

## THE TECH DARES TECHNIQUE TO ITS ANNUAL CARNAGE

Newsroom Squad Will Prepare  
To Do Up Foes In Old  
Roman Fashion

### INFIRMARY TO PREPARE

With THE TECH challenging the snivelling Sneakers to the annual gridiron roasting on November 26, the perpetual fog surrounding the year book office has turned to gloom for all sneakers have placed orders for coffins and made out their last wills.

Careful inquiry reveals that the depleted and scatter-brained staff of Technique is wholly incapable of producing a congregation of their unfortunates which would even resemble a football team when compared with THE TECH'S brawny, bruising, brainy, bone-breakers.

### 'Sneakers Quake At Challenge

Recent tremblings of the earth which have shaken Walker during the past week, have originated in the Sneaker office in the basement, where those spineless snapshotters having been quaking in anticipation of this challenge. Their frantic pleas for mercy have so stirred the newsmen that THE TECH seriously considers allowing its poor rival its choice of being overwhelmingly defeated in poker, bridge, or ping pong.

Even with this wide range of competition, the sneakers are hopeful of finishing second or third, if at all. In no event do the newsies consider it necessary for more than four men to make up their football squad, this number being more than sufficient to handle the entire Technique staff.

### Infirmary Adds New Rooms

In preparation for the awful carnage, the Homberg Infirmary has added eleven new rooms into which the victims of THE TECH'S wrath will be placed. The American Red Cross is making plans to give first aid to all spectators who unwittingly venture to close to the scene of the massacre.

## TURNER SEES SLUMP IN MINING INDUSTRY

Says It Has Reached Low Point  
and Now Has Upward Trend

Dr. Scott Turner, director of the United States Bureau of Mines and president of the American Institute of Mining Engineers, addressed a meeting of members of the organization living in and around Boston, and a group of students of Mining and Metallurgy from Tufts, Harvard, and M. I. T. at a dinner Monday night in the North Hall, Walker Memorial. In his talk Dr. Turner voiced the belief that although there has been a slump in the mining industry, the second largest industry in the United States. The slide has reached its lowest point and is now on the upturn.

Mr. A. P. Parsons, secretary of the American Institute of Mining Engineers, complimented the local section of the organization for the work done by its Unemployment Committee, and mentioned that this was Dr. Turner's official visit to this branch.

### Work of Unemployment Committee

A description of the work done by the Unemployment Committee was given by Mr. J. P. Alexander, head of the Emergency Research and Engineering Bureau of the A. I. M. E. "We are doing in Boston," he said, "what New York pays millions of dollars for," that is, the carrying out of civic projects, the improvement of slums, and the development of park projects. Such work is carried out by unemployed engineers without any expenditure of taxpayers' money, since

## Voo Doo Startles Institute With First Humorous Creation In Years

DOES

# 'The Tech'

Fulfil its Duty as the

Official News Organ

OF

# THE INSTITUTE?

Monday's headline unmistakably reveals an attempt on the part of the would-be news finders to create a feeling of ill will between the two groups of undergraduates.

"The Tech's" motive glares through the flimsy news in the article, once more showing the paper to be a mere outlet for the evil thoughts of a few illiterate, biased and uncontrolled children. In our estimation, "The Tech" is a great big net loss.

To be Continued in

# Voo Doo

Next Tuesday

Above is a facsimile of the pamphlet passed out in the Institute halls last Wednesday by staff members of "Voo Doo". Although the corridors were practically littered with the circulars, THE TECH reproduces it above for the benefit of those who for one reason or another have not read it, and are still under the impression that "Voo Doo" never has produced anything humorous and probably never will.

Many people who read the pamphlet expressed the opinion, following a comparison between the pamphlet and recent issues of the magazine, that 25 cents should have been charged for the pamphlet and the magazine given away free.

The pamphlet was published on characteristic yellow. It was in all probability written before "Voo Doo" was acquainted with the fact that Mr. Fossett had personally read and approved the article in question.

## DRAMASHOP CHANGES DATE OF PRODUCTION

John Galsworthy's play, "The Pigeon", the forthcoming Dramashop production, will be presented on the nights of December 8, 9, and 10. This cancels the previous announcement which gave the date of performance as December 1, 2, and 3.

## QUADRANGLE CLUB MEETS WEDNESDAY

The Quadrangle Club will meet at the Theta Chi House Wednesday night at 8:30 o'clock. The discussion of the Freshman tie problem will probably be brought up at this meeting. Since considerable publicity has been given this question in the last few weeks.

## Nominations for Junior Prom and Freshman Class Officers

### CLASS OF 1934 JUNIOR PROM COMMITTEE

William G. Ball, Jr.  
Robert M. Becker  
Frank J. Brazel  
William Brockman  
Edward P. Bromley  
James H. Burnham  
John J. Carey  
Edgar B. Chiswell  
William E. Coleman  
William G. Cragin  
G. Kingman Crosby

## Military Society Has Pledging At Armistice Dance

Cadet Officers Elected With  
Elaborate Ceremonies  
At Midnight

At the stroke of midnight twelve cadet officers of the R. O. T. C. were elected to membership in the Scabbard and Blade Society at the Military Ball held last Thursday night in the main hall of the Walker Memorial. About one hundred couples were present to dance to the music of Leo Reisman's orchestra and celebrate the fourteenth anniversary of the signing of the Armistice.

The hall was appropriately decorated with various flags and sabres hung from the balcony. Two machine guns and two field guns were obtained from the National Guard, adding an effective military atmosphere.

During the intermission, refreshments were served to all present. The chaperones for the dance were officers of the Military Science Department of the Institute.

### Associate Members Elected

Besides the new members, seven associate members were elected, including Captain Knight, Major Gatchel, Captain Johnson, Professor Waterhouse, Professor Zimmerman, Lieutenant Keller, and Lieutenant Potter.

The new members elected to the Honorary Military Society were Robert M. Emery, William E. Coleman, Herbert A. Morriss, Walter W. Bird, Albert G. Kern, William A. Baker, Winold T. Reiss, Raymond P. Holland, Aaron K. Dedcay, Francis H. MacDuff, Richard Martin and Marvin J. Silberman.

## ALPHA CHI SIGMA AWARDS STUDENTS

Announcing the undergraduate awards of Alpha Chi Sigma, honorary chemical society, Professor Gill last Wednesday evening presented Robert Dillon, '33, the Junior Award, annually given to some outstanding senior majoring in Chemistry or its related fields. Robert K. Kennedy, '35, received the freshman award of having his name inscribed on a plaque kept in the Chemical Reading Room.

The Junior Award is a year's membership in the American Chemical Society. Both awards are made by the faculty and are on the basis of scholarship and personality of the students. Dillon is taking the Chemical Engineering Course while Kennedy majors in Electro-chemical Engineering.

## FACULTY MEETING DECIDES TO FUND SALARY RESERVE

Part of Pay Will Be Used To  
Guard Against Possible  
Budget Deficit

### CO-OPERATIVE PLAN MADE

A co-operative plan whereby the staff and employees of the Institute are to contribute to a salary reserve fund to guard against the deficit which will occur in case the year's income is further reduced, was announced by President Karl T. Compton following a meeting of faculty last Wednesday.

This fund will be set up from two sources. The first consists of a deposit of ten per cent of salaries or wages, after deducting an exemption of \$500, to be accumulated between December 1, 1932, and July 1, 1933, with the understanding that any balance of this fund which has not been needed to meet the operating expenses of the Institute, be returned pro rata at the latter date to those who have contributed to it.

### "Professors' Fund" Second Source

The second source is the "Professors' Fund," which has been accumulating for more than a year from the 50 per cent contributions of income earned by members of the staff for professional services rendered outside the Institute while it is in session.

The professors themselves have voted that this fund shall be used to set up a plan for leaves of absence to enable members of the staff to increase their professional contacts and opportunities for research. They have, however, now voted to put such portion of this fund as may be required to meet operating expenses at the disposal of the Institute.

President Compton emphasized that this is a precautionary measure to prepare for contingencies which are not now in sight and which he hopes will not arise. Prudence demands that such precautionary measures be taken in order effectively to meet the situation if it should be necessary.

### Not Considered As Cut

There has been no reduction in salaries at Technology, and this action is not considered as a reduction, President Compton stated. The corporation has made every effort to maintain salaries on the present basis, especially in view of the fact that the outside income of the staff, through various professional contacts, comes from a type of work which has

(Continued on page four)

## Musical Club Hold Concert and Dance

Banjo and Piano Specialties  
Presented At Season's  
First Concert

More than one hundred members of the Combined Musical Clubs were present at the Franklin Square House last Wednesday night for their first concert of the season. The concert, lasting from 8:30 to 10:00, was followed by dancing until midnight.

In general, the program was classical or semi-classical in nature. Music of a lighter vein was presented by Arthur L. Conn, '34, and Warren H. Pease, G., who played a banjo duet. Edward W. Donahue, '34, presented several jazz pieces of his own arrangement on the piano.

An informal closed dance for members of the Combined Musical Clubs, will be given next Saturday in the North Hall of the Walker Memorial, from 8:00 to 12:00. The Techtonians will furnish the music.

Well, gentlemen, the identity of the Lounger, supposedly kept secret through the ages by successive staffs of THE TECH, is now about to be released. We hesitate to let you all in on this, but the Lounger feels sure that you positively won't breathe a word of it to a soul. But just let your eye casually wander to the list of nominees for the Junior Prom committee, and there it is. Yes sir, getting up in the world, so we are.

It is with mingled feelings, as the old song and dance goes, that we survey the formidable list of these mighty men of talent who are so numerous that the voice of the people had no choice but to acclaim all for the post of committee member.

Some speak of the lack of spirit at the Institute, but this is something far transcending the wildest dreams of the most ardent worker for communal esprit. Think of it, gentlemen, each of you, each of us, the Lounger might say, are of such calibre and moral worth in the eyes of our classmates that they have voluntarily put us up for this honor. Ah, Diogenes!

In all fairness, we suppose something should be said of the jelly-bean boy, who so nobly aided the digestive tracts of many of the Institute's finest, Thursday. But we forbear, as, perforce, we are obliged to sympathize with his plight. My, aren't we noble?

We have it straight from the source itself, that the Institute consumed exactly a pound and a half in just exactly forty minutes. Which reminds us of Saranac, where they say that, while they don't know so much about the production, the consumption is something terrible.

Before we let this thing rest, out of due and shocking modesty, we must tell you about the professor who must, unfortunately, remain unrecognized in anonymity.

This worthy gentleman accepted the proffered jelly-bean, then read the scriven emblem, gravely. He turned away, contemplated the small sweetmeat, and then came back, holding it out to the unfortunate donor, saying, "Here, I was wrong too." Then he left, walking disconsolately into the elevator.

If you read THE TECH, or even if you don't, you have undoubtedly obtained some whiff of the results of the statement made by our esteemed Senior president in an article written, ostentatiously for the last T. E. N.

Personally, we are all for utterances and uproars and things. Proves that the student body hasn't yet gained

AWAY FROM THE GRIND

Sid Rinehart and his orchestra supplied the rhythm for the sixty couples at the Theta Delta Chi house Thursday night. The dance was formal and was chaperoned by Mr. and Mrs. Roy Sidelinger. The dancing lasted from nine-thirty till two.

The committee which organized the Tech Catholic Club dance last Thursday was composed of John J. Carey, chairman Leamon F. Donahue, William D. Murphy, Charles M. Parker, and Cole A. Allen. The military decorations of the Scabbard and Blade Ball the preceding night were used again. There were sixty-five couples present. Mr. and Mrs. Wallace M. Ross and Sergeant and Mrs. Harold F. McDonnell were the chaperones. The Techtonians furnished the music for the dancing from nine until two.

Freshmen served the refreshments at the Phi Beta Epsilon formal dance Saturday night. The one hundred couples present danced from ten until two to music by Eddie Bryant's orchestra. Mr. and Mrs. Charles Abbott acted as chaperones for the evening.

enough brains to laugh the thing off, in spite of this and that to the contrary. However, in spite of Dicky-bird's proclamation, we have to note that the so-called underdogs of the Institute are still dormant.

Before we close, some reference to the excellent example of yellow journalism handed around by those screamingly clever boys who run the Institute's supposedly humorous magazine should be made. Well, we guess we got a nice one to the button all right, all right, and all via the excruciatingly subtle genius of Danny Havens, which fairly shouted at your humble correspondent from the tiny yellow sheet.

The Lounger has a pretty mental picture of a motive glaring through a flimsy new article. What with dresses the way they are and everything, this is, no doubt, not beyond the ranges of possibility. Perhaps one of those things we can wait for, with the coming of beer.

Perhaps you noticed the beautiful irony of the statement which says something about evil thoughts, illiterate, biased, and uncontrolled children. As New Yorker so aptly put it, we're sick of one and half a dozen of the other.

Then there is the sharp economic division of periodicals. One is led to infer logically, that if THE TECH is a great big net loss, then the writer fondly supposed *Voo Doo* to be an equally great big gross profit. We are inclined to agree with the "gross" part, but that's as far as it goes.

As We Like It

SHUBERT THEATER

The DuBarry

Grace Moore is a beautiful woman and she has a lovely voice. To see and hear her against the background of gorgeous costumes, lavish settings, charming dances, and pretty melodies of The DuBarry is a real treat to one's eyes and ears. In gowns of gold and red and white, each more splendid than the one before, through songs sentimental and gay, Miss Moore is ever more fascinating, more completely mistress of her audience. She is the center of attraction in a production resplendent with color and beauty.

Jeanne, played by Miss Moore, starts out as a poor milliner who loses her heart and her job for a penniless poet. A misunderstanding arises between them when she is visited by the Count DuBarry and in a fit of anger the poet casts her out. The Count, who is not so blinded by her charms that he fails to recognize their value

THAT HAUNTING PROBLEM

ONCE again it appears that the question of war debts with all its complexities will be thrown into Congress. Recent press dispatches from Europe indicate that advances looking to a further reduction or a cancellation of debts have been made or will be made by the debtor nations. Both France and England have communicated with the United States, Greece has failed to make a payment due last Thursday, and Hungary has stated that it will be unable to meet an obligation of \$40,726 in principal and interest due on the 15th of next month.

President Hoover is returning to Washington where he will consider the notes that have been received and discuss the situation with cabinet members and congressional leaders. The inclusion of expected war debt collections in the budget for the current fiscal year complicates matters. In addition the last session of Congress overwhelmingly voted against further reductions in foreign debt payments.

The whole question of war debts is bound up with those of armaments and economic conditions. There is a sentiment in the United States against a further reduction or cancellation if the money otherwise devoted to a payment of debts would be used to increase war strength. This attitude is justified. On the other hand there is the fact that improved economic conditions will come but slowly if the debtor nations must continue to stagger under the great load of debts. The problem facing the Administration and Congress is indeed a knotty one.

IT ISN'T FAIR

THE Greek ideal in athletics has been the aim in all sports, minor and major, at Technology. Dr. Allan W. Rowe, '01, chairman of the Advisory Council on Athletics has stated on various occasions that even though the Institute is not always represented by winning teams, each man has the thrill and experience that comes with competing in an athletic contest.

The Greek ideal with its emphasis on athletics for bodily development alone, does not imply that every effort should not be extended toward putting up a good battle and keeping in good physical shape. Oscar Hedlund, head Track coach has said that for the first part of a race Technology athletes show up well, but toward the end they frequently wilt completely. There is but one disease with these symptoms, poor training. We admit that for the most part this is unavoidable, the demands upon students by the Institute makes it difficult to get the proper amount of sleep necessary to be in excellent physical condition.

Over the past week-end an Institute team displayed just this weakness. The cause of the failure was due not only to the difficulty just mentioned, but to a flagrant lack of team spirit which was shown by certain individuals the evening before. When a man has reached his second year in college, if he is to compete, he should be able to resist the temptation of staying up till three o'clock the night before a game to attend some social function. The practice should be stopped for it is fair neither to his team mates nor to Technology.

ELECTIONS AND PROMOTIONS

THE TECH announces the election and promotion of the following men to its staff:

Associate News Editor: Richard Taylor, '34.

Features Writer: Paul G. Herkart, '35.

News Writer: Robert J. Marks, '36.

Reporters: John A. Bartol, '36; Richard L. Odiorne, '36; Francis S. Peterson, '36; William H. Robinson, '36; Malcolm A. Porter, '35; August V. Mackro, '36; Anton E. Hittl, '36; Sidney Levine, '36; Vincent T. Estabrook, '36; Eugene H. Scheffelman, '36; William R. Saylor, '36; Ralph D. Morrison, '36; John P. Hamilton, '36.

Circulation Department Staff: Edward L. Pratt, '36; David F. Cobb, '35.

Business Service Staff: Roy G. Thomson, '36; Spencer Muras, '36.

Advertising Department Staff: Raymond B. Healy, '36; George J. Pearson, '36; Irving S. Underhill, '36; Herbert R. Winkler, '36; Paul B. Beal, '35.

It haunted clerks for generations

"The first of the month" used to be a time of feverish activity for ledger clerks. But the Bell System accounting staff—breaking away from tradition—simplified the keeping of accounts and rendering of monthly statements to customers.

They applied a modern system of rotation billing to the telephone business which now spreads this work evenly throughout the month. In cooperation with manufacturers, they devised special typewriters and bookkeeping machines. Thus they did away with inefficient rush and achieved greater accuracy, speed and neatness.

This is but one example of a point of view found throughout the Bell System. Even long accepted routine is constantly studied—it's always worth looking for the more efficient way!

BELL SYSTEM

A NATION-WIDE SYSTEM OF INTER-CONNECTING TELEPHONES

## Miss Alice T. Hunter Nominated For President Of Freshman Class

### Co-ed Presidential Candidate Interested in Outside Activities

For the first time in the history of the Institute a girl has been nominated for the position of class president. Miss Alice T. Hunter, one of the freshman co-eds, is listed among the nominees on the freshman election ballots.

Miss Hunter came to the Institute because she likes science and math. "After six years in a girls' school, I think Tech is the swellest place ever," Miss Hunter said. She feels that more girls interested in science do not come to Technology because they are afraid of the boys. She is in Course V, intends to major in chemistry, and wants to do research in this field after graduation.

As to class spirit, Miss Hunter does not agree with those who accuse the Institute of having no spirit. Technology has long been said to lack the atmosphere which is supposed to exist at other colleges. "From the things I've seen, there is as much spirit and activity here as there is in some liberal arts schools," Miss Hunter said. She also observed that men who do not live in the dorms miss a lot of this. Conditions almost require that commuters take little or no part in activities, because outside work does not start until five o'clock. Something should be done to remedy this situation, she stated.

According to Miss Hunter some of the co-eds are interested in gym work, but the gym is constantly in use, and the apparatus is never available to

MISS ALICE T. HUNTER

the girls. She is also interested in rifle practice, but there are not enough girls to join her in this sport.

Commenting on freshmen ties, Miss Hunter believes that the freshman class should wear the insignia as a mark of distinction. The girls, too, are willing to wear the school colors. On Field Day she and three other co-eds tried to get scarfs with Tech colors, but were unable to do so.

About her candidacy for class president she said, "They always try to make a girl secretary. I'm tired of being offered secretaryships." She was nominated for secretary of the Unity Club but declined.

Miss Hunter is the daughter of Frederick H. Hunter, an alumnus of the Institute, and a former member of its instructing staff.

## Open Forum

In opening its columns to letters addressed to the Editor, THE TECH does not guarantee publication of any communication nor does it necessarily endorse the opinions expressed. Letters on subjects of interest to the student body are welcome if signed. However, if the writer so desires, only the initials will appear on publication.

To the Editor of THE TECH:

Mr. Fossett's article in the November T.E.N. is the statement of the man at the head of Institute undergraduate activities and for this reason carries much weight. His predictions for Technology in the future are very interesting and will doubtless invite much comment. It is unfortunate, therefore, that Mr. Fossett's comment on the relative merits of dormitory and fraternity men should have received the prominence that Monday's issue of THE TECH gave it.

The efforts of the more enlightened elements in both groups have been directed for a number of years towards the removal of the unhealthy and undesirable sentiment which, they firmly believe, can react only to the detriment of Technology as a whole. We trust that THE TECH has no idea of reviving this issue — that in giving such undue prominence to the statement of Mr. Fossett, they did not foresee the consequences of such action. We have strong reason to believe that Mr. Fossett had no intention of raising this question — whether or not one group is superior to the other is a question that we believe beyond the powers of any undergraduate.

The feeling of cooperation and goodwill between the two groups has grown during the last few years and will continue to grow. We trust that unfortunate controversies such as this one will not interfere with its progress.

Yours truly,  
THOS. E. SHAUGHNESSY,  
Pres., Dorclan  
GEORGE HENNING, Jr.,  
Vice-Pres., Dorclan

## NOMINEES

THE TECH will gladly publish, in the Open Forum, letters from candidates in the coming elections or their supporters. In writing, it should be remembered that there is a ruling of the Institute Committee that electioneering is prohibited. However, before letters are printed the elections committee will be asked to pass on their status. To protect the candidates against disqualification those letters which the committee regards as electioneering material will not be published.

## FALES TO DESCRIBE EUROPEAN MACHINES

Professor Dean A. Fales, of the department of Mechanical Engineering, will describe the latest developments from the London and Paris automobile shows at the first meeting of the Society of Automotive Engineers Wednesday in Room 3-270. One of the more outstanding developments to be discussed is the new independently sprung wheels, a feature that will probably appear on 1934 automobile models.

Plans have been made to include as speakers at all meetings, men acquainted with the various branches in the automotive field. Movies of new car models before they are placed on the market are generally shown at meetings of the society.

James W. Vicary, '33, chairman of the organization, announced that the student chapter of Technology will join the Boston Branch of the national society in their regular monthly meetings.

## FROSH SOCCER TEAM BEATEN BY HARVARD

The Freshman Soccer team lost to the Crimson Booters Friday on the Coop Field which was wet and not conducive to good play. The score at the first half was 2-0, and at the end of the game, 4-0. Hamilton and Sanchez starred for Technology.

January 11	Harvard Freshmen	Here
January 14	Yale Freshmen	Away
February 10	Tufts Freshmen	Here
February 18	Bucksport	Here
February 25	Brown Freshmen	Here
March 4	Springfield Freshmen	Away

## INSTITUTE GYM TEAM SCHEDULE ANNOUNCED

Six meets and the Intercollegiates at Army will comprise the Gym Team schedule for the winter season. The team is practicing regularly even though the season is three months away. According to Coach Neudorf, Gym is one sport where the members must be in training all year round.

The seventeen freshmen candidates are developing rapidly and several meets are being scheduled for the first year men.

February 18	M. I. T. at Navy
February 25	M. I. T. at Army
March 3	Temple at M. I. T.
March 11	M. I. T. at Springfield
March 18	M. I. T. at Princeton
March 25	Dartmouth at M. I. T.
April 8	Intercollegiates at Army

## Intercollegiates

An advertisement in the "Claremont College Daily Life" read, "WANTED: two young men with sporting blood, a car and a knowledge of lower Main street, to take two seniors, brunettes, who want a taste of low life before they reap their sheepskins, to one of these places that allow smoking and stay open all night."

UNIVERSITY OF MISSOURI — The Dean of Women of this University recently decreed that no co-ed may speak to any male student on the street for more than three minutes at a time. According to the decree they must also have a chaperon.

## Runkleite Installs Microphone On Radio

Runkle again breaks into the spotlight, this time with a home broadcasting contraption. Not satisfied with standard broadcast reception, one of the inmates has installed a miniature microphone attached to a regular set. All the embryo Cab Calloways, Ben Bernies, Jimmie Wallingtons, etc., will have a chance to perfect their technique; that is, unless the objections advanced by the other inmates prove too objectionable.

The experimenters started Monday evening by placing the set on the window sill and conversing with the passers-by below. After a few minutes a paper bag filled with water descended from the room above, and the set was removed to a chair just inside the window. Broadcasting was not interrupted, however. Soon more precipitation of aqua occurred, and the window was closed, but still broadcasting continued.

*Stepping Out?*  
THEN COME TO THE  
SALEE MODERNE

Every evening you'll find the gay, young crowd you know gathered in this brilliantly modern supper room . . . savoring the delicious food . . . gliding over the polished sweep of floor to the swinging syncopation of the newest dance hits . . . played by

## How To Avoid BONERS

A CATARACT IS A TRAINED CAT

AND still they let him live! Even after he said a refugee was a man who took charge of prize fights! There's just one thing to do—and high time somebody did it. Introduce Bill Boner to a good pipe and good tobacco. A pipe helps a man get down to straight thinking. College men know, too, that there's one smoking tobacco without a rival. That's Edgeworth.\*

Here's an idea. Fill your pipe with Edgeworth Smoking Tobacco and light up. Now—take a good long puff. Ever try anything like that before? Of course not, for Edgeworth is a distinctive and different blend of fine old burleys.

Buy Edgeworth anywhere in two

forms—Edgeworth Ready-Rubbed and Edgeworth Plug Slice. All sizes —15c pocket package to pound humidior tin. If you'd like to try before you buy, write for a free sample packet. Address Larus & Bro. Co., 120 S. 22d St., Richmond, Va.

\*A recent investigation showed Edgeworth to be the favorite smoking tobacco at 42 out of 51 leading colleges.

## EDGEWORTH SMOKING TOBACCO

# CALENDAR

**Monday, November 14**  
 5:00 P. M. — Pi Delta Epsilon Meeting, West Lounge, Walker Memorial.

## FRESHMEN CAPTURE INTERCLASS MEET

**Freshmen Tally 84 Points to Win Annual Fall Interclass Track Meet**

Piling up a total of 84 points the freshmen trackmen completely routed the upper class rivals to win the annual fall interclass track meet by a large margin on the Tech Field Saturday afternoon. Second honors went to the Sophomores with 63 points, while the Juniors scored 42 points to finish far ahead of the Seniors who had but 11 counters in their favor.

In spite of the condition of the track which slowed up the runners considerably and made it difficult for those participating in the field events, a commendable showing made by everybody.

The points of the classes as scored in the events are tabulated below:

Event	'33	'34	'35	'36
100-yd. dash	0	0	8	7
220-yd. dash	0	0	10	5
440-yd. run	5	3	7	0
880-yd. run	0	4	5	5
1-mile run	0	0	0	15
2-mile run	2	10	3	0
High hurdles	0	9	0	0
Low hurdles	0	7	3	5
Shot put	0	1	9	5
High jump	0	5	0	10
Pole vault	4	0	4	4
Discus	0	0	6	9
Broad jump	0	3	0	12
Javeline	0	0	8	7
Totals	11	42	63	84

## FIRST DORM FORMAL SET FOR WEDNESDAY

Jack Marshand's orchestra, dancing from 9 to 2, and open house from 7 to 10 mark the Dorm formal planned for Friday night in the main hall of the Walker Memorial. Jack Marshand, who played at last year's Spring Interfraternity Conference Dance and at the Dorm Prom, will be present in person with his innumerable specialties to make the first Dorm formal dance a success. The admission price is two dollars which includes refreshments to be served during the intermission.

## WET GROUNDS CAUSE DEFEAT OF BOOTERS

The Technology Soccer team lost to Harvard Friday in a game played on the Crimson Field. The day was wet and dreary and the field was sloppy from past rains. As a result of this the Engineers were not able to cooperate as well as in past performances.

The last intercollegiate game of the varsity soccer team will be played against Clark University next Saturday at two o'clock on the Coop field.

### Technology Line-Up

Kaiser	Goal
Bateman	RFB
Forburg	LFB
Hanson	RHB
Kiddé (Captain)	CHB
Waram	LHB
Holladay	ROS

## TURNER SEES SLUMP IN MINING INDUSTRY

(Continued from page one)  
 money for the payment of these engineers is raised by subscription. Mr. Alexander stated that, of \$75,000 raised last year, was ninety-two percent of the money pledged. Of this amount \$63,000 was spent on payroll, \$2,300 for overhead, consisting of office supplies and miscellaneous. The overhead of the Committee was only 3.6%.

### Mining Society Banquet

The Mining Society will hold its first dinner meeting in Walker Faculty Dining Room this Thursday, November 17, at 6:15. Professor Morris will be the principal speaker and some tricks of magic are expected as another item on the program. The instructing staff will be well represented including Professor Hutchinson, department head of Mining and Metallurgy, and Prof. Lindgren, the head of the Geology department. All students who wish to be present are asked to leave their names in the office of Mining Department in the second floor of Building 8.

## As We Like It

(Continued from page two)  
 in gold, rescues her from a house of prostitution and makes her the Countess Dubarry. The fame of the Countess's beauty and wisdom reach the King of France who desires an evening with her. She makes the most of her opportunity, prolonging that evening into many, many evenings, thereby becoming the King's mistress and partial ruler of France. The atmosphere of court life at the time of Louis XV is provided by the luxuriant, ornate settings with their royal color and decoration, by the rich, dazzling costumes, the powdered wigs, the smooth galantries, and an excellent group of dancers who make the most of the minuet and the ballet.

Gustave, the old Marquis, and Margot, his mistress with ambitions to play Cleopatra, provide the humor in the production. With their gags and their burlesque, they add a modern touch to the operetta.

D. V. R.

## FACULTY VOTES SALARY FUND FOR EMERGENCY

(Continued from page one)  
 been greatly reduced during the depression.

The staff as a whole has already suffered a very considerable reduction in income from such work, even though the Institute salaries have, up to now, remained unchanged.

**THE SEA WOLF**  
 "Nature in the Raw"—as portrayed by the noted artist, N. C. Wyeth... inspired by the infamous Captain Kidd's fierce raids on the gold-laden Spanish galleons (1696), which made him the scourge of the Spanish Main. "Nature in the Raw is Seldom Mild"—and raw tobaccos have no place in cigarettes.

**No raw tobaccos in Luckies —that's why they're so mild**

WE buy the finest, the very finest tobaccos in all the world—but that does not explain why folks everywhere regard Lucky Strike as the mildest cigarette. The fact is, we never overlook the truth that "Nature in the Raw is Seldom Mild"—so these fine tobaccos, after proper aging and mellowing, are then given the benefit of that Lucky Strike purifying process, described by the words—"It's toasted". That's why folks in every city, town and hamlet say that Luckies are such mild cigarettes.

**"It's toasted"**  
 That package of mild Luckies
