

BELL ELECTED SENIOR PRESIDENT

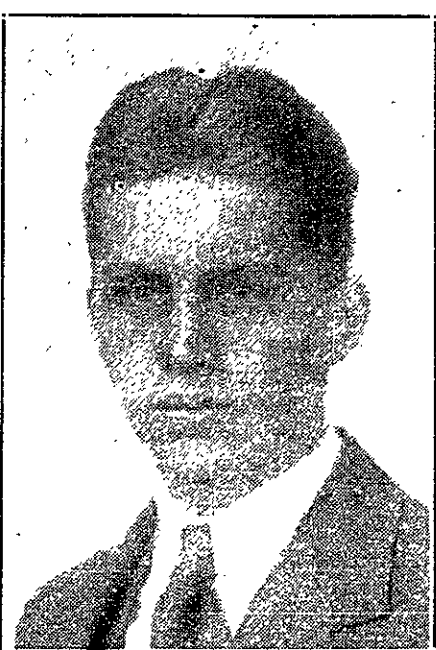

NEWLY ELECTED CLASS PRESIDENTS

RICHARD L. FOSSETT, JR., '33

RICHARD BELL, '34

WALTER H. STOCKMAYER, '35

PHILIP G. BRIGGS, '36

Stockmayer Wins Junior Presidency

Briggs Elected President Of Class Of 1936 For Second Time

HENNING BECOMES 1933 PERMANENT SECRETARY

Nine Hundred And Sixty-Two Cast Ballots At Annual Class Elections

Richard Bell was elected president of the class of 1934, and Walter H. Stockmayer and Philip G. Briggs were chosen presidents of the two lower classes in the annual spring elections announced at the Institute Committee meeting yesterday. Richard L. Fossett, Jr., was elected permanent president and George O. Henning, permanent secretary of the class of 1933.

Officers who will aid Bell in leading next year's senior class are Robert M. Emery, vice-president; Robert C. Becker, secretary; E. Philip Kron, treasurer; Edward P. Bromley and Henry D. Humphreys, members of the Institute Committee; and William G. Ball, Jr. and Proctor Wetherill, members of the Executive Committee.

Ballard, Bemis Re-elected

In the class of 1935, the other elections were: Donald C. Gutleben, vice-president; T. C. Dauphine, secretary; Cason Rucker, treasurer; John B. Ballard and Hal L. Bemis, members of the Institute Committee; and G. Fred Lincoln and G. Peter Grant members of the class executive committee. The following men were elected to the Beaver Key Society: Hal L. Bemis, Kenneth D. Finlayson, Bernard S. Freiberg, Wesley H. Loomis, Louis W. Pflanz, and Cason Rucker.

To lead the class of 1936, the freshmen elected Philip G. Briggs, president; Michael A. Kuryla, vice-president; William B. du Pont, secretary; Jack I. Hamilton, treasurer; John C. Austin and C. Donald Brown, representatives to the Institute Committee; and Henry Runkel and Fletcher P. Thornton, members of the class executive committee.

Bell Known As Track Star

Bell, the new president of the class of 1934, comes from St. Louis. He is especially well-known as the captain of the track team. He received the Technique Cup for highest point scoring last year, and is the I. C. 4-A in-

(Continued on page four)

VAUGHAN IS CHOSEN SWIMMING CAPTAIN

Frederick W. Vaughan of New York was elected captain of the swimming team for next year at the annual banquet in the Walker Memorial Grill last night.

Vaughan was one of the outstanding members of this year's team, and several times during the season he broke the Institute record for the 440-yard swim. He and Captain Flanders were the team's only consistent winners. Last night he was presented with a cup in recognition of the work he has done this year.

RUNNERS ENTERED IN G. B. I. C. GAMES

Varsity, Weakened By Loss Of Dick Bell, Is Picked To Take Third

Although weakened by the absence of Captain Dick Bell, a strong contingent of Technology track men will compete today and tomorrow in the fourth annual Greater Boston Intercollegiate at the Harvard Stadium. Coaches Hedlund and Bowie have entered about a hundred men in both the freshman and varsity games, and the teams are expected to do well in many events.

Fearing possible injury to his star sprinter, Hedlund has decided not to enter Dick Bell, who is not in the best of condition. Bell has nothing to lose by this move, for he is already acknowledged to be the best sprinter in New England and is pointing for the more important meets later in the season. His absence tomorrow, however, will cut down the team's strength considerably.

Team Picked Third

Six colleges are entered in the meet, the list including Harvard, Technology, Boston College, Boston University, Tufts, and Northeastern. Track experts of the Boston Transcript have picked Technology to finish third, behind Harvard and B. C.

Individual predictions find Walter Wrigley of the Engineers listed as

(Continued on page three)

Venerable Lizzie Dons New Spring Finery Early

Dormitory residents arriving at classes yesterday were struck by a kaleidoscope of color on what formerly was a respectable looking Model T Ford. During the night some merry little villains applied paint and brushes to the venerable lizzie, and the result was worthy of a place in a modernistic art gallery. Diagonally opposite fenders are red and yellow, the doors are red and green, and the hood boasts a beautiful orchid tint. The radiator is labeled "FIRE", and across the back the title "J. Gratz" identifies the chariot. Red curtains painted on all the rear windows complete the picture, an example of what a little time and ingenuity can create.

Technology Crew Faces Hard Test In Compton Race

Haines Will Use Same Crew That Lost To Navy; First Race At 2:30

Using the same oarsmen that lost to Navy a week ago, Coach Bill Haines will send his charges to match strokes with one of the best college eights in the East when Technology faces Princeton and Harvard on Saturday afternoon.

According to a statement issued by Coach Haines last night, it is hard to say what the Technology stalwarts will do on Saturday, although they have improved considerably since the last race. Nashner, who was inserted in the boat when Loomis was hurt, has fitted into the boat perfectly and the crew is working together with much better co-ordination.

Cup Presented Tonight

The Compton Cup races will be preceded this evening by a banquet being given at President Karl T. Compton's home. Richard L. Fossett, '33, president of the Senior class, will make the formal presentation of the cup to President Compton, as the representative of the student body.

Following the Varsity race, President Compton will present the cup to the captain of the winning crew. The regatta will start at 2:30 o'clock, when the three freshmen crews race over the 1 5-16 mile course. They will be followed by the Junior Varsity, 150's and Varsity at regular half-hour intervals. The varsity and junior varsity races will be over a mile and one-half course.

All of the Technology men rowing tomorrow also rowed against Navy. The varsity men are: 1, Lucke; 2, Stueck; 3, Miller; 4, Wood; 5, Nashner; 6, Whitmore; 7, Glenn; stroke, Cook; and coxswain, Humphreys. The junior varsity includes: 1, Packard; 2, Freiberg; 3, Seelman; 4, Bixby; 5, Loewenstein; 6, Graham; 7, Haskins; stroke, Westfall; and coxswain, Emery.

The men rowing in the light boat are: 1, Miller; 2, Burton; 3, Agnew; 4, Grant; 5, Rothen; 6, Fassoulis; 7, Priggen; stroke, Haines; and coxswain, Clarke. The yearling oarsmen are: 1, Brown; 2, Boulware; 3, Briggs; 4, Willeox; 5, Brooks; 6, Hermann; 7, Kuryla; stroke, Johnson; and coxswain, Kanters.

Technology Crew Men Resent Insult In Annapolis Theatre Demonstration

Dunning, Freshman Crew Coach, Runs Afoul Of Law On Following Day

When forty Technology crew men last week marched en masse into the Circle Theatre in Annapolis, the misgivings of the management were soon justified, for before the smoke had finally cleared away, a riot call had summoned six policemen and a patrol wagon to unceremoniously drag away two rather unobtrusive and quiet members of the party.

Prior to the appearance of the bluecoats, the Technology oarsmen had quietly watched a showing of "42nd Street", and outside of a little innocent amusement, had in no way indicated that anything untoward would happen in the remainder of the performance.

Picture Rouses Ire

Following the feature picture was a short subject pertaining to colonial days, and here the spark was kindled for the flare-up of a few seconds later. In a hunting scene the actors moved around in an atmosphere which struck the Institute men as vaguely familiar. Closer scrutiny revealed the Rankle Dormitory in the dim background, and when this fact had been verified by

further examination, the indignant group let out a whoop of protest.

Not until a squad car with six policemen had carried off two members of their party, and the rest of the group had followed on foot to the court, had the outburst subsided. By combining their financial resources they managed to pay off the fine imposed, and then wended their way back to the Naval Academy, where they were making their temporary residence.

Coach Also Visits Court

On the following day came the anticlimax to the incident, when Al Dunning, freshman crew coach, was given a ticket for parking his car on the wrong side of the street. When he came up before the judge for settlement of the case, he explained that he was unfamiliar with traffic rules in that city because he was from out-of-town.

The judge, who curiously enough had tried the case of the crew men on the previous night, was ready to adopt lenient measures towards the offender until he asked Dunning's business in the city. When Dunning told him he was a crew coach, the justice inquired the college.

"Technology," said Dunning. "Ten dollars," replied the judge, smiling grimly.

STRATTON PRIZE DATES ARE SET

Each Course Limited To Three Entrants For Competition On May 4, 5, 8, 9

Dates of the semi-final competitors for the Stratton Prize were recently announced by Dr. Samuel C. Prescott of the School of Biology and Public Health, and Chairman of the Faculty Committee on Stratton Prizes. The afternoons of May 4, 5, 8, and 9 are set aside for this purpose, the room number to be decided upon later.

Over fifteen student papers have already been presented before meetings of the individual professional societies, and a total of over thirty papers are expected during the four days of the semi-final competition, according to a statement made by Richard F. Warner, Jr., '33, Chairman of

(Continued on page two)

FAVOR FRESHMAN TIE REGULATIONS

Referendum Came As Result Of Laxity In Enforcement Last Term

Decisively showing its approval of freshman rules by a 662 to 240 vote, the student body in a referendum on the election ballots, also recorded itself in favor of their enforcement. This sounding of student opinion came as a result of the laxity in enforcement of freshman regulations last term.

The question concerning the tie ruling received the greatest majority in favor of continuance, 705 expressing themselves for it, with 183 against.

Favor Stricter Enforcement
If the general consensus of opinion had been opposed to the present measures regulating freshman conduct, the Institute Committee would probably

Someone has been flooding our mail with little thoughts of this and that, and then signing themselves Oscar Zilch. Unfortunately the literature under the signature is just about as original, and not half as funny, so we just wish he would stop it, we do.

There is however, something in his comment as regards the beer smell, Professor "Beaker Joe" Phelan is reputed to have said something when he remarked upon the unpleasantness of fermented beer on a table top. In point of fact, our little correspondent finds this so revolting in the Tech Drug Store that he has been forced to look for his meals in Walton's. Personally we find (after the old saying from New Yorker) that we are sick of one and half a dozen of the other.

There is something perennially refreshing and romantic in a freshman, much as there is in Spring. Something in their droll efforts at impressiveness, and damn the cost, calls to mind the sunlit period when we too were just that stage-struck that the guise of importance was worth more than much fine gold.

This one uses the news-room regularly, and consequently has some of the dash and flavour that goes, by rights, with a newspaperman on a large collegiate newspaper. He also is enamoured of some ravishing female who, it appears, is called Alice.

Well, to get on with it, THE TECH maintains a phone in the newsroom, the same which is surrounded by a booth. Our freshman descended to the office in a slack hour and called up the light of his soul, meanwhile closing the door on his companion, who was waiting for him. No one else was present.

After some talk had been exchanged between the twain, this other one became impatient, and proceeded to bang on the door. In the silence that followed he heard the man within say, a little hastily, perhaps, "Just a minute, Alice, the rest of the news room is interrupting."

In conclusion we wonder if the irony of the late elections has really been brought home as it should be. Robert M. Becker has been elected to office for three years. There are some vile slanderers who would attribute this to the fact that a name starting with "B" will stand well at the top of the ballot.

However, be that as it may, this year one Robert C. Becker also ran for the same office for the first time. He won.

K. T. COMPTON CUP IS HUNDRED YEARS OLD

Originally A Part Of Famous Wanamaker Collection

An interesting sidelight in regard to the Karl T. Compton Cup is the fact that it is at present one hundred and twenty years old. It is manufactured of Georgian silver, with a thin layer of gold plating. It was made by a London silversmith, and was originally a part of the Wanamaker collection.

The cup is intended to be awarded each year to the crew winning the triangular meet. By presenting the cup it is hoped to make a perpetual race between three institutions, and consequently make it a focal point of tradition. The Institute will pay for the engraving of names while there is room left, and will also pay for insurance costs.

Heavier Water Will Be Described At Meeting By Dr. G. N. Lewis

Isolation Of Hydrogen Isotope Results In Discovery Of New Water

Water which is much heavier than ordinary, and which has higher boiling and freezing points, will be described tomorrow by Dr. Gilbert N. Lewis, dean of the College of Chemistry at the University of California. The address will be given at the April meeting of the northeastern section of the American Chemical Society. Dr. Lewis will also attend the George Eastman Research Laboratories on Monday.

The preparation of the water has been made possible by the utilization of the hydrogen isotope, which has double the atomic weight of ordinary hydrogen, the isolation of the hydrogen isotope being an achievement in itself. The new water has a specific

gravity of 1.035 as compared to 1 of the ordinary kind.

Will Describe Isotope
The speech will describe the experiments which have been made to determine the properties of the isotope. These include exploration in the biological, physico-chemical, and spectroscopic fields. The isotope itself is so different from ordinary hydrogen in its behavior that it is regarded almost as a new element.

Dr. Lewis is a native of Massachusetts, and has taught at Technology for five years. His address will be preceded by an inspection of the new laboratories, and followed by a formal dinner at Walker Memorial in the evening. Among the distinguished scientists who will also be present at the dinner, which will be presided over by Dr. Allan W. Rowe, is Professor Arthur A. Noyes, of California Institute of Technology, and who was for many years a professor at Technology.

C. E. SOCIETY ELECTS OFFICERS

Technology Civil Engineering Society recently announced election of officers for the 1933-34 season. The newly elected men are: president, John Grayson Brunner, '34; vice-president, David Douglas Knox, '34; secretary, John Willard Patch, '34; and treasurer, Emerson Philip Kron, '34. The election was held by mail ballot.

The final banquet of the society will be held at the Hotel Commander, in Cambridge, on May 12, at 6:00 P. M.

FRATERNITIES ELECT CONFERENCE MEMBERS

Interfraternity Conference officers for the coming year were elected at a dinner meeting in Walker Memorial on April 11. Following is a list of the officers chosen: temporary chairman, Hoyt P. Steele, '34, Phi Gamma Delta; representative on the Institute Committee, Joseph L. Seligman, Jr., '34, Theta Chi; permanent secretary, Charles E. Buchanan, '34, Phi Mu Delta; and permanent treasurer, Hal J. Bemis, '35, Delta Psi.

These officers constitute the executive committee of the conference of fraternity presidents, which was recently formed as a result of the reorganization of the Interfraternity Conference.

GREEK CLUB OFFERS TWO SCHOLARSHIPS

Two one-hundred dollar scholarships have been offered to worthy students of Greek birth or descent by the Greek-American Inter-Collegiate Club for the coming academic year of 1933-34.

Applications must be made on special blanks to be furnished by the Society, together with a copy of the school record, three letters of recommendation, and a small photograph. All applications are to be submitted not later than May 25, 1933 to the Greek - American Inter - Collegiate Club, 15 West 76th Street, New York, New York.

DRIVE THERE IN A SMART NEW CAR

Drive a '33 Chevrolet! Low rates by the mile. No deposit required from students. 24-hour service.

U-DRYVIT AUTO RENTAL CO., Inc. 6 BELVIDERE ST., BOSTON COMMONWEALTH 5700 Tech Station: 15 HAYWARD ST Near Kendall Square

STRATTON PRIZE DATES ARE SET

(Continued from page one) the Student Committee on the prizes. Undergraduate interest in the prizes this year has been greater than ever before in the three years of the competition. As previously announced, the finals are to take place on the morning of June 6, which is Class Day. There is no other event of importance during the morning of this day. At this time the six men who have been chosen from the semi-finals will deliver their papers before a large audience.

In the circular letter sent out last week by Dr. Prescott to all faculty advisors for competitors, it was also announced that the number of papers from each society would be limited to three. Last year the number was unlimited, yet interest has been such this Spring that the limitation has become necessary, according to Dr. Prescott.

All papers are to be presented in the form of a speech, and will be judged on a basis of speaking ability as well as scientific interest and accuracy. The competition is open to all undergraduates, and will be presided over by a judging committee composed of Faculty members. Papers must be read within approximately fifteen minutes.

WATCH YOUR DOLLAR GROW!

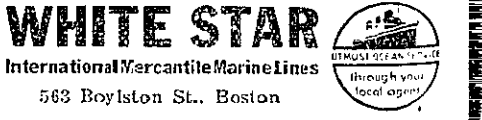

Follow the "50 TIMERS" to EUROPE

It's worth knowing... this little vacation trick the "50 Timers" know so well... those veteran voyagers who have chosen White Star's mighty liners 50 times and more! They know that today the luxury... the thrill of a trip to Europe in White Star Tourist Class costs less than ever! For Europe is cheaper, travel is cheaper—now's the time to go across!

Here are the "50 Timers" favorites: The Majestic, world's largest ship; famous Olympic; Georgia (new) and Britannic, England's largest motor liners; and the favorite Adriatic.

\$98.50 (up) Tourist Class one way from \$175 round trip

For sailings to Ireland, England and France, see your local agent—the travel authority in your community.

563 Boylston St., Boston

ENFORCEMENT FROM WITHIN

FRESHMAN rules have been approved by the student body by an outstanding majority. The freshman class, in particular, supported the freshman tie rule by a four to one majority. This came as a surprise to many, inasmuch as the class of '36 showed a surprising lack of observance of the debated rule. If they are so completely behind the rule, why is it that each year during the first term so much opposition is observed among the first year men? The reasons are not plainly evident. The method of enforcement perhaps is at fault. With enforcement as it is, left to the Sophomore class, the wearing of the tie becomes a drudge, something to be avoided if possible. Should the rule turn into custom with sufficient background, the wearing of the tie might be left for freshman enforcement. Din into the new men that the tie has been worn for years, that it is for their own unity that it is worn, and set up a system of freshman enforcement. Upperclass domination and hazing are out of style.

PROSPERITY BY SUGGESTION

JUST at the report of an inflationary measure, business is picking up all over the country. According to news dispatches, textiles, electrical and milling industries, and shipping have all suddenly lifted up their heads and taken deep breaths. This little sign is looked at with some degree of skepticism by some because of the many little spurts that have made themselves evident during the past few years. The fears of the few who doubted are somewhat dispelled by the strong rise in trade after the Easter Season.

The moderate rise in commodities is probably the result of the suggestions for inflation. With the passing of the measures now in Congress there should be a decided jump in the price level and a corresponding increase in business. In order to satisfy both the inflationists and the hide-bound conservative Republican deflation forces a plausible solution might be to let Congress dawdle along in their usual style for another year on the pressing measures, then just on the report, we will have prosperity back without the actual inflation. Expectation is often better than fulfillment.

COME—HELP PUSH

WITH Open House a little over a week away, it is rather discouraging to hear everywhere complaints about the lack of student co-operation in preparing for the event. How many of the students who are taking no part in the preparation will strut through the halls accompanied by fair guests and with a burst of just pride exclaim about the wonders of the Institute to his retinue of devoted admirers, while the man who is working on the exhibition is dirty but smiling with a feeling of merited complacency.

To those who class themselves among the well known "brown-baggers", the technical demonstrations of Open House day afford just the opportunity that they have been waiting for. Here is a chance to apply the stored up knowledge and skill in classroom or laboratory work. On touring the Institute next Saturday, however, we will find that the same men who are keeping the activities rolling are also making the wheels go round in funny ways for the amusement of the guests.

It is absolutely essential that Open House Day attract and impress a large number of people. Many a student now at the Institute will recall how he was thrilled at a similar demonstration. It was here, too, that he definitely made up his mind to spend four years at Technology. With the enrollment prospects dull for next fall, it is to the interest of everyone to help give the figures a boost.

Get behind the Open House Committee!

Latin American War Congress Discussed

Liberal And Socialist Clubs Will Hear Talk By Delegates

A report on the recent Latin American Congress against war will feature the next open meeting of the Liberal Club and the Socialist Club which will be held Monday, May 1 at 4 P.M. in Room 4-231. All students and faculty members are invited to attend.

The report will be given by Carl Geiser, one of the two delegates from the United States to that Congress and an engineering student at Fenn College, Cleveland.

The Latin American Congress against War was held in Montivideo, Uruguay, March 11-15, and was attended by over 500 delegates from practically all the Latin American nations. The report ought to be particularly interesting since the congress was attended by delegates from Paraguay and Bolivia, countries which have been at war with each other for almost a year, as well as from Colombia and Peru, which are now also engaged in warfare.

FACULTY COMMITTEE VOTES DISSOLUTION

Members of the Faculty Open House Committee at their first meeting Wednesday evening unanimously voted that President Compton be requested to dissolve the committee. This move on the part of the Faculty was prompted by the satisfactory reports received from the Combined Professional Societies on the progress of Open House plans as thus far carried out by the students.

All members of the professional societies have been engaged for the last few weeks on preparations for this annual Visitors' Day and have organized a series of exhibits throughout the different buildings that are expected to be the most interesting ever presented at Open House.

FAVOR FRESHMAN TIE REGULATIONS

(Continued from page one) have taken actions to prevent freshmen from suffering any unwarranted embarrassments. It would seem that when the students realized that the rules might be permanently set aside, they declared in favor of more stringent enforcement.

American Physical Society Will Hear Dr. Compton Today

Other Technology Professors Will Present Papers In Washington

A group of prominent members of the departments of physics and civil engineering at the Institute will deliver technical papers before sessions of the American Geophysical Union and the American Physical Society in Washington today and tomorrow.

Dr. Karl T. Compton president of Technology, and E. S. Lamar, research associate, today will present a paper before the American Physical Society on "A Test of the 'Momentum Transfer' Theory of Accommodation Coefficients of Ions at Cathodes." The program also includes a discussion of "The Nature of Gas Ions" by Dr. Overton Luhn, and an "X-Ray Diffraction Study of Vitreous Silica and Pyrex" by Professor Bertram E. Warren of the Institute. A paper on "Electron Capture Cross Sections" will be presented by L. A. Young and N. E. Bradbury, National Research Fellow, will discuss "A Statistical Investigation of an Assembly in Equilibrium in Which All Possible Transmutations Can Occur."

Barrows Will Speak

Other members of the Technology staff attending these sessions include Dr. John C. Slater, head of the department of physics, Professor Philip M. Morse, Professor N. H. Frank, Dr. Newell S. Gingrich and W. Jost, International Research Fellow.

At the meeting of the section of hydrology of the American Geophysical Union this morning, Professor Harold K. Barrows of the department of civil engineering will discuss "Precipitation - Runoff - Altitude Relations for the Connecticut River Basin in New England". "Investigation of Wave Action on Sea Walls" will be the topic of a paper by Professor Kenneth C. Reynolds, and J. B. Drisko will speak on "Wave Motion in a Channel." Cedric H. MacDougall, research associate, will read a paper on "Bed Sediment Transportation in Open Channels."

RUNNERS ENTERED IN G. B. I. C. GAMES

(Continued from page one)

the favorite in the broad jump, in which he set a new Institute record last year. Bob Mann in the mile and Johnny Barrett in the two-mile are picked to finish in third place or better. Other men mentioned in the selections are Schwarz, Sousa, Pierce, Ball, Green, Crout, Dixon, Holladay, Crosby, Hill, Rimbach, Lovering and Greenlaw.

Holladay Leads Sprinters

Lou Holladay, who placed in both dashes at the Greater Boston meet last season, is the leading sprint entry, while Ted Rimbach in the century and Walter Wrigley in the 220 are also strong contenders. Completing the Technology entries in the straight running events are Rees Schwarz and Ed Walsh in the quarter; Mel Sousa, Dick Jarrell, and Bob Mann in the half; Mann and Morton Jenkins in the mile; and Johnny Barrett, Johnny Talbert, and Paul Gerhard in the two-mile.

Best among the Technology hurdlers are Charley Hill and Red Snow in the low and King Crosby in the high hurdles. Turning to field events, Bowie has McIver, Alschuler and Lovering in the shot; Greenlaw and Wiedeman in the discus; Crout, Rimbach, and King in the hammer; and Dixon, Pierce, and Lockhart in the javelin. Green, Pierce, and Stark are entered in the pole vault. Wrigley and Ball in the broad jump and Pierce, Walker and Clapp in the high jump complete the list.

The freshmen, whose abilities are more or less unknown, are entering a large group. Those who seem most likely to place are Runkel and Svenson, sprinters, Johnson in the hurdles, Ray in the high jump and Graham in the discus, with the latter having a good chance of breaking the freshman record.

CROSBY ELECTED DORM CHAIRMAN

G. Kingman Crosby, '34, of Glen Ridge, N. J., was elected Chairman of the Dormitory Committee, in the balloting which took place last Monday. He will represent the dormitories on the Institute Committee, and heads the student governing body of the dormitories. Crosby is a member of the basketball and track teams, besides being a member of Dorclan.

FLAITZ ELECTED TO LEAD 1934 GYMNASTS

John M. Flaitz and Edward S. Edgar, both of the class of 1934, will be Captain and Manager respectively of the gym team for the 1934 season, it was announced at the team banquet held Tuesday night at the American House.

Flaitz was the high scorer among the Juniors this last season, and a consistent performer in the rope climb and tumbling. In the Senior New England Championships last week he placed third. He is in Course X, a member of the Phi Kappa Sigma fraternity, and comes from Shreveport, La.

BASEBALL MEETING SET FOR MONDAY

Class baseball will start Monday, May 1, with a meeting in Room 5-226 at five o'clock, at which class managers will be selected and a tentative idea of the line-ups will be obtained. The first game will be played Tuesday, May 2, at 5 o'clock on Coop field, between the Seniors and Juniors. On Wednesday there will be another between the Sophomores and freshmen.

The schedule for the entire season will be posted next Monday on the athletics bulletin board outside the cashier's office. Last year there was a tie for first place between the Seniors and the Juniors, and a play-off game ended in a tie also.

All undergraduates who are interested in either playing or managing are urged to attend Monday's meeting.

Athletic Events For Engineers This Week

- May 2—Golf — Providence College — away.
- May 2—Tennis — Williams — away.
- May 3—Tennis — Freshmen — Exeter — away.
- May 3—Lacrosse — Brown — away.
- May 5—Track — Freshmen — B. C.
- May 6—Track — Maine—home.
- May 6—Tennis — Holy Cross—away.
- May 6—Tennis — Freshmen — Andover — away.
- May 6—Crew — Harvard—(2nd Fresh—150 lb., Fresh — 2nd 150 lb. Varsity)—home.
- May 6—Crew — Freshmen — Groton — away.
- May 6—Golf — Amherst — home.

STICKMEN OPPOSE DARTMOUTH TODAY

Have Saturday Game With New Hampshire At Durham

Technology's lacrosse team will be kept busy this week-end with a game today on Coop field with the strong Dartmouth ten and another Saturday at Durham against New Hampshire. The Dartmouth team recently defeated Tufts by a 16-1 score, and since Tufts edged the Engineers in their last game, there is not much chance that the latter will win today.

Against New Hampshire, however, they have a very good opportunity to emerge victorious. Last year the Wildcats won 2-1, but the improved style of the Engineers this year should provide a sufficient margin for victory. The starting line-ups will be the same as in the previous games.

NOTICE

George E. Best, '34, president of the T. C. A., and Wallace M. Ross, general secretary, will be at the conference of newly-elected presidents of college Christian Associations of New England at the Salvation Army Camp, Sharon, Mass., today.

BELL IS ELECTED SENIOR PRESIDENT

(Continued from page one)

door sprint champion. He belongs to Chi Phi fraternity.

Edward P. Bromley, '34, representative to the Institute Committee, hails from Philadelphia, and is a graduate of Montgomery School in Wynwood, Pennsylvania. There, he was stage

manager of dramatics, baseball manager, and a member of the football team and the honorary society of the Student Council. At Technology he is a member of the Quadrangle Club, Beaver Club, Beaver Key, Technology Boat Club, and a member of the first crew as a freshman, and the jayvees last year.

Walter H. Stockmayer, '35, new president of the Sophomore Class,

comes from Rutherford, N. J. and graduated from the Rutherford High School. He is sports editor of THE TECH. As a member of the musical clubs he plays the piano in the Glee Club and the bass viol in the Instrumental Club. He was also a member of the Sophomore Field Day football team.

John B. Ballard, '35, re-elected to the Institute Committee, comes from Chuquicamata, Chile, South America. He is a graduate of Phillips Exeter Academy. At the Institute he is assistant treasurer of the Athletic Association, vice-president of the Quadrangle Club, treasurer of the Beaver Club, and a member of the Beaver Key Society and of the varsity soccer team.

The other Sophomore member of the Institute Committee, Hal L. Bemis, '35, is a native of Wayne, Pa. He graduated from the Haverford School, where he was in the dramatic club, glee club, and the "Index", the school magazine. Here he is on the soccer team, the Beaver Club, the Beaver Key, and is treasurer of the Inter-fraternity Conference.

Briggs On Freshman Crew

Philip G. Briggs, '36, re-elected freshman president, comes from Re-

hoboth, Mass. He attended the St. George's School in Newport, R. I., where he took part in football and crew. Before coming to the Institute he worked for two summers with Dr. Wilfred Grenfell, who was doing medical work in native villages in Labrador. Briggs is on the freshman crew, and a member of Delta Kappa Epsilon fraternity.

One of the freshman members of the Institute Committee, John C. Austin, '36, of Spokane, Washington, prepared at the Lewis and Clark high school in Spokane. He was valedictorian of his class, editor-in-chief of the annual publication, and a member of the debating team. At Technology he is treasurer of Tech Show, a member of the Technique staff, and received his numerals on the gym team.

C. Donald Brown, '36, the other freshman representative of the Institute Committee, comes from Rhineland, Wis. He prepared at the Manlius school at Manlius, N. Y., and was president of the athletic council. He is rowing bow in the Technology freshman crew.

Other Elections Announced

Other announcements of elections at the Institute Committee meeting yesterday were those of the Walker

Memorial Committee, which included John B. Dunning, '34, chairman, Wesley H. Loomis, III, '35, and Edward J. Heizer, '35; the Point System Committee: Herbert R. Schwarz, '33, chairman, and Cason Rucker, '35, junior member; the Budget Committee: Louis P. Holladay, III, '34, chairman; dormitory chairman, G. Kingman Crosby, '34; and the Elections Committee: Halfred L. McKeever, '33, chairman, William Brockman, '34, Kingman Crosby, '34, George E. Merryweather, '34, John P. Bairbridge, Jr., '35, Samuel S. Fox, '35, and Frederick L. Kingsley, '36.

Scabbard and Blade To Pledge At Dance

Scabbard and Blade, Technology honorary society for officers of the R. O. T. C., will pledge its new members for the coming year during a intermission in its annual spring dance tonight in the Main Hall of Walker Memorial. The original Bay Staters will furnish music for the affair, which will last from nine till two o'clock, the pledging to take place at midnight.

IT'S FUN TO BE FOOLED

THIS WEEK IN THE MAGIC THEATRE:
The sensational Japanese Thumb Tie!

IT TELLS IN THE PAPER HERE HOW A MAGICIAN MAKES A BIG BALL ROLL UPHILL.

THAT'S NOTHING. LAST NIGHT I SAW A MAGICIAN CATCH SIX HOOPS ON ONE ARM - WITH HIS THUMBS TIED TOGETHER.

WHAT STAN SAW LAST NIGHT

NOW HIS THUMBS ARE TIED UP GOOD AND TIGHT - ALL RIGHT, ALL RIGHT.

THE HOOPS ARE O.K.

HOW COULD HE DO IT, STAN?

IT'S SIMPLE - IF YOU KNOW HOW.

HOW IT'S DONE

- 1 SHOW AUDIENCE THUMBS AND CORD
- 2 SLIP TIP OF FIRST FINGER BEHIND THUMBS TO GET SLACK. URGE VOLUNTEER TO PULL HARD AND TIE A GOOD HARD KNOT.
- 3 TURN THUMBS DOWN FOR VOLUNTEER ASSISTANT TO TIE THE KNOT ON TOP OF THUMBS
- 4 SLIP THUMB OUT TO CATCH HOOPS

YOU'RE AN OLD SMOOTHIE WHEN IT COMES TO TRICKS, STAN. HAVE A CIGARETTE?

I WON'T SMOKE ONE OF THOSE, EVEN FOR YOU, FRAN. THEY ARE TASTELESS.

THEY ARE THE ONLY KIND I EVER TRIED. WHAT DO YOU RECOMMEND?

HAVE A CAMEL. CAMELS ARE MADE FROM MORE EXPENSIVE TOBACCOS - AND THEY ARE MILD WITHOUT BEING INSIPID.

THIS IS THE BEST TASTING CIGARETTE I EVER SMOKED.

IT'S THE TOBACCO THAT COUNTS, FRAN.

TO WOMEN ONLY

ARE YOU ONE OF THOSE GIRLS LIKE FRAN WHO HAS SOMEHOW MISSED THE PLEASURE OF SMOKING CAMELS? BETTER TRY THEM. YOU'LL ENJOY THEIR MILDNESS - THE ADDED PLEASURE THEY GIVE.

IT'S MORE FUN TO KNOW

Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand. Hence they are mild, easy on the throat... yet full of flavor and enjoyment.

DOMESTIC AND FOREIGN TOBACCOES
A MATCHLESS BLEND

NO TRICKS IN CAMELS - JUST COSTLIER TOBACCOS
