with a vault of 11 feet even. Coben took the broad jump with a leap of 18'-4.5".

In the 22 yard dash Jandris and Bridge changed places and Jandris took first place with Bridge behind I. L. Yates '29. This afternoon at three o'clock the team will journey southward to meet Yale on Friday and Army on Saturday.

The team is ready for the coming Tace.

T. C. A. COMPETITION

The T. C. A. reminds all that there are several positions open for fresh-
men and sophomores in the organiza-
tion. Competitions is now being run for the Members of the Editors. Men inter-
tested please call at T. C. A. office.

TYPEN xWITER LOST

A four-bank Underwood Portable

PSYCHIATRY EXPERT ADDRESSES FACULTY

"The Legal Aspects of Psychiatry" was the subject of the second address in the series on "Mental Health and Stress", given before the Faculty Club at luncheon meeting in the North Hall of Walker last Monday noon.

The speaker was Dr. Alfred K. Overholtz, Associate Professor of Medicine, University, and Director of the Division for the Psychiatric Education of Physicians, which is under the charge of the State Department of Mental Diseases.

Dr. Overholtz has had much experience in the examination of the mental condition of prisoners.

This recent belief that crime is due to the result of an abnormal mentality is increasing in popularity and may destroy the crime question in this country.

CORRECTION

The following is a list of additions and corrections to the list of nominees for class officers that was published in last Thursday's issue of THE TECH.

The name of Robert B. Simonds, nominated for Institute Committee for Class of 32, should read William B. Simonds.

The name of William H. Stevenson, nominated for Secretary of Class of 31 should read Benjamin W. Stevenson.

Robert M. Stewart, notified for Secretary of Class of 32, should read Benjamin W. Stevenson.

An addition to the list of those elected to Alumni honorary society of the paper.

ENJOY THE SPRING SOCIAL SEASON

Lowest Rates
U-DRIVE Auto Rental
6 Belvidere Street
Boston

Why two pairs of trousers?

—often it saves taking an extra suit

on that short trip. We are offering a new lot of two-trousered fancy waistcoat suits at $13.50.

Special

Two seniors will address the A. I. E. E.

Of the Fraser Drive. This paper will

be published as well as the first in to be followed by a discussion to the students.

The society is interested, as all members who may or may be interested in the open discussion to attend the meet-
ing on this subject. The cost of the lecture for non-members of the Institute Branch will be twenty-five cents, while for all members it will be fifty cents. In order to attend the luncheon it is necessary to fill out a ballot and return it to Room 1-181.

MUSICAL CLUBS

All those whose names appear on the list of the members of the Musi-
cal Clubs in the Main Lobby are

renewed at Technique office in Walker this week. Otherwise books must be

redeemed in the Main Lobby and will be continued until the end of this

quarter. The society is interested all those interested please call at T. C. A. office.

Rules for class voting announced

(Continued from Page 2)

for no votes by placing the number

one opposite the candidate name. Each may vote for as many of the listed nominees as he wishes, mark-

ing the ballot in the numerical order of his preference.

He may not, however, give more than one vote to the same candidate as this will make his vote invalid.

This rule will also be enforced for the Institute Committee and Exen-

trate members, where more than one candidate for each office is to be elected.

John Spang

Quality Radio Equipment

Installation and Service

The Institute will be the first in the area to offer an installation and service

service to every corner of the nation.

Bell invented the telephone; Vail made it a national system, a nation-wide system of inter-connected telephones.

Many kinds are needed

One man supervises the construction of a new telephone line, a second is responsible for efficient service on that line, a third con-

cerns himself over the greatest scope and shows the public how to use the service.

Each is furthering an important side of his respective business of rendering reliable, uniform and economical tele-

phone service to every corner of the nation.

What is more, the Bell System develops in complexity, opportunities for interesting life-work becomes constantly more varied.

BELL SYSTEM

A national-wide system of inter-connected telephones

"Our pioneering work has just begun"
