WILSON COMPTON DISCUSSES N. R. A. AT TECHNOLOGY

Brother of Dr. K. T. Compton Says Code Removes Causes of Depression

"The N.R.A. has brought about regulated individualism," held Dr. K. T. Compton, in a discussion of the National Recovery Act last Thursday. "It is going to be the law of the land for some time and we shall have to accept it," said the former President of the University of California, in an address presented to the approximate New Year's Day.

The National Recovery Act is now in its second year, and has been the subject of intense discussion as a means for the relief of the depression in addition to its provisions for the regulation of industry. The idea which underlies the N.R.A. is based on the principle that voluntary agreement among business groups is the most effective method of regulating industry. The act provides for the establishment of codes of fair competition, which are to be approved by the Federal Trade Commission and under which business enterprises are to operate.

Dr. Compton emphasized the importance of the act in the context of the current economic situation. "The N.R.A. is not a panacea for our problems," he said. "But it is a step in the right direction, and it is important that we accept it as a reality." He also said that the act has brought about a change in the attitudes of business leaders, and that it is important for them to embrace the idea of regulated individualism.

The address was presented to the membership of the University of Technology, and was well received by the audience. The discussion was concluded with a question and answer period, in which members of the audience had the opportunity to express their views on the subject.

INSURANCE OF ALL KINDS

This week we were meeting with more men than in the service of the N. R. A. than we have for the last five years. Our new test of the present market has been well received and the distribution of valuable policies is being made in Searles Field.

Moreover, we are now writing insurance for a Corporation that is the largest in the country. A few weeks ago our new friend, the "Forbes Man," said to us: "I want to be with you for the insurance that you can offer me." He paid the money up front and left, saying: "Now, you ask the question, "Forbes Man, why are you with us?""

"Yes," you say. "How much longer do you plan to stay with us?"

"I don't know," he replies. "I plan to stay as long as I can."

The "Forbes Man" is an important addition to the list of clients that we have, and we are glad to have him as a member of our firm. We are pleased to be able to offer him the insurance that he needs, and we are confident that he will be satisfied with the service that we provide.

This week, we have received a large number of letters from new clients who are interested in the services that we offer. We are glad to be able to help them in any way that we can.

SQUASH TEAM WINS OVER DARTMOUTH

The Technology squash team won its opening Intercollegiate Match last night when Coach Jack Reemers' champions defeated Dartmouth, 4-0. Indies, second men's pair, took the second match by forfeit. Captain Bill Wiegand's veteran pair, easily victorious in the 1100 and 2500 yard races, respectively. The summaries:

IV. C. Society News

The return of Captain Dick Bell to competition marked the second indoor swimming meet of the season, which was conducted by Coach Oscar Telford last Saturday afternoon. Bell, whose pulled tendon kept him from all but the first outdoor meet, was able to win three events and break one school record. Brown has won both the 100 yard dash and the 440 yard free style.

ENGINEERS BEATEN BY BROWN SCORING SPEEE

(Continued from Page 1)

O'Brien then faulted Kemsley while he was shooting and was put out on the next hole where Kemsley had to sink both of his shots. O'Brien was then paired against a Brown player who was paired against a Kemsley and a Brown player. On the next hole, Kemsley had to sink two shots from the floor with the ball and sink another shot from under the basket to attempt to make a 10. Brown then sank another shot from the floor. On the next hole, O'Brien sank the ball and had to sink another shot from the floor, which he did. The final hole of the match was Brown's lead to one point, but the Engineer attack was on the Brown player who was paired against a Kemsley and a Brown player. On the next hole, Brown sank another basket and got the match won. On the next hole, O'Brien sank a shot from the floor, which put Brown in the lead one point. O'Brien then sank a shot from the floor, which put Brown in the lead one point. O'Brien then sank a shot from the floor, which put Brown in the lead one point. O'Brien then sank a shot from the floor, which put Brown in the lead one point. O'Brien then sank a shot from the floor, which put Brown in the lead one point.

Luckies

Reach you fully packed

THE TOBACCO

DOES NOT SPILL OUT

Good tobaccos...real good tobaccos...that’s the reason for Lucky Strike’s fine, smooth quality. We use only the center leaves of the finest Turkish and domestic tobacco plants. Not the top leaves—because those are under-developed. Not the bottom leaves—because those are inferior in quality. We use only the center leaves—because those are the mildest leaves—fully ripe for perfect smoking. Only these choice tobaccos are used to make Luckies—so round, so firm, so fully packed—and no loose ends to spill out. That’s why Luckies are always mild and smooth. That’s why always “Luckies please”. And don’t forget—“It’s toasted”—for throat protection—for finer taste.

Always the Finest Tobacco

and only the Center Leaves
