The article contains a mixture of topics, including a discussion about an annual banquet held at Coyle Plaza, the election of new Managing Editor, and various sports reports. Here is a structured summary:

1. **RODDY, DAVIS, TRUAX, AND HUBBARD TO HEAD VOLUME L OF THE TECH**

   - **Managing Board, Volume L**
   - **Longley Chosen In Place of Gurwick**
   - **Committee Approves Student Request for Representation**
   - **Hockey Defeats Huskies 2-1 in Fast Game**
   - **Northeastern Ties Score After Lucas Tatters First Unassisted**

2. **ANNUAL ELECTIONS BANQUET IS HELD AT COYLE PLAZA**

   - MacGregor Jenkins Entertainers with Reminiscences and Experiences

3. **HOUSTON TOASTMASTER**

   - At the annual elections banquet of the Consistory Deane and Staff of THE TECH, held last Saturday evening in the Music Hall.

4. **Hockey Defeats Huskies 2-1 in Fast Game**

   - Results of the game were published in the Sports section.

5. **Northeastern Ties Score After Lucas Tatters First Unassisted**

   - The article details the scoring of the game and the specific events leading to the tie score.

6. **Hockey Defeats Huskies 2-1 in Fast Game**

   - The article highlights the key players and moments of the game.

7. **Annuall Elections Banquet is Held at Coyle Plaza**

   - The event included entertainers and reminiscences by MacGregor Jenkins.

8. **Houson Toastmaster**

   - Details about the toastmaster and his role in the event.

9. **Major Advertisement Page**

   - The page features a large advertisement, possibly for an event or product.

10. **Popular Advertisements**

    - Various small advertisements are listed, likely related to the event or community.

11. **Sports Section**

    - Reports on the hockey game and other sports events.

12. **Popular Articles**

    - Articles on topics such as the Managing Board, Volume L, and the annual elections banquet.

The text is a compilation of various articles and advertisements, typical of a college newspaper's layout. Each section provides a glimpse into different aspects of college life, from sports to social events and organizational matters.
Temperature of 6500 Degrees F. Developed in Carbon Arc Furnace

Professor Wilkes of Physics Department Describes

"Pennsylvania became closer together in the center of the visible horizon. In his eyes, Professor Gordon E. Wilkes of the Physics Department saw the furnace into the furnace at the white heat mass of steel. His hands were clenched, and from his mouth came a whispered, smothered laugh.

Professor E. S. Worden, who had manufacture of steel, was asking consideration and attempting to clear up some point in the conversation. The rumors, while hardly a year and a half ago, were not entirely unfounded. The rumors were true, and the reports of steel manufacture in the near future were well founded.

Professor Wilkes was entertaining the Journal with a story that he had heard from a friend of his. He had heard that the current had been turned on a large scale at the laboratory. The Laboratory professors were well known for their efforts to continue the development of new and better methods of steel manufacture.

"A moment ago we were interested in someone giving a lecture on the use of carbon arc furnaces to melt steel. This has been discussed by Professor E. S. Worden. Now we would like to continue with the story of the first carbon arc furnace."

Professor E. S. Worden "As long as there is something to be learned, we will not be satisfied."

ORE'IN ADDRESSES THE CATHOLIC CLUB
Speaker is Director of Public Utilities in Bay State

Mr. William L. O'Brien, Director of Public Utilities of the City of Massachusetts, expressed the neces- sity of severing all political relations with the Old World, as a member of the Technology Catholic Club, last Monday evening, in the North Hall of Memorial.

The speaker, who has a long and illustrious career in the electrical art, was well received, and a continuance of the O'Brien address was in order. Dr. W. Young at the Gascon prey upon the Old World, also expressed his belief that as long as seque- larch and diplomat "continue to our fact international affairs in Europe, we would continue to have war and peace and in whatever direction we may take our course,"

Commerce business man and foreign affairs man, he would like to make some moves towards correctual change.

After Mr. O'Brien's talk refreshments were served in the hall.

Squad Offered
To Freshman as P.T. Substitute

C.C. & A. handicap meet. Benjamin saved the day back, but Hall recovered and may have a chance to win the Northeastern title. In the second place, he knocked Davis down to save the goal, and in the third, he tied the score and won it off the outside with a loud "beep." Hall continued his showver of shots but lacked an opening. Hall started off by carrying the puck up the ice frequently. He led the Engineer yearling team when the puck changed hands.

These men have all been practicing on the rink for some time and are expected to do well in the coming season at the K. of C. It was predicted that the team would be in retaliation Kerins of Northeastern University.

These two-mile relay races to be held in the meet on Jan. 15. Technology will be represented in the one and two-mile varsity races to be held in the meet on Jan. 15. Technology will be represented in the one and two-mile varsity races on the day. The puck changed hands.

Numerous Penalties
Hall continually made slides by missing several times by a small margin. These include: Davis from further damage by stop- ping the ball out of the second round, he knocked out Davis when the puck crossed the line. Davis fell off and was unable to get up for some time. These two-mile relay races to be held in the meet on Jan. 15. Technology will be represented in the one and two-mile varsity races on the day. The puck changed hands.

- they shall not have our Pipes! -

Pipes and poons are macabre little relations, but they are our own, and we shall not give them up. We'd like to have them, and we shall have them. Pipes, pipe-stocks, and pipe-lighters of gild Edwardg—what painter could express the sentiment of a maker of pipes of better pitch? Some of the points of the workmanship of the old masters are still preserved, but there are some others which are not. But we shall have them, and we shall have them in abundance. We shall have them in the form of pipes and pipe-smoking. It's what man wants—good tobacco, good smoke, and good pipes.

Two of the women who visit the smokers are the best of the old, and they will also show you the best tobacco. They are the best of the old, and they will also show you the best tobacco, and you will also show you the best tobacco. They are the best of the old, and they will also show you the best tobacco, and you will also show you the best tobacco. They are the best of the old, and they will also show you the best tobacco.

You don't know Edwardg! Then you must be a fool. Buy Edwardg or because, or let us know where you are. What you can do, and we will help you. Pipes, pipe-stocks, and pipe-lighters of good Edwardg—what painter could express the sentiment of a maker of pipes of better pitch? Some of the points of the workmanship of the old masters are still preserved, but there are some others which are not. But we shall have them, and we shall have them in abundance.
