PLANS FOR 1930
SOCCER TEAM MADE AT FIRST BANQUET
Samuel G. Ryan succeeds Edgar M. Hawkins as Captain Of Sport
PRACTICE THIS SPRING
Suggestions for Improvement Of The Team Given By Each Of Letter Men
Soccer for the 1930 season was planned at the first banquet of the sport which was held in the house of architecture. The need of the team and the need of the freshman team were present at the discussion and the members of all kinds were made for the team's benefit.

The 24th Annual Christmas Banquet was held in the Freshman dormitory, on December 19, and was attended by many members of the faculty. The program consisted of several musical numbers, a reading by Mrs. E. A. Little, and a speech by Mr. R. E. C. Bower. The guests were served a special dinner, and a Christmas stocking was presented to each guest. The banquet was a great success and all who attended enjoyed themselves.

The manager, who presided at the banquet, presented the team with a gift of $50. The gift was a check for $50, and was to be used for the purchase of football equipment. The team was also presented with a large box of chocolates. The banquet was a great success and all who attended enjoyed themselves.

Various Benefits Arranged For The Freshman Football Team

Christmas trees ERECTED BY T. C. A.

The seventh feature tree erected by the T. C. A. in the gym lobby, and the smallest (for the football lobby, of course) in the lobby will remain as the holidays for the benefit of the-classroom was the Christmas tree. The addition of lights to the already attractive tree is most notable. The Christmas tree is the best thing that could come out of the sport with a possibility of the team being in the ranks of the best. The tree is a bit higher than the field of the campus, so that it can be seen from the fields of the E. O. C. C. On its election, Captain Ryan stated that breaking in training was left to the individual, and that he would be happy to help. He encouraged all the men to attend the practice session when games will be played instead of teamittles.

The manager for next year will include Yale, Brown, Dartmouth, and Harvard. The manager of the team will be Arthur D. Little '31, and the manager of the E & F. team will be Charles Straley '31. The manager of the E. & F. team will be in charge of the E. & F. team, and the manager of the E. & F. team will be in charge of the E. & F. team.

EXAMINATION SCHEDULE

CHALLENGES FOR 1930

A. A. also Increases Membership of Executive Committee

Official recognition was given to the freshman riflemen at a meeting of the M. I. T. A. held yesterday afternoon. Freshman rifle teams have been competing for several years as part of the freshman O. C. C. A. The team was comprised of 25 members, and was recognized by the M. I. T. A. as an official committee sport.

At the same meeting, an address to the members of the Committee of MIT, the A. A. T. A. was given, and a list of the members was presented. The meeting was held in the C. O. C. C. and was attended by several members of the committee. The meeting was adjourned at 2:00 P.M.

Festive Appearance

Informative Takes on Festive Appearance

Throughout the service efforts of Mrs. Reed, secretary to the director of the school, there has been a notable emphasis on the festive appearance of the school. The appearance of the school has been improved by the efforts of the students, who have been encouraged to take part in the festivities. The students have been encouraged to take part in the festivities, and the school has been decorated with decorations such as the Christmas tree, the Christmas stocking, and the Christmas stocking. The students have been encouraged to take part in the festivities, and the school has been decorated with decorations such as the Christmas tree, the Christmas stocking, and the Christmas stocking.

**THE TECH**

**THE OPEN FORUM**

To the Editor of THE TECH:

I should like to make a complaint. I know that I have been warning you about this for six years, but I have never been heard. Therefore, I am writing this letter to bring the matter to your attention. I believe that the nature of the problem is serious, and I urge you to take action.

The problem is the way that the Tech is written. I have always thought that the Tech is the most important publication in the world, and I believe that it should be written in a way that is clear and easy to understand.

I have been reading the Tech for the past six years, and I have noticed that the articles are often difficult to understand. I believe that this is due to the fact that the Tech is written in a way that is not clear and easy to understand.

I believe that the Tech should be written in a way that is clear and easy to understand. I believe that this is the only way that the Tech can become the most important publication in the world.

I hope that you will take action to improve the writing of the Tech. I believe that this is the only way that the Tech can become the most important publication in the world.

Sincerely,

[Name]

**Hudson River Bridge Is Latest Work of Woolworth Building**

Cass Gilbert '80 is Designer of The Structure and Many Others

Appointed by three succeeding presidents of the American Institute of Architects, president of the National Building Congress, and chairman of the National Commission of the Fine Arts, Cass Gilbert '80 is designer of the Hudson River Bridge. The latest work now in process of construction in New York City is perhaps the most outstanding structure in the country. The Hudson River Bridge, when finished, will be the longest single span arch bridge in the world. Extending 7,389 feet from North River to the City in Bergen County, North Jersey, its structural work will surpass all other existing bridges.

The architectural features of the Hudson River Bridge are two in number. First, the bridge is a single span arch structure, and second, it is a single span arch structure. The former is an architectural feature that has been used in the construction of many bridges, and the latter is an architectural feature that has been used in the construction of many bridges.

The bridge is 7,389 feet long, and it is 195 feet high. The span is composed of two arches, one 1,150 feet and the other 1,000 feet long.

The bridge is designed to carry 300,000 vehicles per day, and it is expected to be completed in 1934.

The bridge is designed to carry 300,000 vehicles per day, and it is expected to be completed in 1934.

7:30—Tech Show Rehearsal, Walker Gym

UNDERGRADUATE

INFORMAL PHOTOS

Technique would like to once again give appreciation to the faculty members who took an active interest in the informal photographs of students. Pictures of St. John’s Home and Walker West are especially desired. Send in your material as soon as at the Technique office, Room 308, Walker Memorial.

SWIMMING TEAM

The Technique prints of both freshman and Varsity swimming teams are to be taken today in Room 401, Walker Memorial. It is essential that everyone bring his own unit and be present on time. There will be no required practices. Freshman winners will be selected in return of 11:00 at this time.

FROSH HOCKEY

The first practice for the frosh hockey season will be held tomorrow morning at 7 o’clock at the Boston Arena. All interested will please report.

MASTERS BASON

All Master Masons at Tech are urged to join their names and comments in the following letters. Comments are due by 11 a.m. today.

The Tech Show orchestra will be held Monday evening in the North Hall of the Institute.

CALL FOR FRESHMAN HOCKEY TEAM ISSUED

All members of the Class of 1932 are invited to request the use of the facilities and equipment and to call for the purpose on the bulletin board at 10 a.m.

MATCHES SCHEDULED

On Monday, December 17, 1929, Foster, Brewster, newspapers, and Bryant were present for the dinner, which included several of the American Institute of Electrical Engineers, attended by the President of the Institute.

The talk was delivered by Arthur F. Kresser, President of the Institute.

The Polish Ministry of Education has extended its aid to the University of Chicago in order to build and develop.

A. I. E. E. STARTS NEW SERIES OF MEETINGS

With the dinner meeting held last Monday evening in the North Hall of the Institute, the American Institute of Electrical Engineers commenced a new series of such meetings. About 50 members of the engineering and business schools offered in electronic courses at the Institute were present for the dinner, which commenced at 6 o’clock.

Our Pioneering Work Has Just Begun

In the Bell System research and development are not confined to engineering laboratories. These methods are applied also to the commercial side of the business, to make telephone service more attractive and more useful.

An example is the classified telephone directory, with its convenient listings by trade and profession, for quick and easy reference. Or take this other use of the classified directory. Telephone men analyzed advertising and merchandising. They saw that prospective purchasers of advertised products were not confined to the trade, but were interested in other fields as well. The Bell System began new directories, with the purpose of the bulletin board at 11 a.m.
