

LIBERAL CLUB TO OPEN THIS YEAR'S SPEAKING PROGRAM

Prof. Robert E. Rogers Ad-
dresses First Meeting of
M. I. T. Student Society

LIBERALISM TO BE TOPIC

Professor Robert E. Rogers, of the English Department, is to be the first speaker that the M. I. T. Liberal Club has scheduled on its 1929-30 program. He will speak on Tuesday, October 8, at 4 o'clock, in Room 4-270, on the subject, "Why is a Liberal?"

A well-known critic, lecturer, and author, Professor Rogers has a wide interest in the trend of modern thought, and development. Since his now-world-famous address to the Senior class last June on the "Be a Snob" theme, he has become one of the most notable figures at the Institute.

The subject, "Why is a Liberal," is an appropriate one to open this year's series of Liberal Club Meetings, and is the first meeting of the year to be held under the club's new president, Miss Mary E. Betts '29.

In presenting its program of nationally known speakers the Liberal Club aims to give Technology students an opportunity to hear able speakers discuss topics of general interest to thinking people, and to join in the discussions taking place after each meeting.

The Liberal Club was organized a year ago, under the direction of Prof. Richard G. Tyler and Prof. Robert E. Rogers as faculty advisers. All M. I. T. students, members of the faculty, and their friends are invited to attend the meetings.

Subsequent speakers on this year's program, cannot as yet be announced, but judging by the very successful program presented last year, which included such eminent speakers as Clarence Darrow, Scott Nearing, Clarence Skinner of Tufts College, Henry W. L. Dand, and many others, the meetings this year should be of interest to everyone.

BOOTERS PRACTICE IN EARLY MORNING

Coach Welch Expects Strong
Team to Start Early Fall
Schedule

Candidates for the Varsity soccer team will practice at 7 o'clock in the morning during the Fall season. Coach Welch has decided upon this step, which has been tried successfully by the M. I. T. crews and hockey squad, because of the difficulty of getting all his men together at one time during the afternoon.

Many of the players have late classes, while those who are through at three o'clock do not wish to waste time in waiting until five. In the past the coach has rarely had eleven men to practice together. With morning practice in effect, it is hoped that a more efficient system can be secured.

Varsity is Strong

The present Varsity squad is one of the best that ever represented the Institute. They are unusually strong in the defensive positions, with Wyman at goal, and Captain Hawkins and Riehl as fullbacks. The other veterans on the squad are Cooper, halfback, and Mulligan, Kashemsanta, and Youngson in the forward line. In addition to the Varsity veterans, there are several promising candidates from last year's freshman team. Outstanding among them are Hansen, Castleman, Chipp, Fragiaco, Newman, Schulze, and Velez.

The opening game is with Brown on October 12 at The Institute field.

Cole Relieves Worry Over Coop Dividends

For the benefit of all those who are looking forward to the good times they will have when they receive their Coop dividends, Mr. Cole desires they be told that Tuesday, October 15 is the day to collect their profit on last year's business. "Do not worry," said Mr. Cole, "there is no reason to fear that the dividends will not be distributed."

Institute Views On Plates Being Made In England

Wedgwood China Sets Ordered
by Over 2000 Technology
Graduates

Wedgwood plates with pictures of the Institute as the center design are being made in England to satisfy the order for more than 2000 dozen which the graduates of the Institute have already subscribed for. The set consists of 12 plates and sells for \$13.00 to men connected with the Institute.

The first 225 sets will have the autograph of President Stratton burnt into the bottom and due to the desire to get a set with this distinction, there were over 600 orders in the first few days. Three dozen have been sent over already to give an idea of the complete sets.

Work was first started in June 30 and the transmission of proofs back and forth across the ocean has taken much of the time. The orders which are now in will be filled by the Spring of 1930. The undergraduates of Technology will be allowed to purchase them soon.

The views are mainly of different parts of the main building, but there is a view of Walker Memorial, Rogers, the President's house, and the Mercantile Building. The latter is taken from an old print of the building where M. I. T. started.

FOUR NEW MEN JOIN STAFF IN CHEMISTRY

Instructors to Fill Vacancies
Created by Resignations

Four new instructors have been added to the personnel of the Department of Chemistry this year to take the place of the men who resigned last spring.

C. E. Teeter, Ph. D., received his degree from Harvard University, and has recently been connected with the University of California, from which institution he came to assume his duties at the Institute. He is a National Research Fellow in Chemistry. Herschel Hunt, Ph. D., another addition to the Institute staff this year, received his degree from the University of Indiana.

R. P. Seward, Ph. D., who comes to the Institute from Georgia, received his degree from Brown University, where he studied under Professor Kraus, formerly a member of the Institute staff.

A. S. Houghton has studied for some time under Sebatier in Toulouse. He will receive his Ph. D. degree from the University of Colorado within the next two months.

FACULTY CLUB MEETS AT DINNER OCT. 16

Will Hear Prof. Owen in
Interesting Talk

Beginning the Institute year with a dinner meeting, the Faculty Club will convene on October 16 at the Twentieth Century Club, at 3 Jay Street, Boston. Professor George Owen will speak on "Incidents of the Gloucester Fishermen's Race", Professor Walter H. James on "Tenderfeet in the Rocky Mountains", and Bursar Ford will give a short talk on "Freshman Camp".

The secretary of the Faculty Club announces that a formal notice will be circulated soon, but it is requested that members who desire to attend reserve the evening of October 16 for the occasion.

COMBINED CLUBS TO HOLD MASS MEETING

Starting its season's activities the Combined Musical Clubs will hold the annual mass meeting on Monday, Oct. 7, at 5 o'clock in Room 5-330. At this time the operation and activities of the organization will be explained by the managing board.

After the meeting opportunity will be given to the men assembled to meet the heads of the various departments and hear about the Glee, Banjo, and Instrumental Clubs, the dance orchestra and the management. Since the purpose of the meeting is one of getting acquainted it will be conducted along informal lines.

HEY FROSH! THE TECH Mass Meeting TODAY

at
NORTH HALL
Walker Memorial
5 O'CLOCK

THE TECH CALLS NEW JOURNALISTS TO MASS MEETING

Smoker in Walker Open to Men
Interested in Working
on Newspaper

All students who are interested in newspaper work are invited to THE TECH mass meeting and smoker which will be held this afternoon at 5 o'clock in the North Hall of Walker Memorial Building. The meeting will be informal as its main purpose is to give the candidates a chance to get acquainted with the men with whom they will work doing the coming year.

Details of the organization and the policy of THE TECH will be explained by the General Manager, D. Tullis Houston '30. Other speakers will be Carl Connable '30, Managing Editor; William F. Howard '30, Editor; and Gregory Smith '30, Business Manager.

This year, as in 1928 men can receive English credit for certain types of articles written for THE TECH. Some member of the board will speak on this subject. The social end of newspaper work will also be explained to candidates. Details of the point system, an impartial method of selecting the best man for the more responsible positions will also be explained.

In both the news room and business office competition for freshman and sophomore positions begins immediately. These positions lead up to the most coveted honor, that of being one of the four members of the Senior Managing Board. Students interested in the business phase of newspaper work will find ample opportunity for work in one of the three departments, advertising, treasury, and circulation.

Tardy Registration Costs Students \$425

Business is not so good for Uncle Horace this year. The total of fines for late registration has been announced as \$425, as against \$910 last year, showing that 97 students have learned that it pays to register on time. Evidently the inmates of the Institute are feeling the stress of hard times, and are showing a great deal more reverence for five dollar bills than has been the case in the past.

Institute Committee Publishes Full Report of Activity Expenditures

Bulletin Is Now Available to
the Student Body at the
Information Office

Initiating a new policy this year, the Institute Committee is publishing a bulletin of the total receipts and expenditures of all the sports and activities on the campus. The main purpose of the bulletin is to give the student body an idea of where the money goes, how the various activities are financed, and what the financial outcome of each is at the end of the year.

Other than this, the men on the activities listed are aided considerably by a concise statement of the expenditures of their department of the year before, by the realization of the amount they are expected to spend. The activities are divided into two distinct groups—those which receive the funds for their operation from the undergraduate dues, which are deducted from the tuition, and those are self-supporting. In the former class fall Athletics, the Institute Committee, and Class Activities, and in the latter are the publications, the T. C. A., Tech Show, the Musical Societies, and the Professional Societies.

Governing Body Gives Approval Of Committees

Institute Committee Accepts
Captains and Managers of
Various Sports

At the first meeting of the Institute Committee, which was held yesterday afternoon in West Lounge of Walker Memorial, the members of the All-Technology Smoker Committee, the Field Day Committee, freshman Rules Committee, and the Curriculum Committee were approved. The captains and managers of the various athletic activities that comprise the M. I. T. A. A. also were approved by Technology's governing body.

Roy W. Chamberlain '31 was accepted as president of the Combined Professional Societies and Donald A. Holden '31 as Publicity Manager of Voo Doo. A motion was defeated that would have given the chairman of the freshman Rules Committee a seat on the Institute Committee.

In the future, the freshman Rules Committee will consist of one Senior, who will be chairman, six Juniors, and fifteen Sophomores. The three freshmen who formerly were given seats on this committee will be omitted. Approval was given of the cost of sending last year's crew to the Intercollegiate Races at Poughkeepsie. A total of \$1,798.32 was expended to support the Cardinal and Grey varsity.

INSTITUTE RECEIVES WEATHER FORECASTS

Meteorological Staff Maintains
Special Radio Station

Weather forecasts are made and posted daily at 12 o'clock in the aeronautical building and on the bulletin board in building 10 by the meteorological branch of the Aeronautical Engineering department. A radio station is maintained in building 33 which picks up the observations sent out from the Arlington weather bureau station at 8:15 o'clock each morning and evening. The Technology operator decodes the message and then plots the map. Members of the meteorological staff make the forecast for Northern and Southern New England and also a special local forecast for Boston.

A branch of the department is also established at the Institute's experimental field at Round Hill. Two men are stationed there, one to work out meteorological research problems, the other to make weather forecasts. The Round Hill radio operator picks up the observations from Arlington, plots the map, and a local forecast for New Bedford is then made after a telephone conference with the Institute's forecaster. This station is primarily intended as an aid in the operation of Technology's blimp, "Mayflower."

TECHNOLOGY ROWS HARVARD VARSITY ON COLUMBUS DAY

Chick Dolbin Appointed Frosh
Coach—Manning to Act
as Rigger

CREWS WILL ROW MILE

With the first race only a week away, the Varsity, Jay-Vees, and 150 pounders have gone into extensive training for the Columbus Day Regatta. The Columbus Day race will be held on the Charles River next Saturday afternoon, the first race starting at 12:30 o'clock. The three crews will race over the mile course against Harvard, and the Union Boat Club in their first meet of the season.

On the Varsity for Technology will be Cook, stroke; Holt, No. 7; Richardson, No. 6; R. Bennet, No. 5; Kloenne, No. 4; Cimorelli, No. 3; Byrne, No. 2; Latham, Bow, and Dunlap, Coxswain. The lineup of the Junior Varsity boat will be as follows, Otis, stroke; Carbonell, No. 7; Evans, No. 6; Cummings, No. 5; Hall, No. 4; Binner, No. 3; Rucker, No. 2; Birdsell, Bow; Cook, Coxswain. The lineup of the boat to be entered in the 150 pound race is still undecided, only four of last year's 150-pound Varsity being back.

Dolbin to be Frosh Coach
Chick Dolbin, Varsity oarsman on last year's boat will coach all the freshman crews this year in place of Pat Manning, who is acting as rigger this season. Coach Dolbin who has been working with the yearlings since last Monday expects to have a strong first boat, having more than three full boats of frosh weighing over 175 pounds.

First practice on the river for the frosh was held in the barge yesterday afternoon under the supervision of Coach Haines, and Coach Dolbin. The yearlings will probably workout in the barge for a week or more before going out in shells. Practice in the afternoons will continue until it becomes too dark, after which all candidates for crews will workout in the mornings before class. Out for positions in the freshman boat are several experienced oarsmen including the Exeter stroke of last year.

FIRST YEAR BANDSMEN TO HAVE NEW LEADER

Lt. Arnold Ackiss '29 Continues
as Band's Student Officer

Warrant Officer Eric H. F. Svenson, retired, will lead the freshman R. O. T. C. band during the coming year. Leader Svenson had charge of the band during one hour a week last spring, but this year will be in full charge. Lieutenant Arnold S. Ackiss, '29, student leader of the band during the past two years, will continue in this position.

Tryouts for the band will be held on Friday afternoon at four o'clock, in Room 5-330, and all freshmen who can play a band instrument and wish to substitute band for regular drill, should tryout at this hour. Band rehearsals will be held regularly in Room 5-330, at four o'clock on Monday, Wednesday, and Friday. Students taking band rather than drill will be given full credit in MS11 and MS12.

M.I.T. PHOTOGRAPHERS MEET ON SATURDAY

Plans have been completed for the year's first meeting of the M. I. T. Photographic Society, to be held on Saturday morning at 11 o'clock in Room 5-130. The meeting will be in the form of a get-together meeting, and will consist of a discussion of darkroom equipment, the club's coming membership drive, and the future policy of the club.

All-Technology Smoker Planned for October 11

Plans are now being made for the annual All-Technology smoker which will be held in Walker Memorial on Friday, October 11. The date of this event was erroneously announced in the handbook as October 4. The varied and interesting program is being prepared, the details of which will be announced in a later issue of THE TECH.

SMOKING JOURNALISTS

IN line with its policy of "Every freshman in some activity," THE TECH is inviting the interested members of the Class of 1933 as its guests at a Smoker this evening at five o'clock. This is the first of the functions sponsored by the various organizations. The meeting will be wholly informal, its prime purpose being to foster mutual friendship between the staff members and the new men.

To the man, entering Technology either as a freshman or a transfer, THE TECH offers an admirable means towards his complete acclimatization. To revert to vulgar usage, he learns "what it's all about" in the shortest possible time. His assignments immediately lead him to faculty members, leaders in activities and the coaches. He comes to know these men as friends. He is able to speak of the affairs at the Institute with the assurance of one who knows.

Even though he has no intention whatever of entering after graduation the field of professional journalism, the man on THE TECH staff will find his experience there to be invaluable. Most important, he learns to express his ideas in a concise, readable style—that this accomplishment is essential during and after his student years goes without saying.

If the man enters the business department, he will find that the executive experience he gains is of equally great value. Here he encounters business men, and finds that "ad" soliciting is really interesting. Here he puts to practical use his accounting, and becomes familiar with the management of a business enterprise.

While experience is an added advantage, no man need feel he has no chance because he has had no practise at amateur journalism. Many of the men don't know the difference between an "em" and a "flyer" when they start working. But they learn rapidly, and in learning, they receive the fullest benefits of their years at Technology. Come over to Walker this evening at five, enjoy refreshments and smokes, and learn more about a big opportunity.

TECHNOLOGY'S "DUNN AND BRADSTREET"

AS the result of much work and no small amount of thought and planning, the "Financial Report of the Undergraduate Activities" is now available. Therein are contained the balance sheets of practically all activities, Technique and The Musical Clubs being the only organizations whose financial statements were not available.

To E. Ralph Rowzee '30, Treasurer of the Institute Committee, and Bursar Horace H. Ford goes the credit for this enlightening volume. Conceived last spring and suggested by a similar publication at Purdue University, the bulletin contains, in easily accessible form, information which should be of much interest to every Technology student, and which will be of great value to succeeding managers of activities.

Although a pioneering effort, the report is most complete. Capably executed, carefully arranged, and attractively bound, it fills a definite need at the Institute. To the men concerned with its publication, Technology is very grateful.

TRADITIONAL WELCOME

TO every entering freshman or transfer next Friday, October 11th, has particular significance. To the former students at the Institute that night means a reunion and another good time—to the new men, it means Technology's hearty welcome. For on that evening, the biggest All-Technology get-together is scheduled, and eight hundred will convene for the Smoker.

If past successes are any indication, the evening will be highly enjoyable for all. The whole affair is free—tickets to the supper at Walker will be issued on request to any man entering the school this fall. Following the meal there will be a varied program of singing, vaudeville acts, presentation of awards, and athletic exhibitions. Come one, come all—remember, it's next Friday.

The Managing Board wishes to announce with pleasure the promotion of O. Charles Chapman '31 to the position of sports writer and the election of George H. Sistars, Jr. '32 to the position of reporter.

One of the most beautiful new art schools in the country has recently been opened in Indianapolis. It is a part of the John Herron Art Institute, and it has been planned and executed to harmonize with the surroundings.

At the University of Purdue, where the fraternity dances are on a commercial basis, a plan has been instituted whereby there will be no conflicts. There have already been several fights for the holiday seasons.

NINETY-TWO MEN COMPETE IN CAMP MASSAPOAG MEET

High Jump Proves to Be Most Popular Event Among First Year Men

Participating in the annual pre-season meet at Camp Massapoag, the freshmen got off to a flying start in their track activities for this year. Ninety-two men competed in the meet, which was composed of six different events. The high jump event attracted the greatest number of men, as there were twenty-three entries. Next came the two running events, the dash and the distance run, with seventeen entered in each. The shot put was third in popularity, attracting thirteen men, and the broad jump and discus throw attracted eleven men each.

Many Stars Revealed

Outstanding among the entering athletes was Samuel Wall of Somerville High, who took first place in both the dash and the broad jump. C. E. Coon of Montclair High School proved to be the best man in the high jump. E. M. Pierce and R. A. Marden both placed in this event and made a creditable showing. Pierce also scored in the broad jump and the shot put.

First in the shot put was W. V. Goodhue, a graduate of Leominster High School. R. G. McKay, Worcester Academy boy, took the first place honors in the distance run.

R. O. T. C. BAND

The R. O. T. C. Band will practice between 4 and 5 o'clock on Mondays, Wednesdays and Fridays. The first rehearsal will be held in Room 5-339 this afternoon, at which time instruments and music will be issued.

FRESHMEN

Freshman ties may be secured at the Coop.

A. A. MEETING

There will be a meeting of the M. I. T. A. A. with the Advisory Council in the North Hall of Walker Memorial, Sunday October 6 at 3 o'clock. All managers, assistant managers, captains, and coaches should be present.

Tennis Entrants Must Sign Up Immediately

All men who wish to enter the Fall Tennis Tournament are reminded that they must sign up on the sheet which will be found posted on the Bulletin Board opposite the Cashier's office. Entries will not be accepted after next Wednesday, October 9.

The Tournament will be run as it has been in the past, according to the rules set down by the United States Lawn Tennis Association. A large chart will be posted on the Bulletin Board, where the daily progress of the Tournament will be indicated.

It is highly desirable that the entire schedule be completed before the first of November, as the weather after that time will not be especially favorable for tennis.

Sports Desk

Although Technology does not hold a place of prominence in the athletic world, it has always been noted for the Simon-pure type of sportsmanship that it sponsors. Men at the Institute who take an active part in athletics usually do so at a sacrifice of time which they might be tempted to devote to their own amusement. The Technology spirit is built up on the firm principle of sport for its own sake, with little reward in the way of glory and prominence through glaring headlines.

It is perhaps a blessing for those men who find it possible or desirable to go out for the teams that the Institute is not a strong athletic school. They learn to play the game fairly and squarely, and, if they meet success, they have the thrill of knowing

that they have done it on their own initiative. It is this spirit that has enabled Technology men to win their way to the top in the field of engineering and science.

Our only regret is the fact that a larger number of students do not realize the benefits of play and recreation through M. I. T. athletics. It is a builder of character and stamina, and an aid to a more efficient completion of the prescribed courses at the Institute. As a complement to the academic program its value cannot be overrated. Come on, ye freshmen and upperclassmen as well, avoid the evils of brown-bagging. Talk to the men who have entered athletics and caught the sporting spirit, and then join them in an experience that you cannot afford to overlook.

This year crew seems to be attracting its usual large quota, especially from the freshman class. Last year's varsity is well represented, but the other candidates, including many who

were ineligible or freshmen last year, will return to bid for seats in the regular shells. Interest in crew waxes stronger each year, and the sport promises to be one of the chief centers of interest at M. I. T. Within a few days the shells will be seen on the Basin, and morning practice will start.

Cross country is a leader among Fall sports and this year is no exception. Captain Leon Thorsen has been out every day with his men under the direction of Coach Hedlund, and they are rapidly reaching the proper condition for the six-mile grind. Several veterans are back this year, including Thorsen, Berry, Baltzer, Vennard, and Gilman.

TECHNIQUE
There will be a Mass Meeting for the freshmen and Sophomores, Monday, Oct. 7, at 5:15 o'clock. Refreshments and smokes will be served. Sophomores will be elected to the staff this Fall and freshmen in the Spring. WATCH BULLETIN BOARDS.

THE STORE FOR MEN
A Separate Store in a Separate Building

Jordan Marsh Company

are you as careful of your clothes as she is?

You should be. We'll bet you would resent it if the girl you were taking out appeared in a dress that was in style two years ago. She probably notices your clothes just as much, so why not play safe and get your evening clothes at the Store for Men, where style is the watchword and quality can be taken for granted.

SECOND FLOOR—THE STORE FOR MEN

Lenox Grille

Egyptian Room

What is your Pleasure, Gentlemen?

LENOX GRILLE

To dine at the Lenox is a Tech tradition. Your course is not complete without a knowledge of the Lenox cuisine. "Mac" has presided on the door for years. Ask him to recommend some of the tempting dishes. He knows. The club-like Lenox Grille (separate entrance on Exeter Street) is the rendezvous of Tech men. You will be pleased with the special table d'hote dinner at \$1.50. Whenever in Boston drop in for luncheon or dinner.

EGYPTIAN ROOM

Definitely favored by those who know, for dinner dancing and after theatre parties. Special table d'hote dinner 6 to 8:30, \$1.50 and \$2.50. Also service a la carte. Dancing from 6:30 to 2 A.M.; Leo Reisman's Hotel Brunswick Orchestra. For reservations, phone Kenmore 6300.

And, for Private Parties---

At either the Lenox or the Brunswick are new and improved facilities for private functions, smartly appointed rooms accommodating from four persons to two hundred and fifty. Ample parking facilities for guests arriving by motor. Both the Lenox and the Brunswick are known as headquarters for college festivities.
