HOCKEY SIX IS PRIMED TO OPPOSE HARVARD PUCK TEAM TONIGHT

PRACTICE DURING RECENT HOLIDAYS BUILDS UP POWER

Harvard Has Record of 2 Wins—Losses to T. Orange.—By 4 Goals

BEAVERS HAVE RESERVES

Continuing a season in which they have had a steady flow of new players, the Harvard hockey team is preparing for its trip to Boston tomorrow night where it will face the Yale nine in one of the big games of the year. Offense is the key feature of the Harvard team and if the players develop it as they have during the season, it will be a formidable force.

DORIAN INCLUDES 26 MEN AT PRACTICE

Dorian, one of the hexer dormitory societies, held its annual practice in the afternoon and the social affair and mixer will be held at the Castle Court tomorrow night. Over 100 men attended. There will be uniforms and the teams will play before two judges.

Mrs. Richards, First Woman Graduate

Did Research Work on Dangers Of Spontaneous Combustion Of Various Oils

Mrs. Ellen H. Simonds '76, the first woman graduate of the Institute and connected with it for 40 years, is a professor of the Department of Technology, Applied Mathematics, and Public Health. Among her contributions in recent years is the development of household economics and the chemistry of living. She has been instrumental in the betterment of living conditions gained for her a wide recognition among scientific organizations.

Richard presented Mrs. Simonds with a gold ring, the present being made out of a piece of gold mined in the South Africa. Mrs. Simonds was graduated in 1896 and was one of the first women to graduate from the Institute. She has served on many committees and has been a strong supporter of the Institute.

2. Suite D major, for harpsichord.
5. Handel—Opus 34.
8. Paladino—from a song.

AN OFFICIAL UNDERGRADUATE NEWS ORGAN OF M. I. T.
A careful and witty chosen cast of proved stars pouts "Sacred Flame" in a plot which contains a certain number of pictures. In this saluting feature, produced by the director, a certain number of famous people as Pauline Frederick, G. W. Hamill, Alice Brady, William Courtenay and Dale Fuller are seen. It is a picture which could never have been produced effectively with the old silent method. It is a picture that gives a wider scope through the use of the talking device.

As "Captain Taylor", an alternate color of the great world, was founded by him for a little more than his money, his wife to enjoy it and him to enjoy the excitement of the experience. The society of the college, with its natural facilities, furnishes the plot. Conceived to a woman, Captain Taylor has his younger brother, interpreting all he might have been, in and takes the wife's affection. The piece is strongly emotional, and the expression of the typical situation is very strong. Excellent dialogue in the scene Pauline Frederick, as the Captain's mother, and Miss Fuller, in her new features, is the most colorful. "Put Ait's Back" is good, with some unusual terraced and a competent cast throughout.

INCREDIBLE LIBERALITY

As both a welcome and an unwelcome change comes the announcement of the Faculty that the marking system is to be modified to include a fourth passing grade, "A." The students' worth cannot fail to give occasion to much discussion.

While the instructor more freedom is given, allowing him to pass the hard worker who barely reaches the passing grade, and in distinguishing the ambitious man from the competent sluggard, there are those students who are satisfied with a grade of "P" because it is so inclusive. A simple "scraping by" effort to receive good marks, and at the same time does not try to meet the standard of the college, can create a good impression, and give the instructor an inkling of his purpose, he automatically tends to defeat that purpose.

Suits

The mechanics of the system is also an interesting question in the mind of the undergraduate. The mere addition of the grade "L" to the existing system would carry with it a horror of receiving this grade almost as great as that of receiving an "F". The system must be designed so that we are not varied to try to create the impression in class that he is earnest and serious in his purpose, he automatically tends to defeat that purpose.

The many serious students place small significance on the class hour.

Social huddles are taken with ease in our evening clothes—see on your eye, ease on your ear, ease on your pocketbook.

But what is in store for the general evening event—ease and troubles—from $6.00.

Fashions are strictly modern styles, of strictly all "out-fashions".

All suits all-knit.

Student's Scholarship Record Generally

Is An Accurate Index of Future Success

Group 10 after graduation, 99.5 per cent after 20, 99.1 per cent after 20 years. The average of the first five years was 30.5 per cent, the general average 30 years after graduation, 14.5 per cent, the latest 40 years, 12.5 per cent. The average of the first five years was 15.0 per cent.

At the end of the first year, 14.4 per cent of the schools which reported had a grade of "P" because it is so inclusive. A simple "scraping by" effort to receive good marks, and at the same time does not try to meet the standard of the college, can create a good impression, and give the instructor an inkling of his purpose, he automatically tends to defeat that purpose.

360 REVIEW SHOWS NEW DEVELOPMENTS
Parallelism of Mathematics and Art Explained by Welner

Technology Review for January was issued at the Institute of Technology, but copies may still be obtained at the Review office.

The feature article of this issue is a study of the fundamental identities in the emotional aspects of mathematics and art. Professor Herbert Welner in the discussion points out the striking similarities between artistic and mathematical interests in many men.

The score in a popular reproduction of the album of "Turns" is taken from a water color by Edgar Wegener, who is also the author of "The Vikings Who Sculptured.

The progress in laboratory and industrial production is discussed by John C. Pressman, and the discussion is carried on by several other students.

Five students at Lehigh University won the prize for the best paper on the history of the American football on the thin walled right heart, which lies along the diaphragm. It is in this position that the increased pressure in the chest of the heart may in some cases be concealed.

5 BUCKS—WILL YA, BUH?

Intercollegiates

Pawns, queens, bishops, and knights are played for from timed points on the board at the winning of the game. Some time is allowed for each player to choose a move, but no points can be made by the moves of any piece other than the knights. The first player, however, may resign the game at any time, and the other player is then the winner.

The game is played on a board of 64 squares, and each player has an army of six men and a king. The object of the game is to win the king, or to force the enemy to resign. The knight is the only piece that can capture more than one piece in a move. The king cannot move into a position where he is in check, and the king is the only piece that can move any distance in the same column, row, or diagonal. The king is the only piece that can move through the center of the board, and the king is the only piece that can capture more than one piece in a move. The king is the only piece that can move through the center of the board, and the knight is the only piece that can move through the center of the board.

The knight is the only piece that can move through the center of the board, and the knight is the only piece that can move through the center of the board. The knight is the only piece that can move through the center of the board, and the knight is the only piece that can move through the center of the board. The knight is the only piece that can move through the center of the board, and the knight is the only piece that can move through the center of the board.
