ANNOUNCEMENT OF $500 SCHOLARSHIP MADE HERE

Award Also Provides for Three Years Employment After Graduation

A scholarship of $500, providing first-year tuition in the department of Building Construction at the Institute, has been established by the New England Branch of the Associated General Contractors of America, Leonard C. Watson, chairman of its educational committee, announced yesterday.

In addition to full tuition for the first year, the scholarship also provides payment for the student for a number of years after his graduation with the degree of Bachelor of Science in Building Construction.

Establishment of the scholarship, which will be awarded annually for five years beginning next fall, was made in the belief that specially trained engineers of exceptional ability will have a marked effect upon the future of the building industry by improving methods and reducing costs.

Special Questionnaires Available

Applications for the new scholarship must be made to the department of Building Construction at Technology, after May 32 weeks. Students will be supplied with a special questionnaire being charged to the architect and preparatory background. Applicants will be required to join the College Alumni Board examinations, and the 3% with the highest standing will then be notified to present themselves at Technology for a general examination, in which the winner of the scholarship will be chosen.

In commenting upon the great value of this scholarship, Professor Ross T. Twelker, chairman of the Building Construction Course at Technology, said:

"The building industry today stands at the crossroads of a new era. Building is primarily and fundamentally the art of estimating material with the process of efficiency and greater economy. The great key to building, to moments upon the demands of our times, must have a profound knowledge of the science of material, an expert in building, and an expert in the highest professional achievements."

JUNIOR PROM SIGN-UPS COMMENCE TODAY
**MASSACHUSETTS INSTITUTE OF TECHNOLOGY**

**ADDRESS OF THE TECH**

**OFFICE OF THE TECH**

Walter Memorial, Cambridge, Mass.

**Newspapers and Editions**

**Message from the Dean**

To the Class of 1934:

The question as to whether students at the Institute can successfully carry school work and at the same time develop an active and healthful undergraduate program of extracurricular activities is the subject of much discussion in the press of the country in recent years.

The students at the Institute are in an extraordinarily fortunate position, for the faculty recognizes fully the need for an adequate program of extracurricular activities and gives the matter the most serious consideration and attention. The administration of the Institute, under the supervision of the Health Education Committee, has been quite successful in bringing about a state of mind that is ideal for both study and play, and the students themselves have been quick to recognize the importance of this attitude and have cooperated fully in this work.

In emphasizing the need of the Institute at the present time, I said that there was no way in which these needs could be better met than by the establishment of a program of extracurricular activities. Today I should like to add that the establishment of such a program is not only desirable but necessary, and that the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.

The program of extracurricular activities is not only desirable but necessary, and the students themselves have a right to demand such a program.
**BEAVER BRAWN**

Most important of all sports events at Technology this week was the Olympic fencing competition, an event which the Engineers must enjoy from the spectator's point of view, rather than that of the competitor. It will give all six freshmen a hobby, a future interest and the pleasure of meeting the sports. It will be a pleasure to see the future fence artist, as the present. The team of the Engineers will be composed of six freshmen.

**TUNES & DANCES**

When the Engineers defeated the Engineers last Saturday afternoon, the engineers of the Beacon were greatly reduced. Some of the members of the engineer fencers, who are not familiar with the game of fencing, were much impressed by the skill and ability of the engineers. The engineers were greatly pleased with the performance of the engineer fencers, who were successful in winning the first match of the day.

**FOOTBALL HUDDLE**

**FOOTBALL HUDDLE**

Two Scholler, the only native German attending Brown, fully admits that it was his first time he attended a football game and that the players touched together that they thought they were offering a prayer in return to the American public.**
The smoke you like... is the smoke she likes for you!

"I like to see a man smoke a pipe!" You’ve heard your own girl say it, perhaps. You’ve even heard it wherever girls go together.

They puff away at our cigarettes. But they like to see us have a go at the "strawberrymen's smoke" —a companionable, time-passage pipe.

There is something satisfying about a pipe. It’s a slow, reflecting, thought-stirring smoke—a calm, relaxing, mental weapon. The hunter’s smoke, the fisherman’s smoke, the engineer’s smoke—at the end of a long day. The hunter’s smoke, the fisherman’s smoke, the engineer’s smoke, through and through.

And wise women who know their own tobacco tell you there’s no blend in which the machine cannot be used. It is a blend that will be as reliable as the oracle of Providence.

"EDGEEWORTH" SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its sweet, natural aroma chosen by Edgeworth's distinctive and exclusive dough process. Buy Edgeworth, any place you smoke.

A new feature for Edgeworth smokers is a pocket pipe packed with fine tobacco.
