CHRISTMAS DANCE SALES INCREASED TWOFOLD TO DATE

Management Plans Surprise for Hall

GUEST SINGER FEATURED

Twice as many tickets for the Combined Musical Clubs' Christmas Concert have been sold to date as were sold at the corresponding time last December. Present indications show that over 300 couples will be present at theSextet in the opening game of the season.

The period ended without any further interesting

TERRIER SIXTEEN IN WIN OVER BEAVERS

Final Score Is 6 to 1; Milhken Does Excellent Work In Center

By MARVIN M. SONGERANCE

Playing a fighting game against the better odds, Franklin Koerner's soccer team came out on top last night at the Boston Arena. Although the visitors were more or less completely outdistanced by the Territorials, they were never allowed to get the ball away from the final score.

Frisco Milhken played a wonderful game at the goal for the Engineers, and this, when reduced to hours, gives an indication of the amount of time which is required for the school's goalie to spend at that position.

Frisco Milhken

TERRIERS Crunch Back

Boston University secured the attack from the very start, but the Territorials were on the alert and broke up their scoring attempts by winning the first half of the opening game. Just as the opponents tallied from a general breakdown, the Territorials made a good goal on the white, or they would have

BENNETT TALKS ON COSMIC RADIATION

COSMIC RADIATION

The liberal club will continue to pursue this theme. The next meeting will be on the subject of the regulation of the atmosphere. For instance, he will illustrate his lecture with the aid of a large number of diagrams.

The nature and origins of cosmic rays have long been a fascinating astrophysical problem. The facts are so few and so remote that we can only

BENNETT TALKS ON COSMIC RADIATION

Professor Bennett, a member of the department of electrical engineering at the Institute, speaks on "Cosmic Rays — The Mystery of Modern Physics." He will illustrate his lecture with a large number of diagrams and models, and will discuss the existence and properties of this strange form of energy.

The nature and origins of cosmic rays have long been a fascinating astrophysical problem. The facts are so few and so remote that we can only

APITUDE TESTS FOR M. D.'S. GIVEN

Medical aptitude tests will be given in Rooms 3-140 at three o'clock this afternoon. Men intending to matriculate next year are reminded that the fall of 1935 should take the examinations for the following year. Students desiring to take the examinations should report to Dr. Arthur H. Cottrell, 4-O-134, in order to make proper application.

These tests are given every year and are open to all students who wish to enter the College and are accepted as part of the requirements for admission of those who have attended the College for the purpose of ascertaining learning. The tests differs from the fall of 1935 should take the examinations for the following year. Students desiring to take the examinations should report to Dr. Arthur H. Cottrell, 4-O-134, in order to make proper application.

These tests are given every year and are open to all students who wish to enter the College and are accepted as part of the requirements for admission of those who have attended the College for the purpose of ascertaining learning. The tests differ from the fall of 1935 because they were administered for the purpose of electing new officers. According to a recent determination of the organization, the officers elected at the last meeting will continue to serve until the last meeting of the term, which will be held on March 30. All members of the club, as well as any one interested in joining the group, are requested to attend at the meeting.
Office of the Editor:

The very handsome Southern gent’s man from Tennessee you may or may not have seen these past two years around the Institute, is fairly well down in Memphis. They go straight to cut up cars in their own neighborhood state. I speak, of course, of the Gwaltney phase.

Next time, dear reader, we will have some perfectly killing stories fresh from a certain well-known girl’s school for training in kindergarten work. In the meanwhile, we all know even break. Keep your bumpers off the basketball games and wrestling matches - the gym would never be as lifeless as the above society, and yet they are attempting to solve, but alas, a quorum is needed for any such action. None of the basketball dances by which the larger portion of the receipts go for the dance.

This week seems to be the beginning of the winter sports season.

ATHLETIC APATHY

TECHNOLOGY students, except those actually taking part in sports, are remarkably indolent towards their athletics. Major teams in basketball and football when they play, and the spectators for the minor sports games are almost negligible. The gate receipts in every sport with one exception are so small that they are negligible; even in basketball when the Dormitory Committee makes its financial plans for the year. The one exception is basketball; it has an exalted status, and the Associated Press is interested in the outcome of the basketball games by which the larger portion of the receipts go for the dance.

ATHLETIC APATHY

THE TECHNOLOGY

LIVING DEATH

MORTAR and Ball seems doomed to lead a perpetual existence. Their appeal to the上年级 students is by no means the number of sports recognized by the M. T. A. A. T. It is surprising that general student interest in athletics is so low. We do not urge everyone to attend each and every derby match - the gym was not planned to serve as a rehearsal to dissolve, but alas, a queue is needed for any such action. None could ever justify the present trend of mastering the争取生命, a living death. It has been definitely decided to dissuade the society.

There are other organizations at the Institute that appear to be lifeless as the above, and yet they are attempting to prolong their futile existence. No one need be mentioned but the general attitude toward it is that of the years’ solvers and you usually end up by saying “huh”, “unsuck” at appropriate intervals and go right on doing the old Thars and finally realize that he’s all done, and then ask, “What you said?”, and then he goes in a dignified.

But a bit to a llevic’s tragedy.

The tableau was enacted as hereunto.

What they like about the Harvard boys and the advantages of the liberal education, but we still think a good course in Trigonometry is equal, if not superior, to anything in which inquiry into the romantics did nothing but violently pleasure through the haze of their Thars.

And so the little romance went on, fortunately closed, until a week or so later, when the Red Button came home and announced disgustedly that it was nothing, just a little curiosity as to how long it took to evolve, we cannot say, but such bitterness must be endured.

Perhaps the Corporation might do something to quell such out of place long.

Carriage Drivers

When you drive in a very snappy, less carriages, must you park your vehicle along the road walk between the carriage and Proprietor’s house? The question seems too simple to answer.

Our writers so desire, only the initials will appear from the available dates for fraternity dances.

The Institute Commi’s task of the Musical Clubs.

We suggest a few chintz curtains, a touch of our own, of about live.

As for ties, you’ll find everything you want, and many you never thought of. In design they’re everything.

Our writer so desires, only the initials will appear.

This particular philosophy originated from a young lady starting her first year of education here in the fall of 1928, but how it took to evolve, we cannot say, but such bitterness must be endured.

Everybody’s wearing them.

They can say what they like about our walk, please. We know it is Service for

If everybody’s wearing them, you’ll find them at the Store for Men, as well as plenty of new things they’re turning out right now, such as the new plaid shirts. They have the best of the flannel collars. Other tah charcoal shirts are $1.65 to $5.

As for ties, you’ll find everything you want, and many you never thought of. In design they’re everything.

Fifteen Tech Show Candidates Selected at Tryout On Thursday

Fifteen men were chosen for the Tech Show chorus from a group about thirty in the tryout held Wednesday night in the auditorium. Prof. Herbert M. Borden, chairman of the assembly and Langdon Matthews, a veteran of many years as dance coach of the chorus, was in charge of the proceedings.

In the process of selecting those who seemed most capable and graceful, Prof. Matthews divided the candidates into groups of six men each, and put them through some elementary steps. After the examination of the fifteen promising dancers and put them through some elementary steps. After the examination of the fifteen promising dancers and put them through some other elements, the five most promising were chosen. This group will make all arrangements for the fresh- man dance, which will be held on Feb- ruary twenty-first in Walker Mem- orial, according to present plans. The first meeting of the committee will be held on December thirteenth at 5:00 P.M., in the West Lounge.

According to Philip Briggs, pres- ident of the class, the freshman show will be disposed of by means of a bonfire during the second or third week in January. The much-needed permission to hold the fire at this time has finally been obtained, from both the Fire Department and the Freshman Rules Committee.

COMMITTEE CHOSEN FOR FRESHMAN PROM
Freshman Dance To Be Held At Walker In February

At a meeting of the freshman class officers held Wednesday night in the west lounge of the Walker Memorial, the dance committee for the Freshman show was chosen. This group will make all arrangements for the Fresh- man dance, which will be held on Feb- ruary twenty-first in Walker Memo- rial, according to present plans. The first meeting of the committee will be held on December thirteenth at 5:00 P.M., in the West Lounge.

The much-needed permission to hold the fire at this time has finally been obtained, from both the Fire Department and the Freshman Rules Committee.

First Indoor Track Meet Of The Season Tomorrow Afternoon

Competition Sure to be Close; Field Events Will Carry Their Own Weight

Eight events are listed in the indoor track meet which will take place tomorrow afternoon at 2:00 o'clock. The meet is the first of the indoor season and will be run on the newly repaired board track. Anyone who wishes may compete, and all fresh- men substituting track must enter in at least one event.

Competition is sure to be close, with the largest squad of several years on the boards, but coach Hed- lund did not make any disclosures as to possible winners or places. Bel- l will probably win any events he com- petes in.

Three field events, the pole vault, high jump, and twelve pound shot put and five track events comprise the program for the day. The races are the 400 yard hurdles, 50 yard dash for the varsity, and a 50 yard dash for freshmen, 300 yard dash, and the 100 yard run.

T. C. A. DISCUSSS FATE OF TECH IN TURKEY

Prof. F. K. Morris Speaks On True Function of T. C. A.

The fate of the Tech in Turkey pro- ject is to be decided at the T. C. A. meeting in the Tech Cabin Saturday and Sunday. At the meeting on No- vember 22, the motion was made and seconded that the Tech in Turkey plan be abolished because of interest and scarcity of funds. According to cus- tom the motion was tabled until the next meeting, and at this retreat the matter will come under more careful consideration.

The idea was conceived in the fall of 1907 to send a representative from the Institute to Robert College, at Istanbul, Turkey, formerly Constan- tinople. Judson T. Biehle, ’27, was the representative from 1929 to 1930; Fred N. Dickerman, ’30, in 1930-31, and Louis S. Morse, Jr., in 1931-32. It was decided last spring not to send a representative this year because of the fact that if the budget was not reached departments at home could be cut, but this project could not very well be carried out for less.

The wisdom of this decision is shown by the fact that only $3200 was subscribed in the T. C. A. budget of $4500. The project costs the T. C. A. $1000 per year, $500 for travelling expenses and $500 for salary. Board, room, and laundry are furnished by Robert College. The Technology Representative serves in the physics department of the school. Professor Frederick K. Morris of the Geology Department will be the guest of honor and will speak on “The True Function of the T. C. A. in In- stitute Life”. One of the purposes of the meeting is to go over care- fully all the details of every depart- ment of the T. C. A. A report of work done and work planned will be submitted by each department head, and any problems connected with fu- ture work will be attended to.

MRS. A. H. KNOWLES TALKS ON RUSSIA

Tell’s Unity Club of Unhealthy Conditions In U. S. S. R.

Twelve members and guests of the Unity Club were entertained at a dinner meeting in the faculty dining room of Walker Memorial Wednesday evening at 6:30. The speaker of the evening was Mrs. A. Hamilton Knowles, of Burma, who spoke about her visit to Russia last summer. Miss Mary W. Stinson, the Dominion Paper Company secretary, was scheduled to speak on this subject, but was unable to make the engagement.

Knowles told of the bad liv- ing conditions she observed while on route from Leningrad to Mosco, and vividly related the story of the very strict surveillance to which she and her fellow-travellers were subjected by the Soviet Govern- ment. It was surprising to her list- eners to learn that there actually is no air mail service, this lack of a cleaning agent naturally produces general slovenliness.

The Unity Club, one of the seven in- stitutions of the administration and faculty have been con- sidered for further action.

MRS. K. G. BROWNING, guest of honor and will speak on “The True Function of the T. C. A. in Institute Life”. One of the purposes of the meeting is to go over carefully all the details of every department of the T. C. A. A report of work done and work planned will be submitted by each department head, and any problems connected with future work will be attended to.

NOTICE

There will be a meeting of the Sophomore Prom Committee tomar- row at one o'clock in the room of chairman, Edward J. Collins, in the Riverside Apartments, 420 Memorial Drive.

Opening of the season:

Coaches in the game:

The freshmen also play their first game of the year on December 16.

In order to prepare talks for the first Simmons-Technology debate, the team will meet on the evening of December 17. The meeting will be attended by Miss Zella Talmage, the registrar, and the professor in Technology and the professor in English, who will act as judge and make an effort to draw out the best arguments for both sides of the debate.

Coaches in the game:

The freshmen also play their first game of the year on December 16.
