ENGINEER HARRIERS TAKE THIRD HONORS IN N. E. TITLE MEET

ANNUAL MILLION HILL MEETING - PROMPTLY at two-thirty this afternoon. The Dormitory Club is to host the annual Million Hill Meeting, which will be held Friday evening, March 21, beginning at 9 o'clock. To the regular, Sixpence and Deferred members, and friends and visitors attending the Million Hill Meeting. All members of the Combine Musical Society and the Orchestra, and all those desiring to attend the Million Hill Meeting, are requested to notify Thomas P. Pitre, Treasurer, before noon. We should, however, like to extend our invitation to every one who has a wish to come to the Million Hill Meeting, to attend the meeting of the Boston Commercial Association. The meeting will be held in the Institute, on the second floor, at 9 o'clock, and members of the Combine Musical Society and the Orchestra will be in attendance. The meeting will be in charge of Mr. Robert C. Batty, and Miss Sophia Barton, and the program will consist of the usual lecture on the Million Hill Meeting, followed by the singing of the national anthem. The meeting will be concluded with the singing of the national anthem. The meeting will be in charge of Mr. Robert C. Batty, and Miss Sophia Barton, and the program will consist of the usual lecture on the Million Hill Meeting, followed by the singing of the national anthem. The meeting will be concluded with the singing of the national anthem. The meeting will be in charge of Mr. Robert C. COLLEGIATE PONDORITY

THAT the small college in America is doomed to ultimate ex-
mination is the conclusion to which facts point in a recent
compilation of statistics by Adam L. Jones, Director of Ad-
missions at Columbia University. Mr. Jones, in a survey of
the registrations of the colleges which are on the approved
list of the American University Association, found that the per-
centage of increase in college enrollment has fallen off in
the last two years to an "alarming degree". The smaller colleges
suffer more acutely in the situation, while the larger institu-
tions still hold their own.

If these facts may be accepted in the light in which Mr.
Jones has taken them, we may look for a decided change in the
general college schedule in the near future. Mass educa-
tion can be applied as well as industry on a large scale; public
sentiment favors quantity production in the present day, be-
cause of the unquestionable advantages it has yielded in the
world of business. Yet when applied to the instruction of hu-
man beings in the art of living, the problem takes on the mul-
tiple aspects of the human equation. It is far from an undis-
picable fact that education on a grandiose scale can better fit
the individual for life.

True, the wealthy and expansive college can provide sur-
roundings of greater beauty to develop the ideals of the stu-
dent, more complete equipment for the carrying out of elaborate
equipment, and adequate facilities for the development of the
student's versatility through activities. Exterior display
prompts many of the gifts which make low tuition rates pos-
sible, and it is to this end that many of the colleges plan ex-
tensive programs of expansion. The modern student is often
spurred on by the realization that his college is one of the
greatest in the country, and leaves not a stone unturned to
provide equipment and instructors of the highest efficiency.

Still the small college has numerous features that make it
almost indispensable in the field of modern education.
The intimacy of association, both among the students and be-
tween the faculty and the students, prevents the great ideal of ad-
ministration from being lost in the face of the search for knowledge in
the strictly utilitarian sense. Education also not only to create
men and women who will receive large salaries, but also to
make the mead men and women to live fruitful lives in a pleasurable
way. The expenses of a student at a small college are far be-
low those of a university student, where the surrounding mer-
chants and vendors have learned that money has little value to
them.

COLLEGIAL PONDORITY

A LBERT EINSTEIN, the great mathematician, is reported to be
exceedingly humble in his look at the world. "The nature of reality itself," he says, "we do not know. We know as
much as the fish itself. We cannot know the composition of derivatives. We cannot label reality."

When Sir Isaac Newton said that he felt like a boy playing
on the seashore, diving himself with pebbles, while the great
ocean of truth was all undiscovered before, he thought he knew
what pebbles were. Today, even the pebbles will be regarded as
a mystery.

Descartes, one of the founders of modern philosophy,
thought he had exhausted all the possibilities of doubt and
got down to first principles when he finally arrived at the formula,"I think, therefore I exist." But the modern psychologist isn't so
sure. "Thinking goes on," he would say, "therefore a concept of thought exists." As to the "I" who does the thinking, he
would shake his head, "a complicated problem."

The nature of reality, Einstein says, we do not know. Philosophers have long puzzled over the problem. Long ago
Aristotle suggested that we could not know the nature of the
"thing-in-itself." He believed the mind was a kind of sorting
machine. A multitude of impressions bombarded it through the
eye, the ear, and the other sense organs. Out of these the mind constructs what we know as the world. A creature with a
different sort of brain and different sense organs might con-
struct an entirely different world.

SCIENTIFIC PHILOSOPHY

"Customized to Don or Customized to Measure"

"Present!"

A roll call of the outstanding Universities would include with most interesting frequency the names of wearers of distinctive
Clothes by LANGROCK.

LANGROCK

"Our Pioneering Work Has Just Begun"

In the telephone business, research man, manufacturing engineer and construction supervisor are carrying on a successful
war against the unruly elements, enemies to the telephone.

Cable, for example, housing many circuits and covered with protective coatings
of proved strength, withstands storms which might seriously threaten open wire lines.

Thus in the Bell System growth is intensive as well as extensive, improving present facilities as well as adding new
ones. And there is no end to this development.

Clearway Wins Net Title, Defeats Dames in Finals

Capt. W. A. Haas Falls to Vic. W. Alvey in Semi-Finals

STEADINESS WINS MATCH

Ready playing and perseverance in a period of several years won the tennis team championship for the Tech. J. L. O'Hara won 2 sets to none over his opponent, Walter Lucas, in the final match of the semi-finals. The winning player possessed a steady and composed game which carried him through the tournament. In the semi-final, O'Hara played against Capt. W. A. Haas. The match was close throughout, but O'Hara eventually emerged victorious with a score of 6-4, 6-2.

It's TRAFFIC FILM

that hides the lustre of your car

THAT dull, dirty coating which accumulates on the finish of your car! Traffic Film—that protective film of black asphalt—hides highway and traffic conditions. It is a dull, unattractive coating, but it is necessary to keep your car dust-free and clean. Traffic Film is the answer to this problem. It is a black asphalt film that prevents dust from settling on your car.

Traffic Film

Traffic Film is the answer to the problem of dust settling on your car. It is a black asphalt film that prevents dust from settling on your car. It is available in various colors and can be applied to your car by your garage or auto dealer.
