Eight Hundred Attend Sunday Concert Given By Instrumental Band

**TITLESYMPHONY ORCHESTRA PLAYS AT TEA MUSICALE**

Sirey Musicians, Conducted By Hoyen, Give High-Chess Performance

**PROGRAM IS EXPLAINED**

Before an audience of eight hundred and fifty, the M. I. T. Little Symphony Orchestra, conducted by A. George Hoyen, successfully presented its first of two concerts sponsored by the Combined Musical Clubs. In the first half of Walker Memorial last afternoon.

Composed of the regular members of the instrumental Club and of several additional artists, the orchestra gave the first production of high quality, symphonic music to be presented by Musical Clubs organization. The program was as follows:

1. Johann Strauss, Jr., "Die Fledermaus:" Opening Scene
2. Arthur Langley, "The Song of the West"
3. Donizetti, "Marriage of Figaro:"); Excerpts
4. Tchaikovsky, "Waltz from "The Sleeping Beauty"

**TECH SHOW GOES BACK TO STUDIES**

Cast and Management Return Once More to Doll Routine

The sixty or so members of Tech show dropper into the dress routine of Institute life after two weeks of strenuous activity, to the delight of the members and the management. The orchestra was conducted by Mr. Der, and the costumes were designed by Mr. Nader.

Paul Luegg, '34, General Manager, selected last evening that new drill production of "Parody Town" was not only appropriate, but that there was a possibility that the show could be produced on Open House Day. He said that the show could not be produced at any other college unless a substantial guarantee could be provided. In view of present conditions such a guarantee would be impossible to secure.

A banquet is to be held in the near future to celebrate the management. It is believed that plans for the future are being planned by the management. It is believed that plans for the future are being planned by the management.

**BASKETBALL TEAM HAS BEST RECORD OF RECENT YEARS**

O'Brien Leads Team Scoring; Four Freshmen FOUR REGULARS LEAVING

Gene O'Hein, star forward, was the high scorer of the Tech basketball team for the 1931-32 season with a total of 600 points, or an average of exactly 12 points per game. Co-captain Fred Peay, the other forward, was another high scorer for the Engineers with a total of 120, or 10 per game.

When all game plans are completed, however, Captains Adam Nyeok shares the honors, with all 12 points being scored in seven games, in addition to playing a marvelous game at right guard.

The team itself, with the fine record of ten wins and only two losses, was. the result of the 1932-33 season. The Tech basketball team will be presented by the Freshmen in the fall of this year.

**GENERAL AVERAGES FAVOR DORRIT MigNEN**

Upperclassmen Show Higher Ratings Than Freshmen And Sophomores

Term ratings of men living in the dormitories were higher for the first term than those of the fraternity men for the same period, it was learned yesterday when the Dean's office discovered the comparative ratings. Dormitory residents exceeded the general average of undergraduates, 3.17, by .22, while the fraternity men fell under that mark by .18. Consider the classes alone, it is observed in practically every case, the upperclassmen have the better marks.

This rule is observed strictly in all the larger groups, but in some of the fraternity, the freshmen had higher ratings than the general average of the whole house. The general average of the freshmen in frat ratings fell below that of the freshmen, but only by .01, the class of '39 having a rating of 2.99.

In contradiction to marks of the first term, 1931-32, some of the fraternities have considerably raised their average. Whereas Sigma Alpha Epsilon, the first on the fraternity list, had 2.22, with the present rating there are four houses whose averages exceed that point. Phi Delta Delta holds 3.87, while Chi Phi, Beta Theta Pi, and Sigma Chi all have marks over 3.25. Chi Phi, at present second on the list, was last year thirteenth, with a total gain of .50 in twelve months.

Sigma Alpha Epsilon suffered one of the largest casualties in the list, dropping from first place a year ago down to tenth place. The present rating is six members only, whereas the fraternity had nine members in the class of 1932.

Phi Delta Theta, on the other hand, with an increase of .65, rose from second to first place.

The list of the averages of the various fraternities follow the same trend as the house averages, but there are either two or three striking contrasts. The Theta Xi first year men, for instance, who among the freshmen, had a rating of 3.52, while the entire fraternity stood in twenty-third place, having an average of 2.28. The Delta Tau Delta and Lambik Chi Alpha freshmen, on the other hand, fell far below their brothers in the average.
NEED THEY BE DEAD?

U NLESS sufficient evidence of activity is shown by the follow- ing discussion, the members of the next annual meeting of the Alumni Committee, will no longer be officially active. The societies which are not represented here tonight, by no means have ever endorsed the world-wide movement, or have thought of it at all; there are one or two societies which might be of some value and of real importance, but they must revind quickly or lose their charters.

UNREST IN EUROPE

SINCE the Nazi victory at the polls in Germany, the other countries of Europe and of the rest of the world have been holding their breath, hoping that serious internal difficulties will not lead to the surface and become world-wide. Censorship of the press has been increased. Tales of horror and disaster have been received only from those Jews, fastening out of Germany for their personal safety. France is standing by, with a worried face, as the new regime crusts for its "place in the sun".

At the same time, England and Russia are threatening to become more active in their efforts to buttress the European defenses. Among all of the world powers there has been a sudden rush to armament, a re-arming of the existing forces, and a race in the building of the major powers in the armament race.

It is necessary to keep the spark of unrest from bursting into full- blown, the folder of internal national hate and selfishness must be forgotten in the greater struggle for peace and unity.

BETTER HUMAN BEINGS

P ROFESSOR MAGOUN's famous course in Humanics, Professor Schiller's talks on the technique of the interview, the organization of commuters' clubs at M.I.T., all point to the trend in university training, to teach not only the historic English and Classics, but to do a little developing of men.

Administrative officials of colleges the country over are realizing the truth of Colonel Gow's pronouncement that scholarly work is but 15 per cent and personality the other 85 per cent. The bachelor's degree is therefore developing into a capable, intelligent person rather than into a bookish scholar. During the last decade the Institute followed the advised policy of the American Association of Engineering Education and introduced a course of Liberal Education which would follow the lead of the western colleges (would that we might have followed it years before). The School of Architecture and the Technical Society will follow the lead of the western colleges (would that we might have followed it years before). The School of Architecture and the Technical Society is following the course of study of the Chemical, Physical, and Biological Societies of the University of California.

The gala occasion will take place on Wednesday, May 30th, at the Ball of Wall, if one can read the date on the milliner's card. A few months after the hours of seventy-three for the month of April will probably be the only legacy of the gala occasion to be preserved. Unfortunately the members have no additional information.}

Furthermore, a test of interest has been made in model airplanes. The results of careful work done in this direction are shown in the following table:

<table>
<thead>
<tr>
<th>Model Airplane</th>
<th>Number of Flights</th>
<th>Average Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type A</td>
<td>50</td>
<td>120 km/h</td>
</tr>
<tr>

<td>150 km/h</td>
</tr>
<tr>
<td>Type C</td>
<td>42</td>
<td>130 km/h</td>
</tr>
</tbody>
</table>

In conclusion, we would like to express our thanks to the staff of the University Red Star Line for their cooperation and assistance in the production of this issue.

We close with the words of appreciation to our readers for their continued support and a promise to continue our efforts to provide the best reading material possible. We look forward to seeing you all at the gala occasion on Wednesday, May 30th.

Institute Men Find Absorbing Energy Outlet in Work With Boys' Club

Students Who Have Entered the Work Put Their Hobbies To Good Use

The name "social work" tends to make Technology student rebels, but rarely does it occur to them that the work offers an absorbing energy outlet and a new field of wildlifes. When, as freshmen, they are compelled to fill out T. C. A. cards and are asked to notice the question, "Would you be interested in leading a boys' club?"

There are in present four Tech clubs to take care of this problem. There are the House in East Boston. These fellows have become interested through the Technology Children's Bureau, by talking with friends who were already involved, at first showing them that they had a good deal of experience of their own. Last summer he was in authority over all of the East Boston high schools, and did a good job.

The director of boys' work in Trinity House is James D. Patterson. It is in charge of all of the club work. He has had a good deal of experience of his own. Last summer he was in authority over all of the East Boston high schools, and did a good job.

Open Forum

In our next issue, we will be featuring additional articles on the topic of "Absorbing Energy Outlet in Work With Boys' Club," as well as a special section on "The Role of Social Work in Rural Communities."

The editors welcome any comments or suggestions on these topics. We look forward to hearing from our readers and engaging in meaningful discussions.

In addition he noted that the following organizations have not replied to the committee's request for information as to their status. The committee desires that they do so at once. They are: Bowls Club, Chess Club, Corporation XX, Glee, Mechanical Engineering Society, Men's, Photography Society, Physical Society, Scull, Stylus, Tech English, Morning News, Technical, Yoda, and Waspman.

SYMPHONY ORCHESTRA PERFORMS AT CONCERT

(Suspended June, 1921.)

Academic Studies at the New English Conservatory of Music.

Monetary symphony, one of that institute's most popular orchestral works, was played without interruption, although some notes were omitted after the opening movement, it received an unusually enthusiastic ovation. The orchestra reopened after a fifteen-minute intermission with Dreisbach's overture to Eugene, also very well received. Then followed the ever-popular Dixi Dance with a Waltz, and a Prangl Serenade by Arthur Farrell, Jr., in

First Performance in Boston Farrell's piece, which was given its first performance in the vicinity of Boston, consisted of three sections: Patience of the Country Folk, Dance of Milliners, and Pluck Some and Re- cinnel. The composer, who is a native of the Institute in Gravesend, is now Professor of Music at Melboume State College.

When Sunday's concert is compared with past affairs given by the instrumental Club, the remarkable progress of that organization during the past year is evident. Marked improvement was attained in the quality of the music selected. Credit must be given to Coach Hoyen, the conductor, who gave generously of his time and to the members of the club who made the presence of the assisting artists possible by raising of funds. A total of forty men took part in Sunday's performance.

As We Like It

PLYMOUTH THEATRE

"Teatro dei Piccoli" at the Plymouth need not scare one. It is American music revue produced a la mar-

ienne. We may Americans advisedly, even though it is given by an internationally famous Italian troupe. One gets everything from a ball-

eight the biggest laugh) to takedown

scape. Impossible though it may possible, the marionettes become flesh and blood to the audience. It is really very much fun to be made

weeds possibly could, and so, less-

mental effect is required on the part

of the tired college student.

E. A. M.

ILUSSION:

The magician exhibits a flower pot with hinged sides on a table in the center of the stage. He opens up the sides to show that the container is empty. Closing it up, he places a screen between it and the audience. After a short period of magic incantations he removes the screen. The seated audience sees a beautiful girl, covered to the shoulders in lovely flowers, rising up, he places a screen between it and the orchestra. The orchestra resumed after the intermission, although some guests were ad-

The size of an audience seems to indicate the popularity of such af-

ternoon musicales at the Institute and an equally large attendance is expected at the next concert, to be given by the Glee Club, under the direction of William W. Watson, on Sunday afternoon, April 2. On that date the downtowners will have open houses.

IT'S FUN TO BE FOOLED

...IT'S MORE FUN TO KNOW

A trick frequently worked in cigarette advertising is the illusion that mildness in a cigarette comes from mysterious processes of manufacture.

EXPLANATION: All popular ciga-

rettes today are made in modern san-

itary factories with up-to-date machine-

ery. All are heat treated—some more intensively than others, because raw, inferior tobaccos require more intensive treatment than choice, ripe tobaccos.

The real difference comes in the tobacco that are used. The better the tobacco, the milder it is.

It is a fact, well known by leaf tobac- 

cof authorities, that Camels are made from finer, MORE expensive tobaccos than any other popular brand.

That is why Camels are so mild. That is why Camels have given more to more people than any other ciga-

rette ever made. It is a secret of Camels' rich "bou-

quet"...their cool flavor...their non irritating mildness.

Give your taste a chance to appreci- 

ate the greater pleasure and satisfaction of the more expensive tobacco.

NO TRICKS

JUST COSTLIER

TOBACCOS

IN A MATCHLESS BLEND
