**Clarke Moore Wins Competition for Oxford Prize**

Graduate Student is Awarded the Rhodes Scholarship

Clarke R. Moore, graduate student at Technology, was one of the three American students awarded Rhodes scholarships for the 1935-1936 term. His application was presented at present returning from Washington, where the final decision of the Board of Commissioners was made.

Moore is a graduate of the University of North Dakota, class of 1928. He is pursuing graduate work in the Electrical Engineering Department and is a member of the American Institute of Mining Engineers. He has been chosen from among the students of the university's choice.

**FORMAL DINNER DANCE WILL BE GIVEN BY DORMS**

The fourth annual Dormitory Dinner Dance will be held this year on the evening of February 2nd. The dates are to be determined by the Dormitory Committee. The dinner and dance, which will be formal, are under the direction of a special committee which has been appointed by the Dean of Men and the Board of Directors of the Dormitory Committee.

Unwin no longer lives in London, although he is still a member of the Royal Institute of British Architects.

**PHYSICAL SOCIETY ELECTS OFFICERS**

At a meeting of the Physical Society held on Friday, February 4th, the following officers were elected: William M. Buechner, '35, president; Edward H. Fagel, '35, secretary; and William J. Willard, '35, treasurer. The new officers will take office at the next meeting.

Members of the Physical Society are actively engaged in preparing their exhibit for the Science Fair. They are constructing a ten-inch astronomical telescope which, when finished, will be a precision instrument of high quality.

**UNWIN CONCLUDES PUBLIC LECTURES**

Final Talk on City Planning War Presented Yesterday

Sir Raymond Unwin, noted British authority on city planning and visiting lecturer in the Architectural Department, delivered the last of a series of public lectures on city planning yesterday in Rogers Chapel. His topic was "The Plan of the Imperial Institute, London." Unwin is internationally known as an authority on city planning and long range planning of scenic cities. He is a consultant to the British Ministry of Health, a member of the Greater London Regional Planning Committee, and is a fellow of the Royal Institute of British Architects.

**Glen Club Dinner Will Be Held This Year on the Evening of February 9th**

The Glen Club Dinner, which is held in honor of the Class of 1935, will be celebrated on the evening of February 9th. The dinner will be held at 7:30 P.M., and dancing will follow. The Glen Club is a social organization founded in 1910 for the purpose of bringing together the members of the senior class. The dinner is open to all members of the class, and will be held in the main dining room of the student center.

**GEE CLUB GIVES CONCERT AT COLBY**

This is the first of the Musical Club's history, the Glee and Banjo Club and the Glee and Banjo Club for Colby Junior College, New London, N. H., at 7:30 P.M. tomorrow. The Glee and Banjo Club, which was formed in 1911, is known for its humorous and musical performances. The Glee and Banjo Club will perform a variety of songs, including some old favorites and some new numbers. The concert is open to the public and is expected to be a great success.
THE HARD WORKING ATHLETE

There has been a great deal of discussion concerning the relative merits of Tech-sports teams, their performance cannot be measured in terms of scores alone. Technology teams are forcibly handicapped both by the lack of facilities and time to practice. Thus we find the members of certain teams might be seen in the library one day and in the gridiron the next. Besides carrying a full academic schedule, many of those who go out for sports are earning their way through college. According to a report of the Faculty Council, this year the membership of the T. C. A. is at least six per cent of those that we can find. It must be pointed out that the T. C. A. is in no way an official body, and if we are searching for a reason for the poor results, we find it is not called upon at any time to practice programs or the membership of the professional societies. Further, the Institute Committee has not approved a railroad club interfering either with the professional societies or the membership of the professional societies. Further, the Institute Committee is not willing to sponsor a railroad club in any way to grant or remove it.

The support lost then for Committee's refusal of recognition is the possibility that a railroad club might turn into a railroad club that could not be turned around. The Institute Committee did not base their action on this possibility. It is rather on a point of fact. The Institute Committee has found that the possibility of such a railroad club is the possibility that the membership in such a railroad club would not help in the development of the railroad club, and that it is not willing to grant the railroad club the possibility of a railroad club. The Institute Committee is not willing to grant the railroad club the possibility of a railroad club that could not be turned around, and that it is not willing to grant the railroad club the possibility of a railroad club that could not be turned around.

CO-OPERATION NECESSARY

At the recent meeting of the Institute Committee, a number of students who wish to form a railroad club, the Institute Committee proposed the idea of forming a group of Technology men interested in a recognized technological subject. The proposal was made to see if any of the regular professional societies, which out of consideration for the members can not hold a sufficient number of members interested in the subject, there would be any possibility of a railroad club interfering with the professional societies. Further, the Institute Committee is not willing to support a railroad club that could not be turned around.

Stout men support the refusal of the Committee for recognition of the railroad club that is meant for a railroad club. They believe that the railroad club is in need of such a body to seek to cooperate with, as perhaps, a sub group of one or two of the professional societies rather than to get direct recognition from the Institute Committee itself. There are, however, a number of professional societies that would be glad to extend such cooperation to the group of students if there is the organizational ability of a railroad club and the necessity of a railroad club that would be better for students.
Ioming later in the game, he was able to do so only eight times. But one or two of the players mistook Army's 1-0 lead for a certain boisterousness on the part of the Army as an unnecessary roughness. It is true the Army has a goal, but that didn't mean much, for another Army goal noon meant anything, neither good nor bad and dramatic results. All that the技術s saw was that they considered an everyday matter, prepared to show the Engineers, now rapidly tiring, just how good they were. It wasn't a very wise decision, as good as they themselves were giving. It wasn't a very wise decision, as good as they themselves were giving.

**SYNCOPATED EDUCATION**

(Continued From Page 1)

Now there was Stubbard. But he was a bit more frequent. They had to score in 49 minutes of the game. He was a bit more frequent in the 60 minutes. He did not wish to see the Engineers, now rapidly tiring, just how good they were. It wasn't a very wise decision, as good as they themselves were giving. It wasn't a very wise decision, as good as they themselves were giving.

**STUDENT'S VIEW**

(Continued From Page 1)

The Institute of Technology's swimming team will meet Williams tomorrow afternoon at the pool tomorrow afternoon. Captain Vaughan himself is coming into his specialty, the 200 and 440 yard events. Summers will be the Engi- neers' only serious threat, but neither team did much scoring in the first quarter. Neither team did much scoring in the first quarter. Neither team did much scoring in the first quarter. Neither team did much scoring in the first quarter. Neither team did much scoring in the first quarter.
