Huge Vote Expected At Institute Presidential Straw Ballot Tomorrow

Rivalry Between Lower Classmen Rising Rapidly

Both Classes Confident of Victory. Field Day Draws Near

Recent evidences of increasing rivalry between the lower classes are being indicated by last Thursday's quadball, founded in "struggle" and "blinds," with all the fraternities playing. Both classes feel sure of victory, and the efforts of the faculty and the enthusiasm of the students are much enhanced. As indicated in last Thursday's play, the game will be under no atmosphere of ill-feeling and the enthusiasm regarded as necessary to the healthy development of the School. The Field Day promises to be a thrilling one.

Point Values of Events

The events will have the same point values as they did last year: football, 60; tennis, 30; track meet, 20; basketball, 10; and baseball, 5. The games of the Field Day will consist of a 60-point game, a 30-point game, and a 20-point game. The basketball game will be played on the same day as the track meet, and the baseball game will be played on the same day as the basketball game. The football game will be played on the same day as the track meet.

Nearly Riot Initiated Between Rival Crews At M. I. T. Track Meet

Near Riot Initiated Between Rival Crews At M. I. T. Track Meet

The drawing of a freshman manager in the Charles River last Friday showed that the MIT track team is far from being a minor team. The team is composed of a number of experienced and able athletes, and it promises to be a strong contender in the Eastern track meet.

The team consists of the following members: John A. Smith, captain; William E. Johnson, co-captain; Charles H. Brown, manager; John D. Lee, assistant manager; John F. Brown, assistant manager; and Charles H. Brown, assistant manager. The team is coached by John D. Lee, who has been the coach for the past three years.

The team's most notable achievement was the victory over Harvard in the last meet, which was won by a score of 15-0. The team's next meet will be against Harvard in Boston, and it is expected to receive a strong challenge.

The team is well organized and trained, and it possesses a fine spirit of sportsmanship. It is expected to do well in the Eastern track meet, and it will be a strong contender for the championship.

The team's most notable achievement was the victory over Harvard in the last meet, which was won by a score of 15-0. The team's next meet will be against Harvard in Boston, and it is expected to receive a strong challenge.
The opportunity for sport substitutions for Physical Training is over. Although the final figures on sign-ups are not at hand, we understand that they are far below those of last year. Thursday at the usual time, the number were going out for one of the most popular sports at the Institute as in past years. A last minute stampede for the Gymnasium office before 12 o’clock on Friday filled the two teams to the brim on its usual basis.

It is rather a surprise and a disappointment to the coaches and teams that such a lack of interest is being shown by the Class of 1936 toward athletics. Adequate material means that there is a much better chance of turning out a winning team. The solution to the problem is this. Let the freshmen go out for the teams and then at the beginning of the second term substitute that sport for P.T.

Yoicks and Huzzah! Yoicks and Huzzah, gentlemen! We have proof amounting to facts that the Junior Prom will function as usual this year at the same old stand. This is, of course, the only logical conclusion to be drawn from the statement of the Institute Committee in accepting the resignation of Assistant Dean in the Junior Prom Committee.

It will be remembered, the Junior Prom went under financially. This caused the official stand of the committee to be such that they could not, in the future, accept the financial responsibility for the Fair, and therefore could not sanction it.

However, it is again apparent that the fine traditions of Technology have come to the fore. Not for the mere sum of a few paltry dollars will this ancient parade of Technology’s cheer and politesse be allowed to fade into the limbo of dead and forsaken things. One more Cancila-Community will roll through our austerely halls, brightening drab days of mechanical exactitude. Yoicks and Huzzah, gentlemen, for a Good Thing.

It’s Men Tomorrow will see Technology men making known their decision on the questions which face the voter in the national election. Almost every man at the Institute will have some knowledge of the questions which will be brought up at the polls.

Disappointing Sign-Ups

The platforms and aims of the two minor parties whose names will appear on the ballot have been published. Summaries of the programs advanced by the two major parties appear today. As can be seen from these, there is little actual difference in principle between the two. Party spirit and strong convictions of party leaders, however, are as rampant as ever and, indeed, would be there are of minor significance. The major issue is the man who would occupy the White House.

On this ground we believe men at Technology, students and faculty alike, must render a decision. Our decision will have some effect on the outcome of the national election, but it will be an indication of student thought on the political situation.

Give the matter some consideration. Reach a decision. Then vote tomorrow. Make your opinion count in the results which will be indicative of Technology political opinion.

Edgeworth is a everywhere.
**What on earth are you up to now?**

Finding things out, smarty! I thought I’d examine the tobacco in a cigarette.

"Look here...this is Chesterfield tobacco. Notice its lighter color...you don’t see any dark heavy types, do you? I guess that’s why Chesterfields are milder."

"I’m told that uniformly lighter color is due to cross-breeding. It sort of washes all the tobacco into one."

"And here’s something else. Notice that these long shreds are all cut the same width. It stands to reason they burn smoother and cooler."

"I don’t pretend to be an expert but it looks to me as if they make Chesterfields right."

"Here, light one. That’s the best test after all. They Satisfy."

_Cigarette that’s Milder and Tastes Better_
POLLS OPEN ALL DAY TODAY FOR VOTE

(Continued from page 2)

There has been a preponderance of requests for Hoover buttons and Republican campaign literature at THE TECH news office during the past week, but it is impossible to tell just what extent this is an indication of Hoover strength in the school. The recent Roosevelt handbill at the Liberal Club symposium may be reflected to some degree in the poll tomorrow although the total number of votes cast at the liberal club meeting were under one hundred and therefore many believe the results would have been called representative of the school.

Both Platforms In This Issue

The Republican and Democratic party candidates are appearing in this issue of THE TECH, concluding a series of four such articles which have been arranged by THE TECH for the information of its readers.

Technology is one of the 34 colleges attending this symposium, and it is expected that this equipment will be bought in the near future.

The Field Day teams have been making a better all-around showing in attendance and spirit since the last mass meeting, for a full quota has been seen daily working hard with the football and tug-of-war teams. Those men who participated in the Dormitory v. Menorah teams could hardly be called representative of the school.

SECTION LEADERS OF '36 TO MEET TODAY

An important meeting of all section leaders is being held today in room 4210 at 4 o'clock at which all representatives are expected to be present. This meeting is being held in preparation for the pep mass meeting which occurs on Thursday and a general preparation for Field Day, five days hence. Section leaders have been collecting twenty-five cents from each member of the class to be used in buying football equipment for the Field Day team, and it is expected that this equipment will be bought in the near future.
