I last week we were greeted with little white baby bonnets dotting Tufts student, who was returning home in the wee small hours they are to initiate. to make up the work lost, but for some, it means a month of long.

There is a Certain person attending that center of education called Harvard, who has taken steps to prevent those few inessential but edible errors from getting through. There may be a change in those few, but they are so insignificant that the class will get out all right. The new, few and any contrary will be given to that few, but the class will get out all right.

Now much as we are given to push.

The old Harvard-Tech battle battle is renewed, and we think that this time we are right. There is no faith in the eternal goodness and beauty of the Tech people. In the words of the Harvard people, the Tech people have been.

Such a one is seen in the following, a portion of the entrance to the University, and added to—not Chief, Technology News Publications, Mass. Inst. or Tech.

"Dear Editor:"

The ultimatum from which we took this sentence, we have re- turned to the rightful owner, it was left in one of the reading rooms of the Tech library. We grant that we did not place our hands on it, but thinking it might be a fresh start, we are sincerely sorry that we can't reimburse them, but we love beautiful things. We're trying not to interfere with honorary societies already present at the Institution.

We remain, yours sincerely.

"The original copy resides now in the possession of your humble correspondent, just in case you doubt the authenticity of the above."

It is indeed unfortunate that the regulation of an otherwise perfectly normal body of undergraduates, must be so rigid.

While we are still gibing meekly at the one which appeared in the January issue of the magazine. Its Relation to Civilization," by Professor Walter H. Newhouse, of the Department of Geology, at Harvard, was written and published in the February issue of the magazine. Describing a new field of investigation into atomic distances in metals in an article by Professor A. H. Wallace, of the Mining and Metallurgy department, giving an interesting review of the methods used for determining distances. The title of this article is "Atomic Distances in Metals," and it is published in the February issue of the magazine.

The principle and apparatus of this society has been a strong incentive in research laboratories and also to reward men who have performed outstanding work. It was established in 1883 by the late President of the University, and is now known as the American Chemical Society.

T.N. E. N. Inaugurates "Engineers' Forum" in February Issue

TRENDS are inseparable from the theme of the present issue. The young engineers, who are the most active in the Society, are continually looking for new ideas and methods to improve their work. The "Engineers' Forum" is a monthly column in the magazine where the young engineers can express their thoughts and ideas. The column is sponsored by the "Engineers' Forum" Committee, which is composed of young engineers from different branches of the Society. The column is a platform for the young engineers to share their ideas and experiences and to contribute to the advancement of the Society.

THE TECH SHOW

A regular rehearsal of Tech Show will be held at 7:30 p.m. tonight in the Old Auditorium. There are several positions yet available for men interested in the activity.

FRESHERN RUNNERS TOP DEAN BY 55-17

Taking every first place, Technology's freshman team opened the season by scoring a smashing 55-17 victory over ech of its three first dual meet. Jan Johnson, with three firsts and Tom Below, with two first and two seconds, were the only two runners.

Johnson was victorious in the hur- dies, 300-yard dash, and the broad jump, to score 65 points, which broke the shotput and the 60-yard dash, and finished second in the hur- ries and the broad jump, totaling six.

Richards, Stevens, Carter, and Equarius, were the other winners.

RELAY TEAM TRIUMPHS
IN BOSTON A. A. MEET
(Continued from page one)
Toppino and Frank Wykoff.
Red Rose got the mile relay men off to a two-yard lead, taking the pole at the start. Dick Jarrell and Rees Schwarz added another yard, and Walter Weigl, running the anchor position, made the final advantage a good five yards. Although this race resulted in an Engineer victory, the good five yards. Although this race

record holder, in the being barely nosed out of third place this time in the semi-finals, being second to Toppino. In the final race, the

finish was extremely close, with Bell Williams, who recently elected Frank winning his heat against Miller of Wil-

topino and Frank Wykoff.

and MacCormack.

in view of the fine record made by the basketball team this year, the Faculty Club has voted to attend the Harvard and Tufts games. Professor Hamilton, in charge of arrangements, has sent out 115 complimentary tix to the Harvard contest and 95 to the Tufts affair, thereby furnish-

ing the team a real incentive to win. The freshman hockey team had another game somewhere around day-

break this morning. Last week the

OUT in Kentucky, where they have pretty women, fast horses, and blue grass, there grows a tobacco called White Burley. It doesn’t grow anywhere else in the world.

There is a type of this White Burley that is best suited for pipe smoking. It is neither too thick nor too thin. It is not light and chatey; at the same time, it is not rank or strong. "U. S. Type 31" is the government classification for White Burley.

Since no other pipe tobacco has yet been found which seems to equal White Burley, this is what we use in making Granger Rough Cut.

Next, we use the Wellman Method, a famous 1870 method of making pipe tobacco, to give Granger its fine flavor and fragrance. Then, too, Granger is "Rough Cut"—just like they used to "whittle" their tobacco off a plug with a jack-knife. It is a good, lasts longer and never guats a pipe.

And finally, we want to sell Granger for 10 cents. Good tobacco—right process—cut right. So we put Granger in a sensible soft fail pouch instead of an expensive package, knowing that a man can’t smoke the package.

Granger has not been on sale very long, but it has grown to be a popular smoke. Folks seem to like it.

Lippert & Higget Tobacco Co.
BASKETBALL TEAM IS WINNER OVER CLARK

However, the Republicans are bound to have plenty of competition even if they show a great improvement over their present form. The game will be the high light of the season, no matter what the result, because of the natural rivalry existing between the two institutions.

The summary of Saturday night's game follows:

DR. COMPTON WILL

ADDRESS CORP. XV

In order for the members to have an opportunity to become familiar with the president, an informal dinner will be held tomorrow evening at 6:30 in the Grill Room of Walker Memorial with Dr. Karl T. Compton. This dinner, which will be prepared by the new chef, is for members of the class only.

Stock Contest

The stock contest, the winner of which will receive twenty-five dollars in prize, started last Thursday. Rules of the contest are posted opposite the cashiers' office, Room 10-185.

RABBITS AND RADISHES

Babies and Bouquets

Carrots and Cabbages

All from an EMPTY TUB!

ILLUSION:

Right before your very eyes the man of magic draws rabbits, vegetables, flowers, fruits—even babies—all from an empty tub. What an astonishing fellow he is!

EXPLANATION:

The assiduous rabbit, bachelors, carrots, cabbages, ribbons and other magical "props" are not created by magic. The tub has a false bottom that is conveniently disguised, and underneath wonderful things spring to life to the magician's nimble fingers. They do literally "spring" because they are made to cooper in the bottoms of the tub, taking their natural shape as the magician lifts them out.

IT'S FUN TO BE FooLED...

IT'S MORE FUN TO Know

Tricks are legitimate on the stage but not in business. Here's one that has been used in cigarette advertising ... the illusion that blending is everything in a cigarette.

EXPLANATION: Blending is important... but it makes a lot of difference what is blended. Inferior tobaccos can be blended to cover up their humble origin. But your taste soon detects the trick.

The proper use of blending is to bring out the full "round" flavor of mild, high-grade tobaccos. It's the cleanliness of the tobaccos, as well as the blending, that counts.

It is a fact, well known by leaf tobacco experts, that CAMELS are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Hundreds of thousands of dollars have been spent by others in the attempt to discover just how CAMELS are blended. The result was disappointing.

But all the while Camel spends millions more for choice tobaccos... to insure your every smoke.

Light up a Camel. Relax, while the delicate blue smoke floats about you. Enjoy to the full the pleasure that comes from CAMEL TOBACCOS.

Keep Camels always handy... in the air-tight, studded Humidor Pack.
