Hazen Appointed Exchange Prof.

In the fall of 1925, Professor Hazen graduated from Harvard University with the degree of Master of Science in Electrical Engineering. In 1928, he received his Ph.D. degree in Electrical Engineering. In 1930, he was appointed as assistant professor in the department of electrical engineering. In 1932, he was promoted to associate professor, and in 1934, he was promoted to full professor. He has been at MIT since 1934.

In the Spring of 1934, Professor Hazen was appointed to the position of exchange professor at Harvard University. He will be in residence at Harvard University from April 1, 1934, to July 1, 1934.

In the fall of 1934, Professor Hazen will return to MIT to resume his teaching duties.

WILDCATS WIN OVER ENGINEER STICKME

Freshman Boats Lose; Second Place

The Freshman boats lost to Tech yesterday afternoon in the annual varsity contest between the Freshman and Sophomore teams. The Tech boats won by a score of 16 to 14.

The Freshman boats were led by a fine performance by the coxswain, who rowed the boat to victory. The Tech boats were led by a fine performance by the coxswain, who rowed the boat to victory.

The Tech boats were led by a fine performance by the coxswain, who rowed the boat to victory. The Tech boats were led by a fine performance by the coxswain, who rowed the boat to victory.

In the opinion of the writer, the inclusion of these articles is not only beneficial to the students of the Institute, but also to those who are interested in the various fields of study. These articles are written by experts in their respective fields, and they provide valuable insights into the current trends and developments in these fields.

In closing, I would like to express my gratitude to the staff of the Institute for their hard work and dedication in preparing these articles. I hope that the students will find these articles informative and useful in their studies.

I also encourage the students to provide feedback on these articles, as their opinions and suggestions will be taken into account in future issues. Thank you for your support and cooperation.

Sincerely yours,

Oscar Hedlund's crack track team scored an overwhelming victory over Princeton, 54 to 31, by taking most of the first places in all events. Baseball fans were glad to see the M. I. T. Independents, play their first game against the Tufts Junior Varsity, although they lost 10 to 3. In the Intraclass loop, the Seniors took the junior class a notch when they beat them in all but the last five events of the year, 22 to 11, but the Juniors did not relinquish their power and positioned themselves for first place, the freshmen failed to show respect for the graduating class last night when they defeated the Seniors, 19 to 10.

The Lacrosse team finished an excellent season on Saturday by dropping its sixth game of the season, against one victory, in the New England Intercollegiate Tournament at Waltham. In the opening game Tufts defeated Providence College, 5-4, and in the final game scored two top-heavy victories last week over R. U. and President's College, 6-1 and 6-0, respectively, the golf team lost to the strong Amherst team, 6-1 yesterday.

PLAYING in the New England Intercollegiate Tennis Tournament at Longwood, Gilbert Hunt seeded number two, won the only match he played yesterday in straight sets over a player from Princeton. The team, however, lost to Williams seeded number one, again in straight sets.

BALLTOSSERS lose
ON TUFFS DIAMOND

Made up of men who have been playing in the intra-mural league at Technology, the M. I. T. Independent basketball team was defeated by the Tufts Junior Varsity at Medford Saturday by the score of 20 to 19. The Independent's own fast, and first place, for the freshmen failed to show respect for the graduating class last night when they defeated the Seniors, 19 to 10.

**NEW DEVICE TUNES IN RADIO AUTOMATICALLY**

(Continued from Page 1)

received set, is a tuning knob which operates the device. Before setting the apparatus, the program for the evening must be chosen. Then, it is expected that the commercial apparatus will require only one-third of the present day, but incom-

Associate from the Senior Class will be:

New device tunes in radio automatically

(Continued from Page 1)

The second new feature is a novel type of relay switch to turn on the motor. The switch consists of an electro-magnet, suitably mounted in conjunction with a glass or other insulating cell, having in the cell some mercury and an iron armature floated in the electrolyte. The passage of current through the magnet causes the iron armature to be attracted to the end of the glass to close a switch.

The model takes up approximately a cube of six inches on a side, while it is expected that the commercial apparatus will require only one-third of this space. The inventors of the machine believe that the retail price of the device will be as low as ten or fifteen dollars.

As far as the builders know, they have been able to find out to date, this is the only device that is able to tune in on any station that a radio set is capable of tuning in. It was a feeling that a greater automatic selection of programs was necessary, that prompted the designing of this apparatus. The inventors wish to acknowledge their appreciation to Professor Har- son and Professor Pease of the Physics Department for their permission to use the staff of the Physics Department in that department. Special acknowledgment is given to Mr. Edmond T. Piotrowski who helped to build the apparatus.

That 20 per cent of the crimes com-
mittcd by day are by boys under 16. (Ooh-I better hurry up!)
