RUNKLE WINS OVER SIGMA CHI, 28-15

Crosby Is High Scorer As Dorm Men Forge Ahead In Final Period

Runkle Dormitory's team went on a record-breaking tear of its own during the final period of its game with the fraternity champions, Sigma Chi, and won the annual meeting 28-15. The score stood at 13-all at the beginning of the last period, but from the opening whistle of the final quarter, the dormitory champions began to sink shots from all over the court, and they made thirteen points while holding Sigma Chi scoreless.

The game was even for the most part. The end of the first half found the score tied at 13-13. In the third period, each team scored only four points, mostly on fast shots. The final minute drive by Runkle was started by King Crosby, who scored a basket from under the basket. Others who were present to give Sigma Chi trouble were Paul Shaya and Iggie Shrega, who collected four baskets in the last two minutes.

The high scorer for the evening was Crosby, with a total of ten points for the winners. Three men were tied for second honors with six points apiece, Milles and Shrega of Runkle and Jack Vickers, high scorer of the Sigma Chi quintet.

Dormitory Residents Move Uncertainty To Vacancy

One of the issues of the sixth floor of Runkle dormitory arrived at his room yesterday afternoon in a speeding delivery truck. The student, who had been absent for two weeks, was heard to say: "Gotta Go", so the unfortunate event occurred. He took his belongings in the basement. Upon entering the dormitory, the student said: "This is a room of joy."

He had moved to the dormitory on that floor. The bed was ready for use, books were stacked, and the Technological atmosphere pervaded the scene. Advantages over the former location included more floor space and running water. The only disadvantage was the absence of telephone.

After photographs had been taken, the student went in search of his former location, and peace again reigned.

Fossett Wears Five Societies

R. F. L. Fossett, Jr., '33, president of the Institute Committee, last night issued this statement concerning inactive organizations at the Institute:

The following organizations have taken no steps toward settling the question of status put to them by the Institute Committee, Sigma Phi, Gamma Sigma, Menorah Society, Photographic Society, Physical Society.

The Institute Committee reserves the right to consider withdrawal of these organizations if no notification of action taken by them is received on or before April 26, 1933.

BEN BERNE PLAYS AT SYMPHONY HALL

The T. C. A. has announced that he will produce an Emerald of the Arts Drama "Avalanche" at 7:30 tomorrow evening at the new Technological Theater. The play will be presented by Ben Bernie and his orchestra and will be supported by the students of the dormitory. Professor E. K. Kenyon, of the Division of Drawing, will conduct the orchestra.

The Drama Club of the Technological is planning to produce a vaudeville act which will be given in the auditorium of the dormitory. The act will be produced by a group of students who are interested in dramatics and will be presented in the auditorium. The group is planning to present a series of one-act plays which will be given during the summer months.

IT DOESN'T PAY

THE field of mathematics feels very deeply the loss of Daymnd Paley. He was probably the most able of English mathematicians since the World War, and is known throughout the world.

Among other things, his death brings to an end some statistics concerning the Institute. All such statistics are of little conceal to the average student.

No matter how well we know our own abilities, it does not pay to take unnecessary chances. Lord Byron said, "You have a large part in life, and we should take heed from the example which we have here before us: science has lost a valuable man because he took a chance—and lost.

WHY NOT ELECTIONEERING?

It is generally agreed that there is an all too apparent lack of interest in student affairs on the part of the majority of students. The students appear to have been interested in few activities outside of the student government. At any rate there is no denying that the actions of the Institute Committee are of little concern to the average student.

How is it that the students should show so little interest in the functioning of the government which is supposed to represent their opinions?

Is it not because the nature of our elections prevents the expression of student opinion and because the student has become accustomed to having his government run by a group of strangers? Our elections are carried out after purely mechanical fashion. Attempts to present candidates at class meetings have failed because the conflicting schedules of Institute members make the attendance poor at such meetings. Once elected the action taken by the Institute Committee may very well be contrary to the desire of the majority of the students.

We believe that a group which has been functioning allowed in a restricted manner, presented a petition to the Institute Committee to take action. This was turned down. The action of the Institute Committee was then upheld. A report on the referendum was very close while the action of the Institute Committee was unan- imous. We believe that if the student body had been allowed to vote on the referendum the results would have been very different. We feel that the student body has been kept in the dark by the Institute Committee.

Another aid to business... a Teletypewriter "Central"

Working out new ways to serve the communication needs of the public is an obvious aim in the matter of the Project Research Office. The new Teletypewriter Exchange Service—typing by wire—is an example.

For some years Private Wire Teletypewriter Service has speeded communication between separated units of many large organizations. Telephone men— anxious to make this service more widely useful— have now established Teletypewriter central offices, through which any subscriber to the service may be connected directly with any other subscriber. Each can type back and forth—their messages being re-produced simultaneously at each point. This new service provides fast, dependable communication, the cost of the service being paid for by the spoken word. It is one more Bell System contribution to business efficiency.

Just time to get them dirtied up for Summer

We've brought out our new rubber-soled, black-oxen-saddled sport shoes early so that they can acquire the distressed patina in time for the sports season. Especially designed for us, their quality is extraordinary at the price. They can be kept clean.

HOOVER DAM FILM TO BE SHOWN TOMORROW

A free reel motion picture of the latest construction work on the Hoover Dam will be shown under the auspices of the Civil Engineering Society tomorrow morning at eleven o'clock in Room S-2 in the Main Building.Handled by Ing. Joseph O. Colwell, a member of the Diversion tunnels, and the diversion of the Colorado River, are among the subjects treated in this picture.

ORDNANCE SOCIETY ELECTS OFFICERS

Constitution Amended To Allow Sophomores Taking MS 224 To Join Organization

The Army Ordnance Association at the Institute yesterday elected Carlton J. Cook, '34 president and Arthur S. Deming secretary-treasurer for the coming year. The Senior and Junior Vice-presidents will be elected some time next fall.

Six Juniors were recently elected to Chi Epsilon, national honorary civil engineering fraternity. They are: Wendell C. Allen, John G. Branner, Emerson P. Kron, George W. Patch, Theodore N. Rimbach, and Norman P. Spofford.

Members of the society are chosen primarily on the basis of scholarship and character. Six men are elected each semester from courses I and XI.

The lucky number contest is a part of the publicity campaign being conducted by the yearbook. Last Tuesday red handbills appeared exhorting the "workers of the world" to "unite" in paying a "tax of two rubles (two hundred kopecs) to defray general costs of printing, distribution, etc. of the book." This redemption of sign-ups may be made at any time today in the Main Lobby or later at the Technique office on the third floor of Walker Memorial.

The other lucky numbers, drawn by President Karl T. Compton last Tuesday, at five o'clock, were 228, 568, 663, and 681, which were redeemed by Carroll T. Newton, '34, Herman J. Shute, '34, Gilbert E. Tyler, Jr., and Theodore N. Rimbach, '34, respectively. The numbers were published in Tuesday's issue of THE TECH and purchasers deposited one of the duplicate numbers in the box from which the drawing was made. Holders of winning numbers received free admissions for Technicons by calling at the desk in the Main Lobby either last Tuesday or Wednesday.
