

COACH CALLS MORE FRESHMEN OUT FOR EARLY TRACK WORK

Best Record in Former Years Made by Those Engaged in Fall Practice

RELAY MEN BROKE MARK

New men have been reporting each day for practice, but Coach Hedlund of the track team is not satisfied because some of the men who need the early practice are not getting it. Men should start work at once if they wish to compete for positions on either the freshman Field Day relay team or on the freshman cross-country team.

A glance over the records of some of the men who ran for the freshmen last year, starting out early before Field Day, will show a large number of stars among that first group. Dick Bell was one of the relay team, and after one or two experiences in competition, the team elected him captain. He has been one of the fastest freshmen ever to run for the Institute, and it is his hope to break ten seconds for the hundred this year.

Break Broad Jump Record

Three of the former relay men went out to the Hangar one afternoon last winter, and broke the Institute freshman records for the broad jump, one after another. Walter Wrigley, and Allen, continued this event in competition, and were counted on for points in most of the meets.

Crosby and Rimbach were two more of last year's point-takers for the freshmen. Crosby in the high hurdles, and Ted Rimbach in the weights, with Winerman, a strong shot-putter, all were in training before Field Day.

Relay Men Develop

Lockhart and Holladay, both on the relay, developed as the year progressed, into first-class men, Holladay in the dashes almost exclusively, and Lockhart as an all-around taker of points. Lockhart was very versatile, having tried his hand at almost every event, and scoring in not a few.

Although there were so many who were sized up before Field Day, there were others whose talents were uncovered by Physical Training competition, including Charlie Hill, who played on the freshman

(Continued on Page Three)

RIFLE TEAMS TO OPEN THE SEASON BY NOV. 1

Four Varsity Shooters Are Left to Form New Team

With Capt. John C. Lyon '32 and Manager Neil E. Hopkins '33, heading his group of experienced riflers, Captain Kellogg, coach, expects to officially open the rifle season on November 1. The remainder of the group are William H. Hodges '32, and George P. Bentley '33, all of whom have seen at least two years of rifling experience. The coach would like to have more material from the upperclassmen. Any Sophomore who can shoot 80 without any further fundamental training, and who is interested in joining the varsity team, should see Captain Kellogg in Room 3-310 before the season starts.

The prospects of the coming freshman rifle team are regarded as bright by its coach, Lieutenant Harwood. Associated with him is Manager Ralph M. Gueake, '34, a member of the freshman team of 1930-31. The reputation of the freshman team of this past year should be regarded as one which will act as an example for the teams to follow in the future. The team scored 1473 out of a possible 1500 and placed second in the annual "Tyro" competition, sponsored by the National Rifle Association. This was only one point less than the score of the winner of the competition.

If any freshmen are interested in trying out for the team, they should try to see Lieutenant Harwood in Room 3-309B before the week of November 19, which is the official date of season commencement for the freshman team.

Field Day Football Squads Prepare for Impending Struggle

Both Classes Report a Fair Turnout After Frosh Start Slow

Football men have been slower reporting this year than ever before. For the freshman team there was no real turnout until last night, when about thirty men came out to the field. The Sophomores have been doing better, and have managed to have several good practices already. Another complete Sophomore team will be made up if a few more men report. This will be a great help to the coach, Louis Vassalotti, because he will be able to run off scrimmage without the possibility of the freshmen learning the plays, as would surely happen if the teams were to work together right along.

There has been a schedule arranged for each team, comprising two games before Field Day, and possibly more for the Sophomores after Field Day, if they wish to continue to play. The freshmen will have to stop their season with Field Day because P. T. starts immediately following it. The Sophomores will play the Harvard Dorns on October 16, and Dean Academy on October 24. The freshmen are to play two games from the following three: Harvard Sophomores, Lawrence School, and Newport Naval Academy.

Years before this, the freshman team has looked much better than the Sophomores.

(Continued on Page Four)

BUSINESS MAN WILL ADDRESS GRADUATES

Manufacturing Expert to Lead First of Seminars in Course XV

"Manufacturing Analysis" will be the subject of an address to be given this morning to the graduate class in that same subject by Carl M. Bigelow, a man prominent in the business world as a business organizer and analyzing expert. He has been a special lecturer for the past several years for Course XV and speaks frequently on business subjects.

He is well worth listening to, and as the "Advertising News" says, "He has studied manufacturing and organization problems from A to Z—and no matter if you are a one-hundred-thousand-dollar president or vice-president, you can learn a lot from Bigelow."

Two books and several magazine articles have been written by Mr. Bigelow. A wage-payment plan covering incentives for both apprentices and experienced operatives in terms of production and material utilization bears his name. During the war he did valuable work for the government in organizing the work in the airplane and electrical manufacturing industries.

In 1921 the Rhode Island State College awarded to Mr. Bigelow an honorary degree in Mechanical Engineering. He is a member of many professional societies and associations and is well known in the business world.

FRESHMEN MAY OBTAIN TICKETS IN LOBBY NOW FOR ALL-TECH SMOKER

Delinquent Frosh Will Be Disciplined Severely

Through its president the Quadrangle Club announces full cooperation with the freshman Rules Committee in the enforcement of freshman restrictions. In order to ensure that the necessary interest in Technology traditions be taken by the entering class, definite steps will be adopted for the observance of the annual rules. Periodic checkups in freshman class rooms will be made by the members of the Quadrangle Club. Violators will be warned after the second offense and thereafter will be brought before a disciplinary committee. It is hoped that the freshmen in their own interest will display sufficient class spirit to comply with the rules.

ENTHUSIASM RUNS HIGH AT MEETING

Large Turnout With Plenty of Pep Makes '34 Meeting Big Success

Less than half of the Sophomore class attended the Class mass meeting in Room 10-250 yesterday afternoon when plans for Field Day were formulated. What they lacked in numbers they more than doubly made up in spirit, however, as was marked by the loud cheering and large number of candidates for the teams.

Henry D. Humphreys '34, president of the class, presided, keeping the group in high spirits with his personal recollections of the freshman class. Coaches of the various teams spoke, Oscar Hedlund speaking for the relay team. Donald B. Gilman '32, president of the Senior class, discussed the possibilities for a complete walkaway for the Sophomores and warned against the use of eggs or any other property damage incurred by the classes. He pointed out that there were to be no demonstrations of any kind off the school grounds.

It was emphatically pointed out by all speakers that a large number of men for all teams were needed. Sophomores who found it impossible to attend the class meeting should sign up immediately with the managers of the teams in which they are interested. A meeting of the tug-of-war men will take place in the Hangar Gym tomorrow evening at 5 o'clock. Coach Hedlund will meet all men interested in the relay team in the Track house any afternoon. Those interested in football should meet Coach Vassalotti '32, on the Tech Field any afternoon, while any member of the class who has any football equipment which he will lend the team should see either the coach or the manager. The team is sadly unequipped and every little bit will be appreciated.

Glider Club to Open Season with Flights by Eligible Members

Automobile-Towed Flying is to Be Tried by Society on Week-End

Starting off its year of activities, the Aeronautical Engineering Society plans to begin with a series of glider flights at the Westwood Airport.

According to plans now made, the first of a series of flights will be made this week-end. On Friday, the glider will be taken to Westwood and will be rigged in preparation for the flights, which will be experimental in nature, in order to test the effects of towing the craft behind an automobile.

Everyone who is interested is invited by the Society to witness the flights, but the actual flying will be restricted to those members who are eligible to fly. All men who are eligible to fly will be so notified by mail. This year's membership drive will start October 15.

This year the forty-foot wingspread glider, the "409," is the craft to be flown. It was taken to Cape Cod in the Spring of 1931 and was flown there, making sixty-nine flights before it cracked up. It has been repaired since by students in the summer school, during which a new tail assembly was made. The only part yet to be fixed is the bent steel nosepiece.

All later official announcements as to this trip and the activities of the Glider Club will be made on posters placed on the bulletin board near the Dean's office and in other conspicuous places.

WOODBURY TO OFFER NAVIGATION COURSE

First Meeting Will be Held on Friday, October 9

Substantially the same course in Navigation that is offered to midshipmen in the United States Naval Academy, will be given this term by Mr. R. S. Woodbury. The course is offered unofficially, no credit being given to men taking the course. The first meeting will be in Room 2-174, Friday, October 9, at 5 o'clock, at which time the hours will be arranged.

Last year was the first the course was given and quite a number of students were interested enough to take the course. The course will be given two hours a week, and is open to all students who are interested. The work covered is practically the same as covered in the same subject during the Junior year at Annapolis.

SMOKER STARTS AT 6.30 WITH DINNER FOR NEW STUDENTS

Annual Get-Together Promises To Be Long Evening of Amusements

GIVE SPORT EXHIBITIONS

Six hundred and fifty reservations have been made for the turkey dinner which is given each year to the freshmen and transfer students. There are over seven hundred new men altogether, therefore an easy deduction is to be first in line when the ticket booth opens in the Main Lobby of the Institute this noon.

For the next three days from 12 till 2 o'clock the tickets will be given out only to the newcomers in the ticket cage under the Dome. Last year there was a scramble at the last minute for tickets with dire results for the late applicants who missed a good meal, and the committee urges that this misfortune should not be repeated.

Speakers on Activities

Following the dinner the doors will be thrown open and the entire student body will be admitted to hear the speakers and to see the entertainment. Dr. John A. Rockwell '96, will speak for the competitive sports at the Institute. Dr. Rockwell is well known about Technology, having been an outstanding athlete during his four years here and very much interested in the functioning of the Athletic Association, entirely handled by students.

James R. Killian '26, the Alumni secretary and editor of the Technology Review, will champion the cause of the publications, THE TECH, T.E.N., Voo Doo, and the Technique. Mr. Killian during his four years was an ardent worker on THE TECH, winning places on the Junior and Senior boards, and being Managing Editor in his Senior year.

Mr. William C. Green, Jr., an instructor in the English Department, will speak in favor of the Musical Clubs and the Tech Show.

Prof. Rogers Will Speak

Prof. Robert E. Rogers, also a member of the staff of the English Department and a columnist of note, will give the address of the evening. His subject has as not as yet been decided upon, but his wit and satirical humor have kept audiences in constant explosions of laughter in the past.

After the final speech the offices of the various activities will be open for inspection. The activity offices are located in

(Continued on Page Four)

REPRESENTATIVES OF INSTITUTE SELECTED

Prominent Men Chosen to Help Consult with Students

Appointment of a national group of honorary secretaries to represent the Institute in various cities of the United States, Canada, and Mexico was announced today.

More than fifty Technology Alumni, selected on a basis of their prominence and experience in professional fields, will provide sources of qualified first-hand information on education in science and engineering, architecture, and business and engineering administration at the Institute. These representatives will consult with students in their districts who intend to enter Technology and will assist them in determining their qualifications for a technical education.

The work of the new secretaries, it was stated, assumes particular importance because of the rapid growth in the number of applicants for admission to the Institute, and the necessity for giving precedence to those students whose earlier efforts indicate special aptitude for technical training.

The SPECTATOR

Drafting-Room Idiots

Whistling is an unmistakable sign of the moron, according to Dr. Charles Gray Shaw of New York University. Historians will probably credit Dr. Shaw with being the first person to make this observation. The Spectator believes this to be a mistake, for he personally has heard T-Square Smith make the same remark. Under his breath, it is true, and not expressed in the academic terminology of a doctor of philosophy; but the meaning and spirit were there, just the same, undoubtedly intensified by years of drafting-room experience. In a more recent news dispatch, Dr. Shaw has modified his remark so as to apply only to "aimless, lip whistling." This is putting the shoe on the wrong foot. Mental concentration is often accompanied by aimless whistling or humming. If you do not wish to whistle aimlessly, you must interrupt your work in order to concentrate on the whistling; and then you are undoubtedly a moron.

Learning Originality

The Spectator was intrigued by one of those posters advising freshmen to come out for T.E.N. and "learn business, journalism, and originality."

Teaching originality is a noble idea, but just how do you go about it? Heroes are born, not made; and it's heroic to be original, as Arthur D. Little points out rather conclusively in the current Technology Review.

Martyrs to Originality

Having a point of view that is not ex-

actly original, but merely peculiar, the Spectator is inclined to favor Dr. Little's martyrdoms with a dash of mental reservation. The theme of the article is perfectly true, but not novel; and it has become the prevailing custom among unthinking people to read into it interpretations that lack both novelty and truth. Dr. Little enumerates the blunders of Authority, and dwells at length on the stupidity of fundamentalists. Whereupon modern youth will come along and, knowing nothing about either, will proceed to argue that Authority should be thrown overboard and that fundamentalism is fundamentally foolish. Neither of these is strictly true.

Bruno was burned at the stake for insisting that the Bible was not valid as scientific evidence. It sounds a bit preposterous, but that is what we are told. If Bruno had been really up-to-date, in the twentieth-century manner, he would have thrown out the Bible not merely as scientific material, but as a guide to religion and moral values as well; and, having proceeded that far, he would probably have decided to be consistent and throw out the religion and morality along with it. And then he would have capitalized on his philosophy by writing one-dollar books on it.

Thirty new typewriters have been installed in the news rooms of the Brown and White, undergraduate newspaper of Lehigh University.

FRESHMEN, ATTENTION!

IT is urgent that every freshman attend the meeting this afternoon in Room 10-250 at 5 o'clock, to plan for Field Day. Showing an interest in class affairs by going to class meetings is every bit as important as wearing a freshman tie.

Field Day is a somewhat milder form of the old freshman-Sophomore fracas; organized athletics have been substituted for rioting. It gives more satisfaction than the old free-for-all, and the question of who won is more easily settled. For those hardy souls who must rough-house, there is the glove fight.

However, this new form of lower-class clash requires infinitely more planning, preparation, and practice than the old form. One cannot even pull a rope efficiently without hauling away at a post for some hours, and the other sports require even more work if one is to become at all proficient. The Class of 1934 won last year, and is naturally determined to repeat its victory. It has very strong teams in all of the events. These can be beaten, but if the men of '35 would develop winning teams, they must get to work soon, and they must work hard.

Therefore, it behooves all freshmen to attend the meeting this afternoon, if only to find out what it is all about. The Sophomores have the added advantage of experience, but upperclassmen have been appointed to advise and help the first-year men, and for this purpose have called the meeting. If you want to win Field Day, freshmen, be in 10-250 today at 5!

SMOKE

SOCIAL functions which draw a representative group of the student body are comparatively rare at Technology. The All-Technology Smoker, scheduled for this Friday evening, is one of those few. This affair has been planned for the freshmen, and for reasons which make it most important that all of the new men are present.

It seems unnecessary to repeat the benefits which a student may receive should he expose himself to one or more of the various broadening aspects of Institute undergraduate life. This Smoker is held so that the freshmen may obtain a cross-sectional view of this life. The free meal and entertainment are strong drawing cards, but the more weighty portion of the attractions is the addresses by men who are best equipped to talk on undergraduate activities.

Tickets for this affair will be given out in the Main Lobby today, tomorrow, and Friday. It is urgent that each and every first-year man procure his, and that he appreciate that the All-Technology Smoker is an event which may play a great part in his subsequent success at the Institute.

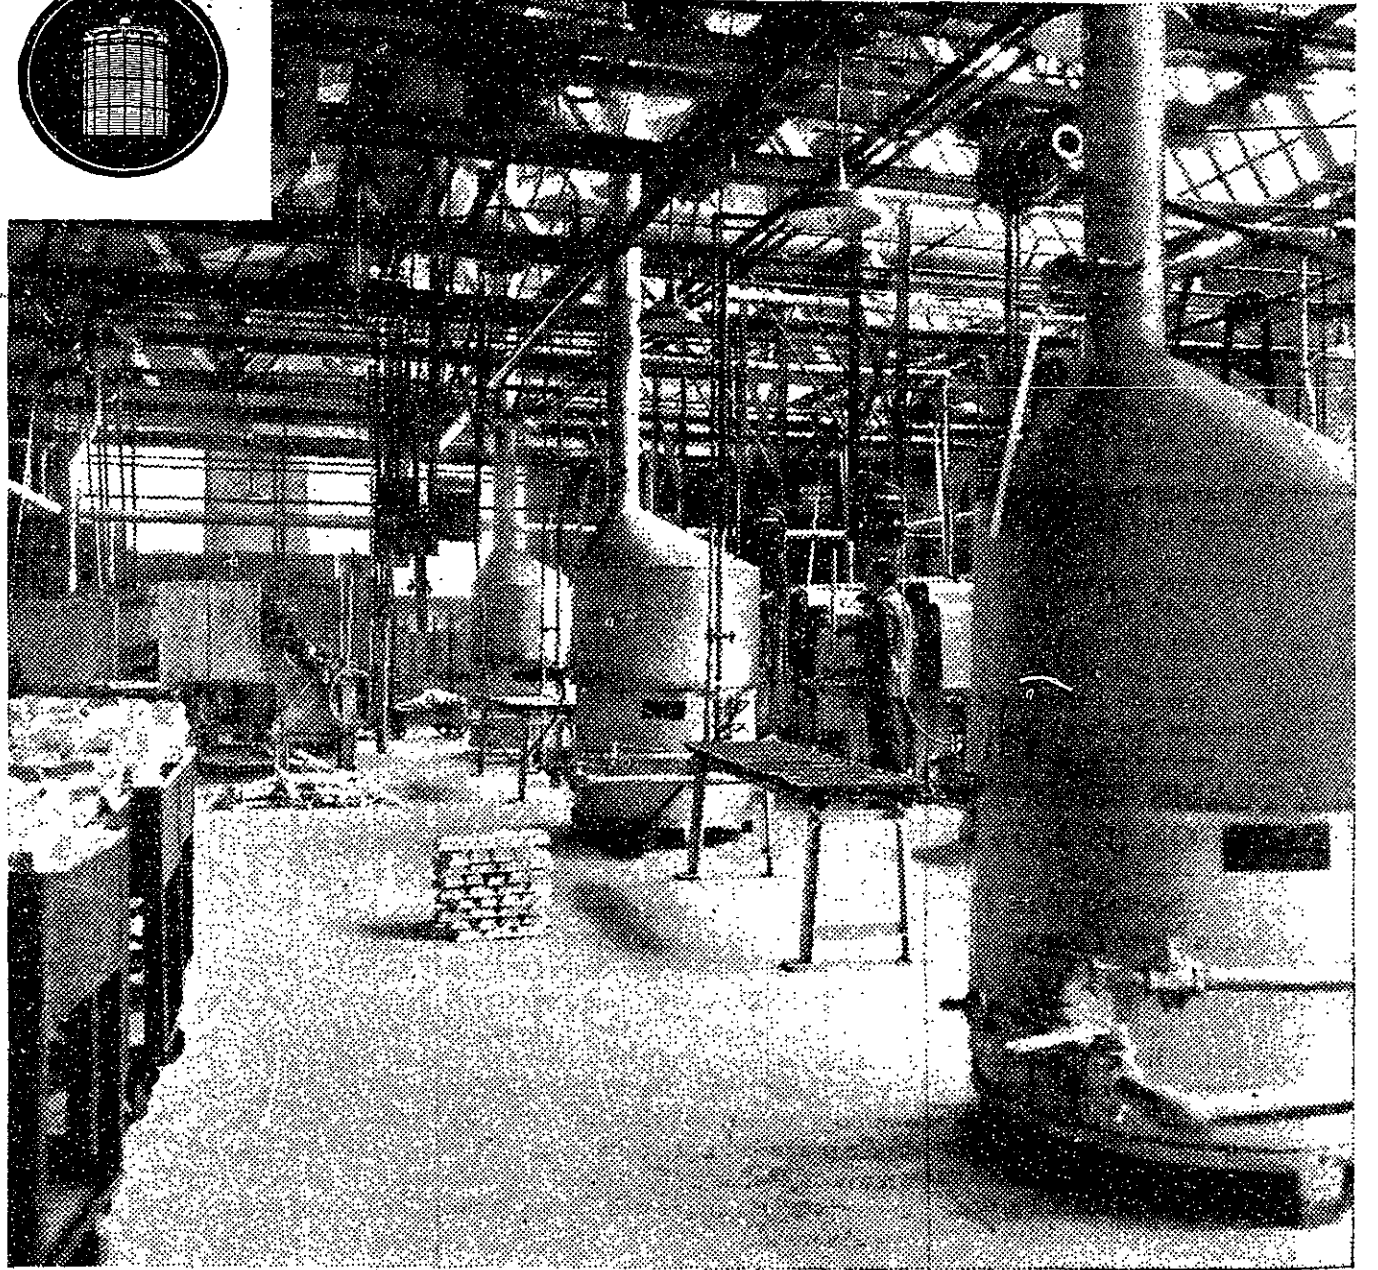

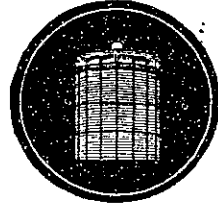

CONGRATULATIONS, PHOS!

SEVERAL times during the last term this column was given to strong criticism against the undergraduate body's humorous publication, our so-called Voo Doo, and citing that the magazine was falling far short of the function which it might perform were it incorporated with proper care, and its contents selected with more taste. Some objections were raised to such a stand, but Phosphorous, as our foolish contemporaries beg to be dubbed, maintained a discrete aloofness which we interpreted to signify a disinterest in self-improvement.

We find, however, that we have been sadly mistaken. Under the careful supervision of the apparently capable managers, today's issue of Voo Doo is a reorganized magazine. Not that it may now take its stand with the world's best humorous periodicals, but it should assume a new station in undergraduate publications. The changes wrought are few, but toward an end which should make for a new appreciation of the Institute man's sense of humor.

The plea has long been voiced for a comic publication which shall, under the guise of wit, serve some definite purpose other than pure amusement. By using to promote matters relative to the Institute its well-directed satire, such a publication can be of tremendous value. Voo Doo's Editorial Page has assumed new potentialities in the present issue. Apt comment on matters of textbooks, and upon the general unmentionables of fraternity rushing can be voiced properly only in a comic magazine.

We are not, however, advocating that the undergraduate body's organ of things amusing deteriorate into something equivalent to a Sunday School journal. We are all human enough to appreciate jokes which are not all that a parlor story should be, but there seems no excuse for broadcasting bawdiness. Voo Doo is pulling itself out of a traditional rut, and we look forward to the most valuable year in the annals of Phosphorous.

GAS heat is the preferred heat for die-casting. It is adaptable to the nth degree; it puts the heat where it is needed; it is economical; its application is simple. The new illustrated book "Gas Heat in Industry" tells the story. Send for your copy (it's free) today.

AMERICAN Gas ASSOCIATION

420 Lexington Avenue, New York

GAS FOR HEAT WHEREVER HEAT IS NEEDED

**Seasonal Jokes
Feature Initial
Issue of Voo Doo**

**Phosphorous' Satire Directed
at Fraternity Rushing
and Freshmen**

Freshman credulity and fraternity rushing tactics take the brunt of the feline wit which issues from the office on the third floor of Walker Memorial as this year's freshman Number of Voo Doo goes on sale today.

Taking advantage of the amazement of the typical freshman upon his initial visit to the Institute, Voo Doo offers a number of drawings, sketches and verses intended to give the "low-down" on various phases of Technology life. The verses in particular, of which there are several scattered throughout the magazine, are witty and rhythmic examples of comic poetical parody.

Will H. Rapport '34, is the principal illustrating artist of the freshman Number, having drawings on almost every page. The cover, which is the work of Harper V. Richards '33, shows a cluster of freshman heads and neckties against an appropriate background of bright green. Drawings by Richards and Richard V. Baltzer '31, also decorate the interior pages of the magazine.

"Foiling the T.C.A. Book Exchange," is the caption of the editorial page, and is followed by an editorial which strongly criticizes the prevailing practice of issuing new editions of textbooks every two or three years. The editor states as his reason that "the slight advantages to be gained by new students from a 'revised edition' are not compensated for by the considerable loss to those who have been robbed of the resale value of the previous volume. Financially handicapped students suffer from being unable to purchase their texts second-hand."

**COMBINED SOCIETIES
HOLD INITIAL MEETING**

Members of the Combined Professional Societies held an informal meeting Monday to discuss and outline this year's program and make arrangements for the regular meetings to be held twice a month. The Executive Committee reported that with a little cooperation from the members, twelve in number, it will have a successful year.

Bowdoin has a new tennis court of English red clay, built of material imported from Great Britain at great cost.

**Articles Lost at Freshman
Camp Attainable at T.C.A.**

The articles listed below were found at freshman Camp and may be claimed at the T.C.A. office:

- 6 towels
- 1 shirt
- 3 handkerchiefs
- 3 bathing suits
- 1 slicker
- 1 blue sweater
- 1 dark grey coat
- 2 pairs socks
- Keys
- 1 pair football shoes

**CALL FRESHMEN OUT
FOR FALL TRACK WORK**

(Continued from Page One)

football team, and thus was not able to practice track until somewhat after the rest had gotten under way. As the winter progressed, he ran on the boards, improving constantly, and by the time the men were out on the cinders, he was a real asset to the team in every meet.

Opportunity For All

Not only the men with years of experience behind them should report, but also those who would like to run, who would like to substitute track for Physical Training. In addition to the intercollegiate competition, there are numerous meets on the home track, open only to students, and meets only for Physical Training men. A varied program is prepared, as was shown in THE TECH of Wednesday, September 30, and there will be ample opportunity for every man out.

An enterprising reporter for the Columbia Spectator set out to determine the cause for the large number of sleepers in a certain class. It's no wonder one gets sleepy when a "prof" utters exactly 267 "er's" in 40 minutes.

**IMPROVEMENTS MADE
IN CABIN OF T. C. A.**

Alterations on the T.C.A. Cabin at Lake Massapoag are now being made in preparation for the large number of vacation groups which are expected to adjourn to it throughout the year. Last year over six hundred people signed the register in the cabin.

A new radio speaker, more equipment, and better lighting facilities are listed among the improvements which are being made. The batteries in the little power plant by the water's edge have broken down after fifteen years of service, and new batteries are being put in, costing \$325.

Any group connected with the Institute may use the cabin free of charge at any time providing they adhere to the rules and regulations and sign up at the T.C.A. office. Calvin H. Mohr '33 is in charge of its administration.

 6.30 — Dormitory freshman dinner meeting in North Hall.
Friday, October 9
 6.30 — All-Technology smoker in North Hall.

TECH SHOW SMOKER

Tech Show's Smoker is temporarily called off. Was scheduled for tomorrow evening. Announcement of new date will be made later.

RIFLE TEAM

Men who were awarded "T R T" and "T" with crossed rifles, for work on the rifle teams, can obtain their certificates at the office of the M.I.T.A.A. in Walker Memorial any afternoon.

FRESHMEN

Freshmen who have elected the course in Business and Engineering Administration will meet in Room 1-190, on Thursday, October 8, at 4.00 p.m.
 Prof. E. H. Schell, head of the Department, will announce at this time certain new developments of particular interest to men electing this course.

INSTRUMENTAL CLUB

The Instrumental Club will rehearse from 6 to 8 o'clock, Thursday evening, October 8, in the East Lounge of Walker. There will be new music to play, and all interested are cordially invited to attend.

BIOLOGY AND HEREDITY

The class in Principles of Biology and Heredity, G71, will meet hereafter in Room 4-231.

FRATERNITIES

All fraternities are requested to send the names of their pledges to THE TECH on or before Sunday, October 11.

FRESHMAN P.T. SUBSTITUTION

Freshmen wishing to substitute track for P.T. must sign up in H. P. McCarthy's office any morning before noon, October 23. Physical fitness cards must be presented. Roll cards must be turned in at track house.

JOURNALISM CLASS ENTRIES CLOSE SOON

Mr. Frederick G. Fassett of the English Department is now forming a class in journalism which freshmen associated with either THE TECH or T.E.N. are privileged to substitute for their regular E-II. More than twenty men have already signified their intention of taking this subject, which for the first time is open to first-year members of the engineering publication as well as THE TECH.

Mr. Fassett plans to hold the class on Mondays and Thursdays, and a tentative schedule of the hour given is posted on the door of his office in 2-274. All those who contemplate taking advantage of this special course should notify Mr. Fassett immediately. "Magazine Writing," by John Bakless, will be used for home reading.

Frosh Field Day Arrangements Will Be Discussed Today

Sophmores Already Organized Are Out to Repeat Last Year's Victory

All freshmen who wish to occupy the honorable position attained last year by the Class of 1934 had better attend the freshman mass meeting at 5 o'clock in Room 10-250. The Sophmores have shown more spirit than usual this year and it will take a well-organized freshman class to defeat them. At this time the Field Day rules will be explained and cheer leaders selected. The speakers will be Robert G. MacKay, president of the Class of 1933, in charge of the meeting; Richard L. Fosssett '33, manager of Field Day; Oscar Hedlund, track coach; Pierre S. Dupont III '33, tug of war; Henry E. Worcester '32, football; and Allan L. Dunning '31, crew. Each leader will outline the work to be done and the number of men needed.

Showing more than usual spirit, the Sophmores organized yesterday, and are out to repeat their overwhelming victory of last year. If they are to be defeated this year, it will take a well-organized freshman class to do it.

FIELD DAY FOOTBALL SQUADS PRACTISING

(Continued from Page One)

more, from a numerical point of view, and often as regards to form and style. This year the second-year men have the jump on the frosh, and are getting started with a great deal of enthusiasm. Many men from last year's '34 team have not yet reported, and it is hoped that they will find an opportunity to report as soon as possible. There was such a fine team last year that it should be easy to find a strong one again.

Play practice is being held by each team at present, with very little scrimmage, as the men have not been out long enough to risk it. There seem to be many good men among the freshmen who have reported to date, several of them with good school records behind them.

 the basement as well as on the third floor of Walker Memorial.

Will Present Technique Cup

To the man who has scored the largest number of points in Intercollegiate competition during the past year will be given the Technique Cup.

Orville B. Denison '11, the old faithful cheer and song leader, will be on hand to keep the crowd entertained, and lead the "We are Happies." Further entertainment will be furnished by the Cocoonut Grove artists and groups from R.K.O.-Keith's circuit.

Sport Exhibitions in Gym

Boxers, wrestlers and gymnasts from the varsity teams will end the evening with demonstrations in the Walker Memorial Gymnasium on the third floor. Several boxing and wrestling exhibitions will be given, and the gymnasts will go through several stunts in their various events.

BUTLER UNIVERSITY — Butler's squad of football candidates is holding night practices in order to escape the heat and to get accustomed to playing under electric lights before it engages the Franklin team next Friday night.

KEEP KISSABLE

WITH OLD GOLDS

Charming women are first won by OLD GOLDS' appealing taste. But their enthusiasm doubles when they find that OLD GOLDS do not taint the breath or mar the whiteness of pearly teeth.

That's because OLD GOLD is a pure-tobacco cigarette. Made from the finest nature-flavored tobacco. So good, it needs no added flavoring.

It's "foreign flavoring," not good tobacco... that leaves unwanted aftermaths. Play safe. Smoke pure-tobacco O.Gs. They leave nothing behind but pleasant recollections.

NO ARTIFICIAL FLAVORS TO TAINT THE BREATH... OR STAIN THE TEETH
