MR. R. E. FLANDERS SPEAKS TO LIBERAL CLUB ON THURSDAY

The Limitations and Possibility of Economic Control in Speaker's Text

ALL STUDENTS WELCOME

Mr. Ralph E. Flanders, vice-president of the General Motors Corporation, will address the Liberal Club tomorrow afternoon at the first meeting of the year on "The Limitations and Possibility of Economic Control". The meeting will be held at Room 1-19. Mr. Flanders' subject promise to be of particular interest at this time because of the policies being pursued by today's in an effort to achieve one degree of Economic Control. True, the control of our present policy of that the control of our present policy will be conducted along partly non-economical avenues. It is the aim, however, to offer a broader, a more comprehensive and a more authoritative basis for the great contemporary economic problems, it occupies a very important place among the extraneous organizations at Technology. In an effort to offer not merely its own (an almost entirely to extensive technical studies or to studies on problems) but for even a superficial acquaintance of the student's knowledge of the great contemporary economic problems.

This year, under the able leadership of Mr. Flanders, Mr. H. M. Flanders, Jr. in addition to Mr. Flanders, many other prominent men from the industry, including, Professor Dana and Mr. C. E. Christensen, will be present at the meetings with the Liberal Club of Technology.

N. LIBAV MUSEUM GETS HISTORIC SHIP MODEL

Duplicate Built from Parts of First "Old Ironsides"

Additional notes to the Naval Academy Museum men have been made.

The "Old Ironsides" was the first of the line of frigates, "Old Ironsides", which was very interesting model model as it was the first of the class. It was built and is owned by the Connecticut Museum for the Library.

To build the miniature model was a very interesting task to have all the parts of the ship together. The parts were taken from the atlas book of the ship, which is built and owned by the Connecticut Museum for the Library.

One Thousand Feet of Rigging

There are also one thousand feet of rigging, five hundred feet of the bowsprit, fifty feet of the bowsprit, fifty feet of the bowsprit, and forty feet of the bowsprit, which are not on the list of the bow's, but the ship is the bow of the ship, which is the bow of the ship. The bow is not the bow of the ship, but the bow of the ship is the bow of the ship. The bow is the bow of the ship, and the bow is the bow of the ship, but the bow is the bow of the ship.

Technique Is After

"Wandering Greeks"

Tug-of-War Team to be in the Male Lobby, at the Institute on October 27, from 10-2 P.M.

Attendence

A. H. MOGENSON LEADS COURSE XV SEMINAR

Assistant Editor of Magazine to speak at 10:15

Attention

Freshmen and Sophomores

Your attention is called to the proposition of the President of the Institute Committee to start the Freshman course (XV) tomorrow with some notes of the format grounds of the class, especially as it is a very nice, interesting, and a very interesting part of the work that has been working on the new class. The president of the Institute Committee is a very important man and a very important man, and the class is a very fine class. If you are interested, call at the office of the Freshman students or the office of the Sophomore students.

SOPHOMORE RELAY SQUAD FAVORRED TO WIN ON FIELD DAY

One of the Fastest Teams Ever Assembled Represents Second Year Men

YEARLENGS SHOW SPEED

Both relay teams for the Field Day this year are made up of members of the Class of '33, but while one will be expected to be weaker than usual, the other will be expected to be stronger than the previous seniors.

According to the coach, both teams will be in excellent condition, and the Sophomore team will have a better chance to win the title. The Sophomore team is made up of about ten men. Among the team are two of the best runners of last year's team, one of the fastest, and three of the best. The team has been working hard throughout the year and is expected to win the title.

Freshmen Will Meet Today In 10-250 While Sophomore Team Plans To Meet Thursday

With Field Day rapidly approaching, preparations for the meet are being made in both the Freshman and Sophomore teams. Both teams will hold practice this week in Room 10-250. The new men on the teams are particularly fortunate in their instructors, the Class of '33, which is the best and the most successful Brooklyn Institute track team. Some of the highlights in his career were winning the New York跑到 championship and the Eastern title in 1933. The Sophomore team will probably be the stronger of the two, but the news men hold a slight edge to date, with the Sophomore team winning the title last year.

PROSPERITIES ARE GOOD FOR FENCING SQUAD

Technology's varsity fencing team is in great form, shaping up for the coming season, and is expected to produce a strong team this year. The team, coached by Ralph H. Flanders, is expected to score well in the meet. The fencing team, which consists of six men, is one of the strongest in the country and is expected to win the championship.

Senior Sign-Ups For Year Book Photos Asked

Senior men planning to be in the 1934 year book are asked to sign up as soon as possible. The year book committee will be glad to arrange times for the group to have their pictures made in order that Technique may present the group in the best possible light.

All students planning to take part in the Sophomore and Junior classes are requested to sign up for the next meeting. The sign-up will be held on Tuesday, October 27, in the Male Lobby, at the Institute. Students are requested to bring their personal cards and to sign up as soon as possible.
The Wilber

"Allentown's answer to Paris, Joan Glaspell, winner of last year's Pulitzer prize, started a two-week season in Boston Monday night. It offers some of the best characterization acting that it has ever been the pleasure of this reviewer to witness; the members of the Civic Repertory Company, of which Miss Glaspell is the director, have their business.

The play is a whole, however, is somewhat drawn. It deals with the breaking of the heart of a lady part played eighteen years previously; she had, it seems, a supposed love affair, and her husband (Oliver Kruger) and brother (Walter J. Burke) see on the lookout that the town doesn't bear about. There are the scenes of the mother, one of whom is subseq

SEEDED PLAYERS ADVANCE IN PLAY
First Four of Ranking Players Win Without Too Much Difficulty

The first four of the ranking players received a first round bye, and many of these first round byes resulted in seeds advancing to the quarter-finals. Seeded men have the right to a bye, and usually there is a bye to the quarter-finals except in round one.

The officials were present in the quarter-finals and it has been announced that the officials are those of the U. S. Open. The matches were played on the same courts that were used in the semi-finals and finals of the U. S. Open. The matches were played on the same courts that were used in the semi-finals and finals of the U. S. Open.

Hockey Meeting
PLANNED MONDAY
Mass Meeting Starts Ice Season
Coach Stewart Will Speak

One of Technology's major winter sports, hockey, starts its season on Monday with a mass meeting. Monday morning's meeting will be held in the multipurpose auditorium, and will be attended by all members of the hockey team. The meeting will be given by coach Stewart, who will discuss the rules and regulations of the game and the team's prospects for the season.

Freshmen Are Favored to Win Relay Race

One of the events of the annual freshman-senior meet is the relay race, which is scheduled for Monday afternoon. The senior team is favored to win, but the freshmen have shown promising signs of winning in practice meets.

The Tech's freshman soccer team lost to Deacon Academy 1-0 last week, and the team is not expected to fare any better in the game against the seniors.

The Tech's soccer team is one of the few teams in the country that are practicing each night, and the officials are present in the quarter-finals. The matches were played on the same courts that were used in the semi-finals and finals of the U. S. Open. The matches were played on the same courts that were used in the semi-finals and finals of the U. S. Open.

Seating for Field Day Crews in Doubt

Start Race from Boat House Finish at Technology

Fredman and Sophomore crews, though they are predicting that this late date is not certain, are putting in much serious practice every morning before the majority of students have crawled out from under the covers. Since there are no more issues of this paper until Field Day, it will be impossible to publish the crew line-ups before the race.

As the crew race is one of the most important events, all men are urged to be present to cheer the crews on to victory. The start is set for 7:45 o'clock, at a point just below the boathouse. Taking a general course downstream the crews will row approximately in front of Technology.

Courses in aerodynamics are now being offered by more than sixty colleges and universities throughout the country.

At the University of Oregon it was advertised that less than two-thirds of the 1931 graduating class was made up of students who had missed the university for any years before.

“Cheerio” O.M.D.

O. M. D. is this O. M. D. someone people are talking about. When you follow plans a week or so in New York you can forget all about the old boy as he now lives there. Rates are from $2 for one, $2.50 for two. Quality accommodations, you are free to own in rooms you have never seen in New York.

Your Host will be EMIL E. REINERS

General Manager of
