Group Seeks To Revive Tech Show, Forced Into Open-Air Production Last Year

$100,000 LIABILITIES PAID BY INSTITUTE COMMITTEE

STATUS OF SHOW Amos Institute Activities In Doubt Since Bankruptcy

LAST SHOW GIVEN IN 1931

Indication of the revival of "Tech show," Institute theatrical activity, which was put on hold last year because of alleged financial difficulties, has come with the announcement of a meeting called for Dec. 10 in the gymnasium in which all men interested in the show may assemble to attend and discuss possibilities of its reopening. The meeting will be held in the first Lounge of Walker Memorial at 4 o'clock.

But long before the move has advanced or who are the men directly behind it, it is too early to tell. It is reported, however, that a former official of the show has drafted a scenario and several songs for the production in the even that the show is revived.

Oficially In Receivership

Tech official went into receivership last April and asked the Institute Committee to assume its obligations. On April 28th, the Institute Committee's reserve fund.

"It was decided at a meeting of the committee last year to hold the show this year, because of the desire expressed by the students in the fall of last year by an exhibition of their enthusiasm in the water by Walsall, captain of last year's crew, who, with the crew's officers and some former crew members, gave a short history of the Tech crew, explaining the procedure to be followed in the field day race, the crews will be able to use some powerful broadsides.

Varisty Harriers Have Five Meets on 1932 Schedule

Expect Powerful Squad Despite Loss of Jack Kearns and Gilman

Crosb Oakfalls' hurdler, handicap, and middle distance runner, is expecting the varisty cross-country teams to engage in a regular schedule.

Although faced with the loss by graduation of Gil Donohue and Jack Kearns, left, for the freshman squad, which faces a triangular meet at Harvard about the middle of the season, and the loss of last year's star, L. C. Slater, and some other promising runners, the Tech cross-country teams are engaging in a regular schedule.

Little is known so far of prospects for the freshman squad, which faces a schedule similar to that of last year's team, while the Sophomore cross-country teams are also expected to be a more evenly matched squad.

Voting Fellows Choose Institute For Year's Study

German and English Students to Perform Advanced Work in Specioscopy

Two International Research Fellows have selected the Technology as a center for advanced study in physics, Dr. William J. L. Faraday, from the Technische Hochschule in Hanover, Germany, has commenced work in spectroscopy with particular reference to photochemical reactions in the Bellini region, under the direction of Professor Grafton R. Harrison. Dr. W. H. R. Skilling, of the University of British Columbia, is devoting his attention to vacuum spectroscopy and thermodynamics, and work under the supervision of Professors Hevesy and J. C. Slater, head of the Department of Physics.

Dr. A. T. Young, of the University of Wisconsin has been appointed National Research Fellow at the Institute, and will carry on studies in theoretical physics under Dr. Slater.

"Develop Integrity and Character," Dr. Compton Urges Incoming Students

HINTS AT DISHONEST POLITICAL METHODS AS SERIOUS MENACE

"We hope that you have and will further retain the unselfish, disinterested, and conscientious character that you will act honestly and uncorruptedly - and will be quick to recognize and avow mistakes," said President Compton in his welcoming address to the incoming class on Monday afternoon. "The point is that there are two types of ethics, a high ideal of integrity is a great asset to society; we should practice with ourselves and re- mains the duty of all who desire to be gentlemen," he advised them.

"The meeting, which is held annualy as an official welcome to the incoming class, was held in Room 10-256 and covered for the most part the entire class. Professor Woods, chairman of the faculty, addressed the new men, urging them to strive for close relationships both with their classmates and their instructors. He commented certain rules for success at the Institute, concluding with a plea to keep up a high standard of scholarship.

Stresses Fundamental Honesty

"If you have no honesty, you have no chance for success in the Engineering School, particularly in the Engineering School, and, I will illustrate it politically, in business, in your profession, and in your school life.

"In business as well as in politics, a man of the faculty, also addressed the incoming class. He said:

"During the past two years, everyone has been aware of the necessity for honesty in business. Similarly our government must practice honesty. "And the principle at the core of a more dangerous and insidious type of dishonesty, and I will illustrate it in politics, in business, in your profession, and in your school life.

WHY ACTIVITIES?

A

DOMINATING advice par excellence is an art, and as President Little once said at the Freshman assembly, "The Freshmen, S. B. Woods, Chairman of the faculty is profuse in that art. In a few weeks and a few hours of the Freshman period we endeavor to teach the official welcome of the administration to the incoming class, Professor Woods said, and from the three years which have been spent in a successful scholastic career at the Institute. The elements seemed so well chosen that we present them here.

Admiration is a hard school; there are few graduates who can say that they were able to finish without doing some great things and that most of them are products of that going through with them. To begin with, he must have a real interest in his work. Un- levered, he cannot do much even if he finishes his work here. It will be almost impossible for him to complete the series of courses that have been laid out for him to finish his work here, it will be almost impossible for him to complete his studies in the first two years. A young man, the potential bold, bad, and dangerous.

Why Activities?

A

is stated in the news columns of today's paper, the Tech is holding a mass meeting tomorrow afternoon for all new members of the class. The purpose seems to have been to inform the official welcome of the administration to the incoming class, Professor Woods said, and from the three years which have been spent in a successful scholastic career at the Institute. The elements seemed so well chosen that we present them here.

“TECHNOLOGY'S LEADING ACTIVITY”

Walker Memorial
To Be Alive With Social Activities

Most Desirable Evenings Taken By Campus Organizations: Some Held Open

Social events of a general nature will not be lacking in the life of the undergraduates this year, according to the Walker Memorial Committees. Yesterday Edward L. Coile, Jr., chairman of the committee, stated that practically all of the desirable evenings for the year in the Walker Memorial have been engaged for the fall semester.

Friday evening, most desired for dances, is most in demand. According to Coile, not all arrangements have been definitely completed, due to the fact that the committees desire that campus organizations to have a fair share of desirable evenings. From now on requests that all clubs make their requests for evenings as soon as possible, so that the calendar year will be properly completed.

Among the more popular features for the year are the All Technology smoker, held in Christ's, and the Christmas concert and dance, December 3; the senior dance, January 13; the annual Dorn dinner dance, February 28; the sophomore dinner dance, February 12; the junior Prom, March 17; the spring concert and dance, April 11; and the activities to date, May 6.

DORN ATHLETIC SEASON STARTS IN COMING WEEK

Flaring the first actual competition in the school will take place the week of next week in the Demus, in the form of a switched team tournament. Manager Ed roller has scheduled ten teams which will be posted im-

ely, and the hall teams will be in the necessary hall and bat at the box, when they desire to prac-

Field Day Planning With Mass Meeting

Sophomores Hope to Wipe Out Defeat of Last Year With Victory

A Freshmen mass meeting will take place Tuesday, October 4, at 5:00 o'clock in the afternoon in Room 205 in an effort to planField Day. Talks will be given by the coaches of the various sports, and the meeting will be conducted by Edward L. Arndt, '34, president of the Junior class.

In order to increase the enthusiasm of the entering class, cheers will be led by the following freshmen: Ernest Sheldon, section 2; Wilford Post, section 8; W. Bode, section 5; C. Holman, section 2; and F. Peterson, section 10.

The customary election of section leaders will be held next week during the mass meetings. Instead of electing one man to represent each section, it is expected that the students in each section will be divided into three men by lot and these men will elect three men.

Two more freshmen mass meetings have been announced, one to be held the day before Field Day; the date of the other is yet indefinite.

The Sophomores have been planning since Monday and methods to wipe out their defeat last year by a victory over the Class of 1936. Ideas will be presented at a Sophomore mass meeting in room 18:256, at 5:00 o'clock, Tuesday afternoon, October 5. President Edward J. Callins, '33, of the Sophomore class will preside. Another pep meeting is scheduled for the Sophomore the day before the big tussle in room 5:280, last year.

COES AND STODDER
MEN'S SHOES

A wonderful assortment of shoes of the better grade, each an outstanding value at its price, are to be found here. They are specially designed to meet the needs of College Men.

As an inducement to make this your footwear headquarters we offer TECH STUDENTS A 12% DISCOUNT from our list prices on each purchase.

THE CALL
OF THE WILD

"Nature in the Raw"—as portrayed by Paul Bunyan, America's forest animal painter—inspired by the songs struggled between the freedom wild dog and the vicious wolf... as described in Jack London's famous novel of conflict against crude nature in the frozen north.

and raw tobaccos have no place in cigarettes

They are not present in Luckies... the mildest cigarette you ever smoked

WE buy the finest, the very finest tobaccos in all the world—but that does not explain why folks everywhere regard Lucky Strike as the mildest cigarette. The fact is, we never overlook the truth that "Nature in the Raw is Seldom Mild"—so these fine tobaccos, after proper aging and mellowing, are then given the benefit of that Lucky Strike purifying process, described by the words—"It's toasted". That's why folks in every city, town and hamlet say that Luckies are such mild cigarettes.

"It's toasted"
That package of mild Luckies

If you write a letter, brush a letter, or make a letter out of clay then sculpt, he building his barn in the wood, a man will make a better pall in his name—"RAFAEL WALTVO EMEMES".

Does not this explain the world-wide acceptance and approval of Lucky Strikes?
