

# Huge Vote Expected At Institute Presidential Straw Ballot Tomorrow

## QUESTIONNAIRES PREPARED TO AID IN INVESTIGATION

Committeemen Will Report On  
Free Meals Eaten In  
Walker Cafeteria

### INQUIRY LASTS MONTH

Plans for the month-long investigation of the Walker Memorial dining service were formulated last Saturday at the first meeting of the Committee on Investigation of the Walker Memorial Cafeteria. Questionnaires have been prepared for distribution, the first of which will be circulated in the dormitories tomorrow.

Following the distribution of the first questionnaire which must be returned to the committee by Thursday, another will be made at a later date to be given out to diners in the cafeteria with their meal checks. These will be handed in when the check is paid.

### Committeemen Eat Free Meals

Each member of the committee which is composed of Edward L. Wemple, '33, Walter L. Wise, '34, and Joseph L. Seligman, Jr., '34, representing the fraternities, and John Streng, '33, George O. Henning, '33, and Sherman T. Leavitt, '34, representing the dormitories will be allowed twenty free meals each week during the investigation in the Walker cafeteria. After each meal a report on it will be made which will be incorporated into the final report. The purpose of these reports will be to make comparisons of the Walker cafe-

(Continued on page two)

## Rivalry Between Lower Classmen Rising Rapidly

Both Classes Confident of Victory As Field Day  
Draws Near

Recent evidences of increasing rivalry between the lower classes as indicated by last Thursday's squabble, foreshadow a vigorous, old-fashioned struggle for Field Day. Both classes feel confident of victory, and the freshmen are eager to match their skill against the second year men, who were conquered in last year's contest.

As indicated in last Thursday's squabble, class spirit is increasing, and the enthusiasm regarded as necessary for a successful Field Day is rising rapidly.

### Point Value of Events

The events will have the same point value as they did last year; football, 4; relay, 3; crew, 3; tug-o'-war, 2; and the glove fight, 1. The crew race will open the day's event at seven in the morning, and at noon school will be dismissed. The afternoon activities will be initiated at 1:30 by the first pull in the tug-o'-war, which will be followed by the first half of the football game. The relay race immediately follows this, and then the second pull of the tug-o'-war. Having recuperated from the effects of the first part of the football game, the teams will finish their contest, and if a third pull is necessary, the tug-o'-war combatants will contend in their final encounter at this point in the program.

(Continued on page three)

## ALL STUDENTS AND MEMBERS OF FACULTY ELIGIBLE TO CAST VOTE —POLLS TO REMAIN OPEN ALL DAY

### Men "Taken for Ride" — So Thought Police

Fraternities at the Institute have again crashed the Boston head lines during initiations. This time the brothers were mistaken for gangsters taking their victims for a ride in South Boston.

A man driving through Roxbury was passed by a speeding car carrying several blindfolded men on the back seat. Suspecting that someone was being taken for a gangster ride, the man followed to South Boston, finally ending the chase at the Fish Pier. At the entrance to the pier police and customs officers were warned.

Shortly afterwards a squad car loaded with armed police arrived and found a group of five men who were obviously not gangsters, but college fraternity pledges. The police stopped only long enough to learn that the men were members of a Technology fraternity.

### Near Riot Instigated Between Rival Crews At M. I. T. Boathouse

Trouble Starts As Sophomores  
Throw Freshman Manager  
In Charles River

The dousing of a freshman manager in the Charles River last Friday morning by the Sophomore Field Day crew resulted in a slight skirmish between the two rival classes in which forty irate freshmen threatened to duck the whole second year crew. The intervention of the varsity men was all that prevented the freshmen in carrying out their designs. It was said that the two crews should save their spirit for the Field Day race and iron out their differences on that occasion.

The trouble started when the Sophomores tried to dock their boat. A strong surface wind made it difficult for the coxswain to judge the landing, and the first attempt was a failure, further so because no help was received from shore. When the freshmen managers arrived, the Sophomores greeted them with unkind words, which were answered accordingly.

The incident was seemingly closed until trouble burst out anew between the freshman in charge of the store room and the second year men, when a controversy arose over the allotment of clean towels. Without much ado, the freshman was seized and thrown off the float into the cold water. His frantic calls for help were answered by all the freshmen crew aspirants, who rushed into the locker rooms to seize the second year men, but they were promptly ousted by the varsity crews.

### Liberal Club Will Debate On R. O. T. C.

Research Committee Reports On  
Developments In Oakley  
Johnson Case

Compulsory Military Science will be discussed in an open forum at the first regular meeting of the Liberal Club today at 5 o'clock. The officers expect a lively discussion on this most debatable subject, and invite all interested persons to be present.

"The Liberal Club is a clearing house for controversial problems," said Lawrence Ebel, the vice-president. Upholding this the Research Committee, appointed at the last meeting to investigate violations of personal freedom, will present its findings in the case of Oakley Johnson, an instructor in the City College of New York, who was dismissed, according to Johnson, for participation in the activities of the Communist Party. The club will write to officials of C. C. N. Y. for their version of the case.

The Board Committee, also appointed at the last meeting, is arranging to get a bulletin board whereon they will post clippings of social, political, and economic problems.

## TECHNOLOGY VOTE BECOMES PART OF NATION-WIDE POLL

Thirty-Four Colleges Will Hold  
Similar Referendums All  
Over Country

### HOOVER STRENGTH NOTED

THE TECH to Announce Results  
In Next Issue; Totals By  
Class and Course

With many eastern schools reporting large Hoover majorities in college straw votes, Technology is eagerly awaiting the results of its own straw vote which will be held tomorrow under the sponsorship of THE TECH. The voting will take place in the Main Lobby from 8.45 to 5.15 o'clock with all registered students and faculty members eligible to vote. It is expected that over two thousand ballots will be cast.

The results will be tabulated as to courses and classes. Faculty members will check a special square on the ballot in order that their votes may be tabulated separately.

(Continued on page four)

## REPUBLICAN PLATFORM

The Republican party this year makes its bid for votes chiefly as an appeal to be allowed to continue the job it has begun during the past four years. The crisis which Hoover has faced arose from conditions beyond anyone's control, and it is the part of justice to judge him by the patience, courage, and success with which he has been able to suggest and apply remedies, rather than to blame him for bringing us to our present plight.

Since the fall of 1929 the President, supported by the Republican party, has waged a determined fight to prevent the nation from reaching a state of panic or despair. The fight has been successful. To continue this fight the Republican party must continue in control.

### Economic Platform

The principal issues in the campaign this year are economic. As a basis for economic stability the Republican party stands for the sanctity of the gold standard, a maintenance of national credit, the principle of a balanced budget, reduced governmental expenditure, an expansion of credit by all means consistent with a sound financial and economic system.

The Republican party has always been a staunch defender of the protective tariff. The home market has been built up under that policy, and belongs to the American worker and farmer. This tariff should be maintained.

### Unemployment Relief

Unemployment relief and methods for administering it have figured prominently in political discussions for the past year and more. The Republican party has not been blind to existing conditions and has taken steps to remedy basic conditions.

There are two ways to minister to the unemployed: give aid in the form of supplies or money or give the man a job. The Republican party has chosen the latter, and aid had been extended corporate units who through this help have been able to give men work.

### Prohibition, Foreign Affairs

Prohibition is a minor issue this year, but the Republican party takes a definite stand: let the people approve an amendment to allow the several states to choose for themselves, the Federal government protecting those states where prohibition exists and guarding its citizens from a return of the saloon and attendant evils.

Three successive Republican Presidents have endorsed membership in the World Court. The party believes that America should use its influence for this institution which offers a safer and more expeditious instrument for the settling of questions arising between nations.

The Party favors United States participation in an international conference to consider monetary problems, commodity prices, exchange questions, and possible cooperative action regarding them.

## DEMOCRATIC PLATFORM

The Democratic Party is conducting its campaign for the election of Franklin D. Roosevelt and John N. Garner principally on the issues of prohibition and national economic conditions.

On the question of Prohibition, the position of the party is in favor of outright repeal of the Eighteenth Amendment, and it pledges its members to work for repeal in the various individual states as well as in the national legislature. It pledges itself, however, to prevent the return of the saloon. In taking its position, the party has condemned the stand of the Republican party as a "straddle," seeking to obtain the greatest number of votes on both sides of the controversy. It pledges itself to restore the rights of the individual states in the matter of prohibition, and to bring revenue to the Government through the taxation of an industry now illegal.

Democratic leaders have also proposed that beer and light wines be legalized immediately, pending repeal of the Amendment, so as to bring this revenue to the Government immediately and help to restore better times by reviving the beer industry.

### Republican Failure

The heaviest campaign ammunition in the hands of the Democratic party has been furnished by the economic depression, and the ineptitude of the Republican administration in dealing with the difficulty is the principal basis on which it expects to be carried into office. It is charged that the Republican Party, together with President Hoover and his Administra-

tion, having claimed exclusive credit for the era of prosperity previous to 1930, must now take the blame for its sudden and disastrous dénouement.

The Democrats charge that the depression was fostered and hastened by the Smoot-Hawley tariff and other Republican economic policies. They charge the Hoover Administration with short-sightedness, with refusing to recognize the economic crisis when it arrived, and with slowness and futility in its attempts to alleviate the effects.

### Broke Faith With Farmers

It is also charged that the Republican Party broke faith with the farmers in promising them relief which has no hope of materializing. The Smoot-Hawley tariff, designed to aid the farmer, did him no good. The Federal Farm Board was a failure, and made the situation worse by its manipulations in the wheat and cotton markets.

In contrast to the Republican protective tariff policy, the Democratic party proposes a "competitive tariff for revenue."

As a further means of balancing the budget the party pledges itself to a large reduction in governmental expenditures. It proposes to abolish useless bureaus and commissions in the executive branch of the government. It also favors the reduction of municipal expenditures, but not by reducing the income of employees.

On the subject of veterans' compensation, the Democratic party proposes just compensation for all former soldiers having disabilities resulting from the war.

**DISAPPOINTING SIGN-UPS**

THE opportunity for sport substitutions for Physical Training is over. Although the final figures on sign-ups are not at hand, we understand that they are far below those of last year. Thursday night about half the number were going out for one of the most popular sports at the Institute as in past years. A last minute stampede for the Gymnasium office before 12 o'clock on Friday, filled out the squad to only two thirds of its usual size.

It is rather a surprise and a disappointment to the coaches and teams that such a lack of interest is being shown by the Class of 1936 toward athletics. Adequate material means that there is a much better chance of turning out a winning team. The solution to the problem is this. Let the freshmen go out for the teams and then at the beginning of the second term substitute that sport for P. T.

**YOICKS AND HUZZAH!**

YOICKS and Huzzah, gentlemen! We have proof amounting to certainty that the Junior Prom will function as usual this year at the same old stand. This is, of course, the only logical conclusion to be drawn from the statement of the Institute Committee in setting a date for the nominations and election of the Junior Prom Committee.

Last year, it will be remembered, the Junior Prom went under financially. This caused the official stand of the committee to be such that they could not, in the future, accept the financial responsibility for the affair, and therefore could not sanction it.

However, it is again apparent that the fine traditions of Technology have come to the fore. Not for the mere sum of a few paltry dollars will this ancient parade of Technology finery and politesse be allowed to fade into the limbo of dead and forsaken things. One more funiculi-funicula will ring through our austere halls, brightening drab days of mechanical exactitude. Yoicks and Huzzah, gentlemen, for a Good Thing.

**IT'S MEN**

TOMORROW will see Technology men making known their decision on the questions which face the voter in the national election this year. Economic questions they doubtless are. Others fade beside the paramount importance of what shall be done to keep America from falling further into the slough of despair and what steps shall be taken to lead us from the wilderness of economic troubles.

The platforms and aims of the two minor parties whose names will appear on the ballot have been published. Summaries of the programs advanced by the two major parties appear today. As can be seen from these, there is little actual difference in principle between the two. Party spirit and strong convictions of party leaders, however, are as rampant as in years when there is a definite cleavage between the parties.

As we see the issues facing the voters at this time, they are resolved into a choice between personalities. Do we want Hoover, steady, patient, somewhat hesitant to make known his plans with a blare of trumpets? Or do we want Roosevelt, pleasant mannered, a good speaker, and a change?

True there is a difference between the parties on the tariff, the method for relieving unemployment, and other points, but these are of minor significance. The major issue is the man who would occupy the White House.

On this ground we believe men at Technology, students and faculty alike, must reach a decision between the parties. Our decision will have little effect on the outcome of the national election, but it will be an indication of student thought on the political situation.

Give the matter some consideration. Reach a decision. Then vote tomorrow. Make your opinion count in the results which will be indicative of Technology political opinion.

**AWAY FROM THE GRIND**

Freshmen were guests of honor at the formal Delta Upsilon dance Friday night. The dance, which lasted from nine until one, was chaperoned by Assistant Dean and Mrs. Thomas P. Pitre. One hundred couples attended the affair.

Merill Goodhue's orchestra furnished the music for the Sigma Chi closed formal on the same night. Forty couples, chaperoned by Mr. and Mrs. John B. McPherson and Mr. and Mrs. John Burns, danced from nine-thirty until two.

A small group of twenty couples was present at the informal closed dinner and dance given by Phi Kappa Sigma fraternity Saturday night. The dancing, to radio and victrola music, ended at midnight.

**FREE MEALS GIVEN TO WALKER COMMITTEE**

(Continued from page one)

teria with other cafeterias in Boston and Cambridge which are at present well patronized by Technology students.

Besides eating free meals, the privilege of inspecting the private portions of the cafeteria such as the kitchen, the pantry, and the storeroom will be given to the committee members. The committee may also have access to the methods of budgeting and will receive the whole-hearted co-operation of the bursar's office and the dining service management.

At the end of the month the committee will make a detailed and specific report to the management of the cafeteria containing instructive and constructive suggestions. This report will cover only the cafeteria service of the Walker Dining Halls.

**A WATCH SHOULD BE CLEANED ONCE A YEAR**

Mr. Regan in the Coop Barber Shop is equipped to do this thoroughly and cheaply. Stop in and see him.

**How To Avoid BONERS**

**MONOTONY IS THE CUSTOM OF HAVING ONLY ONE WIFE**

HEAVEN have pity on the poor lad! He also thinks a parapet is a tropical bird.

But where there's life there's hope. If somebody will introduce Bill Boner to a good pipe and good tobacco, perhaps he'll improve. You see, a pipe helps a man concentrate, think right. And be sure you fill his pipe with Edgeworth Smoking Tobacco. As you know, Edgeworth has proved to be the favorite smoke at 42 out of 54 leading colleges.

Ah! There's a smoke for you! Notice how that blend of fine old burleys helps you think out a difficult problem. See how cobwebs fly from a tired brain on its fragrant wisps of curling blue smoke!

Edgeworth is available everywhere

in two forms—Edgeworth Ready-Rubbed and Edgeworth Plug Slice. All sizes—15¢ pocket package to pound humidior tin. Want to try before you buy? Write for free sample packet. Address Larus & Bro. Co., 120 South 22d St., Richmond, Va.

**EDGEWORTH SMOKING TOBACCO**

**You don't Need to Pay fancy Prices... for Correct Stationery**

THIS note paper is correct for informal correspondence. We have supplied it for 18 years to many of America's most prominent families. It has been a favorite also among college men and women.

With the introduction of the new "450 Package" the cost of this fine note paper is made lower than ever. It actually costs *less* than cheap stationery.

It's the same style note paper we have sold for 18 years—same printed name and address—same prompt delivery—same price. *But the quantity is 50% greater!*

Send one dollar (\$1.10 west of Denver and outside of U. S.) and get one of the biggest bargains in fine merchandise offered in America. Your package printed and on its way to you within 3 days of receipt of your order. No agents or dealers. Sold by mail only. Absolute satisfaction guaranteed.

**50% Bigger THE NEW "450 PACKAGE"**

You can't buy any stationery at any price better suited to your informal correspondence than the new "450 Package." It is correct note sheet size, 6"x7". The quality is actually better than found in many boxes of high-priced stationery.

Give American Stationery for Christmas. It's a better gift than ever this year. Make up your list now and have your Christmas shopping done—early, economically and thoughtfully.

## DOCTOR COMPTON GIVES ADDRESS AT SYMPHONY HALL

"Will the Machine Destroy Our Civilization?" Was Subject Under Discussion

### DR. SKINNER ALSO SPOKE

"Will Machinery Destroy Civilization" was the subject discussed at the Community Church, Symphony Hall, yesterday morning. Dr. Karl T. Compton, President of the Institute and Professor Clarence R. Skinner of Tufts College were the speakers. Prof. Skinner discussed some of the dangers of the present speed at which scientific development is progressing, while President Compton pointed out aspects more favorable to the machine.

Technique, in the sense of invention which helps man to produce and to adjust himself to his environment, tends, Prof. Skinner stated, to dominate personality. In the orient, where technological development has not been carried so far as it has in the western world, individuality dominates. In the western civilization, where increasing faith is placed in the machine, attention is concentrated on great engineering projects, and there is a tendency for the machine to dominate human personality. Less emphasis, Prof. Skinner declared, is placed on the human soul and intelligence.

#### Scientific Tempo Too Fast

Science, he brought out, is selling its products, but not its process. Man does not keep up with scientific development. What we need is not more machinery but more constructive thought about the machines which we now have. The speed of technological change is so great that the machine is taking away man's hands and thoughts. Inadequate mastery of this great power and consequent maladjustment might mean the downfall of mankind.

If it be possible to rouse the willpower for intelligence to control this power, Prof. Skinner concluded, we may make the machine serve the best interests of mankind and look forward to a time when social co-operation is assured.

President Compton, in presenting some of the other aspects of the question, brought out that the machine has created civilization, and, that in looking back over the history of past civilizations, we can find no examples of machinery destroying a great social system. While machines of warfare have become more effective, there have been steadily increasing limitations of the horrors of war, which limitations arise from the increasing sympathy and understanding of one people for another, understanding made possible by modern machine methods of travel and communication.

#### Economic System To Blame

That new industries have sprung up to absorb jobless workers, that overproduction is not due to machinery but to a faulty economic system, that machines have removed tremendous burdens from the shoulders of mankind, that the results of the machine have been preponderantly beneficial and consist essentially in the creation of opportunity President Compton clearly showed. The development of machines is an inevitable result of man's inherent urge for progress.

"I do not know whether civilization will be destroyed or not, but if it is destroyed the blame will rest on man's stupidity and 'cussedness' and not upon the machines which he has created," he concluded.

## MENORAH TO HEAR PROFESSOR MAGOUN

Professor F. Alexander Magoun, of the Division of General Studies, will be the guest speaker at the Menorah Society joint meeting with Simmons College, next Wednesday evening at 7:30 in North Hall, Walker Memorial. A dance will be held after the talk. Membership cards are required for admittance. All persons wishing to join may do so now or at the meeting.

## SOPH-FROSH RIVALRY RISING FOR FIELD DAY

(Continued from page one)  
Glove Fight Struggle

The most spectacular event, the glove fight, follows, in which the traditional rivals will have ample opportunity to let loose their pent-up emotion accumulated in the preceding few hours. Any equipment except spike shoes is allowed. It is probable that the respective football teams will get together in this event to settle their affair among themselves.

## WORLD PEACE MOVE UNITY CLUB TOPIC

World Peace Movements were discussed at the Unity Club Meeting held Wednesday at 4:30 o'clock, in the Faculty Dining-room.

The club meets the first and third Wednesdays of every month, at the above time and place. Rev. Gysan, the club's advisor, will conduct an informal discussion on "Why are we religious liberals?", at the next meeting. All liberal students at the Institute are cordially invited.

## Soccer Team Drops Overtime Match To Brown Booters, 3 to 1

### Stone Scores For Technology As Team Suffers Third Straight Loss

Technology's varsity soccer team suffered its third straight defeat Saturday at the hands of Brown University, in an over-time game at Providence. A goal in the second period by Stone gave Technology the lead until the third period, when Allen, of the opposing team, tied the score. The game was tied when the final whistle blew, but in the overtime Allen again came to his team's aid, scoring two goals to enable Brown to win, 3 to 1.

According to Manager Harold E. Thayer, '34, the Technology booters showed a strong defense, but a poor offense, not seeming to have the "push" when it was needed. Forsburg and Brockman starred for the Institute team, and Allen for the victors.

The following are the line-ups for the two teams:

M. I. T.	Brown
Kaiser, G.	G., Toleman
Bateman, R.B.	R.B., Bauman
Forsburg, L.B.	L.B., Whiteman
Hanson, R.H.B.	R.H.B., Jones
Warram, L.H.B.	L.H.B., Tulp
Kiddé, (Capt.), C.H.B.	C.H.B., Elpes
Holliday, O.R.	O.R., Tuller
Stone, I.R.	I.R., Knott
Kron, C.	C., Eberstadt
Daleda, I.L.	I.L., Wellman
Brockman, O.L.	O.L., Allen
Goals: Allen 3 (Brown), Stone (M. I. T.).	

## T. C. A. SERVICE GETS 7 FROSH CANDIDATES

Seven freshmen appeared at a meeting held recently in the T.C.A. office and indicated their willingness to participate in the work of that organization. Each will spend two to three hours each week in the office doing any work which may be assigned.

After the financial drive, in which all will take part, a freshman cabinet will be formed, under William E. Rand, '33.

## TRYOUTS FOR FIELD DAY RELAYS TODAY

Final tryouts for both Sophomore and freshman Field Day relay teams will take place today and tomorrow, it was announced by Coach Oscar Hedlund. It was also stated that the cross country meet with Holy Cross, originally listed for last Friday, had been dropped from the schedule.

## Lindgren Discusses Hoover As A Young Survey Assistant

### Was In Geological Expedition To Sierra Nevada Range In California

One of President Hoover's first positions after graduating from Leland Stanford was the post of assistant to Professor Waldemar Lindgren, head of the Institute's Geology department, in a geological survey expedition to the Sierra Nevada mountain range in California.

The survey, carried on in the summers of 1894 and 1895, was conducted at a very high altitude, involving many difficulties and much climbing in rarified atmosphere. President Hoover proved a very capable assistant, said Professor Lindgren, showing himself to be a conscientious and efficient man, and giving promise of going very far.

Soon after this survey, his second experience in the geological field, President Hoover left it to go into mining engineering and then to Australia.

Concerning his administration in the last few years, Professor Lindgren had nothing but praise for the President, saying that he had done excellent work under very adverse conditions. "If the American people don't re-elect him, it will show their lack of intelligence," he stated.

## INSTITUTE RECEIVES PORTRAITS TOMORROW

### President Compton Will Accept Works of Miss Browne

The Institute will be formally presented the first four of a series of portraits of distinguished engineers and scientists which are being painted under the sponsorship of Mr. and Mrs. Henry A. Wise Wood of New York in the office of President Karl T. Compton at three o'clock tomorrow afternoon.

The portraits to be presented are those of Professor Elihu Thomson, eminent electrical engineer, and a member of the corporation of Technology; Rear Admiral David W. Taylor, distinguished naval constructor, who from 1914 to 1922 was Chief Constructor of the United States Navy; Dr. Ambrose Swasey, famous as a mechanical engineer who has made important advances in the design and construction of scientific instruments and in precision methods for mechanical processes; and Joseph Priestley, the distinguished chemist, discoverer of oxygen and founder of the American Chemical Society.

#### Work of Margaret F. Browne

These portraits are the work of Miss Margaret F. Browne, the well-known Boston artist. They will hang in the various departments of the Institute in which the achievements of these men have special significance.

The portraits will be accepted for Technology by President Compton, who is expected to make a brief reply to Mr. Wood's presentation. Among the guests at the presentation will be the deans of the various schools at Technology, and members of the corporation and their wives, as well as members of the faculty particularly interested in those branches of engineering and science in which the subjects of the portraits are distinguished. Following the presentation tea will be served in the Moore Room in the new physics building.

## POLLS OPEN ALL DAY TOMORROW FOR VOTE

(Continued from page one)

There has been a preponderance of requests for Hoover buttons and Republican campaign literature at THE TECH news office during the past week, but it is impossible to tell just to what extent this is an indication of Hoover strength in the school. The recent Socialist landslide at the Liberal Club symposium may be reflected to some degree in the poll tomorrow although the total number of votes cast at the liberal club meeting were under one hundred and therefore many believe the results could hardly be called representative of the school.

### Both Platforms In This Issue

The Republican and Democratic party platforms are appearing in this issue of THE TECH, concluding a series of four such articles which have been arranged by THE TECH for the information of its readers.

Technology is one of the 34 colleges co-operating in this national presidential straw vote. Results of the local vote will be published in Wednesday's issue of THE TECH. On Friday the final results of the national collegiate poll will be printed.

## SECTION LEADERS OF '36 TO MEET TODAY

An important meeting of all section leaders is being held today in room 4-270 at 4 o'clock at which all representatives are expected to be present. This meeting is being held in preparation for the pep mass meeting which comes on Thursday and a general preparation for Field Day, five days hence. Section leaders have been collecting twenty-five cents from each member of the class to be used in buying football equipment for the Field Day team, and it is expected that this equipment will be bought in the earlier part of this week.

The Field Day teams have been making a better all-around showing in attendance and spirit since the last mass meeting, for a full quota has been seen daily working hard with the football and tug-of-war teams. Those men who participated in the Dorm

### WITH CLIVE IN INDIA

"Nature in the Raw"—as portrayed by the noted artist, Karl Godwin... inspired by the fierce and brilliant assault by Clive and a handful of followers, outnumbered 20 to 1 by savage hordes of bloodthirsty natives, at the Battle of Plassey—the birth of the British Indian Empire—as described in the famous Henty book, "With Clive in India."

## —and raw tobaccos have no place in cigarettes

They are *not* present in Luckies... the *mildest* cigarette you ever smoked

WE buy the finest, the very finest tobaccos in all the world—but that does not explain why folks everywhere regard Lucky Strike as the mildest cigarette. The fact is, we never overlook the truth that "Nature in the Raw is Seldom Mild"—so

these fine tobaccos, after proper aging and mellowing, are then given the benefit of that Lucky Strike purifying process, described by the words—"It's toasted". That's why folks in every city, town and hamlet say that Luckies are such mild cigarettes.

**"It's toasted"**  
 That package of mild Luckies

"If a man write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, tho he build his house in the woods, the world will make a beaten path to his door."—RALPH WALDO EMERSON.  
 Does not this explain the world-wide acceptance and approval of Lucky Strike?
