SOCIAL SCIENCE WORK FROM OVERSEAS

LAWRENCE G. ROBBINS

A Member of the Board of Education of the University of the Stateof New York

Professor of Political Science, Cornell University...
MASSACHUSETTS INSTITUTE OF TECHNOLOGY

STRAW, straw, straw! It seems that everybody is holding a straw vote, and not to be outdone THE TECH is sponsoring a straw vote to determine which candidates two weeks before the regular election day. On Tuesday, October 25, every student and faculty member of the Institute will have a chance to express his preference for president.

How many young engineers at Technology feel that our Engineers Club, such as it is, could be done under the circumstances and should be returned to the White House and control. And how many students at the country's foremost engineering school believe that the time has come for Roosevelt's 'New Deal'? The Engineers Club, the Freshmen and the Socialist Party should receive their support. How many would vote in favor of these associations? These are all questions whose answers would be interesting facts to students at the Institute because they are part of the group which would make the answer. They would be interesting answers to those outside, too, for they wonder how the technical student feels about the present political conditions.

So that we shall not be voting in the dark, as it were, in the issues preceding the day set for the straw vote, statements from the various parties explaining the platforms upon which they make their appeals for votes and containing any special desires in regard to technical students will be held twice a week, and those who have short parts will not have to be held twice a week, and those who have short parts will not have to

does it mean anything?
The appearance of some seventeen men, all Sophomores, at the meeting called this week to begin competition for positions on the Walker Memorial Committee may have no significance, but it probably has. Those men who have had a chance to become acquainted with the Institute a little more than have the freshmen even with their Freshman Camp and All-Technology Sophomore have apparently realized the function that activities have in the life of a college man. Having failed to become connected with any undergraduate activity during their first year or having been eliminated from the various activities explaining the platforms upon which they make their appeals for votes and containing any special desires in regard to technical students will be held twice a week, and those who have short parts will not have to

CAPTAIN KNIGHT SPEAKS AS GUEST AT A.E.S. SMOKER

Subject of Lecture Will Be Air Corps Training

FREE PLANE RIDE GIVEN

Meetings tonight for the first time this year, the old and new members of the Aero-Technology Engineers Club will hear a lecture by Captain J. H. Stockmayer, 35, who is at present a member of the Air Corps training, available from the Army Air Corps train-
in the various steps of training the Engineers. Captain Knight, who has experience advanced flying, "aerobatics", gun-

desired flying division of the army—bombing, pursuit, attack or observation. Here also the cadet learns specialized flying— he is attached to one of the various desirable divisions of the army—bombing, pursuit, attack or observation. Here also the cadet learns specialized flying—one is attached to one of the various desirable divisions of the army—bombing, pursuit, attack or observation.

D R A M A S H O P HOLDS FINAL TRUITS

The final truists for the dream

"The Pigeon" will be held this afternoon, October 14, in Room 215. The managers state that there still are opportunities for men to play parts in the production. There are all types of parts, from long and short, character and straight. Rehearsals will be held twice a week, and those who have only one of the various desirable divisions of the army—bombing, pursuit, attack or observation. Here also the cadet learns specialized flying—one is attached to one of the various desirable divisions of the army—bombing, pursuit, attack or observation.

different activities of their teams. They are to make it possible for them to come out during the second year to get something of life as well as from study in Technology.

CLASS SPIRIT

WTH Field Day only two weeks away, there is still a scararity of men in some of the events. Both of the tug-of-war teams are without a second string. Neither of the teams are having a fair chance. For class numerals of the spur of class spirit seems to fill out the squads for the activities which are really weak in the response to the call for more candidates. All of the other events have complete teams, but there is still room for more competition.

"You call it America's pipe tobacco!"

ANOTHER PESIOMER

...AND HERE'S WHY:

Granger is made of White Burley Tobacco—the type between the kind used for chewing and the kind used for cigarettes.

In other words, it's pipe tobacco—and if you're smoking a pipe, you want tobacco made for pipes—not tobacco made for something else, it matters not how good it is.
One Smoker tells Another

CHESTERFIELD are Milder, They Taste Better
— the things smokers want most in a cigarette

CHESTERFIELD there is no harshness—no bitterness.
They are made from ripe, sweet Domestics tobaccos and the
right amount of Turkish. The taste and aroma are just right.
Depression Causes Drastic Changes In Cooperative Course
Professor Timble Announces New Policy For VI-A

That Course VI-A would continue the current depression and resume its former style of co-operative work, was yesterday expressed by Professor Timble, in charge of the co-operative branch of the Electrical Engineering Course. In contrast to former years, this course has at present, no real co-operative work for its students.

In view of the present hard times, said Professor Timble, it would be unfair both to the student and to the workingman to continue the co-operative course. The student would suffer, he said, because he could work only 3 or 4 days a week, and the workingman, because he would be deprived of a job when employment was scarce.

However, the course has been altered so that students will miss none of the work for which the course calls. Instead of alternating work and study, students will pursue a course specially devised to meet the circumstances. Professor Timble estimates that conditions will have improved sufficiently by next October to warrant a return to the regular course.

In anticipation of prosperity's return, the companies co-operating with the Institute have reduced their quota of men for employment. At present, Professor Timble, who is teaching this course, estimates that the course will take a year graduate course which will be an equivalent to the co-operative work he has been forced to forego. In answer to the question, "What if the depression doesn't end as soon as anticipated?" Professor Timble smiled and replied that if it doesn't there will be no Institute left to worry about it. However, he wished and expected all would go well as the impending presidential election "turned out right."

CATHOLIC CLUB WILL EXTEND TIME LIMIT
Extending the time limit of its membership drive for two more weeks, the Technology Catholic Club offered its members an additional opportunity of winning one of the three prizes offered. The first prize winning of the cash has been announced and will be held next Wednesday, October 18. Already the largest undergraduate Club at the Institute, the Technology Catholic Club hopes to make a record-breaking enrollment this year.

Students have been grouped in teams of four, the teams then going out to win new members. The prizes offered are: the winning team and man gets free admission to all dances; the second team and man will receive free admission to all dances; the third team gets admission to all formal dances.

Meeting of the Student Council.

The Student Council met yesterday evening in the Elks Club. The meeting was called to order by Vice-President of the Student Council, Mr. Patel, who presided over the meeting. The minutes of the last meeting were read and approved. President of the Student Council, Mr. Randles, reported that the Student Council had been invited to attend the opening session of the annual meeting of the Massachusetts Conference of Student Councils, which will be held next Wednesday, October 18.

The Student Council voted to send a representative to the meeting of the Massachusetts Conference of Student Councils. The representative was to be selected by the Executive Committee of the Student Council.

The Student Council also discussed the matter of the Student Council's relationship with the Massachusetts Conference of Student Councils. It was agreed that the Student Council should maintain a close relationship with the Massachusetts Conference of Student Councils and that the Student Council should send a representative to the annual meeting of the Massachusetts Conference of Student Councils.

The Student Council adjourned.
