CORP XV WILL GO TO PHILADELPHIA ON MID-YEAR TRIP

Will inspect Campbell Soup Plant in Camden and the Du Pont Tour Ends in New York

In an attempt to get away from the usual round of New England football games, the members of Corp XV have arranged to go on a mid-year trip to Philadelphia. They will leave for Philadelphia by train on Friday, November 28, and will return by train on November 30. Leaving Cambridge on Sunday, January 18, they will spend two days in Philadelphia and will return to Cambridge on Tuesday, January 21.

OPEN FORUM

To the Editor of THE TECH:

A great deal of argument has been made on the 201 campaign circulated during the past week.

Due to the short time before the exam, the Renaissance Club felt it was necessary to circulate this petition over a long period of time. During this period the petition was signed by 90% of all students who responded to the petition.

In explanation of our policy, it may be said that it is our belief that the first two years of undergraduate R.O.T.C. is very inefficient and ineffective. In supporting International law and International History of the United States, the Club wished to secure courses which would present an international outlook.

To clear up a prevailing opinion, the Renaissance Club wishes to state that we have no connections with any other groups or organizations. It is a spontaneous uprising against expensive propaganda.

It is our desire and aim to do something useful and have plenty of music. This show has all of this, even though it did have some unpleasant shades of green and orange.

To try to lead this play in the manner of usual Better papers is a matter of priorities to Boston and in local productions. All parties will enjoy this show to its fullest extent.

D. H.

MARINA

Colin Tucker

The question is whether to comment on the "Africans," now playing at the Colonial Theater, as if it is an amateur production giving local performers the opportunity to dispel the bad name that a few have shown to those talents, or as if it is a production desired and planned entirely by those who are supposed to know how. As the latter type of show, one would have to say it is a failure, it lacks the sophistication, the combination, the good taste in color and lighting that makes a New York show. Unfortunately, we have not the facilities to take the productions to New York or to New England.

As an amateur theatrical it seems to succeed fairly well. There are two or three good singers, two beautiful actresses, and rather good direction for such a company. An opera should be useful and have plenty of music. This show has all of this, even though it did have some unpleasant shades of green and orange.

To try to lead this play in the manner of usual Better papers is a matter of priorities to Boston and in local productions. Only parties will enjoy this show to its fullest extent.

But the telephone conversation must not freeze

A sudden cold snap might seriously interfere with long-distance telephone service if it were not for the studies made by Bell System engineers.

They have found that temperature variations within 24 hours may make a ten-thousandfold difference in the amount of electrical energy transmitted along the telephone circuit! On such long circuits initial energy is normally maintained by repeaters or amplifiers, situated at regular intervals. So the engineers devised a regulator-operated by air pressure, which automatically controls these repeaters, keeping current always at exactly the right strength for proper voice transmission.

It is one of the typical of the interesting problems that go to make up telephone work.

BELL SYSTEM

A NATION-WIDE SYSTEM OF INTER-CONNECTING TELEPHONES
AIRSHIPS WILL BE POPULAR SCIENCE LECTURE SUBJECT

Dr. Smith Will Discuss History Advances in Design and Describe "Alzorn"

SHOW MOTION PICTURES

"Alzorn"—America Speaks About World War I—will be the subject of the twenty-first annual meeting of the Public Science Society of Popular Science and Popular Mechanics. Dr. Richard H. Smith, professor of aeronautics at Massachusetts Institute of Technology, will deliver his talk at 8 o'clock, December 10th, at 4 o'clock.

The talk will discuss the history of airship development, significant advances in design, contracts with the air-line, and its achievements in transportation. By also utilizing the world's largest airship, the means for future improvement. As a business man, where will be an opportunity to see the future of this growing industry.

Dr. Smith is widely recognized as an expert in the field of aeronautics. He is a graduate of the College of Aeronautics, and a student in the flight training school of the Massachusetts Institute of Technology. He has been in the field of aeronautics for the past ten years, during which time he has developed the Alzorn, a large airship that has been in use for several years.

Crippled Beavers to Face Williams

Three Men Unable to Make Trip

To Face Williams

In the last game before the second examination the varsity hockey team played with Williams to play Williams at the same time. Not much was expected from the game, but the Williams players did not do as well as expected. The game ended in a tie, 4-4.

In the first period, the Williams players went on the attack and scored three goals in the first two minutes. The second period was more even, with both teams scoring two goals each. The third period was also even, with both teams scoring one goal each. The game ended in a tie, 4-4.

Professor Feils Trick

Of Freshman Section

In a letter to important members of the Freshman section, Professor Feils states that he has been trying to teach the class in a new way. The class will be divided into two groups, and each group will have a specific task to work on. The class will then be divided into smaller groups to work on specific problems. The professor is hoping that this will help the students to learn more effectively.

Boxing Team Leaves Tonight on Trip to Meet Army Varsity

Beating Years of Experience

Taking its first trip of the season, the varsity boxing team is scheduled to meet Army today at New York, at 2:30. The team will leave for New York at 7:00 tonight.

At West Point, the weights will be equalized, and the team will be able to compete against the best boxers in the nation. The varsity team has been trained for several weeks and is in good shape.

The game will be played on an ice rink, and the team will be able to use the same ice that the varsity team used in the past. The varsity team will be able to use the same equipment that they used in the past.

RICHARDS MEDAL IN CHEMISTRY GOES TO A. A. NOYES '86

First Recipient of Award Was A. A. NOYES, 1886

PROFESSOR OF MANY BOOKS

Professor Arthur A. Noyes, '86, new director of the Gates Chemical Laboratory, Harvard University, is the first recipient of the Richards Medal, awarded by the American Chemical Society for outstanding achievement in chemistry. The medal is given every five years to the most distinguished scientist in the United States.

The award was presented to Professor Noyes by Dr. T. W. Richards, who was the first recipient of the medal in 1895.

Money for the dancing will be furnished by the Techmen. To attract so many as possible, tickets are selling for only 25 cents per couple, the same for stall or stags. They may be obtained at the door on the night of the dance. A box lunch and shoes for $1.00 will be made available for all who may need it. If the key has not been turned in by the next term, the lock is locked and the keys are returned.

Although the swimming team has done well in the competition so far, there is still room for improvement. The team is looking forward to the next meet and hopes to continue its winning streak.

For Beavers; Henning and Flanders Also Star

Monday, January 17

5.00 p.m. - Roogo Club rehearsal in East Lounge of Walker Memorial.
