

LACK OF SPIRIT IS PREVALENT AT SOPHOMORE MEET

Less Than One Hundred Fifty
Hear Various Field
Day Coaches

MORE SUPPORT URGED

Easily outdoing the freshmen in showing lack of class spirit, less than one hundred and fifty Sophomores troubled themselves to attend the Field Day Mass Meeting last Wednesday in Room 10-250.

Track Coach Oscar F. Hedlund, first to be called upon by Edward J. Collins, president of the Sophomore class, denounced the lack of attendance and the deplorable lack of class spirit, declaring that it was the worst in his recollection. Reminding those present of last year's whitewashing, he said that the Class of '35 would not only fail to win this year, but would again be calmed. In comparison with the freshmen, who have at least enough men to make a full team in each event, the Sophomores, who cannot yet produce a full team in any event, may as well forfeit Field Day without a struggle.

Bemis Exhorts Class

Hal L. Bemis, Sophomore Institute Committeeman, followed with a dramatic exhortation, urging those present to support their class president. "Even if you do not like your class president, you've elected him to stay until next term", he declared. "If you want a change, you can make it at next election," he said, "but in the meantime, he's your president and it's up to you to support him. He's a good man who can produce results, but he needs the help of you men". In concluding, Bemis asked those present to attend another mass meeting to be arranged at a later date, bringing with them another classmate who did not attend the first meeting.

More Football Men Needed

Collins next called on Harner Selvidge, '32, coach of the Sophomore football team, to say a few words. His first words were to warn of a potentially strong freshman football squad. He stated that last year's freshman team, if returned in full strength, looked strong enough to win, but, he added, without replacements it would be beaten by a weaker frosh team, which could wear the Sophs out by inserting a multitude of fresh substitutes. Thus, he indicated, that there is an urgent need of more football candidates.

(Continued on page three)

Frosh Shake Hands With Sophs; Meeting, a Fizzle

The proposed compulsory Sophomore meeting, under the direction of the freshmen in the dormitories, came to a tragic conclusion last evening, when thirty second-year men who had gathered to see what would happen, were met by some five freshmen and engaged in a light hand to hand encounter in front of Runkle. Following this skirmish they shook hands all around and walked arm in arm toward the other buildings. Here the Sophs attempted to abduct one of the frosh, but after some pleading from his classmates and discussion among themselves they decided not to, and everyone shook hands again and went on his way.

Members of Dorclan who had met the previous night to discuss plans for prevention of undue violence at the scheduled "meeting" were thoroughly disappointed. Throughout the evening they were posted about the campus, donned in old clothes, ready to stop any action which might cause serious consequences, all to no avail.

Course Registration Figures Compiled By Registrar Mackinnon

Course VI Shown to be Leader With Course XV Close Second

According to a report issued late yesterday afternoon by Registrar MacKinnon, Course VI has the largest enrollment with 439 students. Closely following are XV with 366, X with 311 and II with 310.

Among the one hundreds XVI leads with I, IV, V, VIII, and XIII following in that order. Courses having less than 100 enrolled are: III, VII, XIII, XVII, XIV, IX, XVIII, XII, and XI. Comparing these figures with those of last year we find that II has almost equalled X in number of students enrolled. The number of courses having more than 200 has dropped from 6 to 4. The total of students enrolled in the Institute is 2808, a drop of 354 from last year. This is considered to be a reflection of the general business depression and is having its effect upon colleges throughout the country.

The Junior class is the largest this year having 606. There are 580 Seniors, 564 Freshmen, 523 Sophomores and 504 graduate students.

Enrollment Figures Show 360 Decrease Below 1931

COURSE	1931	1932	Change
I Civil Engineering	233	169	-64
II Mechanical Engineering	339	310	-29
III Mining Engineering and Metallurgy	113	95	-18

Prominent Speakers As Well As Lively Entertainers Are Promised At All Tech Smoker

Radio Society Will Elect New Officers At Meeting Tonight

Society, Celebrating Twentieth Anniversary This Year Runs Station WIMX

The first meeting of the M. I. T. Radio Society will be held this afternoon at 5 o'clock in room 10-275. Officers will be elected and the work for the coming year will be outlined. Freshmen who are interested in this project will be given an opportunity to join at this time.

This fall the Society celebrates its twentieth anniversary as an organized activity of the Institute. According to Norman B. Krim, '34, it has one of the most complete amateur stations in New England, and when the present construction program is completed, it will rank among the leading university stations of the world.

The equipment, which is housed in a shack between the Hangar Gymnasium and the track house, consists of three high-powered crystal transmitters in the popular amateur bands, and two receivers. It is one of the few undergraduate organizations which owns its equipment. It also owns the building in which it is housed.

The Society has a high standing in the Amateur Radio Relay League, an organization for the promotion of wireless communication. In 1922, WIMX, the society's station, held the long distance transmission record of the league, having been heard in Hawaii. The New England division of the league held its annual meeting in 1923 at Walker Memorial as a guest of WIMX. At that time Hiram Percy Maxim, '86, said, "WIMX is at the present time the leading uni-

(Continued on page three)

Freshman Meeting of Chemical Society To Be Held On Tuesday

Professor Gettens of Harvard To Speak On Chemical Restoration

The M. I. T. Chemical Society will hold its first meeting next Tuesday at 7:45 in the Faculty Dining Room of Walker Memorial. The speaker, Professor R. J. Gettens of Harvard, will talk on technical applications to the fine arts. His topic will include the subject of restoration of works of art with the aid of chemistry. Professor Gettens is a pioneer in this field.

This meeting is open to all freshmen who wish to attend. The regular meetings of the Society are held on the third Tuesday in every month. At these meetings prominent men speak on subjects of chemical interest. Also, candidates for the Stratton Prizes are given an opportunity to read their papers, and the best ones that are read at the meetings are entered in the contest by the Society. Refreshments are served at the meetings.

All men who are interested in joining should see the president, Forest P. Dexter, Jr., '33, in room 4-047 any time during the day. At night, William L. Abramowitz, '35, Hayden 110, and William J. Moran, '33, Hayden 307, will be glad to see candidates.

Coop Dividends to be Ready Next Thursday

Wealth will come to 10,700 students next Thursday when the Harvard Cooperative Society pays its annual dividends. The total is less this year than in previous years, but on the above day checks for \$79,200 will be placed in the mail. Of the 10,700 students, 2800 are from Technology, this number being only 27 fewer than the year before. Harvard members last year numbered 140 less than the previous year. According to the average a member last year paid \$74 on books, clothes, and other materials, and receives next week a check for \$7.40.

Preliminary Tryouts For Dramashop Held Yesterday Afternoon

Those Unable to Attend Meeting Still Have Chance for Cast Positions

The preliminary tryouts for Dramashop's first play "The Pigeon", were held yesterday afternoon at five o'clock in room 2-178. The general manager of the show, Robert A. A. Hentschel, outlined the work of the organization. Professor Fuller, the coach, then briefly described the play which is by John Galsworthy and will be produced early in December. He then explained the manner in which tryouts are held, and announced that final tryouts will be held next Friday at the same time, and in the same room.

All those who were unable to attend the meeting yesterday afternoon will be given an opportunity to earn parts in the play if they report to Professor Fuller before next Friday in room 2-176. A schedule of Professor Fuller's free time is written on the blackboard in room 2-178, and he will see candidates at any of those hours. There are also positions to be had on the stage staff and in the business office.

TECHTONIANS WILL PLAY AS NEW MEN ENGAGE IN DINNER

Speakers of Evening Include Rowe, Rogers, Hamilton Greene, Billings

DANCERS ARE ON PROGRAM

A thoroughly enjoyable evening at the All Technology Smoker is promised tonight by the entertainment committee headed by Edward Wemple, '33. The Techtonians will play dance music while the freshmen are eating. After the dinner there will be speeches given by Professor Robert E. Rogers, Doctor Allan W. Rowe, '01, secretary of the Advisory Council on Athletics, A. W. K. Billings, Professor William C. Greene, and Professor Leicester F. Hamilton, '14, chairman of the Dormitory Board. At the conclusion of each speech, there will be a half-hour of music and singing provided by professional entertainers, two guitars and a banjo. A trio of dancers will also be on the program at about the middle of the evening. The Techtonians will provide music for this part of the entertainment.

Doors Open To All At 7:30

At 7:30 the doors of Walker Memorial will be thrown open, and all the undergraduates at Technology are invited to be guests at the Institute's first social function of the year. At the same time, those attending the dinner will have the opportunity to visit the various activity offices. Student leaders of these activities will explain anything the curious may wish to know. An attempt to interest the new men in these undertakings will be made.

Walter R. Duncan, '33, is the recipient of the Schwartz Medal this year, which is to be presented to him at this function. The medal is given each year to the man who is considered the best manager in the M.I.T. A.A.

Manager of Different Activities

Professor Ryan Stresses Activities For Well-Balanced Life At Institute

Says They Develop Abilities To Secure Leadership in Later Life

Emphasizing the need of a varied, well-balanced life at the Institute, Professor W. P. Ryan, head of the Chemical Engineering Department, in a speech at the Technique Smoker, Wednesday evening, urged the freshmen to go out for one of the extra-curricular publications. It has been shown in the past, he stated, that men who distinguish themselves in activities, as well as in their scholastic work, develop abilities to secure leadership in their positions after graduation. The man who secures highest honors in his studies and who has entirely neglected the other aspect of Institute life does not get as good a letter of recommendation as the man who stands high in both his studies and extra-curricular work, he added.

Present System Superior
Instead of bemoaning the passing of the "good old days", Professor Ryan showed that the present system of competitive work on the Technique is far superior to the democratic but unsatisfactory "political" system of former times. Each out-going board, not wanting to be outdone by next year's class, would not prepare for any future work. The result was great class spirit but lack of business organization and efficiency.

Under the present system it is possible for any man to devote a reasonable amount of time to the Technique and not in the least endanger his scholastic standing. Judicious budgeting of hours each day, Professor Ryan brought out, can give one time to develop the qualities of leadership, poise, ability to meet people and present ideas convincingly, abilities which cannot be underestimated.

James E. Norcross, '33, general

WILD EYES AND FIELD DAY

IF one goes outside the circle of college men and makes inquiry regarding college journalists, he will find the general impression to be that they are a group of wild-eyed young men whose chief delight is in criticizing and tearing down established traditions and institutions.

As a general thing we are not wild-eyed, nor do we take special delight in making criticisms, and certainly we make no intentionally malicious attempts to destroy tradition. There comes a time in the life of everything, machines, institutions, and even men, when they have served their period of usefulness. When this time comes, they should be removed and replaced, or not, as necessity requires.

Once again it becomes our duty, and rest assured it is not one of special pleasure, to call attention to the decline of a Technology tradition or institution that seems to be fast approaching that state of outworn usefulness. The matter is one of serious concern to us, for when a custom of more than thirty years standing reaches the point where it receives little support from those who should be interested, a change in the student body is indicated.

Years ago it became necessary to change the form of Field Day because of the overflowing enthusiasm of the participants. Now however, the opposite seems to be the case. Already there have been two lifeless class meetings, and last night the second year men had not a complete team in any event. Coach Oscar Hedlund, track mentor, has made two appeals for some show of class spirit, but so far he is as disappointed as we have been.

Aside from the men who are actually taking part in the events, there are few who seem to have an interest in Field Day. Of course, it is still some three weeks till Field Day and there is time enough for spirit to be raised. We sincerely hope the classes will be aroused from their lethargy, but unless something happens, we shall have to get out our wild-eyed look, and with a feigned joy in our hearts advocate the abandoning of Field Day.

2500 PART TIMERS

IT is difficult to understand the motive of the United States Department of Labor in excluding foreign students who find it necessary to work to pay their college expenses. It is estimated that about 2500 students are affected. Several of these are Technology men who will probably find it necessary to discontinue their studies and return to their homes, as no attempt is being made to contest the decree.

The action is particularly regrettable in view of the fact that the 2500 men who have come to America to study are very likely of much greater ability than the average American student. Foreign students, for the most part, study at American colleges because the quality of training and the degree of knowledge which they wish to acquire cannot be obtained at home. We in America do not realize the great reputation that Technology and other American institutions have among European and Asiatic students.

The legal excuse for the ruling probably lies in some obscure corner of the Immigration Act, and the present employment conditions undoubtedly furnish a further pretext. The sheer negligibility of the latter condition is apparent. The incident seems to be another manifestation of the stupid nationalism and the mechanical regard for petty legal technicalities that so often characterize the decisions of minor government officials in our bureaucratic system. It is also one more argument against the extension of that system into the field of education.

ELECTIONS AND PROMOTIONS

THE managing and associate boards of Volume LII of THE TECH take pleasure in announcing the election of William R. Churchill, '34, to the position of Advertising Manager and John M. Teasdale, '35, to the Advertising Department, and also the promotion of David Horvitz, '34, from the position of Associate News Editor to that of Make-Up Editor.

BASIN DEVELOPMENT NEARS COMPLETION

Landscaping to Begin Next Spring — No Highway to be Made as Some Expected

By the first of the year all the work on the filling of the area to become the new Esplanade along the Boston shore of the Charles River will probably be finished.

The strip, which extends from the dam to Granby Street, has been the subject of many discussions among the students of Technology, a number of which are erroneous. One of the most prevalent opinions is that a duplicate of Memorial Drive is to be constructed on the south shore of the Charles. As a matter of fact that was one of the features of the original plans of the metropolitan district commission, but later developments eliminated it from the project. As things stand, inside of about one and one half years the development will be opened to the public as a park with walks, shrubbery, ponds for boating in the summer and skating in the winter, boat landings, and a boat haven in front of the Union Boat Clubhouse.

Trimount Co. Does Dredging

The dredging, which has been contracted for by the Trimount Dredging Company, is being carried on 24 hours a day with three shifts. Varying from 100 to 150 feet in width, the strip will be filled entirely with clay from the bottom of the basin except for the section between the Longfellow bridge and the Union Boat Clubhouse, which will be filled with material from other sources. This section, owned and controlled by the city of Boston, is to be the site of one of the finest waterside playgrounds in the country. The rest of the new Esplanade will be controlled by the metropolitan district commission.

Total expenditures on the entire basin improvement project will aggregate \$1,400,000, while the filling in alone will entail an expenditure of \$300,000.

Open Forum

"Sheepskins"

To the Editor of THE TECH:

Your editorial in last Wednesday's issue entitled "The Size of a Diploma" was indeed startling. Are you trying to place our Alma Mater on the same level as another Massachusetts College or are you putting the importance of graduation on the same plane as the importance of a trip abroad?

You have probably heard the expression that "the best gifts come in small packages", but please don't get the idea that a diploma is a gift. As a matter of fact it is a reward for the four (or five) hardest years you will ever work. (How about it).

If other colleges can get away with it, there is no reason why we can. In order to spell out Massachusetts Institute of Technology in a type large enough for our aged would-be employees to read will require at least one linear foot per each word (not including the "of"). That will make a minimum width of three feet — yet you in the printing world never think of such things.

If you guys would only stop and think a while, I believe you would "give the calf more rope", or in other words give the diploma more size. The majority of us here are not calves so there is no danger of our hanging ourselves.

Very truly yours,
 ROBERT G. HENRY, JR.
 Managing Editor Voo Doo

POOR FROSH

"From now on the freshmen will be treated with less courteous attention," reads a story in the Amherst Student. Fraternity rushing season has closed, the paper went on to state, and the frosh would "be made aware of the remnants of the old hazing days".

Technique Award Will Be Presented Richard Bell, '34

Cup [Is Presented Every Year To Athlete Who Has Made Best Record

Richard S. Morse, '33, will present the Technique Cup to Richard Bell, '34, tonight, at the All-Technology Smoker. Each fall the cup is presented to the outstanding athlete of the preceding year. Technique '23 donated the cup to the M. I. T. A. A. with that instruction.

The award is made on a point system. Each point a competitor for the cup wins in the Intercollegiate counts five points toward the trophy. Each point in the New England counts three on the Technique scale. Points in dual meets, and in the annual Interclass meet count two and one respectively.

Bell Gets 33 Points

Last year Bell rolled up a total of 33 points, which was more than any other man received during the same period, so the award goes to him.

Instead of actually giving the cup to the winner, and allowing him to keep his trophy for only one year, a

To Dine on Beacon Hill
VENTURE INN
 Breakfast - Luncheon
 Dinner
 Sundays 4-8 P.M. 94 Revere St.

more satisfactory procedure has been devised. Each time the cup is awarded the recipient's name is engraved in its side. The cup is then moved to the trophy room on the second floor of the Walker Memorial Building; nevertheless the winner does not go cupless. He is presented with a replica, in miniature, which he may keep. Men holding these miniatures are:

- John W. Poole, '22
- Howard W. Dexter, '23
- Douglas P. Jeppe, '25
- George J. Leness, '26
- Henry G. Steinbrenner, '27
- Marshall H. Fay, '29
- Bror Grondal, '31
- C. Everett Coon, '33
- Richard Bell, '34

Pointing the way to the advertised brand

Many a "sale" made by advertising has gone to a competitor because the purchaser did not know where to buy the advertised brand. Telephone men evolved a plan to make it easy to find.

They created a "Where to Buy It" service in the classified telephone directory. There—beneath the advertised trade marks—Buick, Goodrich, RCA Victor, General Electric and many others now list authorized local dealers. Thus telephone men complete the chain between advertiser and consumer—help manufacturers and dealers to increase sales—help consumers to get what they want!

Because they apply vision to subscribers' problems, Bell System men continually increase the value of telephone service.

BELL SYSTEM

Instrument Club Rehearses Music For Concertina

Club Makes Plans for Small Symphony Orchestra For Next Year

Starting the year with a promising turnout of candidates, the Instrumental Club held its first rehearsal last night in the East Lounge, Walker Memorial. During the one-hour rehearsal, several overtures and a waltz were played in preparation for the first concert, which will take place in the near future. "Orpheus" and "The Blue Danube", a waltz, will probably be on the program for this first concert.

John D. Collins, '35, leader of the Club, said that the incoming class contained much promising material, and that a very interesting program had been arranged for the coming year. Last year the Instrumental Club won the Baton Cup offered by the Baton Club each year for the musical club showing the most improvement for the year, and if the interest shown at present continues, the club is likely to take the cup again.

Club Plans Symphony
The Instrumental Club has long been an active limb of the Combined Musical Clubs, and has been constantly introducing new ideas in music. If everything goes as well as planned next year, a Technology Little Symphony will be organized and rehearsals started. Such a move will require the utmost cooperation from the Faculty and Alumni, as a symphony orchestra is a complicated and expensive matter. All those having any experience in managing or working with an orchestra are urged to communicate with Mr. Collins, or any member of the club.

The rehearsal last night was shorter than the regular period, which is about two hours. The music to be played is chiefly classical, including many overtures and waltzes. When the club is well under way, special rehearsals will probably be called, besides the regular periods on Tuesday and Thursday, at six o'clock.

RADIO SOCIETY OBSERVES THEIR 20TH ANNIVERSARY

(Continued from page one)
iversity radio station in the world." Aside from maintaining station WIMX, the Radio Society sponsors weekly lectures featuring subjects of radio interest.

In Operation 72 Hours
In the spring of 1932 the station operated for 72 consecutive hours on two different occasions. At this time it scored second place in the New England district of the Amateur Radio Relay League in the international tests. First place in this contest was taken by the official station of the league. In 1932 contact was made with 134 stations during 24 hours of continuous operation. In such long periods an automatic code sender is used to facilitate the dispatch with which messages are sent.

The president of the Society is Frank J. Bleil, '33. F. Malcolm Gager of the Department of Communications has the position of Faculty advisor. This activity is believed to be the only one at the Institute which continues its work throughout the summer vacation. During the past summer, although no regular meetings were held, WIMX was operated at intervals over the entire period of vacation. Tests were made during the eclipse of the sun.
Training Given for Operator's License
Although the equipment of the Society is used only by members having federal licenses, a candidate for membership has an excellent opportunity to get such a license. He is allowed to use the equipment of the signal corps for practice in sending and receiving code. Most of the other information required for a license can be learned simply by association with present members of the Society.
The shack is usually open in the afternoon, and inspection by prospective candidates is invited by the Society, it was stated.

P. T. Substitutes Must Report to Walker Gym

Freshmen who have substituted track or any other sport for P. T. must report to Henry P. McCarthy in the Physical Training office on the third floor of Walker Memorial in order to clear up their records in P. T. If this is not done, those substituting will be marked absent and makeups will be in order.
More freshmen track managers are needed and anyone desiring such a position should report to the track house as soon as possible.

Student Society Asks Permission For Open House

Combined Professional Societies Agree to Sponsor Day if Faculty Approves

At the meeting of the Combined Professional Societies, October 5, it was unanimously decided to take charge of Open House Day, resuming the responsibility for another year, provided that the Faculty deems it financially advisable to hold the function this year. A decision is expected at the November meeting of the Faculty.

On Open House Day the Institute throws its doors open to the public. All departments are set in operation for the entire day so that visitors may receive a glimpse of the work of the Institute.

In addition to the routine work, Clarence R. Westaway, '33, was elected chairman of the Office Committee. This is a standing committee, duly authorized by the Constitution of the Combined Professional Societies.

A change was made in the date of the meetings of the organization from Wednesdays to Fridays.

John D. Rumsey, '33, president of the Combined Professional Societies, stated that a drive for members had been made on Registration Day by holding a table in the Main Lobby, the Societies having specially organized and acted as a group to increase the membership for the year.

POOR CLASS SPIRIT SHOWN BY SOPHS AT MEETING

(Continued from page one)
Commenting on equipment for the football team, he said that there were only about six uniforms left from last year to be divided proportionately between the two teams. While it was true that the freshmen of last year subscribed to a fund to provide equipment for their football team, which was expected to be available this year, the equipment was loaned from the trackhouse where it was stored, to various publications' teams which failed to return it. It was indicated that another fund might again be started for the purpose of equipping the men.

Must Practice for Tug-of-War

Robert L. Moody, '34, the coach of the Sophomore tug-of-war team, as the concluding speaker, stressed the need of practice for the tug-of-war. Because twenty-four men are needed for the team, he urged that a large group appear for practice and expected more than thirty-five men would be on hand to try a hand at

rope-pulling. Speaking of the freshman group he said that they were all huge men, with a likely 300-pounder as anchor man.

With a reminder to attend the second mass meeting, to be announced at a later date, the meeting closed as quietly as it began, with hardly a cheer or other loud utterance. Thus the Class of 1935's mass meeting lived true to the characterization of upperclassmen who were present, as being the dearest in the history of Field Day.

PROF. RYAN STRESSES VALUE OF PUBLICATIONS

(Continued from page one)
manager of the Technique, outlined the competitive system, and went on to say that work on the Technique records to be conducive to high scholastic standing. Freshmen are eligible to the freshman board in March. The organization consists of a board for each class, and men are moved up each year if their work merits it.

Large Variety of Work
A wide variety of work is provided

in the departments: literary, business, circulation, statistics, photographic, and designing. The department heads are as follows: literary, Paul Davis, '34; business, David Lee, '33; art, Sam Paul, '35; photographic, Duane Davis, '35; advertising, William Hartz, '34; and circulation, Charles Bechle, '34.

The announcement was made that the first meeting of the Sophomore and freshmen candidates will be in the Technique office next Thursday at five o'clock. Following this the gathering became more convivial with the serving of cider and doughnuts, while the department heads at various tables went into informal discussions.

The decision as to how much time to put into outside work depends entirely on one's scholastic ability, Norcross emphasized. High standing in studies is of paramount importance.

S. Whittimore, '36

Brooks Hospital
Thos. K. Fitzpatrick, '33
Abner Stodder, employee of the Institute
Dr. Williams, pathologist connected with the Infirmary

QUADRANGLE CLUB TO HAVE TWO ELECTIONS

An important change has been made in the manner of electing new members to the Quadrangle Club, freshman-Sophomore organization. At their meeting last night, it was voted to have two elections a year instead of the single one they have had in the past. The method of choosing from the freshman highlights, however, remains unchanged.

The first election will be held just before Christmas when about ten men will be chosen. The second will come during February and another ten will be selected.

It was also decided at the meeting to invite Technology professors to speak to the club on subjects related to Institute affairs.

Tentative plans for an outing to the Tech Cabin were made.

CHINESE STUDENTS PLAN ANNIVERSARY

Chinese students of the Institute have joined with Chinese students in other Greater Boston colleges in sponsoring an observance dinner in memory of the twenty-first anniversary of the founding of the Chinese Republic. Speakers in three tongues, English, Cantonese, and Mandarin, have been invited to the dinner, which will be held on Sunday, October 9, in Boston.

At a meeting of the Chinese Students Club held last Friday, a committee was selected as delegates to join students of other colleges in preparing this observance. This committee, with members from Harvard and Boston University, planned and arranged the dinner. Over one hundred and fifty are expected to attend.

HANDBOOKS OFFERED FACULTY MEMBERS

Letters were sent today to 510 members of the Faculty and Administration by the Handbook staff offering a copy free to any official who wished one. Some upperclassmen and instructors have evinced a desire for this little book with its Institute calendar, fraternity and activity directories, etc., and it was because of this that the offer was made.

Beginning this fall two of the smaller dormitories at Mount Holyoke college will be run on a cooperative basis, with the girls doing all of the work except the cooking and in turn receiving a reduction of \$200 from their tuition and board fees.

THE TECH News Dept. Holds First Meeting Today

THE TECH news department will hold its first meeting of the year today at five o'clock, in the news room in Walker Memorial. All the members of the news, features, and editorial departments are requested to be present. Managing Editor Dayton H. Clewell, '33, will take charge.

Asch Heads Ushers at All-Technology Smoker

In the list of men selected to serve as ushers at the All-Technology Smoker, as submitted for publication, the name of Edward L. Asch, '34, was inadvertently omitted. Asch, as President of the Junior Class, is an ex-officio member of the group and automatically head usher.

FIVE SOPHOMORES GET CABOT MEDALS

Given By Dean Lobdell for Physical Development

Harold E. Lobdell, '17, dean of students, has announced that the Cabot Medals for the year 1931-32 have been awarded as follows: John J. Ryan, Ferguson Foulk, Frederick F. O'Brien, Philip P. Johnston, and Phoenix N. Dangel, all of the Class of '35.

Honorable mention was given to the following Sophomores: Abraham K. Chakmaklian, Samuel J. Whitmore, Jr., Gordon E. Gott, Henry M. Doane, and Gerald W. Farr.

These Cabot Medals are awarded to those men who have shown the greatest improvement in strength and measurements. Examinations are held in the fall and then again in the spring; it is from the results of these examinations that the selections are made.

TECHNOLOGY SOCCER TEAM MEETS YALE

Tomorrow afternoon the Technology Soccer team will meet the Yale Varsity at New Haven, and as last year's game was won by a margin of two points by the Connecticut men, the final score being 3 to 1, the 1932 game promises to be close.

In a statement to THE TECH, Captain Kidde said that little was known about the strength of the Eli team, but that the home team would give a good account of itself.

The following is the probable lineup for tomorrow's game:

Goal	Kaiser
Right Full Back	Bateman
Left Full Back	Cary
Right Half Back	Hansen
Left Half Back	Warram
Center Forward	Kidde, (Capt.)
Right Outside	Holliday
Left Outside	Brockman
Right Inside	Stone
Left Inside	Daleda
Center Forward	Kron

Results will be published in Monday's TECH.

T. C. A. COMMITTEE TO MEET AT TECH CABIN

The deputation department of the T. C. A. directed by Edward J. Kratt, '34, will inaugurate a new plan this year by holding a meeting at the Tech Cabin for all men interested in this work. Invitations to attend were sent to those who indicated on their T. C. A. cards that they were familiar with public speaking, T. C. A. work, or church work, and at least ten are expected to come to the gathering in the T. C. A. office tomorrow afternoon at 2.00. Dr. Newton C. Fetter, the leader of the first, and today the most successful college deputation team in the country, will be the speaker Saturday evening.

Each year a number of requests are received by the T. C. A. for speakers to address Y. M. C. A. clubs, Boy Scout troops, and similar boys' groups. These speakers are furnished by the deputations department.

Problems Of Out Of State Cars Are Solved By THE TECH In Inquiry

Reporter Gets Information of Interchangeable Driving Privileges

For the information of students driving cars with out of state licenses, THE TECH has secured the following information in regard to the laws concerning the operation of such cars.

All cars, with the exception of those from Iowa, Arkansas, Mississippi and Tennessee may remain in Massachusetts for a period of 30 days. If planning to remain for more than thirty days, the car owner should secure a permit to continue operation under the license of his home state. These permits remain good for the lengths of time stated:

Unlimited: Pennsylvania, Alabama, California, Connecticut, Delaware, Florida, District of Columbia, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maine, Maryland, Minnesota, Missouri, New Hampshire, New York, North Carolina, North Dakota, Ohio, Rhode Island, Vermont, Virginia, Wisconsin.

Allowed Ninety Days

Ninety days: Colorado, Michigan, Montana, Oregon, South Carolina, South Dakota, Washington, West Virginia, Wyoming.

Four months: Arizona.
Sixty days: Indiana, Nebraska, Oklahoma.

Thirty days: Georgia, Tennessee.

At the expiration of the time of the permit, the owner must obtain a Massachusetts registration in order to continue operation in the state.

Mississippians must obtain Massachusetts registration after 25 days. Those from Iowa, Tennessee and Utah must get a Mass. registration after ten days in the Commonwealth of Massachusetts.

These permits and registrations may be obtained at the Commonwealth Pier.

Violates Loose Privileges

Non residents lose all non-resident privileges, if they violate any of the laws of the State, and they may be required to secure both Massachusetts registration and license.

The following states have interchangeable license privileges which allows them to drive cars Massachusetts automobiles with their respective licenses: California, Delaware, Washington, D. C., Kansas, Maryland, Nebraska, New Jersey, New York, Pennsylvania, South Carolina, Vermont, West Virginia.

Call for Wrestling Candidates

On Monday, October 10, at 5 o'clock in Hangar Gym there will be an important meeting for all men who are interested in Varsity and Freshman wrestling. Everyone who wishes to try for the teams should be present. Any sophomore wanting a manager's position next year, see Mgr. Karr at this meeting.

Instrumental Club Can Use More Instruments

The Instrumental Club has places for several more players, in spite of the fact that most pieces have been signed up. Anyone able to wield the following instruments is urged to see John D. Collins, '33, leader of the club.

- Five Violins
- Two Violas
- Two cellos
- Oboe
- Double-bass
- Flute
- Tympani

Quadrangle Club Remains Neutral Concerning Ties

The freshmen are being let off easy in the matter of wearing ties. The Quadrangle Club, which was so active in punishing delinquents last year, has declared itself strictly neutral. Last year members of the club visited freshman classes and offenders were noted. After two offenses, the guilty were taken in hand and punishment meted out.

It is a known fact that many freshmen have not bought ties as the number of sales is much below the enrollment figure. Some dutiful students have bought two making the total of delinquents even higher. The men giving out tickets to the Technology Smoker report that many freshmen asked for tickets who were not wearing ties.

PROMINENT SPEAKERS TO BE AT ALL-TECH SMOKER

(Continued from page one)

fall, and also took over the duties of boxing manager in the latter part of the season. This year he holds the office of President of the Beaver Key Society. Richard Bell will also be presented and awarded the medal sponsored by the Technique for the most outstanding athlete of the year. At the conclusion of the entertainment the Stein Song will be sung, as is the custom.

The members of the committee are as follows: Edward Wemple, '33, chairman; Robert G. Holt, '33, Roger P. Congdon, '33, W. Clinton Backus, '33, Walter R. Duncan, '33, Duke E. Selig, '33, Charles C. Bell, '33, Richard S. Morse, '33, Wilbur B. Huston, '33, and Edward Asch, '34.

Tickets numbering 265 were given out in the Main Lobby yesterday, and they can be obtained all day today until five o'clock. The affair starts at 6:30.

ADVISORY COUNCIL TO MEET WITH A. A. SUNDAY

The first meeting of both the Institute Athletic Association and the Alumni Advisory Council is called for three o'clock next Sunday afternoon in the North Hall of Walker Memorial. All the managers, assistant managers, captains and coaches of the various teams are requested to be present.

Lacrosse Mass Meeting

This afternoon in Room 1-190 a mass meeting for all men interested in lacrosse will take place, with Coach Gardiner S. Robinson presiding. Veterans from last year's varsity and freshman teams, as well as any new men interested, are expected to attend. Plans for the regular fall practice will be discussed.

YEARLING GRID TEAM HAS FIRST WORKOUT

Teams Plan To Hold Practice Games Before Field Day

Tryouts for the freshman football team had their initial practice Wednesday afternoon, with about thirty five men turning out. As most of them have had some experience, the development of a strong team depends greatly upon what condition the men are able to build up in the next three weeks.

The Sophomore candidates, however, are few in number, but this disadvantage is overcome by the fact that the majority of them are veterans of last year's freshman team. The size of the yearlings means anything, the Sophomores have a big job ahead of them. Meanwhile Sam Brown, '34, is endeavoring to arrange a few games for the two weeks preceding Field Day.

Sophomores Needed

All Sophomores interested in the game should report to Tech Field today at 5.00 o'clock, and also should make it a point to attend the next Sophomore mass meeting, the date of which will be announced. More definite plans will be made at that time. There are a few used uniforms available at the track house, but all men are advised to obtain their equipment from other sources, if possible.

JORDAN MARSH COMPANY STORE for MEN

BEGINNING NOW

Our Annual International TIE Sale

95c

Here's an opportunity to lay in a big supply—such a wide selection that your main trouble will be in limiting your purchases. Rich silks, imported from France, Germany, Italy, England, and Switzerland—each bearing the arms of the country in which it was loomed. Tailored in America by hand, which means they'll stay smooth and knot easily. All in newest colors and patterns.
