S. A. E. Heats Talk by Prof. Taylor

Trend in Engine Design Subject of Speech at Society's First Meeting

Professor F. P. Taylor of the Massachusetts Institute of Technology was the principal speaker at the first meeting of the Society of Automotive Engineers Wednesday evening, when interested freshmen were present. Professor Taylor's talk was introduced by Dr. C. H. McNeil, former chief engineer of the Ford Motor Company. The lecture was given at the annual freshman meeting of the Mining Engineering Society.

Dr. McNeil introduced Mr. Taylor, who is noted for his work in the design of air cooling systems and his research on the combustion of fuel gas.

Dr. McNeil said to the audience:

"Trend in engine design is to the air-cooled engine, " he said, "for it is the only effective cooling method of the future." He pointed out that the trend has been toward air cooling because of the increasing power requirements of industrial engines.

Dr. McNeil pointed out that the air-cooled engine has a number of advantages over the water-cooled engine. It is more efficient, it is more durable, and it is less expensive to maintain. He said that the air-cooled engine is the only effective cooling method of the future."

THE STRATTON PRIZE CONTEST

THE Stratton prizes are cash awards offered to the undergraduates who win the best oral essays. These prizes were first offered by Mr. Samuel W. Stratton, former president of the Institute, during the year of his death in 1931. A fund was created to perpetuate the contest, to be used for distribution of the prizes.

Dr. Stratton's intention in offering a public speaking prize to the students was an attempt to broaden their outlook. Everyone studying these things from the same book tends to produce uniform mechanical minds. The oral delivery of ideas in the various contests is a wonderful chance for originality and free thought. It gives a man poise and control, maneuverability of his tongue, and above all, a self-confidence which may only be acquired by public speaking.

The personal benefit obtained from entrance in the Stratton prize contest is easily worth the time involved, let alone the substantial cash awards for the winners.

ATTENTION, MR. PRESIDENT!

The Daily Washington Merry-Go-Round, a syndicated column in the metropolitan dailies, is about to publish an interesting editorial which originally appeared in the Harvard Crimson. It seems that President Roosevelt is in the process of his own Secretary of the Treasury, Mr. Morganthau is from Harvard, and by this we mean the undergraduates, are always as assimilated as the staff as reporters. Among the best principles of selection, Harvard seems always to have been our own standards seem to be a divergent from all others.

It seems that President Roosevelt is making a mistake in this matter. This country does not now, and for that matter never had a single former to give them a game.

What is it at other colleges that creates spirit and an enthusiasm for the college and all it does? A Harvard student who writes to the inquisition last year, perhaps the answer is naturally enough, sports and activities. But you say, we have been asked to compete with other colleges. It seems that the comparatively few games played, the Harvard Crimson, to see if their team would win their prize. They were delighted. They told us a team which played games with both of other teams, including the Yale paper, the Pennsylvania, and others. We were defeated. Everybody was happy.

"Well, I'm afraid we can't meet on that agreement," he said, "and how about playing touch?

But the enthusiasm in this effort is due to the fact that, perhaps, the reception of this news, and as things have been left hanging, although Harvard will tell you it is all bound to want on Sunday morning.

Although there was great excitement about the result of the Walter Harper, last year, perhaps the question does not exist how much of the social symmetry it can give to the students. As a specific instance of this bit of moral philosophy we have been asked to compete with other colleges. It seems that the comparatively few games played, the Harvard Crimson, to see if their team would win their prize. They were delighted. Promising Season Seen for Boxers

Return of Wetherell, Collins, Carey Brightens Prospects

With all of last year's varsity back, Coach Tommy Rawson is looking forward to a very successful boxing season. He is also optimistic about last year's National Intercollegiate boxing championship, although his team was edged out of the title by the Carnegie Tech team.

Leading the team this year is Capt. Wetherell, '34, but there are many other capable men on his squad. Other members of the team include Collins, '33, and Carey, '34, both of whom have been very successful in previous years.

TRACK PLAN HANDICAP MEET

Institute track men will race in two handicap meets for the track club. These meets will be held on Saturday, June 16, at 2:00 p.m. in the Institute gym, with the first meet being held at 2:00 p.m. and the second meet at 4:30 p.m.

The first meet will feature a 440-yard dash, a 120-yard hurdle, and a 100-yard dash. The second meet will include a 440-yard dash, a 880-yard run, and a 100-yard dash.

The handicap meets will be held to give all track men the opportunity to improve their times and to give them a chance to compete against each other.

For more information, contact Coach Wetherell or Captain Carey.
New Cables Run in Dynamo Lab.

Because of experiments being done in the Dynamo Laboratory, new cables are being run from the main switchboard to feed more outlets with electrical power and to supply sources of power of varying voltages. The old circuits were incapable of carrying the added current. The cables now being installed are run overhead in the laboratory to eliminate the extra cost of conduit.

DINNER DANCE
FEBRUARY 9, 1934

The annual Dorm Dinner Dance will be held February 9, 1934, it was announced today after the first meeting of the Dorm Dance Committee.

The Dormitory Dance Committee is composed of the following members: Publicity, P. W. Vaughan, '34; Roster, R. E. Lucke, Jr., '34; Decorations, M. A. Sayles, '34; Chaperones and Tickets, P. B. Walker, '34; and Head Usher, E. B. Chiswell, Jr., '34.

IT TAKES HEALTHY NERVES TO BREAK Records IN THE AIR!

Men and women who are famous for their brilliant flying agree about smoking and healthy nerves. "I never worry about healthy nerves," they say, "because I smoke Camels." They cannot afford to make a mistake in choosing their cigarette. They have to know. And it is more fun to know, because of the greater smoking pleasure they find in Camels. Camels are milder... better in taste. They leave no "cigaretty" aftertaste. They have to know. And

Steady Smokers turn to Camels
