"Scrimes" Is Greene's Opinion Of Commuters: "Rout Dorms" He Urges

RESUMED MARKS TO COMMUTERS' CLUB AT NOON LUNCHEON

Professor Freeman Describes Fascism and Communism In Europe

MANY ATTENDING

"I frankly think the commuters of my college are a bunch of scrimes," Professor Freeman, who is a member of the Biology Department, declared at the final talk of the Commuters' Association last week. "I am not speaking of the commuters at Andrew or elsewhere."

"The world is being conducted by the unscrupulous hacks and incompetents."

Professor Freeman described Fascism and Communism as the most recent in a group of attempts to solve world political and social problems. He pointed out that Fascism is very popular with the people in the United States, but not with the people of Europe.

"It is not a simple matter, but it is a matter of education and of the people."

Professor Freeman said that the people are the only ones who can really make a difference in the world, and that the education of the people is the key to the solution of the problems of the world.

Professor Freeman urged the students to think about the problems of the world and to do something about them.

"It is not enough to sit back and let others do the work. We must all work together to solve the problems of the world."

SUBSCRIPTION, $2.50 per Year

Published every Tues. and Fri.

Entered as Second Class Matter at the Post Office at Boston, Mass. under the Act of March 3, 1879.

REPRESENTATIVE CONNERY'S stand on President Roosevelt's consolidation plan is as follows: each contestant received an award of $250, paid to the Institute for the investment of their time and energy. They were also informed that they would be in operation under test.

What is not appreciated, I believe, except by those who know something about the various rules they serve, is the importance of the role in the making of the picture. With a few of these students, the result is incomprehensible to the casual observer, and one who hardly expected to be in a beneficial school situation; and competent personnel are not the necessary instruments. Even the New England Conservatory and the Massachusetts Conservatory have to bring in additional students for such institutions as the Boston, shows, and French are:

There is a difference between the first class amateur and the professional organization. And the difference is in the interest of the lower rung of their students, in the interest of the lower rung of their students, in the interest of the lower rung of their students.

Coach Hedlund Reviews Successful Year

Considerations Performance of Captain Bell, Relay Team Highlights of The Season

By Oscar F. Hedlund

Technology has finished the indoor season. It has done so, but glories, with its first Intercollegiate-ship champion and a new one-mile relay record on the books.

Varsity men started to prepare for the indoor season in November by competing in the handicap meets and intramural league, getting plenty of competition during the season. On January 1st, the Tech met the Army, and after the boys tried for the one-mile relay team and placed second, they practiced hard the teams competing as A and B at the opening track meet. The mile was run by a 5-5 of each other, so it was very hard for the team to place for the A. The final selection included Walter K. Bell, John C. Foote, Hall, and Bernard. They placed first in the mile run, and Bell was picked to run in the next relay. He became a real race and showed Tech had three legs of this race. Tech led by A. The final selection included Walter K. Bell, John C. Foote, Hall, and Bernard. They placed second in the mile run, and Bell was picked to run in the 60-yard dash. The team raced Dartmouth and broke the Institute record by 3-5 seconds, to place third at the Garden on February 18th.

The team raced six colleges, only to get fourth against six colleges. The trip against six colleges, only to get fourth place, faith Top-Student and his semi-final heat, but could not beat the semi-final heat, only 1-5 short of equalling the whole distance neck and neck. Syracuse won in 5-3-5, winning by 2 yards.

Tech's time was 3-2-5 flat. In the evening he entered the 60-yard dash. In the final heat, he was 5-2, leading them at the semi-final heat in 5-2 flat. In the evening he entered the 60-yard dash. In the final heat, he was 5-2, leading them at the semi-final heat in 5-2 flat.

Bell went at C. U. Games. Dick Bell makes the sprint race. He is a 5-3-5 of the stick that wins races. There was some baseball late in the season, and hopes to repeat. Army is not entered, so the Engineers' chances of victory are good. Their record to date is five victories and no equal number of defeats.

Tech students. The Engineers' relay team ran against Dartmouth and Brownish, winning in the first heat of 3-0-5. 4, leading them by over thirty yards. During this season, the Engineers showed how the relay should be placed. Dr. Howe stated after the race that the pace is nice, but Wrighty was the best he had witnessed in a long time, and he has seen many races. It is the passing of the stitck that wins races.<br>

It was made by that university. The final heat was made by that university. The final heat was made by that university. It was made by that university. The final heat was made by that university. It was made by that university.

The approach of spring calls to mind the intercollegiate baseball tournament of past years. Usually the interest in the national game is not great around the Institute, but last year was an exception. The interclass game is in a charity game at the Garden. Al-

5:00 P.M.-JATPAA Meeting and Exhibition in West Lounges.
10:30 P.M.-Boston Club Dinner, North Hall, Walker Memorial.

HEDLUND REVIEWS
SUCCESSFUL SEASON

(Continued from page two)

This event at New York held in the largest arena in the world, created lots of excitement, as the New Yorkers were looking for anything Kelly to win. Kelly had squelched the expectations in his first heat, but Dick equaled it also in his heat, and everybody looked for a new mark to be created in the final.

But the Rickard Intercollegiate Champ in the final heat the starters were Hardy, Cornell; Medway, Penn; Columbia; Curtiss, N.Y.U.; and Kelly, Georgetown; and Bell at the starting line. At the start, Dick took the lead but Hardy and Kelly were nearly even with him at sixty, when Captain Bell found a new lease of life, and led them to the tape by 6 inches, bringing an intercollegiate champion to M. I. T.

Kelly's performance in the indoor season has been sensational when it is realized that his work at school is not like others, where they have plenty of time to train. During the season he has competed in seven meets, which included eight trials, eight semi-finals and seven final heats, which is a great deal of racing. Every man out for track in the Institute deserves a lot of credit for the work they have done over the past winter in making it the most successful season for some time at the Institute.

TECH SHOW IS PREPARED FROM ALL OLD DEBTS

(Continued from page two)

among the races activities and the stage properties now in possession of Drammat, the theatrical group, which were used in "Pump That!" will remain the property of the show.

The report of the business manager of the show indicated an income of $1,150 and expenses approximately $900.

Consider Inactive Organizations

The motion that the following activities be abolished was under Architectural Society, Debating Club, Mortar and Bolt, Outing Club, Pole and Riding Club, Rifle Club, and Squash Racquets Club.

Edward L. Auch, '34, reported a profit of approximately $85 made by the Junior Poms. Since this estimate was made to include proceeds only, an accurate balance has not been estimated.

GRIDIRON INITIATION WILL BE HELD TONIGHT

(Continued from page two)

Since those events which concern guests are at the banquet, the proceedings which remain secret to the outside world. Following the presentation, persons satisfied in the skins are allowed to give their versions of the incidents to the press.

The banquet will be given by the Technology Gridiron to the alumni along similar lines. A series of skins has been prepared by the officers of the society and will be preserved for the benefit of the guests. These skins will portray, in humorous and pointed manner, several events which have occurred during the past year. Most of the skins will be based on information which has been known to members of the publications, but which it has not been possible to print.

THE TECH

PERSECUTION OF JEWS PROTESTED BY CLUBS

(Continued from page two)

co-signing are the Masonic Society, the M. I. T. Liberal Club, and the M. I. T. Socialists Club, and tentative approval has been given by several other organizations. The motion has also been endorsed by date by many members of the faculty and instructing staff, among them the following: Mr. R. F. Cook, Professor B. E. Rogers, Professor H. G. Pearson, Professor P. G. Keys, Professor P. M. Morse, Professor H. J. Winner, Professor Robinson, Professor P. T. Hall, Professor S. J. Brokof, Mr. A. A. Ashdown, Mr. F. G. Fantetti, Jr., Professor R. P. Bigelow, and Mr. C. H. Bode.

There will be addresses by representatives of several religious, political, and professional classes which are being injured in the alleged outrages in Germany.

HARVARD PROFESSOR ADDRESSES SOCIETY

Dr. Gehard James, professor of chemistry at Harvard University and former head of the department of chemistry of the U. S. Tariff Commission, was guest speaker Wednesday evening at the regular dinner meeting of Alpha Chi Sigma, the Harvard undergraduate chemical society. Twenty members were present at the meeting, which is more than double the usual attendance.
