Various Types of Heat Flow Studied In Chemical Engineering Laboratory

Pipe Flow Theoretical and Experimental Used in Applied Chemistry Research Laboratory

A common pipes is cast by ferritl

In the new Applied Chemistry and Chemist Engi

ment of Art. Other sections of pipes are employed,

an obvious reason. On the other side of the room a distinct blue light shone through a window. Beyond the blue light there was an apparent expanse of sea, but it was to

If a cylindrical, steambent pipe is brought around a corner at a relatively high velocity past it, how do the various sides of the pipe vary in rate of heat loss? The most obvious answer is that the problem is not yet complete, as it can be determined by means of such a pipe placed in the wind tunnel.

NEW T. C. A. MEMBERS TO MEET TOMORROW

Predominantly male members of this University's Technology Club were scheduled to meet Monday night at 8:00 o'clock in the Technology Club rooms. The purpose of the meeting is to accord with the other members of the T. C. A. and to organize a fraternity of the T. C. A. and to organize a fraternity for the first time in the T. C. A. office as of 8:00 o'clock.

Any member of the business class who is interested in activities of the T. C. A. is invited to attend the meeting. The members of the T. C. A. will supervise the work of the new men.

The American

* College Editor

The Education of an Engineer—Who Should Pay for It?

To decide who should pay for the education of a graduate engineer, one must have a knowledge of the social and economic factors involved. Knowing how these benefits are divided among the students, one is then interested in the activities of the T. C. A. The T. C. A. is interested in the activities of the T. C. A. as well.

The engineer himself is benefited, first and foremost, by the benefits of his education. One of the main gains in earning power, a broader view of his professional activities, increased appreciation of his engineering abilities, and ability to live profitably and enjoyably. The educational improvement of the engineering profession is of great interest to the student of the engineering profession. There are many ways to improve the educational improvement of the engineering profession. How much can be done to improve the educational improvement of the engineering profession?

Let's all go to Turkey

Eastward ho! Four thousand miles nearer the rising sun—let's go! To the land of mosques and minarets—so different from our skyscrapers, stacks and steeples. Let's see this strange, strange country. Let's see the land where the tobacco grows—where the tobacco grows. Let's see the land where the tobacco grows. Let's see the land where the tobacco grows. Let's see the land where the tobacco grows.

XANTHII . . . CAVALLA . . . SMYRNA . . . SAMSON . . . famous tobaccos!

*Turkish tobacco is to cigarettes what teak is to furniture. It is not the "spice," the "base," or what rich, astringent blend is too! To the extent that is far above that of the usual cigarette. It is the purest made. The many requisites of a cigarette! This is just one more reason for Chesterfield.
