Dr. J. C. Hunsker Becomes Head of M. E. Department

Distinguished for Research in Field of Aeronautical Engineering

FOUNDER OF COURSE XVI

Succeeds the Late Professor Edward F. Miller, Who Died During Summer

With the arrival of the new term Dr. Jerome C. Hunsker, successor to the late Professor Edward F. Miller, is installed as Head of the Department of Mechanical Engineering of the Institute, in which he has been associated for many years with the staff. His appointment was announced last term, Professor William P. Davis having been appointed in his place the previous year.

Dr. Hunsker, a native of Massachusetts, received his education at the University of Wisconsin, where he obtained the degrees of Bachelor of Science and Doctor of Philosophy. After a year of postgraduate study in the University of Paris, he returned to his native state and became an instructor in mathematics and physics at the University of Wisconsin. In 1894 he was appointed assistant professor of mathematics and physics, and in 1896 he was appointed professor of mathematics and physics. He was also appointed professor of mathematics and physics at the University of Wisconsin in 1898, and in 1900 he was appointed professor of mathematics and physics at the University of Wisconsin.

Dr. Hunsker has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In the course of his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

He is a member of the American Institute of Electrical Engineers, the American Society for the Promotion of Engineering Education, and the American Society for the Promotion of Engineering Education.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. He has been a member of the staff of the Department of Mechanical Engineering of the Institute for many years, and has been associated with the staff in various capacities.

In addition to his work on the chemistry of eelhead of the Department of Mechanical Engineering of the Institute, he has been associated with the staff in various capacities. I out on a spree. One moment he listens with beetling brows and called, was probably known to more Technology graduates than service to Technology. The students will recall his thrilling Professor Ryan, but the death of Professor Miller followed the way connected with the Institute. It is strange that both of these W. H. Robinson, '36 L. C. SCENES AT FRESHMAN CAMP

IT'S COLD BUT IT'S CUSTOMARY. Here is how the freshmen tossed in Michael A. Kuryla, '36, vice-president of the Sophomore class, as a token of their great esteem.

SHIVERING BUT SMILING. Michael A. Kuryla, '36, is shown emerging from the icy waters of Lake Massapoag after the traditional ducking at the hands of the first year men.

VICE-PRESIDENT VANSTEER RUSH addresses the men gathered around the council ring.

"AT THE SIGN OF THE THREE BRASS BALLS."

HERE IS DEAN HAROLD E. LODDELL, '17 (with hat) just after completing his talk at the council ring.

EXCELLENT WEATHER FOR SWIMMING drew this large crowd to the float to enjoy a cool dip before dinner.

Right: THE MANLY ART OF SELF DEFENSE as acquired at Technology is demonstrated by a couple of obliging lads from the boxing team.

Ohio Dennison, '11, gives the boys another encore of that old Technology favorite — as only Obie can render it.

A little further to the right can be seen assistant dean, Thomas P. Pitre, saying "warm jokes, eh, boss?" to Professor Samuel C. Prescott, or words to that effect.
MASQUE CONTEST WILL CLOSE AT END OF OCTOBER

Fifty Dollar Award Offered for Best Tech Show Manuscript

Tuesday, October 31, has been set as the last day for submitting contest work. A award will be re
ceived. Established last year by the Masque, honorary society of
undergraduates, as well as graduate
students, the contest includes the
writing of a musical comedy scenar
The closing date, falling as late as it does, is intended to allow both
freshmen and transfer students to
compete in the contest. For the ben
The contest will be repeated. Further
information will be published in THE TECH.

How much do they really count?

Good marks are of first importance. Certainly! But studies are not all that a college offers an undergraduate. Executives are demanding more than book knowledge from their prospective college-trained assistants.

Freshmen—in less than four years you will be facing a highly competitive employment market. How will you answer this query:

Now is the time to plan ahead for a balanced college life. The importance of extracurricular activity to a college man is proven by the emphasis which it receives from many companies which offer positions to college graduates. Freshmen should make it point to get into some activity—to learn the pleasure and enjoy the benefits of working with fellow classmates in a common endeavor.

THE TECH, the official news organ of the Institute, occupies a distinguished place in the line of Technology activities. It now offers positions on its staff to ambitious members of the incoming class. Men who are interested in joining an activity should make every effort to attend the smoker of THE TECH in the North Hall of Walker next Thursday afternoon. The organization of the paper and the opportunities it offers new men will be fully outlined at that time. Prominent Technology alumni will point out the benefits to be gained from extra-curricular activities, and will give valuable advice from their own experiences to the new men.

All incoming men and other members of the student body who are interested are cordially invited to attend this smoker. Refreshments will be served.

Make Your Activity!
