

COMMUTERS' CLUB DISCONTINUES ITS WEEKLY MEETINGS

Meagre Attendance Is Cause Of Action According To Executive Committee

PROF. PRESCOTT SPEAKS

Commuters will no longer hold weekly luncheons in the North Hall of Walker according to an announcement made by the executive committee at the meeting of the association last Wednesday noon. At that time the meeting for Thursday was also cancelled.

Edward S. Goodridge, '33, chairman of the executive committee, said the reason for the discontinuation of the luncheons was the meagre attendance which they had attracted. On Wednesdays an average of thirty commuters attended the luncheons, while on Thursdays only half that number were usually present. To take the place of the weekly affairs meetings will be planned from time to time when good speakers can be secured; announcement of the first meeting of this type will soon be made.

Regional Clubs Functioning

Regional commuters' clubs have now begun to function, it was announced at Wednesday's meeting. The West Roxbury organization has completed plans for a dance to be held in the Emma Rogers Room on April 25, in addition to regular meetings every two weeks. Newton commuters also intend to hold a dance. In Arlington the commuters have organized baseball and bowling teams. Men who come from Melrose will have an or-

DORMITORIES ELECT NEW HALL CHAIRMEN

In results of the elections held yesterday for chairmen of the dormitory halls, the following men were chosen: Runkle, Gorham K. Crosby, '34; Atkinson, Alexander J. Rogowski, '34; Walcott, Leonard Shapiro, '34; Bemis, Charles H. Lucke, Jr., '34; Goodale, James L. Bennett, '34; Munroe, Arthur L. Conn, '34; Hayden, Edward K. Dougherty, '35; and Wood, Franklin H. Lobdell, '34.

Dr. Rimmer, Noted Evangelist, Is Speaker At Good Friday Meeting

"Is There Harmony Between Science and Religion" Is Question Discussed

Dr. Harry Rimmer, noted evangelist and bible expositor, has been secured by the Meetings Department of the Technology Christian Association to speak on the topic "Is There Harmony Between Science and Religion" in Room 10-250 at 4 o'clock today.

During the past two weeks Dr. Rimmer has spoken at Calvary Tabernacle in Watertown on the same topic, and at the Park Street Church, Boston. Besides being president of the Research Science Bureau, an organization with the purpose of making scientific expeditions to collect information to substantiate the Bible, he is a member of the American Geographical Society and an ordained minister.

His appeal as a speaker is shown by the fact that in the past twelve years he has spoken to more than three thousand student assemblies. Expression of Dr. Rimmer's qualities is contained in a letter by Dr. Albert G. Johnson, pastor of Temple Baptist Church, Detroit, Michigan, where Dr. Rimmer recently conducted evangelistic meetings. "... Personification of Christian cheerfulness; a man of remarkable powers of oratory and, to say the least, a brilliant mind." Invitations to attend the meeting have been sent to members of the Faculty and Administration and to all the dormitory men. Professor Ervin Kenison, of the Division of Drawing will preside at the meeting.

Bright Student Solves Closed Door Mystery

It takes a brainy man to figure out the doors on the Institute. 'Twas Wednesday afternoon when one such observed a certain gentleman having difficulties finding his way out of the buildings to go to Walker Memorial. This otherwise brilliant student was tugging away at the door from the inside, trying with all his might to budge it.

Then, along came one of the rare men who can grasp situations at a glance. He saw the vain efforts of the man on the inside. Intending to solve the trouble, he stepped right up, took hold of the handle, and with one motion opened the refractory door. It opened outward.

Musical Clubs To Broadcast Over National Hook-up

Program Will Originate At WBZ Saturday Afternoon At 3:00 O'Clock

The Musical Clubs will broadcast a program of selections over the Blue Network of the National Broadcasting Company next Saturday afternoon at 3:00 o'clock. The program will originate in the Studios of WBZ and will be heard over thirty-five associated stations including WJZ in New York. William E. Weston will direct the glee club and Arthur Conn, '34 will lead the Banjo Club. The program is as follows:

Glee Club:
Now Let Every Tongue Adore Thee.....Bach
Adoramus TePalestrina
Home On the Range.....Guion-Riegger
March of the Men of Harlech.....Welsh
Banjo Club:
Moment MusicalShubert
Sobre las ClasRosas
Soldier's FarewellSeredy

RUNKLE WINS OVER SIGMA CHI, 28 - 15

Crosby Is High Scorer As Dorm Men Forge Ahead In Final Period

Runkle Dormitory's team went on a scoring splurge in the last period of its game with the fraternity champions, Sigma Chi, and won the annual contest 28-15. The score stood at 15-all at the beginning of the last period, but from the opening whistle of the final quarter, the dormitory champions began to sink shots from all over the court, and they made thirteen points while holding Sigma Chi scoreless.

The game was very even for the most part. The end of the first half found the score tied at 11-all. In the third period, each team scored only four points, mostly on foul shots. The last minute drive by Runkle was started by King Crosby, who sank several shots from under the basket. Others who were prominent for Runkle were Kirk Miles, Manny Sayles, and Iggy Sbraga, who collected four baskets in the final period.

The high scorer for the evening was Crosby, with a total of ten points for the winners. Three men were tied for second honors with six points apiece, Miles and Sbraga of Runkle and Jack Vickery high scorer of the Sigma Chi quintet.

INACTIVE GROUPS TO LOSE STATUS

Fossett Warns Five Societies Action Will Be Taken In A Short Time

Richard L. Fossett, Jr., '33, president of the Institute Committee, last night issued this statement concerning inactive organizations at the Institute:

The following organizations have taken no steps toward settling questions of status put to them by the Institute Committee: Boat Club, Chess Club, Menorah Society, Photographic Society, Physical Society.

The Institute Committee reserves the right to consider withdrawing its recognition of these organizations if no notification of action taken by them is received on or before April 26, 1933.

(Signed)

Richard L. Fossett, Jr.

May Recognize Other Clubs

According to the Institute Committee the following organizations are not recognized, but recognition of any of these will be considered immediately upon the receipt of a constitution for the society:

Alpha Chi Sigma, Armenian Club, Burton Club, Club Sixteen, Commuter Association, Socialist Club, Unity Club.

April 26 is the last day on which constitutions will be accepted. All communications should be addressed to the Institute Committee, c/o Richard L. Fossett, Jr., M. I. T. Dormitories.

BEN BERNIE PLAYS AT SYMPHONY HALL

The T. C. A. has announced that it has tickets on sale for the concert to be presented by Ben Bernie and his orchestra at Symphony Hall next Tuesday. The Travellers' Aid Society is sponsoring the affair, which will include dancing from ten to two o'clock.

Penthouse Resident Moves Unexpectedly To Lavatory

One of the inmates of the sixth floor of Runkle penthouse arrived at his room Sunday afternoon to find he had unexpectedly moved. On the door was placed the cryptic legend: "Gotta Go". So the unfortunate went in search, expecting to find his belongings in the basement. Upon finding his new apartment he uttered a cry of joy.

He had been moved to the lavatory on that floor. The bed was ready for use, books were open on the desk, the bridge lamp was lit, the radio was operating, the bureau and bookcase were in place, pictures adorned the walls, and a very homelike atmosphere pervaded the scene. Advantages over the former location of the room included more floor space and running water. The only disadvantage was the absence of telephone service.

After photographs had been taken, the room was moved back to its former location, and peace again reigned.

Technique Raffle Winner Fails To Claim Redemption

Four Men Receive Yearbook At Half Price In Number Contest Tuesday

Only four of the five winning numbers drawn in the recent Technique raffle contest were redeemed by the lucky holders before the time limit for redemption expired at 5:00 o'clock last evening, it was announced by the Technique management last night. The lucky number whose owner did not claim a redemption was 227. According to the rules of the contest it is now too late to receive the reward on this number.

Faculty Club Will Hear Dr. Redlich

Harvard Professor Will Speak On European Situation

Dr. Joseph Redlich, former Minister of Finance in Austria and now a professor in the Harvard Law School will speak on "The Present Situation in Central Europe" at the Faculty Club luncheon meeting to be held next Friday in the North Dining Room of Walker Memorial.

Dr. Redlich, before he took up permanent residence in this country, was an exchange professor to Harvard University. He served as Finance Minister for Austria immediately following the war. He is a distinguished scholar in history, is recognized as an authority on English parliamentary law, and has been a lecturer before the Lowell Institute.

LECTURE ON AERIAL SURVEYING TODAY

Lieutenant J. F. Phillips of the United States Army Air Corps will deliver an illustrated lecture on "Aerial Photography and Aerial Surveying" at a joint meeting of the student branch of the American Society of Civil Engineers and the Air Corps unit of the R. O. T. C. to be held this afternoon at 2:00 o'clock in Room 1-190.

HAINES ANNOUNCES FINAL SELECTIONS FOR NAVY REGATTA

Crews Will Face Naval Academy Oarsmen At Annapolis On April 22

MEN IN GOOD CONDITION

Formal announcement of the forty-two varsity and freshmen to make the trip to Annapolis for the Navy Regatta on April 22 was made last night by Coach Bill Haines. Although no definite crews had been named until yesterday, most of the men that have been picked to represent Technology have been rowing together since the beginning of practice.

According to Coach Haines, it is hard to say how the heavy crew will fare against the Midshipmen, since the Navy calibre is practically unknown. An estimate can be made on Saturday when Navy stacks up against Princeton. According to reports, Princeton has one of the best crews in recent years.

Men In Fair Condition

As a further comment on the possibilities of his men, Haines said that their condition is not as good as he would have them, but as well as may be hoped considering the unusual bad weather and late spring. Al Dunning could not be reached to comment on the ability of his charges.

The varsity heavies include: Lucke, 1; Stueck, 2; Miller, 3; Bixby, 4; Glenn, 5; Wood, 6; Loomis, 7; Cook, stroke; and Humphries, coxswain. The junior varsity are: Packard, 1;

(Continued on page three)

TECHNOLOGY DAMES WILL OFFER PLAYS

Group Of Three One-Act Plays To Be Produced At Commons Room On April 28

The Dramatic Club of the Technology Dames and Technology Matrons will present a group of one-act plays at the Commons Room, Roger Building, on Friday, April 28. The program will include *Overtones* by Alice Gerstenberg, *The Maker of Dreams* by Oliphant Downs, and *Sweetheart Review* by Esther E. Olson. It is hoped that a large number of faculty members will be present. Tickets are seventy-five cents, and may be obtained at room 2-131. Checks should be made payable to the Dramatic Club.

If sufficient interest is shown, a permanent organization of those interested in dramatics is planned. Such an organization would include those members of the staff, the Technology Matrons, and Technology Dames who wish to participate in amateur dramatics.

A. E. S. VACATION PLANS COMPLETED

There only remains very little work to be done in rebuilding the new Franklin Utility glider which the Aeronautical Engineering Society recently acquired. The members of the Society have spent a considerable amount of time in preparing the ship for flight. Several new ribs have been built and put in place, and the wings are now in the process of being completely recovered.

As previously announced, the society plans to spend three days at the Framingham Airport and three days at the Greenfield ridge. At both places the Professor soaring plane and the new glider will be flown by the members.

Little notes of personal interest filter through this department at odd intervals, and this time the interest is certainly more than personal, at least to those members of the organic class of last term.

There used to be one fellow who had the inside track, apparently, to the three co-eds who took that course. At least it seemed that way to the rest of us jealous devils. However, we now discover, late as the date may be, that perhaps the intellectual plane of that combine was a little above our own status.

Always they sat in the same place, fifth row side, the blonde, the brunette and even the lad himself; always was there much ado, stirrings, and other bustling indicative of a gay old time; and always, as ever, did we wonder thereat. Now the secret is out. This triumvirate whiled away the dull hours of 5.41 with reciprocal love sonnets written in German.

While we are still fresh on the subject, more sidelights from the coeds' strata reveal heretofore unknown statistics concerning the Institute. All this, you must understand comes via our special underground grapevine, for which Hearst has made three offers already.

This time we have it straight that

the M. I. T. boys are the only ones for whom at least one coed has ever held a door open. They tell us that the situation was so bad for a while, when the coeds first entered, that if some enterprising individual had dusted off whatever manners he entered with, and had actually performed the service of holding the door, the girls would have been flabbergasted into demanding phone number, address and all the rest of it. Drop your glove, lady?

Going from the rough and tumble atmosphere of the biological department, we note the advertisements telling us to come one come all and hear Ben Bernie play at Symphony Hall. Oh horrors, where is the Watch and Ward Society? We knew this beer business would demoralize something!

MENORAH SOCIETY TO HOLD DANCE TUESDAY

The M. I. T. Menorah Society will hold its annual dance in the North Hall of Walker Memorial next Tuesday evening from 9:00 to 1:00 o'clock. The price of admission will be \$1.35 per couple; the tickets may be purchased at the door on the night of the dance or beforehand from any member of the dance committee.

Open Forum

In opening its columns to letters addressed to the Editor, THE TECH does not guarantee publication of any communication nor does it necessarily endorse the opinions expressed. Letters on subjects of interest to the student body are welcome if signed. However, if the writer so desires, only the initials will appear on publication.

To the Editor of THE TECH:

Dear Sir:

This is written with reference to the editorial "Technology Pacifism" appearing in last Tuesday's THE TECH. It is not my purpose to stir up the old war between the pacifists and the militarists, but to be helpful if possible in pointing out a few fundamental ideas, which all of our great statesmen have been guided by in order to help make our country the great nation that it is today.

It is indeed gratifying to know that young engineers in our colleges and universities have the intelligence to restrain themselves and give due consideration and thought to matters be-

(Continued on page three)

IT DOESN'T PAY

THE field of mathematics feels very deeply the loss of Raymond Paley. He was probably the most able of English mathematicians since the World War, and is known throughout scientific circles. Among other things, his death brings to an end some valuable research with Professor Wiener; if two excellent men are working together, it is nothing short of a tragedy when they are forced to stop.

Paley's death stands as a warning. The party with which he was skiing in Canada had been repeatedly warned not to go out alone. Paley, however, was an excellent skier, and had extreme confidence in himself. In common with many strong-willed men, he did not like to follow the beaten track, and never advance over his fellows. He went off on a journey of his own—his last journey. While he was near the top of a mountain he started an avalanche and was engulfed in it.

No matter how well we know our own abilities, it does not pay to take unnecessary chances. Luck plays a large part in life, and it is often unsafe to defy it. We should take heed from the example which we have here before us; science has lost a valuable man because he took a chance—and lost.

WHY NOT ELECTIONEERING?

IT is generally agreed that there is an all too apparent lack of interest in student affairs on the part of Technology undergraduates. The students appear to become interested in few activities aside from those which affect them directly. Perhaps this lack of interest in activities in general has come to include the student government. At any rate there is no denying that the actions of the Institute Committee are of little concern to the average student.

How is it that the students should show so little interest in the functioning of the government which is supposed to represent their opinion?

Is it not because the nature of our elections prevents the expression of student opinion and because the student has become accustomed to having his government run by a group of strangers? Our elections are carried out after merely publishing a list of the candidates. Attempts to present candidates at class mass meetings have failed because the conflicting schedules of large classes makes the attendance poor at such meetings. Once elected the action taken by the Institute Committee may very well be contrary to the desire of the majority of the students.

Last spring a group, who wished to have electioneering allowed in a restricted manner, presented a petition to the Institute Committee. The Committee refused to take any action until it was too late for the ruling to go into effect. Then the motion was brought up and was unanimously defeated. By means of a fresh petition the matter was referred to the student body in the spring elections. But the wording of the referendum was so obscure that its meaning was not apparent to a large number of the voters. The action of the Institute Committee was upheld. A check up reveals two significant facts. The vote on the referendum was very close while the action of the Institute Committee was unanimous. A large number admitted that they had been deceived by the wording on the ballots. It is our belief that, not only was the Institute Committee acting against the interests of the majority of the students, but that the failure of the referendum was due mainly to the wording of the ballots.

If the Technology student government is to assume its deserved importance this situation should be corrected as soon as possible. The evils of unrestrained electioneering are fully realized by everyone but our present system can hardly claim to be a great deal better.

The spring elections are near at hand. There has never been electioneering of any sort at the Institute. Would it not be well worth our while to try the experiment?

Another aid to business ... a Teletypewriter "Central"

Working out new ways to serve the communication needs of the public is an objective always in the minds of Bell System men. The new Teletypewriter Exchange Service—typing by wire—is an example.

For some years Private Wire Teletypewriter Service has speeded communication between separated units of many large organizations. Telephone men— anxious to make this service more widely useful— have now established Teletypewriter central offices, through which any subscriber to the service may be connected directly with any other subscriber. Both can type back and forth—their messages being reproduced simultaneously at each point.

This new service provides fast, dependable communication and does for the written word what telephone service does for the spoken word. It is one more Bell System contribution to business efficiency.

HANDICAP TRACK MEET TOMORROW

Nine Events Are Scheduled; Practice Every Day During Vacation

The first official meet of the outdoor track season will be held tomorrow afternoon at two-thirty o'clock. Nine events are scheduled to be run off, but unless the weather man has a change of heart they may not be run at all. However the meet will be held if it is physically possible to do so. If the cinders are not in good condition the meet will be transferred to the board track.

It will be a handicap meet, and should give the men some much needed practice. No less than twelve of the first thirteen days so far this season have been unsatisfactory. The season has just started, and the men are already six full days behind in their work, all because of bad weather. Oscar Hedlund and Bob Bowie are working as hard as they can, trying to get the team into condition for the first competitive meet of the season, the Greater Boston Intercollegiates, which will be held April 28 and 29.

In order to make up some of the lost time, practice will be held every day during the vacation at three o'clock. Coach Hedlund said that all men trying for positions on the team should be out every day during the vacation.

Summer Institute For Men and Women to be Given at Wellesley

"Our Economic Future" Will Be Subject Of Study During Month of July

An interesting expression of the modern trend toward adult education is the plan for a summer Institute to be held at Wellesley this July. The subject of the gathering will be: "Our Economic Future: Its Direction and Control". President Compton is among the prominent educators actively cooperating for the success of the project and besides being a member of the governing board has helped in the organization of an Admissions Committee, of which Mr. Natt W. Emerson is president.

Although enjoying the hospitality of the Campus, with its facilities for recreation as well as for study, the Institute will be independent of Wellesley in finances and control, and as far as possible, an equal number of men and women will participate.

It is hoped that potential leaders from different vocational groups may be brought together for stimulating well controlled discussions resulting in a thoughtful, unified effort toward a better social order.

It is hoped that, by means of interested men and women now being organized in cities in all parts of the United States to interpret the plans of the Institute to different communities, those best qualified may be attracted and persuaded to attend. From the list of applicants the Central Admissions Committee will invite one hundred and thirty members, so chosen as to maintain a balanced representation from all occupational groups.

FILMS OF FIRES TO BE SHOWN A.S.M.E.

Continuing the series of lectures and trips on the subject of fire protection engineering, the local branch of the American Society of Mechanical Engineers will present a four reel film of various fires and fire-fighting methods of Boston, next Monday afternoon at 4:30 in room 10-250.

A three-alarm fire on one of Boston's waterfronts, complete in every detail, will be the feature of the film. Lieutenant Donovan of the Boston Fire Department will be present to explain the films and answer any questions.

Oscar Hedlund Wins In Rainy Half-Mile Race

The story goes that Oscar Hedlund had just finished a particularly active game or two of squash. He was in a rather tired-looking mood, and he had reason to be. Seeing his plight, a student started to kid him about his condition. Oscar wouldn't stand for this.

"I'll take you on for half a mile," he said. He meant it. It was pouring cats and dogs on the track, but that didn't matter. Oscar Hedlund and his would-be ridiculer went out on the track for two laps through the rain and all. A running suit was all that anyone wore, and by the time that the race was over, the two were pretty well soaked. Incidentally, Oscar won his race by about twenty yards.

OPEN FORUM

(Continued from page two)

fore endorsing the so called "liberal movements and issues". For any new idea there can always be found a great number to endorse it, but the endorsers are usually composed of idealists, thrill seekers, the uninformed, natural radicals, and people who can't keep their heads above the water and consequently grasp in the air in hope of relieving the present unfortunate circumstances.

A pledge not to support one's country in an hour of need is one that deserves serious consideration. A man who for any reason fails to support a loyal friend in an hour of need is indeed no friend at all and despised by all. If one's country is a friend, providing protection, food, shelter, clothing, education, happiness and friends or any of a million other things, which it is assumed are such that one prefers to remain in his country, isn't it rather despicable to offer nothing in return for insuring a continuation of these things for one's self or for his friends and family?

Whether or not war is justifiable in certain cases is another question and certainly the decision rests in the hands of the people or their representatives in this country.

No doubt the basic R.O.T.C. course, like calculus and others, is not at all times pleasant and agreeable, but after it is all over most of us look back upon it as having been something worth while, if only from an individual point of view. Any one with physical defects is gladly excused, and so far no one has been subject to serious torture or had his growth stunted to any marked degree.

Frequently members of the advanced R.O.T.C. are approached with a question such as, "Do you take advanced R.O.T.C. because you like to 'boss' the freshmen or because you consider that a uniform improves your looks". Usually if asked in earnest, the only answer that penetrates this type is that "practical considerations" make the advanced R.O.T.C. desirable. Actually, however, it is not a fact even five per cent of the advanced R.O.T.C. students, who have been in the course more than one term, remain only because of "practical considerations". Furthermore it can not be truthfully said that members of the R.O.T.C. have caused over ten major wars, and since we are slightly well informed as to modern methods of warfare, and really human beings, for some reason we can't look upon war as a picnic. Nevertheless please allow us to plead innocent of being a pacifist in the sense used in the editorial.

Out of twenty thousand at Columbia University a mere four hundred students makes only about two per cent. How many of these are just young and in the formative period or how many are not citizens of this country we can not tell, but again it is gratifying to know that a great many years are to come before a great people of a great nation discontinue to consider it a privilege to fight under the Stars and Stripes and make secure forever a country we are justly proud of.

Douglas Johnston, '33.

HARVARD STICKMEN DEFEAT ENGINEERS

Technology Team Bows By 10-0 On Muddy Field; Geil Is Beaver Star

Harvard University's crack lacrosse team proved too strong for the Technology stickmen last Wednesday, and the Engineers came out on the short end of a 10-0 score, just the reverse of the result of their game with Boston University nearly two weeks ago. The game was played on the Harvard field, which is directly in back of the buildings of the Harvard Business School, in a pouring rain, and the field was so muddy and full of puddles that good playing was almost impossible.

The Crimson presented a well-balanced team which kept the ball in the Engineers' territory practically all of the game, and it was only fine work by Borger in the goal that saved several other scores. The famed Harvard defense lived up to expectations and prevented the Engineers from tallying, although there were times when it was in imminent danger of being scored upon.

Geil Stars For Beavers

Captain Geil was the star of the fine, aggressive brand of defensive playing, and aiding the attack men many times. Borger was the only other Engineer to star, and his work in the cage was seriously handicapped by the weather.

The next game for Technology will be against Tufts on the Coop Field tomorrow afternoon, and will probably be played despite the inclement weather. Tufts has already been defeated by the Boston Lacrosse Club.

HAINES SELECTS CREWS FOR RACE WITH MIDDIES

(Continued from page one)

Freiberg, 2; Seeleman, 3; Whitmore, 4; Loewenstein, 5; Graham, 6; Haskins, 7; Westfall, stroke; and Emery, coxswain; and the alternates are Roulston and Nashner.

The light crew is the same Sophomore boat that led the freshman crew on Field Day, with the exception of Captain Priggen, who is rowing in position 7. The others are Olson, 1; Burton, 2; Agnew, 3; Grant, 4; Rothen, 5; Haines, 6; Fassoulis, stroke; and Clark, coxswain. The substitutes are Miller and Becker.

The freshman crew as named by Al Dunning include Briggs, 1; Boulware, 2; Brown, 3; Wilcox, 4; Brooks, 5; Hermann, 6; Kuryla, 7; Johnson, stroke; and Kanters, coxswain.

Just for **FUN!**
Swagger into Havre

for \$110.50

A THREE-LETTER WORD meaning the time of your life... you'll find it in informal Tourist Class on mighty United States Liners. And it's fun with your own crowd... fun that's planned for Americans, by Americans, enjoyed with Americans! The broad decks of these great liners look just about like a college campus. Hail! (you'll say) The gang's all here!

And costs this year are good news for the pocketbook. Travel is cheaper (\$185 for a round trip to Europe); Europe's rate of exchange favors American dollars (for \$3 to \$6 a day you can live, travel and have a grand time).

Travel with your own crowd on these ships: *Leviathan*, *Manhattan* and *Washington* (Maiden Voyage May 10), world's fastest Cabin Liners; *President Harding*; *President Roosevelt*. Four "one class" American Merchant Liners direct to London. Fare \$90.

AVAKIAN REPRESENTS T.C.A. AT CONFERENCE

The Technology Christian Association has announced that A. Steve Avakian, '33, will represent it at the "London Economic Conference", sponsored by the Dartmouth Christian Association, beginning today.

Representatives from many New England Colleges will be present at the Conference. The topics to be discussed are similar to those discussed at the recent London Economic Conference; war debts and financial and commercial policies of nations with respect to trade.

Each delegate is to represent some country, and after having made a study of the problems under consideration, will present the view of that particular country on the subject. At the close of the Conference some agreement is expected to be reached concerning the problems. Mr. Avakian will represent the Trans-Caucasian States of the U. S. S. R.

COMMUTERS' CLUB WILL NOT HOLD MEETINGS

(Continued from page one)

organization meeting in the West Lounge tomorrow. The regional clubs are to elect representatives who will meet on April 18 to elect permanent officers for the Commuters' Association.

The speaker at the luncheon meeting last Wednesday was Professor Samuel C. Prescott, Dean of Science. His subject was "The good old times". Starting with the statement that reminiscence is the prerogative of old age, he described the Institute of forty years ago when he was a Senior. At that time the "Institute was not on the banks of the Charles, but on the 'banks' of Boylston Street."

According to the speaker drill was held in the drill shed where the Hotel Lenox now stands. The only activity was THE TECH, which had an office "up under the roof". Sports consisted of football, baseball and the Intercollegiates. Prof. Prescott said that when he was a student, it was not unusual for a man to have twelve three-hour exams in the mid-years and finals.

Bursar Ford has allowed the commuters to use a portion of the bulletin board in front of his office. In the future, notices of the association will be posted on this board.

Scabbard and Blade Elects New Officers

Edgar B. Chiswell, '34 Will Lead Organization During Coming Year

Edgar B. Chiswell, '34, has been elected captain of Scabbard and Blade, honorary military organization for advanced R. O. T. C. students, it was announced yesterday. William E. Coleman, '34, was chosen 1st Lieutenant, Ray P. Holland, '34, 2nd Lieutenant, and Aaron K. Redcay, '34, 1st Sergeant. These officers will lead the organization during the coming year.

The society held a smoker for all members of the advanced R. O. T. C. courses last evening in the West Lounge of Walker Memorial. Approximately fifty men were present at the affair.

On April 28th, the organization will hold its annual Spring dance.

SIGN-UP WINNER DOES NOT CLAIM NUMBER

(Continued from page one)
 The other lucky numbers, drawn by President Karl T. Compton last Tuesday, at five o'clock, were 228, 568, 663, and 681, which were redeemed by Carrol T. Newton, '33, Herman J. Shea, '33, Gilbert F. Tyler, G, and Theodore N. Rimbach, '34, respectively. The numbers were published in Tuesday's issue of THE TECH and purchasers deposited one of the duplicate numbers in the box from which the drawing was made. Holders of winning numbers received free re-

demptions for Technique by calling at the desk in the Main Lobby either last Tuesday or Wednesday.

The lucky number contest is a part of the publicity campaign being conducted by the yearbook. Last Tuesday red handbills appeared exhorting the "workers of the world" to "unite" in paying a "tax of two rubles (two hundred kopeks) to defray general costs of printing, distribution, etc. of the book." This redemption of sign-ups may be made at any time today in the Main Lobby or later at the Technique office on the third floor of Walker Memorial.

SIX ELECTED TO CHI EPSILON FRATERNITY

Six Juniors were recently elected to Chi Epsilon, national honorary civil engineering fraternity. They are: Wendell C. Allen, John G. Brunner, Emerson P. Kron, George W. Patch, Theodore N. Rimbach, and Norman P. Spofford. Members of the society are chosen primarily on the basis of scholarship and character. Six men are elected each semester from courses I and XI.

HOOVER DAM FILM TO BE SHOWN TOMORROW

A five reel motion picture of the latest construction work on the Hoover Dam will be shown under the auspices of the Civil Engineering Society tomorrow morning at eleven o'clock in Room 5-330. Handling of aggregate, mixing of concrete, lining the diversion tunnels, and the diversion of the Colorado River, are among the subjects treated in this picture.

ORDNANCE SOCIETY ELECTS OFFICERS

Constitution Amended To Allow Sophomores Taking MS 224 To Join Organization

The Army Ordnance Association at the Institute yesterday elected Carlton J. Cook, '34 president and Arthur K. Deming secretary-treasurer for the coming year. The Senior and Junior vice-presidents will be elected sometime next fall.

An amendment was made to the constitution of the association which will allow Sophomores taking MS 224 to join. A dinner meeting has been planned for May 2 in Walker Memorial at which Captain Hamilton from the Ordnance office in Boston will show a four reel film on "Cadet Days".

TODAY'S SHOW MYSTERIOUS BALL ROLLS UPHILL

1 I SAW A MAGICIAN MAKE A BALL ROLL UPHILL LAST NIGHT...WITHOUT TOUCHING IT. HE WAS SIMPLY WONDERFUL

2 WHAT SHE SAW—THE PERFORMER MAKES A BALL DEFY GRAVITY AND ROLL UP AN INCLINE AT HIS BIDDING. IT PAUSES... ROLLS DOWN... ROLLS UP AGAIN... OBEYING EVERY ORDER OF THE MAGICIAN.

3 DID HE DO IT BY RADIO REMOTE CONTROL OR THOUGHT WAVES? THAT'S THE BUNK GRACE. HERE'S THE REAL LOW-DOWN...

4 THE MAGICIAN DIDN'T HAVE ANYTHING TO DO WITH MAKING THE BALL PERFORM. THERE WAS A CONTORTIONIST INSIDE IT. BY SHIFTING HIS WEIGHT IN THE BALL, HE MADE IT GO.

5 (Illustration of a contortionist inside the ball)

6 MY GOODNESS BUT YOU'RE SMART, JOE. WON'T YOU HAVE A CIGARETTE? EXCUSE ME. I DON'T LIKE YOUR BRAND

7 BUT ISN'T THIS THE MILDEST KIND? THAT'S ANOTHER ILLUSION. DON'T YOU KNOW THAT IT'S THE TOBACCO THAT COUNTS? HERE, HAVE ONE OF MY CAMELS.

8 JOE, YOUR CAMEL IS MILD AND I LOVE THE TASTE, TOO. IT'S MORE FUN TO KNOW ISN'T IT?

CAMELS are made from finer, MORE EXPENSIVE tobaccos than any other popular brand. They are mild...easy on the throat. They give you more pleasure. Try Camels.
