

SPRING CONCERT HELD FRIDAY

Class Elections Campaigning Necessitates Official Action

TWO CONTESTANTS ARE STRUCK FROM NOMINATION LISTS

Electioneering Causes Action Of Executive Committee Against Nominees

VIOLATE CONSTITUTION

For active electioneering in direct opposition to the Constitution of the Undergraduate Association, the names of Albiny Machinsal and Harold E. Sprague were stricken from the list of nominees in today's election by action of the Executive Committee of the Institute Committee at a special meeting late yesterday afternoon.

The candidates whose names were removed from the list are both members of the Class of '33 and were nominees for the position of class president and vice-president respectively. Both men were disqualified because they distributed or permitted the distribution of advertising matter calling attention to their candidacy in today's election.

Committee Report

The action of the Executive Committee as made public in a statement released after the meeting was as follows:

"At a special meeting of the Executive Committee of the Institute Committee it was voted that the names of Mr. A. Machinsal and Mr. H. E. Sprague be stricken from the list of nominees for class office, and the members of the undergraduate body be acquainted with the fact that it is contrary to the Constitution of the M. I. T. Undergraduate Association (Elections Committee, Art. IV, Sec. 17) to electioneer in any form."

The action of the Committee was taken when it was learned that circular letters and postcards bearing messages from the nominees had been received by members of the rising Junior class.

Used Letters and Postcards

Circular letters containing a statement of problems that confront the Institute and signed by Machinsal as a candidate for the office of class president constituted the grounds upon which the name of this candidate was removed from the list of nominees.

UNIVERSITY LODGES PLAN DINNER-DANCE

Walker Memorial Selected As Scene of Joint Affair

On the evening of April 30, the three college lodges of Technology, Harvard and Boston University will hold a combined "Ladies' Night" in Walker Memorial. This is the first time in several years that the Masonic clubs have combined for such an affair and the first time that Walker Memorial has been chosen.

Starting at 6:30 o'clock with dinner, the members of the lodges will spend the rest of the evening dancing to the music of Ruby Newman's orchestra. Entertainment has also been planned to precede the dancing. The recreational facilities of Walker Memorial will be available during the evening including the reading lounges, bowling alleys and pool and billiard rooms.

Two classes of tickets have been issued. The first covers the entire program at a cost of \$2.00 per person and the second covers admission to the entertainment and dance only at \$1.00 per person. They are available from the officers of the clubs.

R. O. T. C. Signal Corps Will Radio Crew Race Report

Meal Will Be Served At Cost In Walker Memorial Cafeteria

Students in the signal corps of the R. O. T. C. will be in complete charge of the broadcasting of reports of the crew race from the Charles River Basin, Saturday afternoon. Those in immediate charge of the venture will follow the race in a launch, sending a running description of it on a long wavelength to the Boston station of the Columbia Broadcasting System, which will rebroadcast it over a nation-wide network.

Another feature of Open House will be the service planned for the Walker Memorial dining hall. Mr. A. W. Bridges, the superintendent of the Walker Memorial Cafeteria, is arranging a special dinner to be served from 4.30 until 7.30 o'clock. Both cafeteria and the usual waiter service will be available in the Grill and Faculty rooms.

Meal Served at Cost

Bursar Horace S. Ford says that the meal will be served at cost; that in no way will any profit accrue to the Institute from it. He states, "A special fifty cent dinner will be served that is guaranteed to knock your eye out." It is expected that a large crowd will avail themselves of this opportunity.

In order to handle the crowds, the R. O. T. C. students will be stationed at various points throughout the buildings in 2-hour shifts so as to be able to answer questions and supply information whenever necessary. They will not move around as guides. To further facilitate the handling of

(Continued on Page Three)

TECHNIQUE STORES SUPPLY OF GREASE FOR ANNUAL RUSH

Football Field Will Be Battle Scene for Dormitory and Fraternity Men

MORRIS IS ANNOUNCER

Black jacks, night sticks, spiked shoes, brass knuckles and sand bags will be the only prohibited articles on the persons of those entering the big fight on next Saturday afternoon. Technique is offering at the Rush, in spite of the scarcity of copies, twenty paddles, each of which is good for a copy of Volume XLVI. Incidentally this is the only way for those who have not already bought a Yearbook to get one, for none will be put on sale.

To satisfy the modesty of the more puritanical section of the spectators the contestants are requested to wear at least a sturdy pair of trunks, ones that will take some knocks without unfolding at the seams, and to be at the track house at 2:30 o'clock all prepared to go. The first paddle will appear from some unknown source about 3 o'clock and from then on may the best man survive.

Dormitories Out To Get Fraternities

As has been proved from past experience the only successful way to compete in the wholesale slaughter is to organize teams and work together for paddles with the big men tossing the infants up on the roof of the slimy hut. It is reported that with their increase in size, the dormitories are going to take advantage of their superior number and are out to clean up all of the twenty paddles.

Last year the fraternity teams took only four paddles while "Shorty" Axelord of the dorms took three himself. A hospital tent will be erected to take care of the broken bones or other more serious injuries that will probably result from the battle royal.

Harvard's crack stadium announcer,

Will Feature Floor Show At Dance Following Concert

Alumni Nominate Four New Members For Corporation

Vacancy Is Filled In Addition To Three Elections Held Yearly By Council

Nomination of four new alumni members to the Institute corporation was announced by Professor Charles E. Locke, Secretary of the Technology Alumni Association, at a meeting of the alumni council at Walker Memorial, Cambridge, Monday night.

William S. Forbes, '93, President and Treasurer, The Forbes Lithograph Manufacturing Company, Boston; Henry E. Worcester, '97, Vice-President, United Fruit Company, Boston; Francis J. Chesterman, '05, Vice-President and General Manager, The Bell Telephone Company of Pennsylvania, Pittsburgh; and Thomas C. Desmond, '09, New York State Senator, Newburgh, N. Y., were the four men nominated to the corporation. Nomination by the alumni body is equivalent to election the actual election by the corporation itself being a formality.

Receive Highest Vote

These four men received the highest votes of a slate of twelve presented by the nominating committee of the Alumni Association to the alumni body of the Institute. It is customary that only three term members be added to the corporation each year, but the death of William E. Nickerson, '76, former Vice-President of the Gillette Safety Razor Company, Boston, left a vacancy. Mr. Forbes of the above four is to fill this vacancy.

Announcement was also made of the election of Bradley Dewey, '09, President of the Dewey and Almy Chemical Company, Cambridge, and son of Professor Davis R. Dewey, sen-

(Continued on Page Three)

AFFAIR WILL WIND UP CLUB PROGRAM FOR THIS SEASON

Large Number of Patronesses Accept Invitation To Night's Events

USE SPECIAL LIGHTING

Culminating the 1930-31 season of the Combined Musical Clubs, the annual Spring Concert and Dance will be presented Friday evening at 8.45 o'clock in Walker Memorial. Efforts have been directed toward making the concert the most successful social function in the forty-six-year history of the club.

A novel feature of the evening will be in the form of a floor show presented during the intermission for refreshments at midnight. This is one of the few times that such an event has been presented at Technology and promises to heighten the possibilities of the hour. Mysterious statements concerning its exact character and the talent secured have been made but the management prefers to keep its exact nature a secret.

Decorations Lavish

No expense has been spared in securing unusual decorations and banks of flowers, potted palms, and familiar greens will be much in evidence conveying the festive Spring spirit of the occasion. Moving and fading colored lights will enhance the murals and Walker promises to be transformed into a color-land of delight.

The dancing floor will be refurnished during the midnight intermission when refreshments will be served at the tables under the balconies, so that the dance may continue until three with a fine floor finish. Tables may be reserved for fraternity or club groups of any size at the office of the Combined Musical Clubs on the third floor of Walker.

Due to the publicity given the unusual "weighing in" admittances at the last Dorm dance, local papers have made arrangements to take pictures at different points in the revelry.

Specialty Acts Secured

Music of a lighter vein will be provided by the rendition of two specialty acts at appropriate intermissions in the concert, which will last from 8.45 to 10.30 o'clock, each club ap-

GIBSON CHOSEN AS HEAD OF A. I. E. E.

Shafer, Smith and Lowery Are Other New Leaders

John C. Gibson, '32, has been elected chairman of the M. I. T. Student Branch of the American Institute of Electrical Engineers for the coming year, it was announced by the senior officers of the society last week. To assist him in the work Elwood W. Schaffer, '32, was elected vice-chairman along with Thomas R. Smith, '32, as secretary and Glenn A. Lowery, '32, treasurer.

Gibson is enrolled in the communications option of the Electrical Engineering Course and is from Bennington, Vermont. He has been active in the society for the past two years and is also a member of the Executive Committee. The new vice-chairman, Schaffer, is also in the same option of the Electrical Course and is from New York City. Lowery is a newcomer this year and has taken an active part in the program. He is a graduate of Muskingum College and is enrolled in the straight VI Course. Smith is from Newton, Iowa, and is following the Cooperative option of the Electrical Course.

WAR DEPARTMENT ACCEPTS RESIGNATION OF COL. EDDY

FRESHMAN CAPTAIN OF CREW SELECTED

John W. Westfall '34 Chosen By First Year Oarsmen

John W. Westfall '34, of Springfield, Mass., was elected captain of the Freshman crew yesterday. Westfall is stroke on the first freshman boat and will lead them in their first race against Harvard and Princeton next Saturday on the Charles.

Before coming to Technology, he attended Springfield Tech, where he was also prominent in crew receiving much valuable experience. Coach Haines found him to be practically the only freshman with previous experience and made him stroke of the crew which position he has worked through the year. He is enrolled in Course X and lives in the dormitories.

CHORAL CLASS WILL OFFER SONG PROGRAM

Next Friday evening at eight o'clock, the Choral Singing Class of the Institute under the direction of Professor Stephen S. Townsend will give a program of song selections in the Commons Room of Rogers Building.

The program will consist of choral and solo selections. Among the soloists are W. Adams '33, Tzoiag T. Amirian '32, Thomas K. Fitzpatrick '33, Benjamin M. Gruzen '35, Helge Holst '31, and George C. Tashjian '33.

Military Science Head To Become Assoc. Professor

Resignation Effective In June —To Teach in Economics Department

Colonel Robert C. Eddy, U. S. A., who since 1929 has been head of the department of Military science, is retiring from the army to accept an appointment as associate professor of business and administration at the Institute. He is resigning at his own request after thirty years of service, four of which have been spent here.

Colonel Eddy graduated from the United States Military Academy at West Point in the class of 1905, and came to Technology as an officer in the Coast Artillery corps to serve on the Faculty of Military Science and Tactics. At the present time he has nearly completed his work toward a master's degree in Economics at Harvard.

Served in Panama

He is an honor graduate of the Coast Artillery School at Fort Monroe, and in 1923 was graduated from the Command and Staff School at Fort Leavenworth. His services during the war included duty in Panama where he was a member of the artillery defense staff. In 1918 he was ordered to Washington to take charge of the organization and training of heavy ar-

(Continued on Page Four)

CATHOLIC CLUB HOLDS ANNUAL SPORTS NIGHT

Red Sox President, Harvard Coach Will Speak

Bob Quinn, president of the Red Sox, Boston American League baseball team, will be the principal speaker on the program of the Technology Catholic Club's Sports Night, to be held tonight at 7:30 in the North Hall of Walker Memorial.

An added feature of the meeting will be the showing of moving pictures of various sport events. Pictures of the last Dempsey-Tunney match and of some of the football games of last fall will be shown, and explained by Nils Nelson, former Harvard football player and one of Harvard's coaches for next year. Musical entertainment will also form part of the program. Following this, refreshments will be served.

OFFICERS SELECTED BY MINING SOCIETY

On April 28 the officers of the Mining Society were elected for the coming year. The meeting was held in Walker Memorial. The following officers were elected: President, A. N. Rineheimer '32; Vice-President, H. J. Chapin '32; Secretary, J. D. Rumsey '33; Treasurer, R. D. Butler '32. There will be a banquet held in Walker Memorial May 12 in honor of the retiring administration.

Firing the Faculty

That Technology ought to have a museum is the opinion expressed by Harry J. Carlson '92 in a recent issue of the *Technology Review*. He notes that provision for a museum was made in the original charter of the Institute. Mr. Carlson goes further and states that if we had a museum it might be possible to fire half of the Faculty.

To the Spectator, the possibility of getting rid of 50 per cent. of the Faculty is reason enough for starting construction immediately, particularly if he may be given some choice in the selection of those to be fired. To make the idea even more attractive, it is suggested that the 50 per cent. thus discarded might be used to form Exhibit A in the new museum. Isn't it Clarence Cook Little who says that 50 per cent. of all professors are fossils anyway?

Mud

With the non-appearance of *The Reck* and the late-lamented *Filter Paper*, the Spectator was beginning to wonder if the Institute's various mud-slinging publications had decided to shut up shop altogether. The *Superheater* has finally come along to save the day for dirt. But the *Supr.* too, has grown anemic. With 90 per cent. of its space devoted to ballyhoo inducing seniors to part with eighteen dollars, (the paper has space for only a couple of weak jabs at the Personnel Department and the president of the Institute Committee.

With *Voo Doo* cleaned up, more or less, since the advent of the new managing board, it seems that the only dirt left to fly around Technology is the literal dirt that comes from Cambridge's mud sidewalks. Whether you

consider this dismal or desirable depends on your point of view. For his own part, the Spectator has never been able to see much sense in issuing annual publications of the character of the *Filter Paper*. From a journalistic standpoint, a little muckraking is beneficial to both circulation and public conscience; but when the

muckraking becomes an annual event, and the mud becomes mixed with a type of humor that portrays nothing so much as the suppressed desires of its authors, peddled at so much per copy—then it is time to call a halt. Engineers who try to be funny usually end up by being both dismal and dirty.

POLITICS!

WITH the deletion from the list of nominees of the names of Albiny Machinsal and Harold E. Sprague, both of the Class of 1933 and candidates for president and vice-president, respectively, a new significance is brought to the election system employed by the undergraduate body of the Institute. Here, probably more than in any other college or university in the country, every effort is made to conduct the selection of class officers by the fairest and most honest procedure. A man should be chosen upon his merits and capabilities alone, and to make certain that there be no other basis for that choice, it was long ago seen fit to incorporate into the constitution of the Undergraduate Association the following section: "All forms of electioneering at the polls and any attempts to form voting blocks, etc., shall be prohibited."

Machinsal and Sprague have violated a trust which has been placed in those running for offices, and were their action to be ignored, it would spell the defeat of the fundamental purposes of our student government. Their circulars were nothing more than a cry for votes, and doubtless many of the members of this class would have fallen for the ruse. They are probably sincere in stating their platform, as absurdly imaginative as it is, but it is not the platform that is objectionable, it is the fact that these men have dared to ignore the constitution which guides the policies of all student action at Technology. They have taken the bull by the horns, and, fortunately, it has thrown them.

The Executive Committee of the Institute Committee deserves every plaudit for its timely action upon this matter. It is absolutely necessary that any attempt to introduce cheap politics—it deserves no better name—into the class elections at the Institute be nipped in the bud. The members of next year's Junior Class owe their thanks to the Executive Committee for punishing an offence which might have marred the class's reputation. "Bossy" Gillis might find two lesser counterparts in these underclass politicians, but it is well that their careers have been terminated before they have done any serious damage.

VOTE!

TODAY has been set aside from all the rest during the second term for the purpose of conducting the undergraduate elections. Yet how many members of the student body actually appreciate the opportunity that is thus offered? Past records show that the percentage of voting students is very unsatisfactory, and that these delinquent men complain that they did not know any of the candidates.

The blame, however, rests entirely upon the non-voters. If a man does not know the candidates, it is ample indication that he has no interest whatsoever in undergraduate affairs. Certainly adequate time has elapsed since the publication of the list of nominees in this paper to allow every student to gain some appreciation of each candidate's capabilities.

Then there is the matter of selection. Which of the men nominated justly deserve the honor, and at the same time, are fully capable of filling the positions? We would urge that every member of the student body consider each man carefully. Do not name preferences until the list has been thoroughly studied, and the proper men distinguished from the rest.

The voting system at the Institute represents an experiment in undergraduate democracy. We have the privilege of selecting our own leaders and of placing in their hands numerous responsibilities and duties. Let us show that we value this opportunity, let us turn out at the polls one hundred percent strong today, and elect those men most deserving and most capable of holding office.

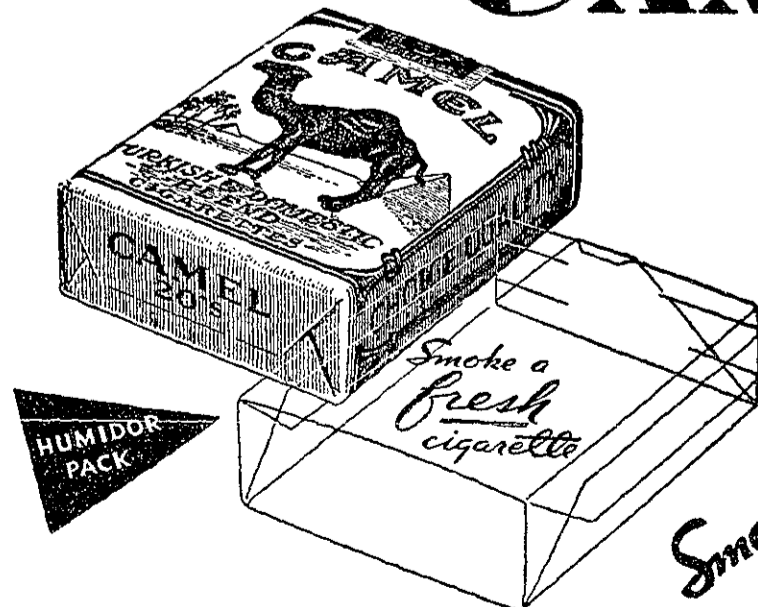

Do a little Checking up yourself

DON'T TAKE our word for it, switch to Camels for just one day then quit them if you can. The moment you open the package you'll note the difference between fresh humidor packed Camels and dry-as-dust cigarettes. Camels are supple and firm to the touch. Stale, dried-out cigarettes crumble and crackle when pressed. But

the real convincer is to smoke Camels. Every puff is a sheer delight of cool, mellow mildness; the Camel blend of choicest Turkish and mellowest Domestic tobaccos, kept in prime condition by moisture-proof Cellophane sealed air-tight.

Smoke a fresh cigarette

Factory-fresh CAMELS are air-sealed in the new Sanitary Package which keeps the dust and germs out and keeps the flavor in.

TECHNIQUE LAYS PLANS FOR RUSH

Combat Scheduled for Football Field Will Amuse Open House Guests

(Continued from Page One)
Eddie Morris, will appear majestically from in front of Walker Memorial followed by his three bag-pipers and the boards of the new and old Technique. After ceremoniously clambering up to the peak of the hut he will announce in his characteristic booming voice the retiring board of the Technique and the names of the new blood that will take their places. Following that touching scene he will announce the few rules of the Rush, already mentioned except for the fact that no man will receive more than one copy regardless of the number of paddles he captures and the greasing and oiling of the hut will begin.

Due precautions should be taken with the crankcase of the old buggy, for Technique is out to save money and the autos for miles around will be drained of the essential fluid for the adornment of hut. Visitors are advised to keep behind the rope fence that will be constructed for nicer things can be thought of than cleaning a spot of filthy oil from a white silk dress.

The first paddle will appear from some unknown source and the field will be open for blood and thunder. More thunder and less blood is hoped but the Technique staff is working hard to make this the most successful Rush that has yet been held.

No Techniques On Sale Saturday
Because of a delay in printing the only techniques that will be distributed on Saturday will be the twenty to the valiant fighters. Starting Monday in the Main Lobby the new issues will be distributed to those who have already ordered them. None will be sold, for there are no extra copies.

RADIO SOCIETY WILL BROADCAST RACE

(Continued from Page One)
crowds, a complete system of signs is planned for the various exhibitions. Furthermore, members of the committee and the staff will be on hand to act as guides and to give information as needed. They may be identified by their white boutonnières.

Further activities of the Military Science Department besides the guard mount and the guide details include a demonstration of the large anti-aircraft guns in the hangar and the giant army searchlight. In the evening it is expected that its beam will fan intermittently from behind the dome. As usual, the buildings will be brightly illuminated by the floodlights, and by some new lights now being experimented with.

LACROSSE TEAM WILL MEET B. C. APRIL 30

Playing their third regularly scheduled game of the season, the M. I. T. lacrosse team meets Boston University on the afternoon of April 30 on the Coop Field.

This game will be their first after two defeats by Brown University and the Boston Lacrosse Club. Brown won over the Institute by a score of 6-1, and the Lacrosse Club vanquished the Engineers 4-1. The freshman team met the Brown University yearlings and were defeated, 6-0.

Although the scores showed decisive victories on the parts of the winners, the games were marked by fast work all the way through. The first goal in the Brown-Technique fray was made by Puffer, of the Institute, in the first half. Then the Brown team rallied and piled up four

for member of the institute's faculty, to the presidency of the alumni association. W. Malcolm Corse, '99, Washington, D. C., was elected Vice-President of the association, and William H. Coburn, '11, W. H. Coburn and Company, Boston, and Harold S. Wilkins, '14, General Radio Company, Cambridge, were elected to the Executive Committee.

Those elected as representatives-at-large on the alumni association were: James R. Cudworth, '21, University of Alabama School of Mines; Martin H. Eisenhart, '07, Bausch and Lomb Optical Company, Rochester, N. Y.; William C. Farer, '08, Architect, Honolulu, T. H.; Lauren B. Hitchcock, '20, Cobb Chemical Laboratory, University of Virginia; and Ellis F. Lawrence, '01, Portland, Oregon.

goals in the remainder of the first half and two more in the second, making a total of six.

Zouck, Technology's "in home man," made the only goal for the Institute in the game with the Lacrosse Club. In the freshman contest with Brown, no scoring was done by the Institute's yearlings, who are, for the most part, inexperienced men.

FRANK DAME OUT OF TENNIS MATCH

Captain Out With Injured Nose—Four Singles, Two Doubles Matches

Encouraged by their win over the Boston University, the Technology tennis team will play Tufts this afternoon. The frosh team will play tomorrow afternoon. Both matches are to be played at Tufts, starting at 2.30 each afternoon.

Handicapped by the loss of Frank Dame, seeded number one, and captain of the squad, the Varsity will play only a four man team in today's meet. Captain Dame is in the hospital, with a nose operation.

Jones, Shifted To Number One Man
Bill Jones, second ranking player, will play at the number one position for the Varsity. Studley, likewise, will step up a place with Regan and Feustel playing three and four respectively.

Both doubles teams will also be somewhat mixed on account of Dame's incapacities. The first team will have Jones and Studley, instead of the Jones, Dame combination. Ross will play with Regan for the other doubles team.

Thursday afternoon the freshmen

will go over to play the Tufts freshmen. Although beaten 8-1 last Saturday by Exeter, they should give the Tufts team a lot of competition.

Dr. Allan W. Rowe '01 has consented to be honorary president of the recently reorganized Technology Fencer's Club. The Fencer's Club is for the benefit of getting alumni, who are interested in fencing, and present

members of the team more closely connected with each other.

Dr. Rowe is an excellent choice for this office as he has long been actively interested in athletics at the Institute, and is a former fencer himself. Coach John Roth is honorary vice-president, and the other officers consist of C. F. Pentler '32, J. I. Levin '23, and C. P. Woods '33.

At Virginia and Kentucky . . . down where tobacco grows

college men choose this one outstanding SMOKING TOBACCO

THE men who go to the universities of Virginia and Kentucky know tobacco . . . they see how it grows and what makes it good.

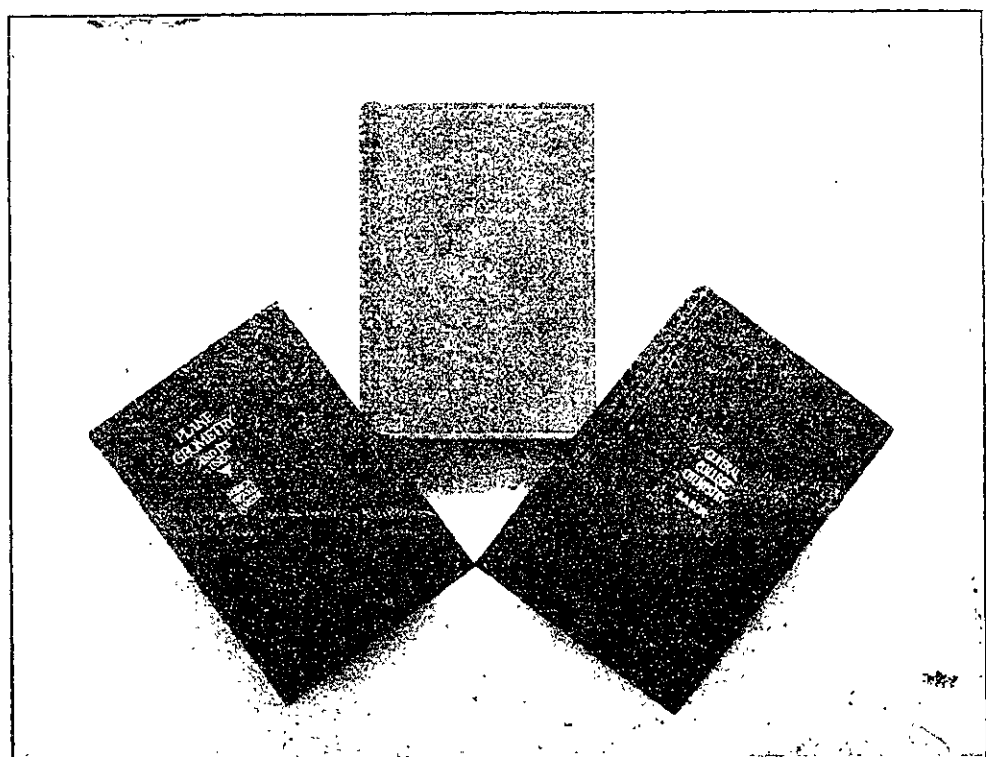

So when Virginia students, and the men who stroll down old South Limestone Street in Lexington, pack their pipes with Edgeworth, their choice tells volumes about the cool, slow-burning quality of this favorite smoking tobacco.

It's the same story everywhere—North, South, East and West. In 42 out of 54 leading colleges and universities, college men prefer the smooth, fragrant burley blend of Edgeworth. Try Edgeworth yourself. You'll find more pleasure in a pipe than you ever knew before. Every tobacco store has Edgeworth, 15¢ the tin. Or, for generous free sample, write to Larus & Bro. Co., 105 S. 22d St., Richmond, Va.

EDGEWORTH SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its natural savor enhanced by Edgeworth's distinctive eleventh process. Buy Edgeworth anywhere in two forms—"Ready-Rubbed" and "Plug Slice." All sizes, 15¢ pocket package to pound humidifier tin.

How Many Text-Books "Flunked Out" Last Semester?

LABORATORY treatment is a stiff test that every M. I. T. text-book must go through. Very few come out with honors. Many flunk hard and are dropped. And that's expensive for you.

Text-books bound in du Pont Fabrikoid win high grades in the hardest tests. Fabrikoid is a pyroxylin-coated material that is wear-defying, tough and durable. At the same time, as you have probably seen, Fabrikoid books are attractive and good-looking. What's more, they keep their good looks. For Fabrikoid may be washed and scrubbed clean as a whistle. Ordinary soap and water do the job.

Fabrikoid bound books are the answer to your problem of having better looking books that "stand the gaff." Fabrikoid-bound books have proved their long life time and time again. Ask for books bound in genuine du Pont Fabrikoid.

OFFICIAL BULLETINS OF GENERAL INTEREST

Special Lectures **Dr. Sanford A. Moss**
Thursday, April 30, and Friday, May 1,
4:00 P. M., Room 5-130

Dr. Sanford A. Moss of the Thomson Research Laboratory of the General Electric Company will give a series of lectures. The first lecture will be "Industrial Uses of Moderate Pressure Air", and the second lecture will be "Design and Characteristics of Centrifugal Compressors." Open to students and members of the instructing staff.

CALENDAR

Wednesday, April 29

3:00 P.M.—A. S. M. E. meeting, Room 5-330.
5:00 P.M.—Banjo Club rehearsal, North Hall, Walker Memorial.
7:30 P.M.—Tech Catholic Club smoker, North Hall, Walker Memorial.
8:00 P.M.—Armenian Club play rehearsal, West Lounge, Walker Memorial.

Thursday, April 30

6:00 P.M.—Tech Masonic Lodge dinner, Faculty Dining Room and North Hall, Walker Memorial.
8:00 P.M.—Tech Masonic Lodge dance, Main Hall.

Friday, May 1

8:00 P.M.—Combined Musical Clubs Spring Concert and Dance, Main Hall, Walker Memorial.

MUSICAL CLUBS TO PERFORM ON FRIDAY

(Continued from Page One)
performing twice. The Banjo, Glee and Instrumental Clubs have each prepared a musical feast of numbers not played before at any of their concerts. Acoustics experiments have shown that a stage at the side of the hall gives better tone quality and such an arrangement has been provided.

Faculty Due En Masse

Due to the acceptance of over seventy wives of members of the faculty and corporation to the honor of patronesses, it is expected that a large number will be present at the concert.

Flurries of ticket sales Monday indicate that a capacity number will attend. The selections best received by the audience will probably be selected for a radio broadcast which will be given by the Clubs in the near future.

Mrs. Horace F. Ford, Mrs. W. T. Hall, and Mrs. J. R. Jack have accepted the invitations to act as matrons on the occasion.

All the lounges, including the Burton Room, will be open to the revelers until three o'clock when dancing will cease. Colored silhouette lamps will be installed in the lounges for the occasion.

Tickets will be on sale all this week in the Main Lobby, and may also be obtained at the Musical Clubs office or the T. C. A. office. Winning posters in the contest sponsored by the Architectural Department will be displayed in one of the lounges before the concert. Other posters which have been considered unusually well executed have been posted on various bulletin boards throughout the buildings.

The program for the evening is as follows:

- Spring Concert Program**
Instrumental Club—H. A. Travers
March—Battleship California
H. J. Crosby
The King's Hussars

3. I Love Thee (Prince and Aana)

TWO CONTESTANTS TAKEN OFF BALLOTS

(Continued from Page One)
Harold E. Sprague was disqualified because postcards bearing his picture together with a short statement soliciting support in the election today were received by members of his class.

Committee Acts Quickly

As soon as it became known that active electioneering methods were being used by certain of the candidates, Harold E. Champlain, president of the Senior Class and chairman of the Executive Committee, called a special meeting of that group. Convening at a relatively late hour, it was after 7 o'clock when the statement given above was released.

The meeting yesterday afternoon, instead of being held in the office of the Institute Committee in the basement of Walker Memorial, was held in the room of Chairman Champlain in Munroe Dormitory.

ELECT REVIEW HEAD TO PI DELTA EPSILON

J. Rhyne Killian, Jr., '26, a former editor of THE TECH and present editor of the Technology Review, was elected vice-president of Pi Delta Epsilon, the national journalistic fraternity, at their annual convention held at Cincinnati, Ohio, recently. Joseph C. Patty '22, one of the founders of the Tech Engineering News, is president of the association.

Mr. Killian is also treasurer of the Alumni Association, a member of the Alumni Advisory Council on Undergraduate Publications, and permanent secretary of his class.

4. Destruction of Atlantis
Tectonians—Popular Selections
Xylophone Specialty
Merton S. Neill
Banjo Club

Open 7:30 A. M.—3:00 P. M.
Opposite Aeronautical Building

RADIO SOCIETY TO HEAR PROF. BOWLES

Will Talk on Vacuum Tubes And Related Subjects

Professor Edward L. Bowles '23, in charge of the Communications Department will speak to the Radio Society tomorrow afternoon at 5 o'clock in Room 10-275 on the subject, "The Historical Development of the Vacuum Tube, Rectifier, Amplifier, Oscillator, Modulator, and Demodulator." Something new will be tried at this meeting. The president of the society will be at a distant point and will introduce the speaker to those in 10-250 by radio. It will be received through a small receiver in the room.

COL. EDDY TO QUIT MILITARY SCIENCE

(Continued from Page One)
tillery units for overseas service.

During the mobilization after the war, Colonel Eddy served as personal officer in the office of the chief of the Motor Transport Corps and later as Commandant of the Motor Transport Training School and Depot at Atlanta, Georgia. It was at this time that he first conceived the idea of teaching Economics and Business Administration.

At the end of the war he was placed on the Eligibility list from which all the officers of the General Staffs are selected. In 1923 he was at Camp Devens as instructor in the Corps School, and later was executive of the coast artillery reserves at New London.

During the four years that Colonel Eddy has been at the Institute he has accomplished several reforms and improvements in the R. O. T. C. Among other things he is largely responsible for the development of the freshman band and the changing of the uniforms from high collars to the present cut.

CHEMICAL SOCIETY TO VISIT FACTORY

Nominations for New Officers Must Be In By Friday

Leaving the Main Lobby at two o'clock today, the Technology Chemical Society will visit the factory of the New England Confectionery Co. The trip is limited to twenty-five members of the organization and the first arrivals will be chosen. The factory is located on Massachusetts avenue, a short distance from the Institute.

Nominations for next year's officers must be in by Friday. They must be in the usual form used in class elections and require six endorser for each man. The officers to be elected are: President, Vice-President, Secretary and Treasurer.

WOMAN ENGINEER TO ADDRESS A. S. M. E.

"Home Air Conditioning" is the subject of a talk to be given by Miss Margaret Ingels of the Carrier-Lyle Corporation in Room 5-330 at 3 o'clock this afternoon. The talk is being given under the auspices of the Student Branch of the American Society of Mechanical Engineers, and is the last meeting of this kind to be held this year.

Miss Ingels is one of the nine women members of the American Society of Mechanical Engineers. The Carrier-Lyle Corporation, which she represents, has recently marketed devices for the scientific ventilation of homes. Air conditioning involves the cleaning of incoming air and maintaining proper conditions of temperature and humidity. All students are invited to the meeting.

STEPPING INTO A MODERN WORLD

Catacombs of communication

Beneath the streets of most cities Bell System men build catacombs of communication. Through these subways run the cables that may serve millions of telephone users.

From each central office, cable ducts spider-web throughout the area served. Other ducts, containing trunk lines, connect one central directly to another. Still others contain long distance circuits

which join the telephones in one city with those in another.

This great underground system exists today only because years ago telephone engineers worked it out. As the telephone habit grew they foresaw the need of clearing streets of overhead wires and protecting circuits for greater efficiency and ease of maintenance. And today this practice of forward planning goes right on.
