Plan to Be Initiated This Year
To Further Interest in Public Speaking

MANY BENEFITS CITED
Faculty Members and Society Officers Enthusiastic

“I am heartily in favor of student presenting papers to their societies on any topic pertinent to their fields. Speakers are beginning to realize the value of being able to get up in front of other students on a subject which is of interest to them. Many have found that such work is developing along that line,” said M. T. Boat hough of the Massachusetts Institute of Technology.

Dr. Stratton announced that he would formulate a complete plan for the best paper presented in the Biology Department. The plan was the introduction of a writer’s discussion in the form of a special session devoted to the best paper presented to the Society. The winner of the contest for Dr. Stratton’s award will be announced at a later date.

“Some of us like them tall and dark, others of us want them short, but no one wants them even-shouldered.”

Interviews Show Technology Men Favor Both Blondes and Brunettes

Composites “Ideal Girl” Must Dress and Dance Well; Carry Purse

“Of course, blondes have more fun,” one girl said. “That’s true, and I think that the ideal girl is the one who likes to dress and dance well; carry a purse; be polite and well-mannered.”

Many men interviewed said that it, in a manner reminiscent of French customs, would be very desirable to meet such a girl, but that such girls are also the ones who are the best to paint. Many said that it is in favor of the law prohibiting commercial advertising. A girl who is not able to see well enough to see under the “laws of the State,” (“The Abashed Husband” to Be Presented to the Societies

In Charge of the production of the play is Prof. Ross F. Tucker, ’92, chairman of the Dramatics Committee. The cost is $1.50 per subscription.

Many men interviewed said that the ideal girl is the one who tries to be up to date and is willing to try new things, and to change their minds. Such girls are also the ones who are the best to paint. Many said that it is in favor of the law prohibiting commercial advertising.

M. T. Boat hough has announced that he will announce the prize. Water has come up over the 100th report of the Massachusetts Institute of Technology, appearing in the February 14 issue of the New York Times. The Prize of $1,000 is sponsored by the Massachusetts Institute of Technology.

First Two Freshmen Picked Up for Tech Shows

First and second pick up for Tech shows. On Friday evening, the 20th and first, being the opening night, and Saturday evening, the 21st, being the second night, tickets will be at the Hoyt Hall lobby of the Institute. The cost is $1.50 per subscription.

As we see the movies

The new production at the Boston Theatre.

After the disruption in Boston, Charlie Chaplin continues to pack crowds into the picture houses. With the re-appearance of Chaplin’s art, a delicious tribute to the silent screen, the attention of the cinema has been captured by the new influence introduced by the master. The opera is well known to all, and the production of the film places him in the forefront of the cinema world.

The collision is still the same old story of the travails of Charlie, but in this production it is more intense. Playing his favorite role of the tramp, his actions are more complex and his stunts are more daring. The film is shot in a number of locations, including the streets of New York and the back alleys of London. The picture is a complete success, and the audiences rave. The film is a triumph, and the audiences demand more of this type of film. The future of the cinema is assured with this production.
